2. *Indian arts and crafts funds.*—Fees charged for use of Government trademarks attesting to genuineness and quality of Indian products are used to stimulate sales of Indian arts and crafts (25 U. S. C. 305a, c).

3. *Operation and maintenance, Indian irrigation systems.*—Revenues derived from charges for operation and maintenance of Indian irrigation projects are used to defray in part the cost of operating and maintaining these projects (60 Stat. 895).

4. *Power systems, Indian irrigation projects.*—Revenues collected from the sale of electric power by the Colorado River, Flathead, and San Carlos power systems are used to operate and maintain these systems (60 Stat. 895).

5. *Purchase of land, Rocky Boy's Reservation, Montana.*—Proceeds from the sale of land, known as Great Falls Subsistence Homestead, are available for the purchase of land for the Rocky Boy's Reservation, Montana (64 Stat. 463).

6. *Colorado River Indian Reservation fund, northern reserve.*—All receipts from leasing of unassigned lands,

Colorado River Indian Reservation, Arizona, northern reserve, may be expended for the benefit of the Colorado River tribes and their members (69 Stat. 725).

7. *Colorado River Indian Reservation fund, southern reserve.*—All receipts from leasing of unassigned lands, Colorado River Indian Reservation, Arizona, southern reserve, may be expended for the benefit of the Colorado River tribes and their members (69 Stat. 725).

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:

This fund is used to assist Indians in acquiring live-stock, farm, and other equipment and in establishing tribal enterprises (25 U. S. C. 470, 471, 631). This fund and miscellaneous tribal funds provide the only source of loans for the great majority of Indians who cannot borrow from ordinary commercial credit sources because of their low economic status and lack of bankable security.

Budget program.—As of June 30, 1957, the principal of the fund amounted to \$16.3 million, consisting of \$13.8 million appropriated, and \$2.5 million cattle settlements. Cattle settlements are payments made by the Indians for breeding stock furnished by the Government generally prior to establishment of this fund.

Operating results.—The deficit is expected to continue to increase because revenues are not sufficient to cover expenses.

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and from three special funds. The special funds are (a) the reclamation fund, largely derived from certain irrigation and power revenues; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenues; (b) the Colorado River dam fund, derived from the revenues of the Boulder Canyon project; and (c) the Colorado River development fund, derived from transfers of money from the Colorado River dam fund. The estimates of appropriation for the budget year are summarized by source, as follows:

Annual appropriation title	Estimate of appropriation	General fund	Reclamation fund	Colorado River dam fund	Colorado River development fund
General investigations.....	\$4,752,000	\$225,000	\$4,027,000	-----	\$500,000
Construction and rehabilitation.....	123,237,000	38,237,000	85,000,000	-----	-----
Operation and maintenance.....	27,500,000	3,119,900	22,365,100	\$2,015,000	-----
General administrative expenses.....	4,164,000	-----	4,164,000	-----	-----
Loan program.....	200,000	200,000	-----	-----	-----
Upper Colorado River Basin fund.....	38,425,000	38,425,000	-----	-----	-----
Total.....	198,278,000	80,206,900	115,556,100	2,015,000	500,000

The total request of \$198,278,000 represents an increase of \$18,303,777 compared with the appropriations of the current year and an increase of \$4,413,500 compared with the preceding fiscal year.

Current authorizations:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans; formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to initial allocation of appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects; to remain available until expended, **[\$5,932,000]** \$4,752,000, of which **[\$5,182,000]** \$4,027,000 shall be derived from the reclamation fund and \$500,000 shall be derived from the Colorado River development fund: *Provided*, That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest. (*Public Works Appropriation Act, 1958.*)

Appropriated 1958, \$5,932,000

Estimate 1959, \$4,752,000

	210,000	250,000	225,000

Surveys and investigations are made to determine the feasibility of potential reclamation projects; detailed plans are developed for authorized projects prior to appropriation of construction funds; and investigations are made for rehabilitation of existing Federal reclamation projects. Total investigations scheduled, excluding a number of investigations for which stream gaging only is in progress, are as follows:

Status	1957 actual	1958 estimate	1959 estimate
Prior year studies continuing.....	62	61	49
Prior year studies completed.....	20	21	25
Initiated or resumed and completed during the year.....	8	6	2
Initiated or resumed but not completed.....	20	13	24

The appropriation request for this activity is \$4,752,000 for the Bureau's normal planning program (a decrease of \$1,180,000 from the appropriation for the current year).

1. *Engineering and economic investigations.*—These are made to plan the development of river basins; to make feasibility investigations of potential projects prior to authorization; and to make general engineering and research studies of reclamation problems either independently or in cooperation with local, State, or other Federal agencies.

2. *Advance planning.*—Detailed field data are collected, definite plans are prepared, and repayment plans completed for authorized projects, prior to obtaining appropriations for construction.

3. *Investigations of existing projects.*—These are made to determine the need and make plans for rehabilitation, financial adjustments, or water conservation on existing Federal reclamation projects.

4. *Alaskan investigations.*—These engineering and economic investigations relate to projects for the development and utilization of the water resources of Alaska (48 U. S. C. 487-487b).

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

CONSTRUCTION AND REHABILITATION

For construction and rehabilitation of authorized reclamation projects or parts thereof (including power transmission facilities) and for other related activities, as authorized by law, to remain available until expended, **[\$116,736,223] \$123,237,000**, of which **[\$55,000,000] \$55,000,000** shall be derived from the reclamation fund: *Provided*, That no part of this appropriation shall be available for other than the completion of field engineering, survey work, and preliminary designs of the Southwest Contra Costa County Water District System and no repayment contract shall be executed or construction begun until plans have been submitted to and approved by the Congress through its legislative and appropriation procedures, after submission of a report to the Congress by the Secretary of the Interior (1) on the cost and feasibility of said project, including the necessary distribution system and (2) on the rates required to be charged to the ultimate consumers: *Provided further*, That any portion of this or prior appropriations available for the construction of extensions to the distribution system of the Southern San Joaquin Municipal Utility District may be expended

BUREAU OF RECLAMATION—Continued

Current authorizations—Continued

CONSTRUCTION AND REHABILITATION—Continued

without regard to the land certification requirement under this heading in the Interior Department Appropriation Act, 1953 (60 Stat. 445), after the execution and approval of a contract which obligates the entire district to repay the cost of such facilities: [Provided further, That not to exceed \$69,000 shall be available toward emergency rehabilitation of the works of the Arnold Irrigation District as under the Act of October 7, 1949 (63 Stat. 724), as amended, to be repaid in full under conditions satisfactory to the Secretary of the Interior:] Provided further, That no part of this

appropriation shall be used to initiate the construction of transmission facilities within those areas covered by power wheeling service contracts which include provision for service to Federal establishments and preferred customers, except those transmission facilities for which construction funds have been heretofore appropriated, those facilities which are necessary to carry out the terms of such contracts or those facilities for which the Secretary of the Interior finds the wheeling agency is unable or unwilling to provide for the integration of Federal projects or for service to a Federal establishment or preferred customer. (Public Works Appropriation Act, 1958.)

Appropriated 1958, \$116,736,223 Estimated 1959, a \$123,237,000

a Excludes \$200,000 for activities transferred in the estimates to "Loan program." The amount obligated in 1957 is shown in the schedule as a comparative transfer.

						80,892,500	61,736,223	38,237,000	38,237,000

¹ Represents total cost to June 30, 1959.

The program consists of preparation of designs and specifications for all projects subsequent to initial allocation for construction, award and servicing of construction contracts, construction of authorized projects, operation and maintenance during construction of completed fea-

tures of projects, and rehabilitation of existing facilities. Investigations and advance planning for units of the Missouri River Basin project are also included.

The appropriation request of \$123.2 million represents an increase of \$6.5 million over 1958. This increase is

principally to provide for earnings under construction contracts awarded in prior years which continue into 1959. Contracts for construction of the major features of the Trinity Division, Central Valley project, are a major contributor to the increase.

The table "Construction and rehabilitation program" shows work continuing on 46 projects or units, with 4 of these scheduled for completion during the year. No new starts are recommended for 1959. Bureau operations during the year will provide facilities for 152,895 new and supplemental acres of irrigated land and 20,500 kilowatts of new power generating capacity.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects).....	\$2, 113, 163	\$1, 683, 303	\$1, 335, 230	\$1, 087, 074
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	26, 821, 851	30, 664, 536	18, 911, 288	18, 385, 000
Service facilities (acquisition value of facilities less depreciation charged to project cost).....	7, 109, 552	10, 207, 885	9, 080, 003	8, 129, 665
Deferred charges (investigations of abandoned or unprogrammed works, operation and maintenance during construction, and investments).....	2, 355, 660	498, 881	645, 587	705, 587

Reclamation fund, special fund	27,267,000	28,000,000	27,500,000
Colorado River dam fund	22,055,700	22,740,000	22,365,100
Boulder Canyon project	2,115,000	2,044,600	2,015,000
General fund	3,096,390	3,215,400	3,119,900

¹ Includes unobligated balance of prior year advances: 1957, \$1,140,765; 1958, \$1,358,023; 1959, \$1,166,860.

Provision is made for operation and maintenance of (a) the power-generating and transmission facilities of completed projects (except the Fort Peck transmission system financed under a revolving fund), and the irrigation and water-supply facilities on certain projects; (b) the Colorado River front work and levee system; and (c) Boulder City, Nev. Provision is also made for soil and moisture conservation operations and halogeton control on public lands under jurisdiction of the Bureau.

The Bureau operates and maintains the power-generation and transmission facilities, and generally the storage dams and reservoirs, of completed projects. Where necessary, the irrigation works are also operated and maintained until the water users are able to undertake the responsibilities. In 1959 a total of 35 projects and 22 Missouri River Basin units and divisions will be operated and maintained for irrigation, power, and municipal and industrial water supplies. Of these, 19 projects and 5 Missouri River Basin units have power facilities. Energy sales and revenues from power operations are as follows:

	Kilowatt-hours of energy (millions)	Gross revenues
Fiscal year:		
1957	25,394	\$59,032,711
1958	28,974	71,575,948
1959	30,967	75,697,640

Commercial power is sold to wholesale customers such as municipalities, Rural Electrification Administration-financed cooperatives, private utilities, and other Government agencies.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

GENERAL ADMINISTRATIVE EXPENSES

For necessary expenses of general administration and related functions in the offices of the Commissioner of Reclamation and in the regional offices of the Bureau of Reclamation, \$4,164,000, to be derived from the reclamation fund and to be nonreimbursable pursuant to the Act of April 19, 1945 (43 U. S. C. 377): *Provided*, That no part of any other appropriation in this Act shall be available for activities or functions budgeted for the current fiscal year as general administrative expenses. (*Public Works Appropriation Act, 1958.*)

Appropriated 1958, \$4,164,000 Estimated 1959, \$4,164,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate

This provides for general administrative functions of the Bureau, consisting of determination of policy and direction of the Bureau's programs, and general supervision and review of operations.

1. *Departmental and Denver offices.*—These offices generally direct, coordinate, and review the entire reclamation program.

2. *Regional offices.*—The seven regional offices administer and supervise activities on a region-wide basis as distinguished from project supervision.

Other administrative costs directly chargeable to specific projects or activities are included under appropriations for those programs.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U. S. C. 421a-421d), and August 6, 1956 (43 U. S. C. 422a-422k), as amended (71 Stat. 48), including expenses necessary for carrying out the program, \$200,000, to remain available until expended: *Provided*, That the unexpended balance on June 30, 1958, of sums heretofore appropriated for the foregoing purposes under the head "Construction and rehabilitation" shall be merged with this appropriation.

Estimate 1959, \$200,000

* Estimate is for activities previously carried under "Construction and rehabilitation." The amount obligated in 1957 is shown in the schedule as a comparative transfer.

Appropriation (new obligational authority).....			200,000

This appropriation from the general fund provides for loans to non-Federal organizations for construction and rehabilitation of distribution systems and small projects as authorized by law. Repayments of these loans will be deposited in the reclamation fund.

1. *Distribution systems.*—Loans are made to irrigation districts for construction of distribution systems on authorized Federal reclamation projects.

2. *Administration.*—Funds are provided for necessary expenses to carry out the loan program.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1957, \$12,302,000 and 1958, \$7,502,000.

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund, the Colorado River dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U. S. C. 391), the Act of December 21, 1928 (43 U. S. C. 617a), and the Act of July 19, 1940 (43 U. S. C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (*Public Works Appropriation Act, 1958.*)

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for purchase of not to exceed one hundred [twenty-seven] and ten passenger motor vehicles, of which one hundred and nine are for replacement only; purchase of one aircraft [for replacement only]; payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts without reimbursement or return under the reclamation laws; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U. S. C. 461-467): *Provided*, That no part of any appropriation made herein shall be

available pursuant to the Act of April 19, 1945 (43 U. S. C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations".

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and Rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General Investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefit of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual, when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Not to exceed \$225,000 may be expended from the appropriation "Construction and Rehabilitation" for work by force account on any one project or Missouri Basin unit and then only when such work is unsuitable for contract or no acceptable bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and Rehabilitation" contained in this Act shall be available for construction work by force account. (*Public Works Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations, as follows:
 "Construction, general," rivers and harbors and flood control, Department of the Army.
 "Construction," Bureau of Indian Affairs.
 "Public lands highways (liquidation of contract authorization)," Bureau of Public Roads.
 "International educational exchange activities," Department of State.
 "United States dollars advanced from foreign governments, United States educational exchange program," Department of State.

Permanent authorizations:

RECLAMATION FUND, SPECIAL FUND

Amounts Available for Appropriation

	1957 actual	1958 estimate	1959 estimate

Collections, Bureau of Reclamation	14,558,663	15,387,100	16,360,900
Collections, other agencies	39,605,626	46,198,300	45,215,800
Power revenues	46,552,469	45,529,500	48,889,000
Unobligated balance returned to unappropriated receipts	5,038,417		
Total available for appropriation	192,989,090	205,919,961	229,166,661
Deduct appropriation for Bureau of Reclamation—			
"General investigations"	4,970,000	5,182,000	4,027,000
"Construction and rehabilitation"	63,083,000	55,000,000	85,000,000
"Operation and maintenance"	22,055,700	22,740,000	22,365,100
"General administrative expenses"	3,942,000	4,164,000	4,164,000
"Payments to farmers' irrigation district (North Platte project, Nebraska-Wyoming)"	8,329	8,000	8,000
"Refunds and returns"	125,000	125,000	125,000
Total appropriation	94,184,029	87,219,000	115,689,100
Unappropriated balance carried forward	98,805,061	118,700,961	113,477,561

This fund is derived from repayments and other revenues from irrigation and power facilities, together with certain receipts from sales, leases, and rentals of Federal lands in the 17 Western States, and is available for expenditure pursuant to authorization contained in appropriation acts (43 U. S. C. 391).

COLORADO RIVER DAM FUND, ALL-AMERICAN CANAL

Amounts Available for Appropriation

	1957 actual	1958 estimate	1959 estimate
Unappropriated balance brought forward.	\$79,375	\$164,558	\$183,258
Receipts	285,183	268,700	303,300
Covered into miscellaneous receipts	—200,000	—250,000	—250,000
Unappropriated balance carried forward	164,558	183,258	236,558

Revenues from water rental, as well as other minor operations of the All-American Canal, are available for appropriation for payment of expenses of operation and maintenance of the project, and for repayment of amounts advanced by the Treasury for construction or other purposes (43 U. S. C. 617a).

COLORADO RIVER DAM FUND, BOULDER CANYON PROJECT

Amounts Available for Appropriation

	1957 actual	1958 estimate	1959 estimate
Unappropriated balance brought forward.	\$2,180,846	\$1,975,225	\$1,655,625
Unobligated balance returned to unappropriated receipts	181,651		
Receipts	5,553,564	5,525,000	5,525,000
Total available for appropriation	7,916,061	7,500,225	7,180,625
Deduct appropriation for—			
"Operation and maintenance"	2,115,000	2,044,600	2,015,000
Miscellaneous permanent appropriations:			
"Colorado River dam fund, Boulder Canyon project, payments to States of Arizona and Nevada"	600,000	600,000	600,000
"Colorado River dam fund, Boulder Canyon project, payment of interest on advances from the Treasury"	3,225,836	3,200,000	3,200,000
Unappropriated balance carried forward	1,975,225	1,655,625	1,365,625

Revenues from Boulder Canyon project operations are placed in this fund. The fund is available automatically for repayment of advances from Treasury for construction or other purposes, for interest on the amounts advanced and for annual payments of \$300,000 each to Arizona and Nevada. It is available for annual appropriations for payment of expenses of operation and maintenance of the project (43 U. S. C. 617a).

COLORADO RIVER DEVELOPMENT FUND

Amounts Available for Appropriation

	1957 actual	1958 estimate	1959 estimate
Unappropriated balance brought forward	\$10,547	\$11,286	\$11,786
Receipts	500,739	500,500	500,500
Total available for appropriation	511,286	511,786	512,286
Deduct appropriation for "General investigations"	500,000	500,000	500,000
Unappropriated balance carried forward	11,286	11,786	12,286

This fund is derived from revenues of the Boulder Canyon project, and is available for appropriation for "General investigations," Bureau of Reclamation (43 U. S. C. 618a).

Appropriation.....	4,025,720	3,937,500	3,937,000

1. *Colorado River dam fund, Boulder Canyon project, payment of interest on advances from the Treasury.*—Interest is paid to the Treasury on moneys advanced for construction (43 U. S. C., ch. 12A).

2. *Colorado River dam fund, Boulder Canyon project, payments to States of Arizona and Nevada.*—Annual payments of \$300,000 each in lieu of taxes are made to Arizona and Nevada, from operation of the Boulder Canyon project (43 U. S. C., ch. 12A).

3. *Operation, maintenance, and replacement of project works, North Platte project.*—This fund is derived from operation of project powerplants, leasing of project grazing and farmlands, sale or use of townsites, and sale or rental of surplus water (66 Stat. 755, sec. 4).

4. *Payments to Farmers' irrigation district (North Platte project, Nebraska-Wyoming).*—Payments are made to the Farmers' irrigation district on behalf of the Northport irrigation district for water carriage (62 Stat. 273, as amended).

5. *Refunds and returns.*—Overcollections are refunded and amounts of unapplied deposits are returned (64 Stat. 689).

Financing applied to program	766,940	1,479,580	2,740,000

This fund defrays the operating expenses of the generation and transmission of power from Fort Peck project, Corps of Engineers, and emergency expenses to insure continuous operation (16 U. S. C. 833).

Budget program.—Operating costs will continue at the level of the current year. The increase in capital outlay is related to continued construction of the Fort Peck-Dawson County 230-kilovolt transmission line.

Financing.—The operation of the Fort Peck project power and transmission facilities are financed by this fund and capital outlays for transmission by the appropriation "Construction and rehabilitation." Bureau of Reclamation. Capital outlays for the dam, reservoir, and powerplant are financed by Corps of Engineers appropriations. The accompanying statements consolidate the financing from the "Continuing fund for emergency expenses, Fort Peck project, Montana" and "Construction and rehabilitation," Bureau of Reclamation.

Operating results.—Net income is estimated at \$1 million for 1959, an increase over prior years, resulting from increased power revenues. Receipts in excess of current operating needs are retained so as to maintain a continuing emergency fund of \$0.5 million. The balance is paid into the Treasury as miscellaneous receipts toward amortizing with interest the costs of the dam and reservoir allocated to power and the costs of the powerplant and transmission. Such payments totaled \$0.9 million in 1957 and are estimated at \$1.3 million in 1958 and \$1.3 million in 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:

Financing applied to program.....	12,576,218	26,360,804	39,925,000

¹ Includes contributions from city, State, and Federal governmental units as follows: 1957 actual, \$553,580; 1958 estimate, \$1,741,442.

The fund defrays the cost of construction, operation, and maintenance of the Colorado River storage project and participating projects, a comprehensive basinwide development which will make possible the control and utilization of the water resources of the Upper Colorado River Basin. The storage project will regulate and conserve the flows of the Colorado River and its major tributaries through holdover storage in large reservoirs, thus making possible increased consumptive use in the upper basin, and will also produce hydroelectric power. Excess revenues from the sale of power will be applied to repayment of costs allocated to irrigation which are beyond the ability of the water users to repay. The participating

projects consist of irrigation and municipal and industrial water supply developments.

Construction costs of the storage project and participating projects are, by law, financed through appropriations advanced to the fund. Project revenues will be credited to the fund and will cover costs of operation and maintenance. Revenues in excess of these costs will be utilized to repay to the United States project costs allocated to power, municipal and industrial water supply and irrigation.

Budget program—Flaming Gorge unit.—Construction of the unit will be continued and is estimated to be 15% complete at the end of 1959.

Glen Canyon unit.—The Colorado River bridge and the diversion tunnels will be substantially completed. Excavation for the spillway tunnels, dam, powerplant, and switchyard control tunnel will be initiated.

Navajo unit.—No work is scheduled to be underway and unobligated balances will be transferred to the Flaming Gorge unit.

Transmission division.—Investigations on the Glen Canyon-Flaming Gorge transmission line, and studies of other lines will be continued.

Advance planning.—Detailed studies of 1 storage unit and 11 participating projects will be continued.

Proposed 1958 supplemental.—An amount of \$10 million for the Glen Canyon unit is proposed for later transmission and appears below.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:			
Service facilities.....	\$1,205,420	\$10,750,201	\$15,555,744
Supplies, deferred charges, etc.....	48,346	177,003	271,447
Unpaid undelivered orders.....	3,228,385	110,323	2,597,323
Total selected resources at end of year.....	4,482,151	11,037,527	18,424,514
Selected resources at start of year (—).....	—	—4,482,151	—11,037,527
Increase or decrease (—) in selected resources.....	4,482,151	6,555,376	7,386,987
Property or services transferred in (—) without charge.....	—190,303	—	—
Obligations incurred for costs of other years, net.....	4,291,848	6,555,376	7,386,987

Financing.—The cost of the authorized storage units and participating projects is estimated to be \$985 million of which \$38.1 million has been appropriated. The 1959 appropriation request of \$38.4 million and a proposed supplemental request for 1958 of \$10 million will leave a balance to complete the authorized work of \$898.5 million.

Operating results.—During the construction period, no income is realized and expense is capitalized, so the fund will show neither income nor expense for 1959.

Net effect of budget expenditures will rise to \$37 million in 1959 from \$25 million in 1958.

The total investment of the Government in the fund is expected to reach \$82 million by the end of 1959.

UPPER COLORADO RIVER BASIN FUND

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Acquisition of assets: Colorado River storage project: Glen Canyon unit, Arizona (total costs—obligations).....		\$10,000,000	
Financing:			
Proposed supplemental appropriation.....		10,000,000	

Under existing legislation, 1958.—An amount of \$10 million is anticipated as an estimated 1958 supplemental appropriation for additional contract earnings and other expenditures on Glen Canyon unit.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. Appropriations in this title available for travel expenses shall be available for expenses of attendance of officers and employees at meetings or conventions of members of societies or associations concerned with the work of the bureau or office for which the appropriation concerned is made.

SEC. 202. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available

BUREAU OF RECLAMATION—Continued

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR—Continued

under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 203. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 204. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided*, That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 205. After August 31, 1957, the position of Administrator of the Southeastern Power Administration shall be in grade GS-18 of the Classification Act of 1949, as amended, but without regard to the numerical limitation contained in section 505 of said Act; the salary of the Administrator of the Southwestern Power Administration shall be the same as the salary of the Administrator of the Bonneville Power Administration, so long as held by the present incumbent; and the salary of the Administrative Assistant Secretary of the Department of the Interior shall be the same as the Solicitor of the Department of the Interior.] (*Public Works Appropriation Act, 1958.*)

GEOLOGICAL SURVEY

Current authorizations:

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions; classify lands as to mineral character and water and power resources; give engineering supervision to power permits and Federal Power Commission licenses; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; and publish and disseminate data relative to the foregoing activities; [and for the Geological Survey or the General Services Administration to acquire a site and to prepare plans and specifications for a building or buildings to meet the special needs of the Geological Survey in the metropolitan area of Washington, District of Columbia, without regard to Revised Statutes, page 3709, as amended (41 U. S. C. 5), and section 302 (c) of the Act of June 30, 1949, as amended (41 U. S. C. 252 (c)): \$36,000,000] \$36,750,000, of which [\$5,800,000] \$6,035,000 shall be available only for cooperation with States or municipalities for water resources investigations: *Provided*, That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality: *Provided further*, That not to exceed \$415,000 of the unobligated balance remaining on June 30, 1957, of the appropriation granted under this head in the Department of the Interior and Related Agencies Appropriation Act, 1957, shall remain available during the current fiscal year for construction of special-purpose buildings]. (43 U. S. C. 31; *Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Appropriated 1958, \$36,000,000 Estimate 1959, * \$36,750,000

* Includes \$1,780,000 for activities previously carried under "Operating expenses," Atomic Energy Commission. The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

The Geological Survey provides basic scientific data concerning the water, land, and mineral resources of the Nation, and supervises the development and production of minerals and mineral fuels on leased Federal and Indian lands.

1. *Topographic surveys and mapping.*—Topographic maps portray the elevation, shape, and position of the natural and manmade features of the earth's surface; they provide engineering information for (a) mineral, water, and other natural resource investigations, (b) engineering and industrial development, and (c) military and civil defense. This program will provide maps for those areas where investigation, development, and construction are most imminent, and those areas to which the Department of Defense has assigned a high priority. In 1959 standard maps for an estimated 120,000 square miles

of the United States and its Territories will be compiled, compared with 115,000 in 1958, 121,000 in 1957, and 121,000 in 1956.

2. *Geologic and mineral resource surveys and mapping.*—These investigations (a) provide an accurate appraisal of the Nation's mineral resources, (b) provide data needed to classify the public lands and to explore for mineral raw material, and (c) develop new concepts and techniques needed in the search for hidden deposits of useful minerals. Geologic mapping and research in geologic processes, in geochemistry and in geophysics, are planned under the long-range minerals program. The work includes the collection and evaluation of data on geologic conditions for use in engineering construction and water development projects; and the preparation of large-scale geologic maps of the United States, its Territories, and possessions. Geologic mapping is now progressing at the rate of approximately 40,000 square miles annually.

3. *Water resources investigations.*—This program includes determinations of the flow, stage, and sediment discharge of rivers; reservoir contents; locations and safe yields of underground waters; the chemical quality and temperature of waters; and the availability of water supplies as related to present and future demands. These data are used to plan water-supply projects for military, industrial, and domestic purposes, as well as irrigation, hydroelectric power, navigation, flood control, highway and bridge design, and land-use projects. In 1959 special studies will be emphasized to develop a more thorough understanding of the principles and physical processes of water's occurrence and movement as recommended by the President's Advisory Committee on Water Resources Policy. Owing to the increase in State offerings and interest in cooperative water resources investigations, there will be some expansion in this phase of the program.

4. *Soil and moisture conservation.*—Basic data and advice concerning hydrologic and geologic problems are provided to other bureaus. The program includes surveys of rates of erosion, effects of soil and moisture treatment measures, and studies for improving the design of remedial measures.

5. *Conservation of lands and minerals.*—Prospecting, development, and production of minerals and mineral fuels on leased Federal, Indian, and outer Continental Shelf lands are regulated. Federally owned and controlled lands are classified as to their mineral and water power values. In the current year approximately 160,000 leased properties, oil wells, and mines in 40 States and Alaska are supervised. These leases are expected to produce oil, gas, and other minerals, valued at \$800 million, and render royalty returns of about \$88 million. The States which produce the minerals receive 37½% of the royalties; the Reclamation fund, 52½%, and 10% is retained in the U. S. Treasury. In 1959 it is anticipated that the workload will aggregate 170,000 leases, wells, and mines, and the production and royalty values will reach \$875 million and \$96 million, respectively. The classification functions provide the foundation for the system of public-land administration prescribed by mineral leasing and land disposal laws. Owing to the unprecedented rate of development of the Nation's oil and gas resources, increased demands are being made upon the Survey for mineral classification services.

Reimbursable obligations.—Reimbursements from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigations (43 U. S. C. 48), proceeds from sale to the public of copies of photographs and records

(43 U. S. C. 45), proceeds from sale of personal property (40 U. S. C. 481 (c)), and reimbursements from permittees and licensees of the Federal Power Commission (16 U. S. C. 797). Reimbursements from other Federal agencies (31 U. S. C. 686) are for special purpose mapping and investigations performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

The unobligated balance carried forward each year includes \$400,000 cash advance to pay the expenses of reimbursable work pending collection from cooperating agencies. This advance is not available for obligation.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed one hundred and [twenty-five] twelve passenger motor vehicles of which ninety-two are for replacement only; reimbursement of the General Services Administration for security guard service for protection of confidential files; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gaging stations; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts [including not to exceed \$10,000 for the person appointed by the President to participate as the representative of the United States in the administration of the compact consented to by the Act of May 31, 1949 (63 Stat. 145)]. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:

"Construction," Bureau of Indian Affairs.
 "Resources management," Bureau of Indian Affairs.
 "General investigations," Bureau of Reclamation.
 "Construction and rehabilitation," Bureau of Reclamation.
 "Revolving fund, Defense Production Act," funds appropriated to the President.
 "Watershed protection," Soil Conservation Service, Agriculture.
 "Military construction," Air Force.
 "Research and development," Air Force.
 "Construction of Indian health facilities," Public Health Service, Health, Education, and Welfare.
 "Research and development," Navy.
 "Military construction," Navy.
 "American sections, International Commission."
 "United States dollars, advanced from foreign governments, United States educational exchange program," Department of State.
 "Operating expenses," Atomic Energy Commission.

Permanent authorizations:

PAYMENT FROM PROCEEDS, SALE OF WATER, MINERAL LEASING

Provision is made for conserving, evaluating, and developing mineral resources.

1. *Bituminous coal.*—Scientific research and engineering investigations are carried out on the chemical and physical properties of coal and its mining, preparation, combustion, carbonization, and gasification. Laboratory research is conducted to find feasible methods for converting coal to

fluid fuels for better utilization in the Nation's machines. Coal samples are analyzed; efficiency of coal-mining methods is evaluated; and economic statistical studies are performed. Research is conducted to discover causes of explosions in coal mines and to improve methods of preventing explosions. Tests are conducted on explosives and blasting devices to determine their permissibility for use in mining operations.

2. *Anthracite coal.*—Research is conducted to develop new and improve present uses for anthracite; improved mining and preparation methods are developed; and basic economic data are prepared on the suitability of anthracite for metallurgical application, on the performance of crushers, and on the operation of a coal planer. Inspection is conducted under the Mine Drainage Act.

3. *Petroleum, natural gas, and oil shale.*—Research is conducted in laboratories and in oil and gas fields to conserve these resources by improving the processes of recovery and utilization. Research is coordinated with work done by other Government agencies, educational institutions, and industry. Economic and statistical information is analyzed to provide a factual basis for industry operations and governmental policy. Technologic research is carried on in resources, production, storage, and utilization of helium. Research is conducted on oil shale and shale oil to determine the composition of the various products, to test the applicability of those products to different uses, and to determine the basic chemistry and physics of the refining processes.

4. *Ferrous metals.*—This includes: (a) research on use of low-grade ores, conservation of raw materials, and improved methods for steelmaking; (b) investigation of manganese occurrences and use of low-grade manganese materials; (c) investigation of domestic chromite deposits; (d) studies to lower production costs of off-grade ores; (e) research on use of alloying metals to produce iron and steel products and high-temperature alloys; and (f) the dissemination of data on the production and distribution of these metals.

5. *Nonferrous metals.*—This includes: (a) investigations and development of new sources of copper, lead, and zinc, recovery of tin and mercury from low-grade ore, and new uses for arsenic; (b) research in metallurgy to develop economic and efficient methods for processing complex low-grade and currently submarginal materials; (c) research on resources and utilization of light metals; (d) development of basic information on properties and uses of ores and metals for realization of potential military and civilian uses and to increase recovery and utilization of scrap; (e) development of information on domestic reserves of rare and precious metals and materials; (f) research to improve the quality of rare metals and related products; (g) research to develop economic processes for the recovery of various rare and precious metals; and (h) economic and statistical studies on nonferrous metals.

6. *Nonmetallic minerals.*—The Bureau's program on nonmetallic minerals is primarily designed to develop adequate supplies of various minerals that are in short supply, or of minerals, supplies of which must be imported and are therefore vulnerable in emergencies. These problems of nonmetallic mineral supply are attacked by: (a) field investigations of mineral deposits; (b) laboratory research on the beneficiation of nonmetallic minerals; (c) research on the development of synthetic minerals as substitutes; and (d) research to develop more efficient methods of using our available nonmetallic minerals.

7. *Foreign mineral activities.*—The Bureau analyzes technical and economic data on foreign mineral resources, production, consumption, and international trade for Government use in coping with problems of mineral supply and to assist industry in planning domestic and foreign minerals ventures.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	\$835,636	\$766,818	\$766,818	\$766,818

BUREAU OF MINES—Continued

Current authorizations—Continued

HEALTH AND SAFETY—Continued

1. *Inspections, investigations, and rescue work.*—The objectives for 1959 are (a) to inspect, at least once annually, every active coal mine regularly employing more than 14 men underground, to require compliance with mandatory provisions and make recommendations to gain compliance with the voluntary provisions of law; (b) to inspect annually, or as necessary, underground coal mines regularly employing less than 15 men, and all strip mines, and to report on hazards observed with appropriate recommendations to correct the hazards; and (c) to conduct investigations of accidents and rescue work to reduce working hazards, safeguard the health of workers, and promote efficiency in the mineral industries. The Bureau encourages accident prevention through education and safety organizations, exhibits, demonstrations, instruction in accident prevention, and first-aid and mine-rescue methods. Research is conducted on the support of mine roof and equipment is tested for use in mines and plants where explosive atmospheres may be encountered. The Bureau also conducts field and laboratory studies of ventilation of mines, methods of allaying mineral dusts, prevention of dust accumulations, effective use of rock dust to prevent widespread coal-dust explosions, and blasting practices.

SUMMARY OF COAL-MINE INSPECTION WORK
[Calendar years]

	1955 actual	1956 actual	1957 estimate	1958 estimate
Active mines.....	8,510	9,458	9,000	9,000
Individual mines inspected.....	6,388	7,575	8,000	8,000
Mines inspections.....	9,823	10,754	11,000	11,000

2. *Control of fires in coal deposits.*—Fires in inactive or abandoned deposits on public lands or private property are controlled or extinguished. Expenditures in connection with fires in operating mines are limited to surveys, investigations, and research.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$302,154	\$186,375	\$186,375	\$186,375

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the Bureau of Mines may be expended for purchase of not to exceed [eighty-eight] seventy-eight passenger motor vehicles for replacement only; providing transportation services in isolated areas for employees, student dependents of employees, and other pupils, and such activities may be financed under cooperative arrangements; purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work: *Provided*, That the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided further*, That the sums made available for the current fiscal year to the Departments of the Army, Navy, and Air Force for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines, and said sums, together with all other payments to the Bureau of Mines for helium, shall be credited to the special helium production fund, established pursuant to the Act of March 3, 1925, as amended

BUREAU OF MINES—Continued

Current authorizations—Continued

ADMINISTRATIVE PROVISIONS—Continued

(50 U. S. C. 164 (c)): *Provided further*, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations as follows:

"Aircraft and missile procurement," Air Force.
 "Army industrial fund."
 "Construction and rehabilitation," Bureau of Reclamation.
 "Grants for hospital construction," Public Health Service.
 "Military construction," Army.
 "Military construction," Navy.
 "Operating expenses, Atomic Energy Commission."
 "Procurement of equipment and missiles, Army."
 "Research and development," Air Force.
 "Research and development," Army.
 "Research and development," Navy.
 "Revolving fund, Defense Production Act," funds appropriated to the President.

Public enterprise funds:

Financing applied to program.....	4,549,340	10,383,385	6,908,789

This fund provides for the conservation, development, production, and sale of helium. Production is primarily for the Army, Navy, Air Force, and the Atomic Energy Commission, who reimburse the fund for products received. Sales are also made to non-Federal consumers for medical, scientific, and commercial use (50 U. S. C. 164).

Budget program.—Operating costs are rising in keeping with the increase in production resulting from the recent completion of a new plant and the rehabilitation of existing plants.

The increase in capital outlay provides chiefly for the development of new sources of helium, the improvement of production facilities, and the purchase of tank cars.

Operating results.—Retained earnings are used to meet the financial requirements of the above program which is expanding to meet the growing demand for helium.

Relationship of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

NATIONAL PARK SERVICE

The Service administers national parks and other areas of unusual historic, scenic, scientific, or recreational character in the interest of their preservation as well as their public use and makes studies of the recreation resources of the United States in cooperation with Federal, State, and local agencies.

1959 will be the third year of the 10-year program, Mission 66, to provide personnel and facilities needed to serve the ever increasing number of visitors to park areas, and at the same time, preserve park values. Visitation to parks is expected to increase from 60 million in 1957 to over 80 million in 1966.

Current authorizations:

MANAGEMENT AND PROTECTION

For expenses necessary for the management and protection of the areas and facilities administered by the National Park Service, including protection of lands in process of condemnation; and for plans, investigations, and studies of the recreational resources (exclusive of preparation of detail plans and working drawings) and archaeological values in river basins of the United States (except the Missouri River Basin); **[\$14,150,000] \$14,632,000.** (5 U. S. C.

Appropriation (adjusted).....	11,585,000	14,150,000	14,632,000

1. *Management of park and other areas.*—The 180 areas comprise about 24 million acres located in 39 States, the District of Columbia, Alaska, Hawaii, Puerto Rico, and Virgin Islands. The increase proposed is to provide for (a) leasing of commercial communication facilities; (b) operation of new facilities constructed or under construction; and (c) added visitor services and protection in the parks as a result of the continued increase in visitation. Actual and estimated visitors and revenue receipts are as follows:

	Calendar year visitors	Fiscal year receipts
1956 actual.....	54,923,443	\$5,065,784
1957 actual.....	-----	5,658,040
1957 estimated.....	59,600,000	-----
1958 estimated.....	63,000,000	5,728,000
1959 estimated.....	66,000,000	5,987,000

2. *Forestry and fire control.*—Forests, brushland, or grassland on over 11 million acres are protected from fire, destructive insects, diseases, and other preventable damage. The increase proposed is to provide for leasing of commercial communication facilities.

3. *Soil and moisture conservation.*—The 1959 program will permit corrective measures on a number of the most critical problem areas.

4. *Park and recreation programs.*—Studies are made of the park, parkway, and recreational potentialities of the United States and its Territories, frequently in cooperation with Federal, State, and local agencies. Technical guidance essential to management, protection, and public use are provided in the fields of biology, geology, history, and archeology. Surveys are made of historic American buildings and sites to acquire and preserve data relative thereto. Investigations are made to determine whether agencies receiving surplus Federal real property with a recreational potential are utilizing those properties in conformity with terms of the transfer agreements. The increase proposed is to provide for further studies in connection with proposed or existing areas; acceleration of studies of recreational facilities on a national scale; more adequate control of land use and water resources; and surveys in connection with historic sites.

5. *Concessions management.*—There are approximately 160 major concessionaires operating in parks and other areas. Contracts are negotiated, or permits issued; rates are established; services to be rendered are determined; and records audited.

The objectives are to maintain and operate physical facilities while safeguarding the natural, historic, and scenic values of the parks. Representative items comprising the physical plant are as follows:

1. *Roads and trails.*—The increase proposed is (a) to meet additional costs incident to increased wage rates, prices of supplies, equipment, etc., and (b) for leasing of commercial communication facilities.

Facility:	Unit	Beginning	
		1958	1959
Roads.....	Miles.....	7,080	7,255
Trails.....	do.....	8,298	8,364
Airport runways.....	do.....	48	48

2. *Buildings, utilities, and other facilities.*—Workloads continue to increase as visitation increases and construction of additional facilities is completed. The increase proposed is for maintenance of new facilities at two areas of the National Capital Parks system, and for the same purposes as indicated in 1 (a) and 1 (b) above.

1. *Buildings, utilities, and other facilities.*—The 1959 program is the third year of a 10-year program to provide

essential facilities to meet all visitor requirements by 1966. A summary of the 1959 program by major type of construction follows:

Campgrounds, trailer, and picnic facilities.....	\$2,080,000
Visitor centers, exhibits and audio-visual installations.....	1,782,200
Ranger stations and contact stations.....	80,000
Rehabilitation, historic structures, etc.....	1,355,000
Utility systems.....	2,386,000
Utility buildings.....	433,000
Employee housing.....	1,240,000
Miscellaneous: Fencing, grounds, improvement, signs and markers, etc.....	1,421,800
Administration buildings.....	231,000
Advance planning.....	600,000
Development of Jefferson National Expansion Memorial.....	2,640,000
Total program.....	14,269,000

2. *Acquisition of lands and water rights.*—Approximately 630,000 acres of privately owned lands are located within the areas administered and should be acquired to facilitate public use of these areas. Status of land acquisition present and projected is as follows:

	[Acres]		
	1957	1958	1959
Private lands, beginning of year.....	655,509	629,009	599,009
Acquired during year.....	26,500	30,000	25,000
Private lands, end of year.....	629,009	599,009	574,009

Rights to water must be obtained, frequently by purchase, in many of the areas for use of visitors and employees, and for fire protection.

The obligations for 1957 and 1958 under the lands subactivity includes \$168,918 and \$162,547, respectively, for the Independence National Historical Park acquisition program. The remaining few parcels should be acquired in 1958.

3 and 4. *Parkways, roads and trails.*—The obligations for these programs are against carryover balances of prior appropriations for programs authorized by the Federal Highway Act of 1952. Programs authorized by the Federal Highway Acts of 1954 and 1956 are obligated against the contract authority provided by those acts and are shown under the appropriation "Construction (liquidation of contract authorization)," National Park Service.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed [one hundred and seventeen] *eighty-four* passenger motor vehicles for replacement only, including not to exceed seventeen for replacing United States Park Police cruisers; *purchase of one aircraft*; and the objects and purposes specified in the Acts of August 8, 1953 (16 U. S. C. 1b-1d) and July 1, 1955 (16 U. S. C. 18f): *Provided*, That all receipts for the fiscal year [1958] 1959 from the operation of the McKinley Park Hotel in Mount McKinley National Park, Alaska, may be applied to, or offset against, costs of managing, operating, and maintaining the hotel and related facilities, and any receipts or other revenues in excess of such costs shall be deposited at least annually into the Treasury of the United States as miscellaneous receipts. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

- "Construction, and rehabilitation," Bureau of Reclamation.
- "Construction," Central Intelligence Agency.
- "Operating expenses, National Capital Parks," District of Columbia.
- "Capital outlay, Recreation Department," District of Columbia.
- "Payments to school districts," Office of Education, Department of Health, Education, and Welfare.
- "Surveys, investigations, and research," Geological Survey.

Appropriation.....	234,752	170,380	116,800

1. *Educational expenses, children of employees, Yellowstone National Park.*—Revenues received from park visitors are used to provide educational facilities to dependents of park personnel (16 U. S. C. 40c). Funds in excess of needs are returned to the Treasury as miscellaneous receipts. During 1959 it is estimated there will be 48 elementary and 15 high school students. Cost per student is estimated at \$385 for elementary and \$725 for high school.

2. *Operation, management, maintenance, and demolition of federally acquired properties, Independence National Historical Park.*—Some of the buildings on lands acquired for establishment of the Independence National Historical Park, Philadelphia, Pa., are rented pending their conversion to park purposes or demolition. Some of the cleared sites are being used temporarily as parking lots from which income is also realized. Income from these operations is used for management and maintenance of the rental properties and for demolition of buildings (65 Stat. 644).

3. *Payment for tax losses on land acquired for Grand Teton National Park.*—Park fees are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (64 Stat. 849).

FISH AND WILDLIFE SERVICE

The Service, consisting of two bureaus under the direction of the Commissioner of Fish and Wildlife, conducts research, management, and demonstration programs to conserve and restore the fish and wildlife resources for both recreational and commercial use. These activities are financed in part from annual appropriations and in part from appropriations of revenues which have been permanently earmarked for these purposes. The following table shows the Service's total obligational program by activity and sources of the funds used to finance these activities.

BUREAU OF SPORT FISHERIES AND WILDLIFE

Current authorizations:

MANAGEMENT AND INVESTIGATIONS OF RESOURCES

For expenses necessary for scientific and economic studies, conservation, management, investigation, protection, and utilization of sport fishery and wildlife resources, except whales, seals, and sea lions, and for the performance of other authorized functions related to such resources; operation of the industrial properties within the Crab Orchard National Wildlife Refuge (61 Stat. 770); maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge; purchase or rent of land, and functions related to wildlife management in California (16 U. S. C. 695-695c); and leasing and management of lands for the protection of the Florida Key deer; [\$12,000,000] \$11,508,000; and, in addition, there are appropriated amounts equal to 12½ per centum of the proceeds covered into the Treasury during the next preceding fiscal year from the sale of seal-skins and other products, for management and investigations of the sport fishery and wildlife resources of Alaska, including construction. (5 U. S. C. 133t; 7 U. S. C. 426; 16 U. S. C. 581, 590a-590f, 661-666c, 667-668d, 671-674, 684-686, 690-691d, 701, 703-711, 715-715s, 718-718h, 721-731, 744-751, 755-757, 811, 851-856, 921; 18 U. S. Definite.....		12,000,000	11,508,000
Indefinite.....		446,283	454,625

1. *Management of fishery resources.*—Eighty-eight fish-cultural stations are operated for the propagation of food and game fishes. This activity also covers administration of the Black Bass Act, encompassing shipments of all fishes across State boundaries.

2. *Extension and training.*—This activity covers (a) technical assistance to States and other public or private entities in the management of sport fishing and fish propa-

gation; and (b) cooperative development, with the States, of fish-stocking programs for major public streams and lakes.

3. *Fishery research.*—Research is conducted to improve fish-cultural methods, and the management of fishery resources. Funds for this activity are supplemented by moneys from the permanent account, Federal aid in fish restoration and management. In 1957, these supplementary funds totaled \$24,341. It is estimated they will amount to \$25,100 in 1958 and \$100,000 in 1959.

4. *Administration of wildlife resources.*—This activity covers (a) 270 refuges, consisting of approximately 18,000,000 acres, operated for the conservation of migratory waterfowl and the preservation and propagation of rare birds and mammals. Of these refuges, 3,500,000 acres are primarily for waterfowl. Funds for administration of the wildlife refuge program are supplemented by moneys appropriated under the permanent accounts for management of national wildlife refuges, and migratory bird conservation account. In 1957, these supplementary funds totaled \$2,002,710. It is estimated they will amount to \$2,703,350 in 1958 and \$3,168,000 in 1959. (b) Enforcement of the Migratory Bird Treaty and Lacey Acts for protection of migratory birds and regulation of interstate and foreign shipments of game, funds for which are supplemented by moneys appropriated under the permanent accounts for management of national wildlife refuges, migratory bird conservation account, and Federal aid in wildlife restoration. In 1957, these supplementary funds totaled \$948,454. It is estimated they will amount to \$1,024,000 in 1958 and \$1,064,000 in 1959. (c) Administration of the Alaska game law directed toward protection and rehabilitation of Alaskan sport fish and wildlife resources. Waterfowl management surveys are financed under the permanent accounts for migratory bird conservation account and Federal aid in wildlife restoration. In 1957, these funds totaled \$389,931. It is estimated they will amount to \$462,000 in 1958 and \$462,000 in 1959.

5. *Control of predatory animals and injurious rodents.*—Predatory animals and injurious rodents are controlled on public lands. Technical information and supervision of cooperative programs are provided to protect livestock, game, poultry, forage crops, forests, structures, foods, and feeds from destruction by harmful animals.

6. *Wildlife research.*—Research is carried on in migratory wildlife and in wildlife management and conservation practices. Wildlife research units are also maintained in cooperation with Wildlife Management Institute and land-grant colleges in 15 States and Alaska to give technical training in wildlife management, carry on research, and demonstrate improved management practices. Funds for this activity are supplemented by moneys appropriated under the permanent accounts for Federal aid in wildlife restoration and migratory bird conservation account. In 1957, these supplementary funds totaled \$265,566. It is estimated they will amount to \$390,000 in 1958 and \$423,000 in 1959.

7. *Soil and moisture conservation.*—Nearly 5.5 million acres in 63 refuges within the continental United States are critically eroded or severely depleted. A long-range conservation plan for a majority of these refuges is underway. Work is now being performed on 54 refuges.

8. *River basin studies.*—Studies are made of proposed Federal power, navigation, irrigation, and drainage projects, to insure measures are taken for the conservation and development of fish and wildlife.

FEDERAL AID IN FISH RESTORATION AND MANAGEMENT

(Receipt limitation)

Appropriated (est.) 1958, \$4,717,220 Estimate 1959, \$5,000,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Payments to States.....	\$6,068,694	\$5,000,000	\$5,000,000
2. Administration.....	219,195	250,000	325,000
3. Research.....	24,341	25,100	106,000
Total obligations.....	6,312,230	5,275,100	5,431,000
Financing:			
Unobligated balance brought forward.....	—2,746,611	—1,584,299	—1,036,419
Unobligated balance carried forward.....	1,584,299	1,026,419	595,419
Appropriation (new obligational authority).....	5,149,918	4,717,220	5,000,000

Assistance is given the 48 States, Alaska, Hawaii, Puerto Rico, Guam, and the Virgin Islands by appropriation of funds equal to the revenue of the 10% excise tax on fishing rods, creels, reels, and artificial lures, baits, and flies (64 Stat. 430).

1. *Payments to States.*—These payments cover fish restoration and management projects, as well as research into fish culture; formulation of restocking plans; and acquisition, and improvement of areas adaptable as hatchery, feeding, resting, or breeding places.

2. *Administration.*—State plans are examined, inspections of projects and audits of State expenditures are made.

3. *Research.*—Funds apportioned but not expended by the States within 2 years are used to supplement moneys appropriated to Bureau of Sport Fisheries and Wildlife under the appropriation for management and investigations of resources, for research on fish of material value for sport and recreation.

Receipts from the sale of Federal hunting stamps are set aside in the migratory bird conservation fund (16 U. S. C. 718-718I).

1. *Enforcement of Migratory Waterfowl Hunting Stamp and Migratory Bird Treaty Acts.*—Fifteen percent of the fund is used for enforcing these acts and to pay the Post Office Department for supplying and accounting for the stamps. Funds used for enforcement supplement moneys appropriated to Bureau of Sport Fisheries and Wildlife for the same purpose under the appropriation for management and investigations of resources.

2. *Acquisition, development, and maintenance of migratory bird refuges.*—Eighty-five percent of the fund is used for acquisition, construction, and management of migratory waterfowl refuges and investigations of migratory birds. These funds supplement moneys appropriated to the Bureau of Sport Fisheries and Wildlife for these purposes.

Indefinite.....		446,288	454,625

1. *Management.*—This activity covers enforcement of international agreements pertaining to fish and whales.

2. *Marketing and technology.*—This includes (a) disseminating economic data on the fishing industry, including business trends and foreign trade; (b) exploring for fish and improving fishing gear and methods; (c) operation of market news offices; (d) publishing commercial fishery statistics; and (e) developing more efficient means of handling, processing, storing, and marketing fishery products. Funds for this activity are supplemented by moneys appropriated under the permanent account, promote and develop fishery products and research pertaining to American fisheries. In 1957, these supplementary funds totaled \$2,219,224. It is estimated they will amount to \$2,605,820 in 1958 and \$2,466,000 in 1959.

3. *Research.*—Research is conducted (a) to learn more about variations in abundance of important commercial food fishes and other aquatic animals; (b) to discover declining species and better measures for conserving, developing, and managing fishery resources; (c) to improve cultivation of aquatic animals, including shellfish; and (d) in the design of fish protective devices. Funds for this activity are supplemented by moneys appropriated under the permanent account, promote and develop fishery products and research pertaining to American fisheries.

In 1957, these supplementary funds totaled \$3,279,962. It is estimated they will amount to \$2,693,250 in 1958 and \$2,177,000 in 1959.

4. *Research on fish migration over dams.*—Investigations are conducted to determine factors influencing direction and rate of movement of anadromous fish over dams, so that these factors may be considered in designing future dams.

5. *Administration of Alaska fisheries.*—This activity covers administration of Alaska fisheries. Twelve and one-half percent of the receipts from sales of fur sealskins and other products are used to supplement the annual definite appropriation for management and investigations of the commercial fishery resources of Alaska, including construction.

ADMINISTRATION OF PRIBILOF ISLANDS

(Receipt limitation, indefinite)

For carrying out the provisions of the Act of February 26, 1944, as amended (16 U. S. C. 631a–631q), there are appropriated amounts equal to 60 per centum of the proceeds covered into the Treasury during the next preceding fiscal year from the sale of sealskins and other products, to remain available for expenditure during the current and next succeeding fiscal years. (5 U. S. C. 133t; Act of Aug. 8, 1956, 70 Stat. 1119; Department of the Interior and Related Agencies Appropriation Act, 1958.)

Appropriated 1958, **\$2,142,184**Estimate 1959, **\$2,182,200**

Unobligated balance carried forward.....	-6,728,277	-401,277	-165,977
Financing applied to program.....	3,298,961	7,260,000	1,800,000

This fund is used for making loans to segments of the fishing industry unable to obtain commercial loans on reasonable terms for financing and refinancing operations, maintenance, replacement, repair, and equipment of fishing gear and vessels, and for research into basic problems of fisheries (Fish and Wildlife Act of 1956, 70 Stat. 1119).

Budget program.—The increase in administrative expenses is due to a slight increase in workload in servicing the outstanding loans.

Financing.—The program is financed from a non-interest-bearing appropriation of \$10 million made in 1957, and from repayments and interest on outstanding loans.

Operating results.—The deficit is expected to be eliminated by future interest earnings.

OFFICE OF TERRITORIES

The Office promotes economic and political development in territorial trusteeship areas under United States jurisdiction. It formulates Federal policy, coordinates operating programs, provides information and advice, and participates in foreign policy matters concerning the Territories. In addition, the Office represents the governors in Washington; supervises the Alaska Railroad, and public works in Alaska and the Virgin Islands; and assists the Virgin Islands Corporation.

Current authorizations:

ADMINISTRATION OF TERRITORIES

For expenses necessary for the administration of Territories and for the departmental administration of the Trust Territory of the Pacific Islands, under the jurisdiction of the Department of the Interior, including expenses of the offices of the Governors of Alaska, Hawaii, Guam, American Samoa, as authorized by law (48 U. S. C., secs. 61, 531, 1422, 1431a (c)); salaries of the Governor of the Virgin Islands, the Government Secretary, and the members of their immediate staffs as authorized by law (48 U. S. C. 1591); compensation and mileage of members of the legislatures in Alaska, Hawaii, Guam, American Samoa, and the Virgin Islands as authorized by law (48

U. S. C., secs. 87, 599, 1421d (e), 1431a (c), and 1572c); compensation and expenses of the judiciary in American Samoa as authorized by law (48 U. S. C. 1431a (c)); grants to American Samoa, in addition to current local revenues, for support of governmental functions; and personal services, household equipment and furnishings, and utilities necessary in the operation of the houses of the Governors of Alaska, Hawaii, Guam, and American Samoa; [\$1,965,000] \$2,100,000: *Provided*, That the Territorial and local governments herein provided for are authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the administration of Territories may be expended for the purchase, charter, maintenance, and operation of aircraft and surface vessels for official purposes and for commercial transportation purposes found by the Secretary to be necessary. (*Executive Orders 6726, 10077, 10137; 48 U. S. C. 62, 63, 66-69, 72, 89, 536, 561-620, 1391, 1421-1426b; Department of the Interior and Related Agencies Appropriation Act, 1958.*)

OFFICE OF TERRITORIES—Continued

Current authorizations—Continued

TRUST TERRITORY OF THE PACIFIC ISLANDS—Continued

States exercises full jurisdiction over the territory and has undertaken to promote the political, economic, and educational advancement of the inhabitants.

The territory encompasses some 3 million square miles of ocean over which are scattered 2,141 islands with a land area of 687 square miles. The population, exclusive of Saipan and Tinian, is approximately 58,000. The Department of the Interior is responsible for administration of all the territory except the islands of Saipan, Tinian, and the small islands north thereof which are under Navy jurisdiction as critical defense areas.

2. *Judiciary.*—Provision is made for the high court of the trust territory, the Court of Appeals, and the lesser courts of the territory.

3. *Grants.*—Grants are required in addition to local revenues for health, education, and other services as well as for the cost of maintaining and providing the necessary facilities of the government of the territory. The costs of government are distributed as follows:

	1957 actual	1958 estimate	1959 estimate

Public enterprise funds:

ALASKA RAILROAD REVOLVING FUND

The Alaska Railroad Revolving Fund shall continue available until expended for the work authorized by law, including operation and maintenance of oceangoing or coastwise vessels by ownership, charter, or arrangement with other branches of the Government service, for the purpose of providing additional facilities for transportation of freight, passengers, or mail, when deemed necessary for the benefit and development of industries or travel in the area served; and payment of compensation and expenses as authorized by section 42 of the Act of September 7, 1916 (5 U. S. C. 793), to be reimbursed as therein provided: *Provided*, That no employee shall be paid an annual salary out of said fund of more than \$11,000 except the general manager of said railroad, one assistant general manager at not to exceed \$14,000 per annum, two officers at not to exceed \$12,500 per annum each, and three officers at not to exceed \$12,000 per annum each. (48 U. S. C. 301-308; Department of the Interior and Related Agencies Appropriation Act, 1958.)

This fund is derived from the earnings of the Railroad, and used for operating and maintenance expense as well as improvements and additions (48 U. S. C. 301-308).

Budget program—1. Rail line operation.—The railroad main line extends 470 miles from Seward to Fairbanks. Branch lines, passing tracks, spurs, and yards total 195 miles. Expense is estimated to increase from \$14.2 million in 1957 to \$16.1 million in 1958 and 1959, respectively. The increase in 1959 represents contribution to the civil service retirement fund and additional operating costs to produce projected revenues. Revenue is expected to increase from \$14.2 million in 1957 to \$16.5 million in 1958 and 1959, respectively, by reason of a revision of certain commodity rates and increases in tonnage due to the economic growth of the Territory.

Capital outlays totaled \$5.6 million in 1957 and are estimated at \$5.3 million in 1958 and \$6.3 million in 1959, mainly for track repairs and purchase of rolling stock equipment.

2. Other operations.—These consist of costs of sales of power, steam, excess property, and rental of properties.

Operating results and financial condition.—Loss of traffic to military petroleum pipeline completed in 1956 resulted in a decrease in gross revenue in excess of \$3.5 million. Expense cannot be reduced in direct proportion to the loss of revenue, and will be increased in 1958 and 1959. Net income will increase retained earnings to \$5.6 million at the end of 1959.

The investment accounts of the Alaska Railroad have been restated to segregate the results of operations after June 30, 1954, from those attributed to earlier operations, as recommended by the Comptroller General of the United States in his audit report to the Congress for 1954.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

Loans are made to local trading companies for purchase of Micronesian products for resale in the world market, purchase of trade goods for resale in Micronesia, and purchase of vessels.

The 1956 appropriation language for the Trust Territory of the Pacific Islands made available for 1 year \$500,000 of the proceeds from liquidation of the Island Trading Company of Micronesia for establishment of this fund. The availability was continued for 1957 and 1958 and it is proposed to extend it again for 1959.

Interest charged is 4% per annum on the unpaid balance.

The Corporation promotes the economic development of the Virgin Islands. Appropriations not to exceed \$9 million are authorized to be made to a revolving fund based on annual budgets submitted by the Corporation. The appropriation of additional funds as grants to finance specific programs not primarily of revenue-producing character and to reimburse the Corporation for operating losses is also authorized (48 U. S. C. 1407).

Budget program.—1. *Loan program.*—Loans are made to aid farmers in agricultural diversification and to improve livestock production and to aid business enterprises with any commercial or industrial undertaking or activity in the Virgin Islands when such loans are not available from other Federal or private sources.

2. *Sugar program.*—The principal business of the Corporation is the growing of sugarcane, and the production and sale of raw sugar. Statistics and cost are as follows (cost includes depreciation and interest):

	1957 actual	1958 estimate	1959 estimate
Sugarcane production:			
Acres harvested.....	2,525.25	2,600	2,600
Tons per acre.....	32.42	23	29

Corporation cane.....	82,849	60,000	75,000
Purchased cane.....	49,566	42,000	50,000
Total.....	132,415	102,000	125,000
Sugar yield per ton of cane.....	11.4%	10.5%	10.5%
Tons of sugar produced.....	14,552	10,710	13,125
Total cost per ton.....	\$131.04	\$151.41	\$140.33
Income per ton of sugar.....	139.23	136.50	134.45
Profit or loss (—) per ton.....	8.19	—14.91	—5.88

NOTE.—Under the crop-year basis of accounting used by the Corporation, all revenue, operating costs, and other expenses applicable to the year's crop are considered earned or incurred during the fiscal year.

3. *Power program.*—Electric generating plants are operated by the Corporation to supply each of the islands of St. Croix, St. Thomas, and St. John with electric power. Program statistics are as follows:

	1957 actual	1958 estimate	1959 estimate
Generating capacity (kilowatts).....	6,660	9,660	9,660
Miles of distribution lines.....	445	475	495
Number of consumers.....	8,017	8,300	8,500
Kilowatt hours sold.....	17,042,595	18,000,000	18,500,000
Average income per kilowatt-hour (cents).....	4.34	4.25	4.15
Average cost per kilowatt-hour (cents).....	3.53	3.56	3.58
Profit per kilowatt-hour (cents).....	.81	.69	.57

4. *Miscellaneous revenue producing activities.*—These consist of (a) certain Navy properties transferred to the Department of the Interior under a revocable permit and assigned to the Corporation for management; (b) leases and rentals of property; and (c) miscellaneous sales of surplus and materials.

5. *Non-revenue-producing activities.*—These include water and soil conservation programs, particularly the construction of dams and land clearance, and a forest development program.

6. *Administrative expenses.*—Administrative expenses for 1959 will be held within a limitation of \$160,000.

Financing.—In addition to the receipts of the fund from its operations, appropriations are made for the Corporation as follows:

	1957 actual	1958 estimate	1959 estimate
Grants for non-revenue-producing activities.....	\$130,000	\$130,000	\$130,000
Grants to restore impairment of capital.....	295,000	394,000	-----
Capital for revolving appropriation for loans to the Corporation.....	125,000	-----	-----
Total appropriations.....	550,000	524,000	130,000

The financing of the non-revenue-producing activities is as follows:

	1957 actual	1958 estimate	1959 estimate
Unexpended grant at start of year.....	\$20,258	\$23,060	\$10,967
Additional grant for year.....	130,000	130,000	130,000
Total appropriations and balances.....	150,258	153,060	140,967
Expenses during year.....	127,198	142,093	130,000
Unexpended grant at end of year.....	23,060	10,967	10,967

The sum of \$9,000,000 has been authorized for the revolving appropriation for loans to the Corporation; \$6,513,000 has been appropriated thus far, of which \$183,000 is estimated to remain on deposit June 30, 1959.

Operating results.—The net income for the fiscal year ended June 30, 1957, amounted to \$215,544. Of this amount \$119,156 was contributed by the sugar program. It is the first time in the history of the Corporation that the sugar program has shown a profit. This was due to favorable weather conditions, reasonable sugar yield and prices, improvements in milling operations in addition to considerable efforts by the supervisory staff. The profit of \$215,544 is a marked improvement over prior years' losses of \$341,539 in 1955 and \$231,944 in 1956.

It is estimated that operations will show a loss in 1958 due to unfavorable weather conditions during the fall of 1957. For this reason, it is recommended that 1957 profits be retained to cover the 1958 deficit as no funds were appropriated for this purpose.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories, deferred charges, etc.....	\$807,764	\$899,067	\$812,000	\$779,500

This fund finances central reproduction, communications, supply, central library, health services, and such other services as may be performed more advantageously on a reimbursable basis (5 U. S. C. 502). The capital consists of \$300,000 appropriated, plus donated assets of \$175,465. Earnings are retained.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Commodities for sale.....	\$78,373	\$84,182	\$74,182	\$74,182
Materials and supplies.....	15,373	16,762	16,762	16,762
Unpaid undelivered orders.....	52,791	66,858	60,000	60,000
Total selected resources at end of year.....	146,537	167,802	150,944	150,944
Selected resources at start of year (—).....	—	—146,537	—167,802	—150,944
Costs financed from obligations of other years, net (—).....	—	—	—16,858	—
Obligations incurred for costs of other years, net.....	—	21,265	—	—

Sources and Application of Funds (Operations)

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: *Provided*, That appropriations made

in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided*, That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title or in the Public Works Appropriation Act, [1958,] 1959, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), when authorized by the Secretary, at rates not to exceed \$75 per diem for individuals, and in total amount not to exceed \$175,000; maintenance and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U. S. C. 2131 and D. C. Code 4-204). (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

GENERAL PROVISIONS

SEC. 401. Unless otherwise provided by law, appropriations contained in this Act available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

DEPARTMENT OF THE INTERIOR

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1959

DEPARTMENT OF THE INTERIOR

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
BONNEVILLE POWER ADMINISTRATION								
Construction, operation, and maintenance.	1	\$42,000	1	\$20,000	\$22,000	2	\$40,000	Helicopters used by maintenance personnel for routine and emergency line patrol and for emergency line maintenance at high altitude locations during the winter months, and by survey personnel for reconnaissance in connection with the preliminary location of new lines. Also used for routine and emergency microwave communication maintenance, especially during the winter months, at high altitude locations.
BUREAU OF LAND MANAGEMENT								
Management of lands and resources.	1	18,000	1	5,000	13,000	6	19,856	Used in Alaska only for fire patrol and transporting fire-fighting crews and equipment. Also for transporting forest management personnel.
BUREAU OF RECLAMATION								
Construction and rehabilitation.	1	100,000			100,000	4	59,750	For official use of supervisory employees of the Bureau in the construction and rehabilitation program, at regional and project levels, and for the use of employees of the commissioner's office in Denver and Washington, when traveling from Denver to regional offices and to the work sites.
Operation and maintenance.						1	12,455	For the official use of Bureau employees, power and operation and maintenance personnel, in patrolling transmission lines and other field work.
Total, Bureau of Reclamation.	1	100,000			100,000	5	72,205	
GEOLOGICAL SURVEY								
Surveys, investigations, and research.						2	40,000	For use by geologists and geophysicists in geophysical exploration.
NATIONAL PARK SERVICE								
Management and protection.	1	10,000			10,000			For use by employees of Everglades National Park, Fla., in connection with management and protection activities including patrol to detect and prevent poaching and illegal hunting and fishing in the park; for protection of visitors (search and rescue work); and for fire detection.
FISH AND WILDLIFE SERVICE								
BUREAU OF SPORT FISHERIES AND WILDLIFE								
Management and investigations of resources.	3	39,000	3	5,000	34,000	16	81,000	Used by agents for enforcing fish and game protective laws, and by wildlife management biologists in refuge operations and management activities, and by hunters in predatory animal control.
Federal aid in wildlife restoration.	1	9,000	1	1,200	7,800		5,000	Used by biologists in carrying out the purposes of Federal Aid Act.
Federal aid in fish restoration and management.						1	5,000	Used by biologists in carrying out the purposes of Federal Aid Act.
Migratory bird conservation account.	2	16,000	2	2,000	14,000	6	30,000	Used by biologists making waterfowl surveys and by game management agents for enforcing bird protective laws.
Management of national wildlife refuges.	2	30,000	2	5,000	25,000	7	35,000	Used by management agents for enforcing game protective laws.
Total, Bureau of Sport Fisheries and Wildlife.	8	94,000	8	13,200	80,800	30	156,000	
BUREAU OF COMMERCIAL FISHERIES								
Management and investigations of resources.	1	20,000	1	2,000	18,000	12	102,000	Used by agents for enforcing fish protective laws.
Promote and develop fishery products and research pertaining to American fisheries.						1	3,000	Used by biologists in red tide investigations.
Total, Bureau of Commercial Fisheries.	1	20,000	1	2,000	18,000	13	105,000	
Total, Fish and Wildlife Service.	9	114,000	9	15,200	98,800	43	261,000	
Total, Department of the Interior.	13	284,000	11	40,200	243,800	58	433,061	

¹ An additional \$5,000 is chargeable to reimbursements from other accounts.

DEPARTMENT OF JUSTICE

The 1959 request for new obligational authority for the Department of Justice totals \$230.2 million compared with \$227.2 million estimated for 1958. Most of the Department's budget is devoted to protective services and alien control, with 17% of the total for the legal activities, 44% for the Federal Bureau of Investigation, and 21% for the Immigration and Naturalization Service. No funds have been included in the budget for major new construction. Additional workloads anticipated in 1959 will be met in part by a continued effort to improve management and increase staff efficiency and in part by changes in the number of employees assigned to various activities.

Protective services.—In the work of its law offices, which prosecute Federal offenders and protect the public interest in civil matters, the Department has made substantial progress over the past several years in reducing litigation backlogs to more manageable levels. The special appropriation entitled "Special temporary attorneys and assistants" which was provided in 1958 and 2 prior years to deal with the situation is being dropped in 1959.

The budget provides for fully staffing the recently established civil rights division, for increased workloads in the fields of tax, civil, and lands litigation, and for increases in the general expenses associated with litigation, both civil and criminal.

A supplemental appropriation for 1958 is anticipated to meet the cost of witnesses needed on behalf of the Government because the original appropriation now appears to be inadequate.

The upward trend in most classes of criminal offenses is expected to continue in 1959, increasing the workload of the Federal Bureau of Investigation. This upward trend will be accompanied by an increase in fingerprint work, name checks, and technical services. The increased workload will be absorbed by continued emphasis on improved methods and procedures.

Alien control.—No increase in funds are requested for the Immigration and Naturalization Service. Workloads

are up in most areas but adherence to good management practices and constant vigilance to improve and simplify procedures will offset the increased costs involved. In addition to the normal workload, the Service will this year and next carry on the additional work which will result from the Immigration and Nationality Act amendments enacted in 1957.

A proposed construction program for replacing out-moded border stations, for which funds were requested but not granted by the Congress in 1958, is being further deferred.

Correctional and penal institutions.—Since 1949, inmate population of penal institutions maintained by the Department for violators of Federal laws has been growing. In 1957 the average daily inmate population was 20,332. The forecast for 1959 is 20,800. The budget includes funds to care for the additional inmates as well as to meet rises in per capita costs which have occurred for subsistence and other items. An increase in the number of recalcitrant prisoners required a diversion of 1958 funds from maintenance and equipment to increase the custodial staff. The 1959 estimates restore items deferred in 1958 and provide an increase in the maintenance and equipment levels.

The first stage of a new powerplant at the penitentiary at Lewisburg, Pa., is the only recommended construction in addition to the normal repair and minor construction projects. The proposed construction of two new penal institutions, for which funds were requested but not granted by the Congress in previous years, is being further deferred.

A supplemental appropriation for 1958 is anticipated to meet the cost of an increase in the number of Federal prisoners held in local jails while awaiting trial or transfer after conviction, or while serving short sentences.

Regulation of commerce and finance.—Funds requested for antitrust activities will maintain the same program level as in 1958.

LEGAL ACTIVITIES AND GENERAL ADMINISTRATION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES—Con.

These are activities which are carried on by the Department's law offices, except the Antitrust Division, which has a separate appropriation.

1. *Conduct of Supreme Court proceedings and coordination of appellate matters.*—This consists of supervising and controlling all appellate matters and representing the Government before the Supreme Court.

2. *General tax matters.*—Cases arising under the internal revenue laws and other tax statutes are prosecuted or defended.

CASELOAD

The Government is represented in each of the 94 judicial districts by a United States attorney and a United States marshal. The United States attorney is responsible for the Government's legal interests in his district. The marshal has custody of all Federal offenders until released by the courts or confined in prison. He also acts as agent of the court in the service of process.

The following table shows actual and estimated workloads:

	1956 actual	1957 actual	1958 estimate	1959 estimate
United States attorneys: Cases:				
Pending, beginning of year.....	29,979	24,253	23,344	21,844
Filed during year.....	53,260	52,337	53,000	54,000
Terminated during year.....	58,813	53,058	54,500	56,000
Pending, end of year.....	24,253	23,344	21,844	19,844

¹ Reflects cases pending at end of fiscal year as reported by the United States attorneys. These cases will not balance mathematically, due to (1) deletion of certain items that were erroneously reported and (2) addition of others that should have been reported in previous fiscal years.

Substantial progress has been made in reducing backlogs to more manageable levels.

FEDERAL BUREAU OF INVESTIGATION

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the detection and prosecution of crimes against the United States; protection of the person of the President of the United States; acquisition, collection, classification and preservation of identification and other records and their exchange with, and for the official use of, the duly authorized officials of the Federal Government, of States, cities, and other institutions, such exchange to be subject to cancellation if dissemination is made outside the receiving departments or related agencies; and such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General, including purchase (not to exceed seven hundred and seventy-five for replacement only) and hire of passenger motor vehicles; purchase at not to exceed \$10,000, for replacement only, of one armored motor vehicle; firearms and ammunition; not to exceed \$10,000 for taxicab hire to be used exclusively for the purposes set forth in this paragraph; not to exceed \$4,500 for expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; payment of rewards; and not to exceed \$70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; **[\$101,450,000] \$102,500,000: Provided,** That the compensation of the Director of the Bureau shall be \$22,000 per annum so long as the position is held by the present incumbent.

None of the funds appropriated for the Federal Bureau of Investigation shall be used to pay the compensation of any civil-service employee. (5 U. S. C. 300, 340, 341, 341c, 341e; Department of Justice Appropriation Act, 1958.)

The Federal Bureau of Investigation is the investigative branch of the Department of Justice and obtains evidence for use in civil litigation and prosecution of criminal violations of Federal law. It has primary responsibility for the internal security of the Nation. It assists all law-enforcement agencies in identification and technical matters.

The appropriation request for 1959 totals \$102,500,000. Most classes of major criminal offenses continue to increase. These trends are accompanied by increased workload concerned with fingerprints, name checks, and the technical services of the Federal Bureau of Investigation laboratory. While no additional staff is budgeted, provision is made for financing the Bureau's promotion program.

1. *Security and criminal investigations.*—This includes the Bureau's investigative responsibilities, the coordination and maintenance of the data gathered, and the maintenance of the Bureau's communications system. Data is disseminated to other Government agencies having an official interest in it. During 1957 the Bureau received 1,656,621 names for search through its files, an increase of 2% over 1956.

CASELOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Investigative matters received.....	444,185	477,092	487,565	501,000

2. *Identification by fingerprints.*—The identification division is the national repository of fingerprint identification records. Fingerprints are acquired, classified, preserved and exchanged with other duly authorized law-enforcement agencies; 5,670,761 sets of fingerprints were received for handling during 1957, a 7.3% increase over the prior year. Fingerprint receipts have shown an upward trend for 3 consecutive years and this upward trend is expected to continue. Sets of fingerprints on file on July 1, 1957, totaled 145,791,854.

3. *Criminal and scientific laboratory.*—The laboratory provides technical and scientific assistance to the Federal Bureau of Investigation and all duly constituted law-enforcement agencies and other Federal agencies which desire to avail themselves of the service. During 1957 scientific examinations totaled 160,643, a 12.6% increase over the prior year for an all-time high in laboratory workload. The upward trend is expected to continue.

4. *Training schools and inspectional services.*—A bureau-wide inspectional service and a personnel training program are provided. The Bureau assists upon request in providing various types of training to local law-enforcement agencies.

The Service administers and enforces the laws relating to immigration and naturalization. Recent amendments to the Immigration and Nationality Act will cause an increase in workload which will be absorbed.

1. *Inspection for admission into the United States.*—Control is maintained at border points, seaports, and airports over the entry of persons into the United States. Funds requested but not allowed last year to replace outmoded border stations have not been included this year because of the budget policy limiting construction.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Aliens admitted.....	1,007,884	1,085,725	1,082,000	1,167,200
Stowaways found.....	253	294	300	300
Citizens arrived.....	1,281,110	1,365,075	1,398,000	1,418,000
Alien crewmen examined on arrival.....	1,533,249	1,688,749	1,846,000	2,005,000
Entries over land boundaries.....	129,616,053	137,590,261	145,654,000	153,410,000
Aliens denied entry on primary inspection.....	168,811	157,174	157,000	157,000

2. *Detention and deportation.*—Aliens alleged to be in the United States unlawfully are served with orders to show cause and accorded hearings. Warrants of deportation are issued, served, and executed. Detention facilities are operated and maintained. The 1957 increase in orders to show cause resulted from a change in regulations.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Orders to show cause.....	4,403	11,223	12,300	13,600
Hearings.....	16,336	13,168	13,800	14,000
Aliens deported.....	7,297	5,082	7,100	7,200
Average number of aliens held in detention.....	1,387	1,170	1,200	1,200

3. *Naturalization.*—Examinations are conducted to determine the qualifications of aliens for naturalization, including applicants for derivative citizenship. Facts and recommendations are presented to naturalization courts, and derivative citizenship is adjudicated by the Service.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Applications, petition for naturalization.....	173,681	173,156	176,400	184,100
Applications, derivative citizenship.....	35,577	32,758	33,800	36,100
Applications for new papers.....	10,226	10,737	11,200	11,700
Recommendations to courts.....	150,687	142,515	145,000	150,000

4. *Border patrol.*—This activity guards the international boundaries to combat smuggling and apprehends aliens illegally in the United States. Selective highway checking, based on intelligence, results in close control with lower volume of examination of conveyances and questioning persons in traffic checks. The decline in apprehensions is based on continued tight control, which has increased the cost.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Conveyances examined.....	2,845,746	2,339,287	2,251,600	2,264,400

1. *Custody, care, and treatment of prisoners in Federal institutions.*—This covers the cost of direct care of prisoners in 27 institutions in the United States and 6 small institutions in Alaska. The cost of related personnel service is included. The furnishing of custody, food, clothing, education, welfare services, and transportation expenses upon release are included. The funds required, exclusive of salaries, are in direct relation to the estimated average number of prisoners expected to be maintained in 1959, which is 20,800, at an estimated cost per man per day of 76 cents compared with 75 cents in 1957 and 1958. The daily per capita cost is increasing because of the higher cost of all commodities. The average daily population for 1957 was 20,332 as compared to 20,209 for 1956, continuing to rise as it has for several years.

2. *Maintenance and operation of institutions.*—This activity reflects administrative expenses, utility services, operation of motor vehicles, repair and maintenance of buildings, grounds, and other facilities, and equipment replacements. It was necessary to divert 1958 funds from maintenance and equipment to increase the custodial staff because of a change in the general character of prison population. The 1959 estimates restore items deferred in 1958 and provide an increase in the maintenance and equipment level previously authorized.

3. *Medical services.*—Medical, psychiatric, and technical services are provided by Public Health Service personnel whose salaries and travel expenses are reflected here.

1. *Construction.*—The estimates for 1959 contain construction funds for projects at several institutions and the first increment of a new powerplant at Lewisburg, Pa., estimated to cost \$1,750,000 when completed.

Due to budget policy, the estimates do not include funds for construction of the two penal institutions requested in previous years.

2. *Repairs and improvements.*—Major plant repairs at existing facilities are provided for. A substantial part of the new construction and plant repair work will be performed by inmate labor.

The corporation is authorized to establish and operate industries in Federal penal and correctional institutions and two disciplinary barracks under jurisdiction of the Department of Defense (18 U. S. C. 4121-4128). Its purposes are to provide employment for physically fit inmates; provide maximum vocational training for qualified inmates in connection with regular institutional and industrial activities and to operate a placement service to assist released inmates to secure jobs. Products manufactured by the inmates are sold only to other Government agencies and the penal institutions. Earnings from the sale of these products pay expenses of the corporation and have permitted payment of \$34 million in dividends into the Treasury since January 1, 1935.

FEDERAL PRISON SYSTEM—Continued

Intragovernmental funds—Continued

FEDERAL PRISON INDUSTRIES, INCORPORATED—Continued

PRISON INDUSTRIES FUND—continued

Budget program.—During 1959 the industrial program contemplates operation of 55 shops in 23 institutions. It is expected to employ, on a 40-hour-week basis, 4,094 inmates in 1959 as against 4,144 in 1958. During the past year industrial activities were diversified among 36 different lines of industry in 54 shops at 23 locations which include a new sign shop at McNeil Island, Wash., a new clothing factory at United States Disciplinary Barracks, Fort Leavenworth, Kans., and a new furniture refinishing shop at Terminal Island, Calif.

In 1959 it is expected to operate the vocational training program on an augmented basis with the employment of one additional employment placement officer and 8 additional instructors. It is expected that trade and occupational training will be provided for 11,500 inmates. It is expected the placement service will place 2,400 released inmates in private industry as compared to 2,200 expected to be placed during the present year.

The following table indicates the breadth and scope of the vocational training program for 1956 and 1957:

Type of training:	Number of training groups		Number enrolled		Number completing courses	
	1956	1957	1956	1957	1956	1957
Agriculture.....	45	41	777	831	276	297
Industrial.....	57	69	1,382	1,432	521	509
Occupational.....	277	331	3,549	3,885	1,652	1,206
Trade.....	56	49	1,211	1,342	836	865
Special.....	78	85	3,270	3,524	2,259	2,152
Total.....	513	575	10,189	11,014	5,544	5,029

During the past year vocational training was pursued by 56% of the inmate population in one or more of the 575 training areas in the institutional shops and vocational schools. Of the total number enrolled without duplication of courses, 45% of these satisfactorily completed a course and received a certificate of achievement. In 1,588 cases these were approved certificates supported by accreditation standards required by State departments of vocational education and signed by their representatives attesting to the validity of the certificate and course.

Coordinated with the vocational training program is the employment placement service comprising five placement units located in different areas of the country. Through the job placement service, placement officers found employment for 2,432 inmates during the past year. Of the total number of placements made, 593 were in jobs directly related to the training and work experience gained in the institution.

The meritorious monetary award program provided awards to 5,447 inmates during 1957. The board of directors, at its meeting on May 17, 1957, increased the amount available for such awards from \$240,000 to \$300,000 annually.

The 1959 budget includes an administrative expense limitation of \$443,000 which is 2% of estimated sales.

The 1959 limitation for vocational expense (exclusive of depreciation and after taking account of related revenues) is \$624,000, an increase of \$67,000 over 1958 due to augmentation of the training program.

Costs financed from obligations of other years, net (—).....	-----	-----	—288,862	—701,000
Obligations incurred for costs of other years, net.....	-----	1,204,449	-----	-----

Financing.—Profit from 1959 operations is expected to result in a minus budgetary expenditure of \$2.2 million compared with \$2 million for 1958 and \$2.35 million for 1957. Dividends of \$1.5 million were paid into the Treasury during 1957 and it is anticipated that \$2.4 million will be paid in 1958 and \$2.2 million in 1959.

Operating results.—Estimates for 1959 reflect a decline of \$2 million in sales, \$1.6 million in expenses, and \$0.4 million in net income. This decline is attributed to an anticipated decline in orders for textile and clothing products.

Retained earnings.—As of June 30, 1957, the corporation's cumulative earnings amounted to \$49.5 million of which \$15.5 million has been reinvested in the business in the form of working capital, plant, and new equip-

ment. It is expected that retained earnings will increase to \$16.6 million by June 30, 1959.

LIMITATION ON ADMINISTRATIVE AND VOCATIONAL TRAINING EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

[Federal Prison Industries, Incorporated:] Not to exceed \$443,000 of the funds of the corporation shall be available for its administrative expenses, and not to exceed **[\$557,000] \$624,000** for the expenses of vocational training of prisoners, both amounts to be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and to be computed on an accrual basis and to be determined in accordance with the corporation's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, payment of claims, expenditures which the said accounting system requires to be capitalized or charged to cost of commodities acquired or produced, including selling and shipping expenses, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, or disposition of facilities and other property belonging to the corporation or in which it has an interest. (18 U. S. C. 4121-4128; Reorganization Plan No. II, pt. 1, sec. 3a, approved Apr. 3, 1939; Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1958.)

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 202. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, Territory, or the District of Columbia.

SEC. 203. [Sixty] *Seventy-five* per centum of the expenditures for the offices of the United States attorney and the United States marshal for the District of Columbia from all appropriations in this title shall be reimbursed to the United States from any funds in the Treasury of the United States to the credit of the District of Columbia.

SEC. 204. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General.

SEC. 205. Appropriations and authorizations made in this title for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed \$75 per diem for individuals.

SEC. 206. Appropriations for the current fiscal year for "Salaries and expenses, general administration", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Bureau of Prisons", shall be available for uniforms and allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. 207. Not to exceed 5 per centum of the appropriations in this title for legal activities and general administration shall be available interchangeably with the approval of the Bureau of the Budget, but no appropriation shall thereby be increased by more than 5 per centum. (Department of Justice Appropriation Act, 1958.)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

DEPARTMENT OF JUSTICE

DEPARTMENT OF LABOR

The budget recommends new obligational authority of \$465 million for the Department of Labor for the fiscal year 1959, an increase of \$2 million over the current year. Seventy-one percent of the total is for grants to States for operation of the Federal-State employment security system. Unemployment payments to veterans, and unemployment and workmen's compensation benefits for Federal personnel or their survivors, represent 22% of the new obligational authority requested. The remaining 7% is for the other manpower, statistics, labor standards, and administrative activities of the Department.

Labor and manpower.—Changing economic conditions are causing an increase in the workload of the nationwide Federal-State employment security offices and the related activities of the Department of Labor. Because of the increase in workload during the current year, the budget includes a supplemental request of \$29 million for 1958 for grants to States for administration of unemployment compensation and employment service activities, in addition to the \$259.8 million already enacted. A further increase of \$40.5 million is recommended for 1959. While these grants are carried as regular appropriations, their cost, as well as the cost of related employment security activities of the Department of Labor and other agencies, is ultimately charged against earmarked proceeds of the Federal unemployment tax. (The Federal receipts from this tax are accounted for separately and do not affect the budgetary surplus or deficit.)

The budget recommends relatively small increases in new obligational authority for several other high-priority labor and manpower functions of the Department of Labor. For example, the Bureau of Apprenticeship and Training will give greater encouragement to labor and industry to increase training of skilled workers, and the Bureau of Labor Statistics will do more work in 1959 on improving national income accounts in such areas as productivity measurements, employment, and prices.

The 1959 appropriation request for the Mexican farm-labor program is down by \$910,600 from 1958, as the cost of carrying on certain activities will be transferred to the farm labor supply revolving fund. In 1959 the cost of the migration and reception centers will be paid through the fund by the farmers who use Mexican workers.

Wage and hour, labor standards, and other activities in the general labor and manpower field will be continued at approximately the 1958 level.

Other veterans' readjustment benefits.—Expenditures for special payments to unemployed veterans of the Korean conflict are declining as veterans' eligibility for benefits is running out. However, unemployment for 1958 now appears to be higher than anticipated last year, and the budget includes a supplemental appropriation for \$8 million for 1958 in addition to the \$36.8 million already enacted. A total of \$19 million is recommended for 1959.

Other veterans' services and administration.—The budget provides for continuing the Bureau of Veterans' Reemployment Rights in the fiscal year 1959 at its present strength.

Central personnel management and employment costs.—Unemployment compensation payments to Federal employees, which are borne by the Federal Government but paid according to the provisions of the various State laws, have increased sharply during the current fiscal year. The budget includes a supplemental appropriation request of \$14.5 million for 1958 in addition to the \$25 million already provided. For the fiscal year 1959 it is estimated that \$27.8 million will be needed.

Benefit payments under the Federal Employees' Compensation Act are estimated at \$57 million for 1959, a slight decline from the 1958 level because military reservists injured after December 31, 1956, are provided for under veterans' programs and are not eligible for benefits under this program.

Appropriation (new obligational authority)	2,021,000	2,121,000	2,121,000

1. *Litigation.*—This includes direction and supervision of enforcement of Federal labor standards statutes through court actions and administrative proceedings.

During 1957 approval was given to the regional offices for the filing of 1,104 actions in the district courts of the United States. A further increase in court litigation is expected in 1958 and 1959.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Cases instituted.....	719	1,104	1,200	1,350
Cases closed.....	791	872	950	1,000
Cases pending in court at end of year...	299	499	600	650

2. *Interpretations and legal advisory services.*—The Office provides legal services to departmental officials. During 1957, 8,576 interpretations were rendered on Federal wage, hour, and child labor laws. The workload in 1958 and 1959 is expected to remain at current high levels.

3. *Wage determinations.*—Predetermination is made of prevailing wages to be paid to laborers and mechanics on public construction contracts. The Office coordinates the administration and enforcement by the Federal contracting agencies of labor-standards provisions in statutes relating to public construction.

In 1957 there were 28,065 wage determinations made on request for contracting agencies. Based on estimates from Federal contracting agencies, the workload volume in 1958 and 1959 will be higher than in 1957. The first wage determinations under the Federal Highway Act were made in 1957.

WORKLOAD

	1956 actual	1957 actual	1958 estimate	1959 estimate
Requests for wage determinations: Federal contracts.....	21,937	26,916	31,485	31,360
Federal highway program.....	-----	1,284	2,700	2,900

4. *Legislative advisory services.*—This provides analyses and interpretations of existing legislation and drafts of proposed legislation for the Department. During 1957, 468 legislative reports were prepared, an increase of 62 or 15% over 1956. No reduction in the volume of work is anticipated during 1958 and 1959.

5. *Enforcement of regulatory labor laws (regional offices).*—Services rendered at the regional level include interpretations and legal advice to regional office officials and to the public on specific request; and enforcement through court and administrative proceedings of Federal labor standards statutes.

1. *Improving State labor legislation.*—This is accomplished by advising States on appropriate labor law administration and legislation and by negotiating Federal-State agreements to eliminate duplication in inspection. Assistance was provided to 43 States in 1957 in response to 763 requests.

2. *Improving conditions of migratory workers.*—Cooperation is maintained with Federal and State agencies and voluntary organizations to improve the working and living conditions of migratory workers; a secretariat for the President's Committee on Migratory Labor is provided. Assistance was given to 34 States and 16 State committees on migratory labor matters in 1957.

3. *Reducing industrial accidents.*—This provides assistance in occupational accident prevention to States, labor unions, and Federal agencies by advising on inspection techniques and conducting training courses. During 1957, there were 1,484 safety surveys completed and 73 training courses conducted for 2,200 trainees.

4. *Protecting young workers and advancing their employment opportunities.*—This includes research activities, serving as a center of information and advisory service in this field; promotes annual back-to-school campaign; develops

BUREAU OF LABOR STANDARDS—Continued**Current authorizations—Continued***SALARIES AND EXPENSES—Continued*

standards for child-labor regulations under the Fair Labor Standards Act.

5. *Promoting employment of physically handicapped.*—A continuing program of public education is conducted through the President's Committee to advance the employment of handicapped citizens and cooperation is maintained with all national groups interested in this field including the governors' committees in the States and Territories.

6. *Registration of labor union data.*—Financial and organizational data are required to be filed as a condition of union use of National Labor Relations Board facilities. About 24,000 register annually.

1. *Training promotion and service to industry.*—Industry and labor are encouraged and assisted to organize and improve programs for developing skills in the work force through apprenticeship and allied training. About 145,000 establishments, 12,000 union locals, and 2,400 local chapters of employer associations participate, providing employment and training for 230,000 apprentices.

2. *Training research and technical services.*—Information is provided on skill requirements, training technology, and appropriate labor standards for on-the-job training programs. Training aids and other techniques to increase the effectiveness of industrial training are made available. About eight pamphlets are published each year to call attention to skill needs or labor force conditions in various industries and to superior skill development programs. Approximately 1,000 written recommendations for improving training practices are made each year to management and labor.

1. *Veterans' placement service.*—This service helps State local employment offices to give suitable counseling and placement services to veterans and promotes the interest of employers to employ veterans.

2. *Farm placement service.*—In cooperation with the State farm placement offices, this service develops and uses special recruitment and placement programs to meet agriculture's need for year-round and seasonal workers.

3. *Collection and interpretation of labor market information.*—Information is analyzed on (a) the administrative operations of the unemployment insurance and employment service programs; and (b) supply, demand, and utilization of labor by areas, industries, and occupations.

4. *Assistance in maintaining public employment services.*—The Bureau assists the States on (a) counseling and testing of youth, veterans, handicapped and older workers, and others in occupational adjustment; (b) recruitment and placement programs; and (c) interstate movement of workers. In 1959 emphasis will be placed on job placement services in smaller centers of labor surplus.

5. *Unemployment insurance service.*—State laws and interpretations are reviewed to assure conformity with the Federal law requirements. Surveys are made to assist States in improving administrative procedures. The Bureau directs State and Federal agencies in the administration of Federal benefits to unemployed veterans and Federal employees. In 1959 emphasis will be given to (a) improving accounting for taxes and extending the internal audit function; (b) more thorough examination of questionable claims; and (c) improving claims processing procedures.

6. *Field guidance, financing, and auditing of State operations.*—The 53 State employment security agencies are assisted in improving their programs, organization, and management. Agencies are audited annually. In 1959 increased attention will be given to the (a) audit of State agency expenditures from granted funds and to improvement of State agency management policies and practices; (b) improvement in controls over tax collection, accounting, and auditing; (c) improvement in handling claims and making benefit payments; and (d) assuring continuity of the Federal-State employment security programs under emergency conditions.

GRANTS TO STATES FOR UNEMPLOYMENT COMPENSATION AND
EMPLOYMENT SERVICE ADMINISTRATION

[Grants to States for unemployment compensation and employment service administration:] For grants in accordance with the provisions of the Act of June 6, 1933, as amended (29 U. S. C. 49-49n), for carrying into effect section 602 of the Servicemen's Readjustment Act of 1944, for grants to the States as authorized in title III of the Social Security Act, as amended (42 U. S. C. 501-503), including, upon the request of any State, the purchase of equipment, and the payment of rental for space made available to such State in lieu of grants for such purpose, for necessary expenses including purchasing and installing of air-conditioning equipment in connection with the operation of employment office facilities and services in the District of Columbia, and for expenses not otherwise provided for, necessary for carrying out title IV of the Veterans' Readjustment Assistance Act of 1952 (66 Stat. 684) and title XV of the Social Security Act, as amended (68 Stat. 1130), **[\$259,814,000]** **\$329,300,000**, of which \$10,000,000 shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the numbers of claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant (or the allocation for the District of Columbia) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments: *Provided*, That notwithstanding any provision to the contrary in section 302 (a) of the Social Security Act, as amended, the Secretary of Labor shall from time to time certify to the Secretary of the Treasury for payment to each State found to be in compliance with the requirements of the Act of June 6, 1933, and, except in the case of Puerto Rico, Guam, and the Virgin Islands, with the provisions of section 303 of the Social Security Act, as amended, such amounts as he determines to be necessary for the proper and efficient administration of its unemployment compensation law and of its public employment offices: *Provided further*, That such amounts as may be agreed upon by the Department of Labor and the Post Office Department shall be used for the payment, in such manner as said parties may jointly determine, of postage for the transmission of official mail matter in connection with the administration of unemployment compensation systems and employment services by States receiving grants herefrom.

In carrying out the provisions of said Act of June 6, 1933, the provisions of section 303 (a) (1) of the Social Security Act, as amended, relating to the establishment and maintenance of personnel standards on the merit basis, shall apply.

None of the funds appropriated by this title to the Bureau of Employment Security for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under title III of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year. (38 U. S. C. 695b; 29 U. S. C. 49-49n; 42 U. S. C. 1361-1370; Department of Labor Appropriation Act, 1958.)

Grants are made to the States for administration of the unemployment compensation and employment service programs. The increase of \$69.5 million is due primarily to increased workloads in the claims and benefit functions.

The claims and benefit workloads in 1958 are exceeding the estimates at the time of the appropriation. For this reason a supplemental appropriation of \$29,000,000 is proposed for later transmission. The 1958 workloads below include those to be performed with the additional funds.

1. *Unemployment compensation.*—State funds are used to make unemployment compensation payments to unemployed workers eligible under State laws. Federal grants cover State administrative expenses for collecting about \$1.5 billion in taxes, paying about \$2.4 billion in benefits, and deciding appeals. The 1959 increase results from increased claims and normal growth of the economy.

UNEMPLOYMENT COMPENSATION WORKLOADS

	1957		1958 estimate	1959 estimate
	Number	Percent change from 1956		
Basic workload				
Employer tax returns processed.....	8,358,000	+14	8,800,000	9,000,000
Employee wage items recorded.....	125,028,000	+9	127,000,000	130,000,000
Initial claims taken.....	12,002,000	+4	17,930,000	17,930,000
Continued claims taken.....	62,406,000	+11	97,800,000	97,800,000
Claims processed.....	6,921,000	+8	10,210,000	10,210,000
Benefit payments made.....	54,239,000	+13	83,100,000	83,100,000
Appeals.....	220,000	-7	400,000	400,000

2. *Employment service.*—Federal grants finance an employment service to find employment for persons seeking jobs and to provide workers for employers who need them. This is accomplished by selecting and referring workers to jobs, providing services to employers in the analysis of jobs and staffing problems and by testing and counseling services. In 1959, 13% more counseling service will be provided, especially to handicapped and older workers and to young persons entering the labor market.

3. *State administration.*—State headquarters offices provide leadership and planning for the unemployment compensation and employment service activities in the central and local offices, as well as legal, fiscal, personnel, training, and research activities.

4. *Veterans unemployment compensation.*—Claims filed by veterans require processing activities similar to those

listed under activity 1. The reduction in 1959 results from the decline in the number of eligible veterans whose claims must be processed. The benefit payments themselves are provided by the unemployment compensation for veterans appropriation.

5. *Unemployment compensation for Federal employees.*—Claims filed by Federal employees require processing activities similar to those listed under Activity 1. The benefit payments are provided by the unemployment compensation for Federal employees appropriation. These benefit payments are expected to be higher in 1958 than in 1957 or 1959 and therefore processing activities will also increase temporarily in 1958.

6. *Contingency fund.*—This fund is used to meet unforeseen increases in the number of claims filed, in State salary rates, and changes in State unemployment compensation laws.

7. *Financing adjustment for advances to the States.*—Because of State legal requirements, funds for July operations must be made available to the States before the year begins. In 1957 obligations were increased by \$464,900 because \$19,738,100 had been advanced to 1956 from 1957, while \$20,203,000 was advanced from 1958 to 1957.

UNEMPLOYMENT COMPENSATION FOR VETERANS

【Unemployment compensation for veterans:】 For payments to unemployed veterans as authorized by title IV of the Veterans' Readjustment Assistance Act of 1952, 【\$36,800,000】 \$19,000,000.

Unemployment compensation for veterans, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States, as authorized by title IV of the Veterans' Readjustment Assistance Act of 1952, such sums as may be necessary to pay benefits for the first quarter of the next succeeding fiscal year, and the obligations and expenditures thereunder shall be charged to the appropriation therefor for that fiscal year. (38 U. S. C. 991-999; Department of Labor Appropriation Act, 1958.)

Funds are allocated to the States for payment of unemployment compensation to eligible veterans who served in the Armed Forces between June 27, 1950, and January 31, 1955.

In 1958 benefit payments are being made at a rate which will require more than the amount of the appropriation. This trend is expected to continue and a supplemental appropriation of \$8,000,000 is proposed for later transmission. Workload estimates below reflect work to be accomplished including this supplemental, but the program and financing schedule does not include the supplemental.

Benefit payments are estimated to decrease \$25,800,000 in 1959. This is due to the President's proclamation of January 1, 1955, which restricts benefits to veterans who served in the Armed Forces before February 1, 1955. In addition, the limitation of benefit payments to 3 years after date of separation, which will go into effect July 26, 1958, will further restrict benefit payments in 1959.

Funds are allocated to the States for the payment of unemployment compensation to Federal employees. Benefits are paid in accordance with the State unemployment compensation laws.

In 1958 benefit payments are being made at a rate higher than the \$25,000,000 appropriation will support. A supplemental appropriation of \$14,500,000 is proposed for later transmission.

BUREAU OF EMPLOYMENT SECURITY—Continued**Current authorizations—Continued****UNEMPLOYMENT COMPENSATION FOR FEDERAL EMPLOYEES—Con.**

It is expected that Federal employment will be more stable in 1959 and that these benefit payments will decline to \$27,800,000. Workloads are estimated to be approximately the same as in 1957 but the average weekly payment will increase somewhat, reflecting action to increase compensation payments in some States.

Mexican agricultural labor is imported for use in areas having a shortage of domestic agricultural workers. Authorization for this program was extended to June 30, 1959, by the act of August 9, 1955 (60 Stat. 615). In 1959, \$910,600 of expenses formerly charged to this appropriation will be paid from the farm labor supply revolving fund.

1. *Determining Mexican labor requirements.*—The agricultural areas needing Mexican workers and the number of workers required are determined. Requests from 350 areas are considered annually.

2. *Supplying Mexican labor requirements.*—Workers are recruited in Mexico and transported to centers in the United States where employers contract for their use. In 1957 there were 450,162 workers contracted. In 1959, an estimated 450,000 workers will be contracted. Direct costs such as transportation, subsistence, medical examinations, etc., are charged to the revolving fund. The overall cost, including revolving fund expenses, for supplying a Mexican agricultural worker averaged \$12.16 in 1957 and is estimated to be \$13.68 in 1958 due to a general increase in costs.

3. *Determining compliance with contract provisions.*—Complaints of contract violations are investigated, and housing and other facilities required by the contract are inspected.

Fees for each worker contracted are paid by agricultural employers into this fund. These fees are used to meet transportation and subsistence costs and other expenses directly involved in importing Mexican farmworkers (7 U. S. C. 1461-1468). On January 1, 1958, the fee for initially contracting a worker was established at \$10, increased from \$7, and the fee for recontracting a

worker was set at \$5, instead of \$4. During 1959, the fees will be increased to \$12 and \$6, respectively, to cover some direct costs previously financed from the Mexican farm labor appropriation.

The act of August 9, 1955 (69 Stat. 615), extended authority for importing Mexican agricultural workers to June 30, 1959.

Budget program.—An estimated 435,000 Mexican farm workers will be imported in 1958 and 450,000 in 1959 at an average cost of \$8.51 for each worker in 1958 and \$10.39 in 1959; \$910,600 of expenses formerly paid from salaries and expenses, Mexican farm labor program, will be charged to this fund in 1959.

Operating results and financial condition.—Receipts from operations are expected to exceed expenditures by \$880,500 in 1959. Retained earnings as of June 30, 1959, are estimated to be \$1,780,336.

The Bureau administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Act, the Defense Bases Act, the War Risk Hazards Act, certain provisions of the War Claims Act, and section 4 (c) of the Outer Continental Shelf Lands Act.

Administration of the District of Columbia Compensation Act is financed through a working fund advanced by the District of Columbia government.

1. *Disposition of compensation claims.*—Workloads are related to the volume of covered employment and the servicing of cases originating in prior years.

(a) Federal employment is estimated at 2,337,000 for 1959; on June 30, 1957, cases from prior years requiring further action numbered 40,509; the backlog in investigations was 236 cases.

WORKLOAD

	1957 actual	1958 estimate	1959 estimate
New injuries reported.....	98,094	98,000	98,000
Reopened cases.....	16,775	16,700	16,700

EMPLOYEES' COMPENSATION FUND

(Indefinite)

[Employees' compensation fund:] For the payment of compensation and other benefits and expenses (except administrative expenses) authorized by law and accruing during the current or any prior fiscal year, including payments to other Federal agencies for medical and hospital services pursuant to agreement approved by the Bureau of Employees' Compensation; continuation of payment of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the advancement of costs for enforcement of recoveries in third-party cases; the furnishing of medical and hospital services and supplies, treatment, and funeral and burial expenses, including transportation and other expenses incidental to such services, treatment, and burial, for such enrollees of the Civilian Conservation Corps as were certified by the Director of such Corps as receiving hospital services and treatment at Government expense on June 30, 1943, and who are not otherwise entitled thereto as civilian employees of the United States, and the limitations and authority of the Act of September 7, 1916, as amended (5 U. S. C. 796), shall apply in providing such services, treatment, and expenses in such cases and for payments pursuant to sections 4 (c) and 5 (f) of the War Claims Act of 1948 (50 U. S. C., app. 2012); such amount as may be required during the current fiscal year. (5 U. S. C. 785; 42 U. S. C. 1701; 50 U. S. C. 2001-3013; Department of Labor Appropriation Act, 1958.)

Appropriated (est.) 1958, \$57,600,000 Estimate 1959, \$57,000,000

Program and Financing

Appropriation (new obligational authority).....	54,760,413	57,600,000	57,000,000

Benefits are paid to civil employees of the Government disabled in the performance of duty or to their dependents, to dependents of certain reservists in the Armed Forces who died while on active duty with the Armed Forces or

while engaged in authorized training in time of peace, members of the Civil Air Patrol as authorized by the act of August 3, 1956, and to others by various extensions of the Federal Employees' Compensation Act.

For 1957 the appropriation was supplemented by reimbursements from the war claims fund for payment of claims covering employees of Government contractors and American civilians who were captured by the Japanese. For 1958 and 1959 funds for these costs are incorporated in the annual appropriation.

(a) *Manpower and employment.*—The Bureau analyzes the level and trend of nonagricultural employment, hours, earnings, and labor turnover; publishes the Occupational Outlook Handbook, and estimates manpower requirements and supply, and long-range employment and labor force trends.

(b) *Prices and cost of living.*—Publication of the Consumer Price Index for the urban wage earner and lower salaried clerical workers of the United States, for the

BUREAU OF LABOR STATISTICS—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

Nation and for 46 selected cities. Trends of primary market prices are published for 2,000 industrial and agricultural products. The Consumer Price Index is incorporated in labor-management contracts for wage-determining purposes, and indexes of primary market prices are used in escalating costs for commercial contracts. In 1959, attention will be given to providing price information necessary for improving the national economic accounts.

(c) *Wages and industrial relations.*—In this activity information is provided on wages by occupation for about 18 major industrial centers, and for about 10 selected major industries; monthly developments in industrial relations and wages for key collective bargaining situations; provisions of labor-management contracts; and work stoppages.

(d) *Housing and public construction.*—These statistics provide an essential component of the national income series, and through volume and expenditure data, a sensitive economic indicator. Comprehensive current information on the volume of new housing is published.

(e) *Measurement of productivity.*—This work consists of the preparation of annual indexes of output per man-hour, the analysis of productivity trends, and studies of automation and other technological developments. Recently emphasis is being placed on the study of adjustments to automation worked out between workers and management at the plant level. In 1959, increased emphasis will be given to providing productivity indexes for individual industries.

(f) *Industrial hazards.*—The Bureau provides quarterly and annual information on industrial injuries, and detailed analyses of the causes of injuries for selected industries. These constitute comprehensive and reliable basic data for industrial safety programs, both public and private. Special emphasis is placed on the development of a more extensive State-Federal program of injury statistics.

(g) *Foreign labor conditions.*—Summary information on labor in foreign countries is made available. This includes data on employment, wages, labor law, living costs, and current labor developments generally. Current emphasis is being placed on more adequate wage statistics.

1. *Development of programs and materials to improve women's employment opportunities and economic status.*—In 1957 the 22 million women in the labor force comprised one-third of the total labor force. In 1959, cooperating with other bureaus of the Department and outside organizations, the Bureau will emphasize employment opportunities for women in social work and in the manufacture of electronics equipment, the compilation of information on vocational training opportunities available to young women, a study of the part-time employment of women, and programs to increase the employment opportunities of older women, and to alleviate shortages of nurses, teachers, and clerical workers.

2. *Advisory services on legislation affecting women workers.*—State minimum-wage laws and orders, equal pay for comparable work, standards for hours of work and working conditions, and laws affecting women's civil and political status comprise the subject areas in which the Bureau regularly supplies technical advice and information to States and other interested parties. The 1959 program includes assistance on programs to promote the equal-pay principle, the revision of State minimum wage orders, and study of child care facilities for working mothers.

The Division obtains compliance with minimum standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce and in establishments furnishing goods to the Government.

1. *Promotion of compliance and enforcement.*—Information media are used to inform employers and employees of their rights and responsibilities under the law, with planned emphasis on developing new ways and new approaches to educate both groups. Investigations are made to correct violations and to assist employers in meeting legal requirements and workers in recovering wages due. During 1957 a total of 48,482 establishments were investigated and 181,910 employees were found to be due wages in the amount of \$18,834,134, of which employers have agreed to pay \$9,211,286. The investigation program will continue at about the same level in 1958 and 1959 with a slight decrease in the present staff.

2. *Wage standards and determinations.*—During 1958 and 1959 a total of 11 industry committees will be convened to recommend minimum wage rates under the Fair Labor Standards Act in Puerto Rico, the Virgin Islands, and American Samoa in conformance with existing law requiring review of all minimum wage rates on these islands not less than once each year. Regulations governing subminimum wages for learners, apprentices, messen-

WAGE AND HOUR DIVISION--Continued

SALARIES AND EXPENSES—Continued

gers, and handicapped workers are being constantly reexamined. It is estimated that 1,800 applications for subminimum wage certificates will be received in 1959, as compared to 2,300 in 1958. Wage determinations under the Walsh-Healey Act will be continued at the level of seven determinations in 1959.

3. *Regulations and interpretations.*—Regulations and interpretations are prepared to give effect to the Fair Labor Standards Act. Emphasis will be directed to development and revision of issuances affected by amendments to the act and changes in industry practices.

4. *Economic analysis and statistics.*—Economic research and analysis and development of statistical data, necessary in the consideration of administrative problems and legislative proposals, is provided. A minimum wage effects study is required by law to evaluate the present minimum wage and to determine the ability of employers to absorb wage increases. It will be completed in 1958 and the final report will be ready in 1959. Further studies will be conducted in 1959 to provide data for reports to the Congress.

POST OFFICE DEPARTMENT

The postal service is presently financed only in part from postal revenues. Expenditures for the postal service are specifically limited by the Congress in appropriation acts. Any operating deficit of the postal fund is made up by an appropriation from the general fund of the Treasury. For 1959, under present legislation, about 80% of the funds necessary for operation of the Department would come from users of the postal service, and the remainder would be a charge to the taxpayer.

Proposed for later transmission.—The budget estimates for 1959 include the effect of (1) proposed legislation to raise postal rates to provide an estimated increase in annual revenue of \$700 million, (2) a supplemental appropriation request of approximately \$25 million to pay increased rates for rail transportation which are now pending before the Interstate Commerce Commission, and (3) the estimated cost of proposed adjustments in pay for postal employees of \$160 million. The postal pay adjustments are not reflected in the estimates shown for the Post Office Department, but are included in the general allowance for proposed legislation in the budget along with the proposed pay raise for other nondefense civilian employees.

Mail volume.—The budget contemplates that mail volume for 1959 will increase 3.4% over 1958, reaching a total of 63.5 billion pieces of mail. This total includes over 34 billion first-class letters, 1.7 billion airmail items, 7.2 billion magazines and newspapers, 16.8 billion pieces of advertising and circular matter, 1.2 billion packages, and 2.6 billion pieces in various other categories.

Obligations.—On the basis of the above estimates of mail volume, obligations under existing legislation, excluding rail rate increases, are estimated to be \$3,421 million for 1959, compared with \$3,325 million estimated for 1958, and \$3,018 million in 1957. Most of the increase in obligations arises from (1) the continuing increase in workload caused by the Nation's economic growth, and (2) the contributions paid by the Post Office Department to the civil-service retirement fund, effective July 13, 1957, which amount to an estimated \$128 million for 1958 and \$138 million for 1959.

The average operating cost per million pieces of mail is estimated to be about \$54,000 in 1959 compared with \$51,000 in 1957. This increase results almost entirely from the contribution now required to be made to the civil-service retirement fund, and added expenditures for

capital and research. Other rising costs will be largely offset by increased efficiency.

Revenues.—Under existing laws, postal revenues in 1959 are estimated to reach \$2,745 million, an increase of \$116 million or 4.4% over 1958 and 9.9% over 1957. Among the major categories of mail, the sharpest relative increases are estimated in domestic airmail and parcel-post revenues. The higher estimate of receipts from domestic airmail results from increased volume. The higher estimate for parcel post reflects proposed rate increases which, if approved by the Interstate Commerce Commission, will result in increased revenue of \$40 million in 1959. Rates on other major categories of mail, however, are set by statute and can be changed only by congressional action.

Postal deficit.—The postal deficit is the difference between postal obligations and postal revenues. For 1957 it was \$522 million, and is estimated to be \$696 million and \$676 million for 1958 and 1959, respectively, under existing legislation. After taking into account the lag between obligations and expenditures, the net budget expenditures for the postal service (the difference between checks issued and revenues) are estimated to be \$686 million in 1958 and \$659 million in 1959. These estimates, like those shown in the following table, do not reflect the President's legislative proposals to increase postal rates and pay of postal employees or the proposed supplemental appropriation request for pending rail-rate increases.

[Dollars in millions]			
	1957 actual	1958 estimate	1959 estimate
Obligations.....	\$3,018	\$3,325	\$3,421
Increase over prior year.....	4.7%	10.2%	2.9%
Postal revenue.....	\$2,497	\$2,629	\$2,745
Increase over prior year.....	3.2%	5.3%	4.4%
Postal (operating) deficit.....	\$522	\$696	\$676
Adjustment in working capital.....	—\$4	—\$10	—\$17
Budget expenditures.....	\$518	\$686	\$659

At the levels of mail volume anticipated in 1959, the deficit will involve an average loss of \$10,600 per million pieces of mail. If the additional costs arising from civil-service retirement contributions and from increased capital and research programs are excluded for comparability, however, the average deficiency would be \$8,000 per million pieces, which is less than the comparable 1957 level of \$8,800.

Deposit funds.—Money order and postal savings funds entrusted to the postal service by the public are accounted for separately as deposit funds, and are, therefore, excluded from the budgetary tables.

POSTAL FUND

Public enterprise funds:

CONTRIBUTION TO THE POSTAL FUND

(Indefinite)

For administration and operation of the Post Office Department and the postal service, there is hereby appropriated the aggregate amount of postal revenues for the fiscal year ending June 30, [1958] 1959, as authorized by law (39 U. S. C. 786, 794a), together with an amount equal to the difference between such revenues and the total of the appropriations hereinafter specified and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General, for the following purposes, namely: (Treasury-Post Office Appropriation Act, 1958.)

Appropriated (est.) 1958, \$696,000,000

Estimate 1959, \$676,121,000

Program and Financing

Program by activities:			
Postal operations subject to appropriation (obligations):			
1. Administration, regional operation, and research.....	\$56,038,759	\$63,769,000	\$64,950,000
2. Operations.....	2,384,657,032	2,618,944,000	2,703,468,000
3. Transportation.....	448,118,928	469,981,000	476,200,000
4. Facilities.....	129,596,744	172,034,000	176,503,000
5. Judgments.....	26,541		
Total obligations.....	3,018,438,004	3,324,728,000	3,421,121,000
Postal operations not subject to annual appropriations:			
1. Purchase of stamp-embossed envelopes.....	6,690,051	8,000,000	8,000,000
2. Indemnities and claims.....	5,336,329	5,500,000	5,700,000
3. Refunds of postage.....	2,252,655	1,300,000	1,100,000
4. Judgments.....	168,576	200,000	200,000
Total nonbudget obligations.....	14,447,611	15,000,000	15,000,000
Reimbursable work for others:			
1. Administration, regional operation, and research.....	54,332	5,200	5,200
2. Operations.....	1,307,328	1,442,000	1,583,000
3. Transportation.....	13,466,593	13,468,000	13,468,000
4. Facilities.....	967,875	1,716,000	3,129,000
Total reimbursable work for others.....	15,796,128	16,631,200	18,185,200
Total program (obligations).....	3,048,681,743	3,356,359,200	3,454,306,200
Financing:			
Amounts becoming available:			
Gross postal revenue:			
Sales of postage stamps and stamped paper.....	1,085,090,059	1,131,015,307	1,174,000,000
Postage paid under permit:			
Metered.....	1,057,058,471	1,123,399,056	1,185,000,000
Nonmetered.....	206,315,109	218,087,817	226,900,000
Postage from other Government agencies: Collections for mailings accepted without prepayment.....	45,661,608	47,109,000	48,700,000
Box rent.....	26,715,972	28,382,000	29,000,000
Money order fees and related revenues.....	63,754,721	70,775,300	71,000,000
Income from Postal Savings System.....	12,484,262	11,031,520	11,000,000
Miscellaneous revenue.....	13,981,719	14,200,000	14,400,000
Total gross postal revenue.....	2,511,061,921	2,644,000,000	2,760,000,000
Advances and reimbursements from Federal departments and agencies:			
Department of Defense, transportation of military mail.....	13,466,593	13,468,000	13,468,000
Federal Communications Commission health unit.....	4,293	3,000	3,000
Department of the Interior, sale of migratory bird conservation stamps.....	139,821	134,000	134,000
Department of Justice, alien registration.....	210,281	239,000	248,000
Treasury Department, sale of savings bonds and stamps.....	652,117	675,000	801,000
Sundry departmental and agencies, communication services for agencies occupying Federal buildings operated by the Post Office Department.....	461,108	499,000	500,000
Other miscellaneous accounts.....	260,739	265,200	270,200
Total Federal departments and agencies.....	15,194,952	15,283,200	15,424,200
Non-Federal sources.....	601,176	1,348,000	2,761,000
Total advances and reimbursements.....	15,796,128	16,631,200	18,185,200
Total revenue and reimbursements.....	2,526,858,049	2,660,631,200	2,778,185,200
Operating deficit.....	521,823,694	695,728,000	676,121,000

Program and Financing—Continued

"Facilities".....		34,000	-----

The total amount requested under this heading for 1959 is \$64,950,000, an increase of \$1,181,000 compared with the cost of similar functions for 1958. No net increase in number of positions under this appropriation is requested for 1959.

1. *Executive direction.*—This activity consists of the immediate offices of the Postmaster General and Deputy Postmaster General, and headquarters office services. It also includes the philatelic promotion program (other than sales) included under the "Finance" appropriation in prior years.

2. *Administration of personnel.*—This provides for policy and functional direction of the personnel administration program affecting more than 500,000 postal employees and the personnel activities serving the headquarters staff.

3. *Legal service.*—The general counsel is legal adviser to the Postmaster General and the entire postal establishment. He is responsible for drafting proposed legislation, reports to congressional committees, and representing the Department before the Congress on legislative matters. He adjudicates and approves damage claims and certain losses claimed in postmasters' accounts. He represents the Department before regulatory agencies of Government, and in administrative proceedings under the postal fraud, lottery, and obscenity statutes. Obligations under this activity include the amount of damage claims paid.

4. *Inspection and internal audit.*—This activity is responsible for all investigative, inspection, and internal auditing functions of the Department and its field elements, pertaining to violation of the postal laws, the prevention and detection of mail loss and mistreatment, losses of Government funds and property; the audit of all postmasters' and disbursing officers' accounts and all other financial records; personnel security, civil defense, and defense mobilization programs; special and suitability investigations; and management surveys.

5. *Administration of postal operations.*—This activity covers the headquarters direction of the postal field service administered through 15 regional organizations and includes the development of policies, programs, regulations, and procedures governing such operations. In previous years funds for this activity were provided under the appropriation for "Operations."

6. *Administration of postal transportation.*—This activity covers the development of policies and programs for the transportation of mail and mail equipment and the exchange of mail with other countries and with the Territories and possessions. It administers the procurement of transportation from commercial carriers and supervises their performance. In previous years funds for this activity were provided under the appropriation for "Transportation."

7. *Administration of postal finance.*—This activity covers administration of policies and programs governing accounting, budgeting, and all other controllership functions, including the administration of the money order and postal savings systems and the postal rate research program. In previous years funds for this activity were provided under the appropriation for "Finance."

8. *Administration of postal facilities.*—This activity administers policies and programs governing the procurement, maintenance, and disposal of real property, equipment, vehicles, and supplies, including the procurement of stamps and accountable paper. It directs the operation of the supply system and exercises general procurement authority for the Department. In previous years funds for this activity were provided under the appropriations for "Facilities" and "Finance."

9. *Regional operation.*—This activity covers the direction and operation of regional and district offices. These offices are responsible for the technical direction of the

following functions at all postal field installations: Post office operations, controllership, industrial engineering, personnel activities, transportation, real estate and motor vehicle operations. In previous years the costs of this activity were carried under the appropriation for "Operations."

10. *Research and engineering.*—An industrial research and engineering program for the postal establishment is carried on, including: (1) the design, development, and testing of postal equipment and materials; (2) the development of better work methods, production measurement standards, and manpower utilization systems; and (3) recommending general location, functional design, building modifications, developing layouts, and mechanization requirements of facilities.

Estimate 1959, * \$2,703,468,000

* Includes \$90,000,000 appropriated in Public Law 85-64, approved June 28, 1957.

† Excludes \$35,906,000 for activities transferred in the estimates to "Administration, regional operation, and research," and includes \$747,000 for activities transferred to the estimates from "Facilities." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Transferred (70 Stat. 96) to—			
“Finance”.....	—100,000	—	—
“Facilities”.....	—1,991,000	—	—

This appropriation covers the operation of post offices. It also includes mail handling in transit previously accounted for under the appropriation for "Transportation" and motor vehicle operation and maintenance previously carried under the appropriation for "Facilities." The amount requested for 1959 is \$2,703,468,000, an increase of \$84,524,000 compared with the current year. This increase is caused primarily by the 3.4% increase in mail volume, and the expansion of delivery service to keep pace with the growth of urban and suburban areas.

1. *Administration of post office operations.*—This activity includes postmasters and post office supervisors.

POST OFFICES BY CLASSES—AS OF JUNE 30

	1955 actual	1956 actual	1957 actual	1958 estimate	1959 estimate
First class.....	3,427	3,626	3,681	3,743	3,803
Second class.....	6,605	6,609	6,612	6,683	6,755
Third class.....	13,224	13,095	13,134	13,163	13,188
Fourth class.....	15,060	14,185	13,585	13,073	12,616
Total post offices.....	38,316	37,515	37,012	36,662	36,362

2. *Mail handling and window service.*—This activity includes clerical employees in post offices for the handling of incoming and outgoing mail and window service to the public, including that required in contract stations. In 1957, due to shortage of funds, window service to the public was temporarily curtailed. This had no effect on the mail volume received and therefore served to inflate temporarily the average pieces handled per man-year. The following table shows man-years of employment for this activity compared with total mail volume. Since a portion of the mail is distributed in transit and at terminals, the employment under the mail-handling-in-transit activity has also been shown and combined with the employment under this activity in arriving at average pieces per clerk man-year.

CURRENT AUTHORIZATIONS OUT OF POSTAL FUND—Continued

OPERATIONS—Continued

COMPARISON OF TOTAL CLERICAL EMPLOYMENT AND WORKLOAD

	Man-years of employment		Pieces of mail (millions)	Average pieces per clerk man-year
	At post offices	In transit

1959 (estimate).....	222,619	40,448	63,530	241,497

3. *Collection and delivery.*—This activity covers the collection and delivery of mail by city delivery carriers, as well as the delivery of mail by special delivery messengers and rural carriers. It includes both collection and delivery routes, mixed business and residential routes, and parcel post and relay routes. The funds requested will provide for new city delivery routes in the expanding suburban areas and at new city delivery offices.

EMPLOYMENT OF CARRIERS AND SPECIAL DELIVERY MESSENGERS AND NUMBER OF ROUTES SERVED

	Man-years of employment	Number of full-time equivalent routes		
		Residential	Business	Rural
1957.....	186,286	89,835	7,539	31,615

1959 (estimate).....	200,734	99,280	7,650	31,403

4. *Custodial service.*—This activity covers the cleaning of Federal buildings under the jurisdiction of the Post Office Department and leased postal space.

5. *Mail handling in transit.*—This activity covers the processing and distribution of mail at terminals, railway post offices, highway post offices, airport mail facilities, and at short-haul truck terminals. The man-years of employment in this activity are shown in the table of clerical employment in the mail-handling and window-service activity above.

6. *Vehicle service.*—This activity covers operation and maintenance of Government-owned vehicles and rental of contract vehicles for use in the collection and delivery of mail.

Transferred (70 Stat. 96) from—"Finance".....	600,000	-----	-----
"Facilities".....	2,000,000	-----	-----

This appropriation covers the transportation of mail by air, land, and water. The handling of mail in transit and the administration of the transportation program previously carried under this heading have been transferred respectively to the appropriations for "Operations" and "Administration, regional operation, and research." The current year contains \$9 million partial cost of anticipated railroad rate increase for western and southern railroads; no funds are provided for this purpose in this appropriation estimate for 1959 pending settlement of the cases. Upon settlement additional funds will have to be provided and a supplemental for this purpose is included under proposed for later transmission. The amount requested for 1959 is \$476,200,000, an increase of \$6,219,000 compared with the current year. The major portion of the increase is for the anticipated additional volume of mail to be transported by rail and air, together with some expansion of the highway transportation services.

1. *Water transportation.*—This covers transportation by powerboat and steamship, and the handling and stevedoring at ports in the United States and its Territories.

DATA RELATING TO TRANSPORTATION BY OCEAN VESSELS

	Pounds (thousands)	Payments to carriers	Average per pound (cents)
1955.....	185,750	\$9,447,128	5.09
1956.....	193,020	9,650,991	5.00
1957 (estimate).....	205,179	10,612,304	5.17
1958 (estimate).....	214,125	11,134,000	5.20
1959 (estimate).....	226,180	11,761,000	5.20

2. *Truck transportation.*—Star-route service is provided between post offices not afforded other means of transportation, and for supplemental service at the offices where there is not adequate mail supply.

DATA RELATING TO TRANSPORTATION BY STAR ROUTE

	Number of routes	Scheduled miles of travel (thousands)	Annual obligations	Average per mile (cents)
1955.....	11,306	245,215	\$40,025,621	16.32
1956.....	10,852	249,321	41,071,541	16.47
1957.....	10,565	256,792	42,492,770	16.55
1958 (estimate).....	10,340	265,149	43,762,000	16.50
1959 (estimate).....	10,215	275,825	44,974,000	16.31

Short-haul truck service is provided for mail diverted from railroads when lower rates or improved service will result. The expansion of this service is the result of a long-range program to transport mail by the most economical and expeditious means.

DATA RELATING TO SHORT-HAUL TRUCK SERVICE

	Number of routes	Scheduled miles of travel (thousands)	Annual obligations	Average per mile (cents)
1955.....	589	41,809	\$9,352,348	22.37
1956.....	633	47,241	10,531,732	22.29
1957.....	668	51,826	12,082,645	23.31
1958 (estimate).....	718	57,655	13,437,000	23.31
1959 (estimate).....	768	63,828	14,971,000	23.46

Mobile highway post offices provide mail distribution in contract vehicles where adequate train service does not exist. The estimate provides for 20 additional contract routes to be established where present service does not meet the demands for efficient and economical mail transportation.

DATA RELATING TO CONTRACT HIGHWAY POST OFFICE SERVICE

	Number of routes	Scheduled miles of travel (thousands)	Annual obligations	Average per mile (cents)
1955.....	126	14,267	\$3,290,943	23.07
1956.....	152	16,908	4,724,335	27.94
1957.....	170	18,564	5,173,343	27.87
1958 (estimate).....	190	20,385	5,849,000	28.69
1959 (estimate).....	210	22,136	6,500,000	29.36

3. *Rail transportation.*—This covers transportation by rail in continental United States, Alaska, and Puerto Rico. The estimate provides for increased mail volume, offset in part by further diversion of short hauls from rail to truck.

DATA RELATING TO TRANSPORTATION BY RAILROAD

	Pieces of mail (millions)	Obligations (thousands)	Average cost per piece (cents)
1955.....	43,429	\$297,166	0.68
1956.....	43,769	293,345	.67
1957.....	45,530	292,138	.64
1958 (estimate).....	47,307	296,290	.63
1959 (estimate).....	48,857	302,706	.62

¹ Excludes \$9 million partial cost of railroad rate increases.

4. *Air transportation.*—This covers transportation between points within the United States and Alaska, to United States Territories and possessions, and to foreign countries. Payments to carriers cover only compensation for service; any subsidy is paid by the Civil Aeronautics Board.

DATA RELATING TO DOMESTIC AIRMAIL CARRIERS

	Pieces of mail (thousands) ¹	Payments to carriers ¹	Average cost per piece (cents)
1955.....	1,733,459	\$33,719,567	1.95
1956.....	1,777,869	35,134,298	1.98
1957.....	1,897,078	37,824,794	1.99
1958 (estimate).....	2,017,015	40,304,000	2.00
1959 (estimate).....	2,145,260	42,958,000	2.00

¹ Includes preferential mail.

DATA RELATING TO FOREIGN AIRMAIL SERVICE

	Pieces of mail (thousands) ¹	Payments to carriers ¹	Average cost per piece (cents)
1955.....	158,330	\$14,827,327	9.36
1956.....	178,095	14,425,692	8.10
1957.....	189,082	18,040,887	9.54
1958 (estimate).....	193,950	20,348,000	10.49
1959 (estimate).....	205,367	21,852,000	10.66

¹ Excludes military airmail volume and amounts for which the Department will be reimbursed.

5. *Terminal and transportation charges by foreign countries.*—Payments are made to foreign countries in accordance with international postal conventions or agreements, for transportation and handling of transit mails of United States origin.

“Finance” (71 Stat. 39).....		8,689,000	

This appropriation covers the purchase of vehicles and other equipment, leasing of space, maintenance, and improvement of federally owned postal buildings and the procurement of supplies and stamps. Operation and maintenance of motor vehicles and the administration of the “Facilities” program previously carried under this head have been transferred respectively to the appropriations for “Operations” and “Administration, regional operation, and research.” The purchase of stamps and accountable paper was transferred from “Finance.” The amount requested for 1959 is \$176,503,000, an increase of \$4,469,000 compared with the current year. The increase is under the activity for buildings operating expense; the other activities reflect decreases.

1. *Buildings operating expense.*—This activity covers rent, utilities, fuel, communications, and building supplies paid for by the Department in connection with postal installations throughout the United States, its Territories and possessions.

RENTED BUILDINGS INCLUDING GARAGES

	Number	Annual rental	Interior square feet
June 30, 1956.....	23,397	\$32,767,000	36,629,000
June 30, 1957.....	23,544	34,989,225	40,277,000
June 30, 1958 (estimate).....	23,739	37,702,000	43,321,000
June 30, 1959 (estimate).....	23,927	40,317,000	46,326,000

2. *Supply services.*—Under this activity is included the procurement, warehousing, and distribution of supplies used by the postal service; manufacture, storage, and repair of mail bags, locks, and other specialized mail equipment items; and the rental of business machines.

3. *Capital program.*—This activity covers the procurement of equipment including motor vehicle and garage equipment, alterations and improvements to postal facilities including large-scale improvement projects. This program for 1959 includes approximately \$10 million for the continuation of the light, color, and ventilation program and approximately \$20 million for the expansion of the installation of modern mail-handling equipment in major facilities and other building improvement. Because of the successful experimental program to mechanize city carriers’ routes, funds are included for the purchase of 2,400 additional “mailsters” and 500 light-weight “sit-stand” trucks. Another 3,000 trucks are being purchased as replacements.

RAILROAD RATE INCREASES

Under existing legislation, 1959.—A supplemental of \$25 million is anticipated to pay costs of the railroad rate increases now pending before the Interstate Commerce Commission.

POSTAL RATE INCREASE

Under proposed legislation, 1959.—Postal rate increase legislation (H. R. 5836) has been enacted by the House of Representatives which would readjust postal rates and

provide approximately \$526 million in 1959. Legislation amending H. R. 5836 will be proposed to increase revenues by approximately \$700 million in 1959.

GENERAL PROVISIONS—POST OFFICE DEPARTMENT

SEC. 202. During the enrrnt fiscal year, and under such regulations as may be prescribed by the Postmaster General, not to exceed an aggregate of \$100,000 shall be available from any funds available to the Post Office Department, as may be determined by him, for expenses necessary to enable the Department to participate in Federal or non-Federal training programs and for necessary expenses of training officers and employees (both departmental and field postal services) in such subjects or courses of instruction in either Federal or non-Federal facilities as will contribute to the

improved performance of their official duties: *Provided*, That not more than forty-five of such officers and employees may participate in any training program in a non-Federal facility which is of more than ninety days duration.

SEC. 203. Not exceeding \$22,000,000 of appropriations in this title shall be available for the repair, alteration, and improvement of the mail equipment shops at Washington, D. C., and for payment to the General Services Administration of such additional sums as may be necessary for the repair, alteration, preservation, renovation, improvement, and equipment of federally owned property used for postal purposes of which not to exceed \$20,000,000 shall be available for improving lighting, color, and ventilation for the specialized conditions in space occupied for postal purposes.

SEC. 204. Hereafter, payments for damage to Government-owned personal property under the custody and control of the Post Office Department shall be credited to applicable appropriations and shall be available for meeting the costs of repairing such damaged property.

SEC. 205. Hereafter, payments made by contractors for services performed for them by postal personnel, and for fines, penalties, and refunds, resulting from their nonperformance or inadequate performance under contracts with the Post Office Department, shall be credited to applicable appropriations and shall be available for payment of such postal personnel or for meeting the cost of other contracts. (Treasury-Post Office Appropriation Act, 1958.)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

POST OFFICE DEPARTMENT

	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
Postal fund						54	\$1,000	2 hired cars and 2 Government-owned cars are used by the Postmaster General, the assistant postmasters general, and by officials of all bureaus of the Department for the transaction of official business. All other cars are used in the field for local transportation at the largest post offices for supervision purposes.

DEPARTMENT OF STATE

Expenditures of the Department of State for 1959 are estimated to be \$228 million, the same as in 1958, but recommended new obligational authority for 1959 of \$207 million is \$6 million less than in 1958 and \$23 million below the actual 1957 amount. Expenditures will exceed new obligational authority in 1958 and 1959 mainly because of continuing work on the new State Department building which was largely appropriated for in 1957.

The conduct of foreign affairs requires 87% of the new obligational authority recommended for the Department in 1959. Exchange of persons is the next largest activity, and cooperation with neighboring countries in conservation and development of natural resources accounts for the remainder.

Conduct of foreign affairs.—The budget contemplates that operating expenses will rise in 1959 in both the departmental and the foreign service. Three factors account for this estimated rise. First, prices and wage rates overseas have increased. Second, additional costs are resulting from larger passport and consular workloads. Third, the budget provides for strengthening the foreign service through the establishment of new posts, particularly in Africa; through improved political and economic reporting; and through better supporting services. Increased funds are recommended for training, representation allowances, employee benefits authorized by the Congress, and travel to international conferences.

The budget also provides an increase in 1959 for contributions to international organizations. This is required by the establishment of the new International Atomic Energy Agency and by additional amounts which various other organizations have voted for their budgets, to which the United States pays its share.

Supplemental appropriations are anticipated in 1958 for consular work resulting from recent amendments to the Immigration and Nationality Act, for participation

in the International Atomic Energy Agency, and for contributions to the United Nations Emergency Force in the Near East.

Economic and technical development. Work on the Rama Road in Nicaragua will continue in 1959 without any new obligational authority being required.

Foreign information and exchange activities.—Exchange of leaders, professors, students, and specialists with other nations will continue at the 1958 level, as will special exchanges of persons and grants of books and educational equipment with Finland and India. The latter are financed from repayment of debts. A special appropriation in 1958 for use of Israeli pounds for a scientific, educational, and cultural grant to Israel will not recur. In 1959 the Department plans to use an increased amount of foreign currencies, received from the sale of surplus agricultural commodities, for educational exchange and for grants to American-sponsored schools abroad. The activities financed from these currencies are in addition to those financed by appropriation of dollars.

Conservation and development of land and water resources.—The 1959 budget recommendation for the International Boundary and Water Commission will permit the continuation of construction of the Anzalduas dam on the lower Rio Grande River, to which Mexico contributes. The budget also provides for the completion of the survey, being conducted jointly with Canada, of Passamaquoddy tidal power.

Conservation and development of fish and wildlife.—Contributions to international fisheries commissions to regulate fishing and preserve fish stocks in international waters will be approximately the same as in 1958, with continued emphasis on eradication of the sea lamprey in the Great Lakes.

ADMINISTRATION OF FOREIGN AFFAIRS

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses.] For necessary expenses of the Department of State, not otherwise provided for, including expenses authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801-1158), not otherwise provided for; expenses necessary to meet the responsibilities and obligations of the United States in Germany (including those arising under the supreme authority assumed by the United States on June 5, 1945, and under contractual arrangements with the Federal Republic of Germany); salary of the United States member of the Board for the Validation of German Bonds in the United States at the rate of \$17,100 per annum; expenses of the National Commission on Educational, Scientific, and Cultural Cooperation as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U. S. C. 287e, 287g, 287r); expenses of attendance at meetings concerned with activities provided for under this appropriation; purchase (not to exceed **[fifteen]** sixteen, of which three shall be for replacement only) and hire of passenger motor vehicles; printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of uniforms; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; dues for library membership in organizations which issue publications to members only, or to members at a price lower than the others; employment of aliens, by contract for services abroad; refund of fees erroneously charged and paid for passports; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; rent and expenses of maintaining in Morocco institutions for American convicts and persons declared insane by any consular court, and care and transportation of prisoners and persons declared insane; expenses, as authorized by law (18 U. S. C. 3192), of bringing to the United States from foreign countries persons charged with crime; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, and (3) preparation of special maps, globes, and geographic aids; **[\$98,088,500] \$105,000,000**, of which not less than \$9,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided*, That passenger motor vehicles in possession of the Foreign Service abroad may be replaced in accordance with section 7 of the Act of August 1, 1956 (70 Stat. 891) and the cost, including the exchange allowance, of each such replacement shall not exceed **[\$3,000] \$3,500** in the case of the chief of mission automobile at each diplomatic mission (except that eleven such vehicles may be purchased **[at not to exceed \$5,000 each]** within such maximum limitation on cost for each vehicle as may be authorized by the Secretary of State in lieu of any maximum limitation on cost which may be otherwise provided by law) **[and \$1,500 in the case of all other such vehicles except station wagons]**. (*Department of State Appropriation Act, 1958.*)

Appropriated 1958, **\$98,088,500** Estimate 1959, **\$105,000,000**

Total reimbursable obligations.....	50,842,829	51,400,000	53,600,000

1. *Executive direction and policy formulation.*—Increases are requested for developing the "Atoms for Peace" program, the Legal Adviser's office, and expanded intelligence collection and analysis.

2. *Conduct of diplomatic and consular relations with foreign countries.*—This includes representation of the United States and its citizens abroad, political and economic negotiations and reporting, issuance of passports and visas, and other services both in the United States and abroad. The estimate anticipates strengthening the Service through provision for mandatory local wage and price increases overseas, and opening 12 new posts including 6 in Africa. Increased training and employee benefits as authorized by the Congress will contribute to a more effective Foreign Service. Staff increases are requested for improved political and economic reporting and supporting services, and for increased consular workloads, one of which is the rise in travel abroad, as reflected in the anticipated increase in passport applications in the United States:

1956 actual	1957 actual	1958 estimate	1959 estimate
560,711	564,397	690,000	752,000

A 1958 supplemental appropriation is forecast below for administration of the revised Immigration and Nationality Act.

3. *Conduct of diplomatic relations with international organizations.*—Strengthening of the Department's staff in this area results from the expanding membership of international organizations such as the United Nations and the increasing number of issues dealt with by the organizations.

4. *Domestic public information and liaison.*—This provides for informing the American public on international policies and also keeping the Department informed on American attitudes relative to foreign policy and issues.

5. *Central program services.*—These provide personnel and physical security measures, translating and interpreting services, and the coordination of governmental foreign reporting requirements.

6. *Administrative and staff activities.*—This includes administration of a global communications system for all civilian activities of the Government. The increased tempo of diplomatic activity and the increase in the

The object of the foreign buildings program is to provide consolidated office space to house the Foreign Service and other agencies of the United States Government abroad, and living quarters for American employees in localities where suitable facilities are not available. Through this program the Department has acquired real property valued in excess of \$150 million, consisting of some 152 office buildings, 128 principal officer residences, 173 resi-

dences for senior officers and attachés, and 2,019 staff living units. Since 1946, the program has been financed primarily through the purchase of foreign currency credits held by the Treasury Department resulting from lend-lease settlements, sale of surplus war property, and other sources. This program also finances property leases of 10 years or more (shorter leases are included in "Salaries and expenses" above), procurement of furniture and furnishings, and repair, maintenance, and operating costs of these facilities.

The purpose of the program for acquisition and construction is generally to replace outmoded or otherwise unsatisfactory Government-owned or leased office space. Such space is replaced with structures that are designed specifically to meet the particular needs of the Foreign Service and other overseas Government operations both from the standpoint of conducting efficient operations and of providing adequate security protection. In addition, housing is provided American employees in localities where housing either is not available or is substandard in relation to American living standards.

Along with the 1957 budget the Department presented to the Congress a 10-year buildings program estimated to require approximately \$200 million, principally foreign currency holdings of the United States Treasury. Of this amount about \$100 million is for operation, maintenance, repair, and servicing costs for present property holdings and for those being acquired, and about \$100 million is for acquiring new office and housing facilities. The status of the latter program is as follows:

PROJECTED STATUS OF THE 1957-65 FOREIGN BUILDINGS PROGRAM THROUGH JUNE 30, 1959

[Amounts stated in thousands of U. S. dollars]

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

[Emergencies in the Diplomatic and Consular Service:] For expenses necessary to enable the Secretary of State to meet unforeseen emergencies arising in the Diplomatic and Consular Service, to be expended pursuant to the requirement of section 291 of the Revised Statutes (31 U. S. C. 107), \$1,000,000. (Department of State Appropriation Act, 1958.)

Appropriated 1958, \$1,000,000

Estimate 1959, \$1,000,000

Program and Financing

Unforeseen emergencies (total obligations).....	\$1,452,357	\$1,000,000	\$1,000,000
Financing:			
Unobligated balance no longer available.....	272,643	-----	-----
Appropriation (new obligatory authority).....	1,725,000	1,000,000	1,000,000

This is used for relief and repatriation loans to United States citizens abroad and for other emergencies of the Department. Repayments of loans are deposited in miscellaneous receipts of the Treasury. In 1957 these funds were used for the evacuation of Government employees, their dependents, and other American citizens from the scene of hostilities in the Middle East.

Funds included in this item were previously appropriated to Administrative expenses, Mutual Security Act, and were allocated to the Department of State to reimburse accounts which provide program policy review, and services to the United States regional office, Paris. The Mutual Security Act of 1956 provided for appropriating these funds directly to the Department of State. The 1959 request will be transmitted later as a part of the Mutual Security appropriation bill and appears below.

Appropriation (new obligational authority).....	44,920,000	2,500,000	-----

This appropriation provides for remodeling the existing main building of the Department of State and constructing an addition. The completed project will accommodate in one building the present components of the Department, including the International Cooperation Administration. Contracts have been awarded for basic construction and remodeling, and the contract completion date is April 12, 1960. It is expected that the project can be completed within funds already appropriated, at a total cost of \$49.2 million.

The United States contributes its share of the expenses of the United Nations and 7 of its specialized agencies, 7 inter-American organizations, 5 regional organizations, and 11 other organizations including for the first time the International Atomic Energy Agency in which the United States has accepted membership to promote the President's proposals with regard to the peaceful uses of atomic energy.

The growing role of international organizations in world affairs is accompanied by added responsibilities. Along with the costs of the new responsibilities, there are higher operating costs.

The estimated increase for the United Nations is largely accounted for by two nonrecurring items, the Conference on Law of the Sea and the Second Conference on Peaceful Uses of Atomic Energy, plus increases in staff costs, offset by a reduction from 33.3% to 32.5% in the assessment which the United States pays. A supplemental is anticipated in 1958 for the United States share of the United Nations Emergency Force in the Middle East. It appears below.

Other major contribution increases are for: (1) the International Civil Aviation Organization, to keep pace with modern aviation requirements; (2) the World Health Organization, to meet the need in certain areas of the world for improved health techniques; (3) the Food and Agriculture Organization, to meet the desire of producers throughout the world to increase the crop yield through the introduction of improved agricultural practices; and (4) the Organization of American States, to put into effect some of the programs recommended by the Inter-American Committee of Presidential Representatives.

The United States is represented at certain international organizations by missions to insure presentation of United States policy, to provide continuous reporting, and to maintain contacts with international secretariats and other delegations. The 1959 appropriation includes furnishings and equipment for new office space to be occupied by the mission to the United Nations and for the financing of the new mission to the International Atomic Energy Agency which is being provided for in 1958 by a supplemental estimate under "International contingencies" proposed for later transmission and appears below. The general increase of the activities of the United Nations, plus enlargement of its membership from 60 to 81 nations, have expanded the workload of the mission.

This appropriation provides for United States participation in certain scheduled and recurring international activities and for emergency conferences and other activities arising in the conduct of foreign affairs. This includes participation in: (1) international conferences; (2) special missions; (3) new or temporary international organizations, including resident United States missions at the headquarters of certain international organizations and contributions to those organizations. The additional amount requested is primarily to finance participation in the following international conferences and meetings: Peaceful Uses of Atomic Energy, Biennial General Conference of UNESCO, and certain international telecommunication groups.

A supplemental request is proposed for later submission to provide for participation in 1958 in the new International Atomic Energy Agency. It appears below.

Under existing legislation, 1958.—The supplemental appropriation would provide for first year's participation in the activities of the International Atomic Energy

Agency. The continuing participation will be financed under "Missions to international organizations."

INTERNATIONAL COMMISSIONS

Current authorizations:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

The Commission consists of a United States section, with headquarters at El Paso, Tex., and a Mexican section, with headquarters at Ciudad Juarez, Chihuahua, and has the status of an international body. It was created in 1889 by the United States and Mexico to provide a practical means for solving mutual boundary problems.

For expenses necessary to enable the United States to meet its obligations under the treaties of 1884, 1889, 1905, 1906, 1933, and 1944 between the United States and Mexico, and to comply with the other laws applicable to the United States Section, International Boundary and Water Commission, United States and Mexico, including operation and maintenance of the Rio Grande rectification, canalization, flood control, bank protection, water supply, power, irrigation, boundary demarcation, and sanitation projects; detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); Rio Grande emergency flood protection; expenditures for the purposes set forth in sections 101 through 104 of the Act of September 13, 1950 (22 U. S. C. 277d-1-277d-4); purchase of [four] three passenger motor vehicles for replacement only; purchase of planographs and lithographs; uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U. S. C. 5); as follows: (Department of State Appropriation Act, 1958.)

SALARIES AND EXPENSES

[Salaries and expenses.] For salaries and expenses not otherwise provided for, including examinations, preliminary surveys, and investigations, \$505,000. (Treaties of Feb. 2, 1848, Dec. 30, 1853, Nov. 12, 1884, Mar. 1, 1889, Mar. 20, 1905, May 21, 1906, Feb. 1, 1933, Feb. 3, 1944; U. S. C. 277-277e; Act of Sept. 13, 1950, Public Law 786; Department of State Appropriation Act, 1958.)

CONSTRUCTION

【Construction:】 For detailed plan preparation and construction of projects authorized by the Convention concluded February 1,

INTERNATIONAL COMMISSIONS—Continued

Current authorizations—Continued

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO—Continued

CONSTRUCTION—continued

1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended (22 U. S. C. 277-277f), August 29, 1935 (49 Stat. 961), June 4, 1936 (49 Stat. 1463), June 28, 1941 (22 U. S. C. 277f), September 13, 1950 (22 U. S. C. 277d-1-9), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, [\$300,000]

\$1,000,000, to remain available until expended: *Provided*, That no expenditures shall be made for the lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: *Provided further*, That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the costs of said dam as shall have been allocated to such purposes by the Secretary of State. (*Department of State Appropriation Act, 1958.*)

Appropriated 1958, \$300,000

Estimate 1959, \$1,000,000

Program and Financing

	Costs to this appropriation					Analysis of 1959 financing			Appropriation required to complete

Financing:									
Unobligated balance brought forward			-4,774,944	-3,961,499	-1,300,000				
Unobligated balance carried forward			3,961,499	1,300,000					
Appropriation (new obligational authority)				300,000	1,000,000				

All construction activities of the United States section of the Commission are financed from this appropriation.

1. *Rio Grande dams.*—Construction of Falcon Dam is functionally complete; only miscellaneous cleanup work remains. The land-acquisition program under the jurisdiction of the Department of Justice will continue through 1958. An engineering feasibility report is currently being prepared for the Diablo Dam and Reservoir, the second major international storage structure contemplated by the 1944 water treaty. These operations are financed from unobligated balances of prior-year funds.

2. *Lower Rio Grande flood control.*—The appropriation of \$1,000,000 will provide additional funds for construction of Anzalduas Dam as a part of the lower Rio Grande flood control project. The dam is designed to effect equitable division of floodwaters from the river to floodways on each side of the river. Construction of the dam began in March 1956. The United States share of the total cost of the dam and related works is estimated to amount to \$6,720,354.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)	\$1,322	\$414		
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	96,311	118,432	\$2,142	
Equipment (acquisition value of facilities used on projects, less depreciation charged to project costs)	129,949	89,458	6,840	
Total selected resources at end of year	227,582	208,304	8,982	
Selected resources at start of year (-)		-227,582	-208,304	-\$8,982
Costs financed from obligations of other years, net (-)		-19,278	-199,322	-8,982

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For expenses necessary to enable the President to perform the obligations of the United States pursuant to treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448), and February 24, 1925 (44 Stat. 2102), the treaty between the United States and Canada signed February 27, 1950, including stenographic reporting services by contract; hire of passenger motor vehicles; [\$330,000] \$325,000, to be disbursed under the direction of the Secretary of State, and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; and special and technical investigations in connection with matters falling within the Commission's jurisdiction: *Provided*, That transfers of funds may be made to other agencies of the Government for the performance of work for which this appropriation is made.

International Boundary Commission, United States, Alaska, and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty, not to exceed \$8 per day each (but not to exceed \$5 per day each when a member of a field party and subsisting in camp); hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear. (*Department of State Appropriation Act, 1958.*)

Appropriated 1958, \$330,000

Estimate 1959, \$325,000

These funds are used for payment of the United States share of the expenses of:

1. *The International Boundary Commission.*—This Commission keeps the United States-Canadian boundary marked in accordance with existing treaties. It also maintains boundary vistas by periodic tree cutting.

2. *The International Joint Commission.*—This Commission performs studies of United States-Canadian border matters, such as investigation of water and smoke pollution, done in conjunction with the Public Health Service, and gathering stream flow data, undertaken in cooperation with Geological Survey. It also acts to insure appropriate apportionment of international waters and, upon referral, investigates and makes recommendations for remedial action.

PASSAMAQUODDY TIDAL POWER SURVEY

For expenses necessary to carry out the provisions of the Act of January 31, 1956 (Public Law 401), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but not to exceed ten temporary employees at any one time, at rates not to exceed \$50 per diem for individuals; hire of passenger motor vehicles; and expenses of attendance at meetings concerned with the purpose of this appropriation; \$1,344,000 \$616,000, to remain available until expended. (Department of State Appropriation Act, 1958.)

Appropriated 1958, \$1,344,000

Estimate 1959, \$616,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate

Unobligated balance carried forward.....	67,838	30,000	
Appropriation (new obligational authority).....	935,000	1,344,000	616,000

This appropriation is to complete a survey by the International Joint Commission as to the economic feasibility of a tidal power project at Passamaquoddy Bay, situated between Maine and New Brunswick Province, Canada. It is the purpose of the survey to determine (1) the cost of construction, (2) whether or not such cost would allow hydroelectric power to be produced at a reasonable price, and (3) what contribution such project would make to the national economy and defense.

Three U. S. Government agencies are participating. The Corps of Engineers is investigating powerplant construction and location requirements. The Federal Power Commission, together with the Corps of Engineers, is studying the potential power market and transmission problems. The Fish and Wildlife Service, in cooperation with the Government of Canada, is determining potential effect on fisheries in the area. It is planned to complete the survey in 1959 at a total cost of \$2,895,000.

These funds cover the United States share of the expenses of seven international fisheries commissions in which it participates. The purpose of these commissions is to determine and undertake measures necessary for the preservation and expansion of fishery stocks.

A new feature of the Great Lakes lamprey control program in 1959 will be the use of specific toxicants which kill lampreys and lamprey larvae. The toxicants, in conjunction with stream barriers used to prevent the predator lamprey from spawning, should hasten the achievement of effective control.

In 1958 restoration of the pink salmon fishery was started.

	20,000,000	20,800,000	20,800,000

The primary objective of the program is the promotion of United States foreign policy through the exchange of key persons between the United States and over 80 foreign countries in the fields of teaching, study, research, professional and governmental observation, lecturing, and the acquiring of specialized practical experience. Assistance is provided also to American-sponsored schools abroad and to some private exchange projects.

In addition to the dollars appropriated for this program, a portion of the foreign currencies derived from sales abroad of surplus agricultural commodities is made available to finance exchanges of persons. The total resources thus available are shown in the following table:

	1957 actual	1958 estimate	1959 estimate
Appropriated funds.....	\$19,988,033	\$20,800,000	\$20,800,000
Foreign currencies generated by surplus commodity sales ¹	937,200	3,505,733	6,325,000
Total.....	20,925,233	24,305,733	27,125,000

¹ These foreign currencies are set forth in special schedules below.

These funds provide grants for United States and foreign participants by categories, as follows:

	1957 actual	1958 estimate	1959 estimate
Foreign grantees:			
Students.....	1,980	2,177	2,111

1. *Educational exchange fund, payments by Finland, World War I debt.*—Any sums paid by the Republic of Finland to the United States as interest on, or principal of, the debt incurred under the act of February 25, 1919, are credited to this fund to finance the educational exchange of persons between the United States and Finland and the purchase of books and equipment for the educational system of Finland. During 1957 the exchange of 37 Finns was financed in full from this fund and \$6 grants to Finns and Americans under the Fulbright program were supplemented. The amount of \$166,078 was used to purchase books and equipment (63 Stat. 630).

2. *Educational fund, interest payments by the Government of India.*—Interest payments up to cumulative total of \$5 million on loans made to India are available for educational exchange of persons and educational materials. As of June 30, 1957, \$2,394,659 had been obligated for this purpose (65 Stat. 71).

The Rama Road, being constructed pursuant to a 1942 agreement between the United States and Nicaragua, will connect the east river port of Rama, Nicaragua with the Inter-American Highway, at San Benito, Nicaragua, 158 miles away. Work has been completed for 108 miles. Prior year funds are available in 1959 for the continuation of this work. Additional funds will be required in subsequent years to complete the United States commitment on this project and authorizing legislation is being requested.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 102. Appropriations under this title for "Salaries and expenses", "International contingencies", and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files.

SEC. 103. No part of any appropriation contained in this title shall be used to pay the salary or expenses of any person assigned to or serving in any office of any of the several States of the United States or any political subdivision thereof.

SEC. 104. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

SEC. 105. It is the sense of the Congress that the Communist Chinese Government should not be admitted to membership in the United Nations as the representative of China.

SEC. 106. The Secretary of State, under such regulations as he may prescribe, may pay the cost of transportation to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects. (*Department of State Appropriation Act, 1958.*)

GENERAL PROVISIONS

SEC. 701. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not heretofore authorized by the Congress.

SEC. 702. No part of any appropriation contained in this Act shall be used to pay any expenses incident to or in connection with participation in the International Materials Conference. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1958.*)

TREASURY DEPARTMENT

The 1959 recommendations for new obligational authority for the Treasury Department total \$8.6 billion. Of this amount, 91% is for interest payments, which are not subject to annual budgetary control. Federal financial management makes up 5% of the total. The largest part of the remainder, 3%, is for the Coast Guard.

Total new obligational authority and expenditures will be slightly lower in 1959 than in 1958. Recommendations for the operating programs have been held to the 1958 level. No funds have been requested for major new construction. The budget anticipates that substantial increases in workload will be met by increased efficiency through the adoption of electronic data processing equipment and through continued improvement in operating techniques.

Interest.—Payments of interest on the public debt, on refunds of receipts, and on uninvested trust funds are financed by permanent appropriations which do not require annual congressional action. These expenditures are estimated to be about the same in 1959 as in 1958.

Promotion of water transportation.—The new obligational authority requested for 1959 for the Coast Guard is about the same as the amount enacted for 1958. Expenditures in 1959, however, are estimated to decline from 1958 and to be less than the new obligational authority for both 1958 and 1959, primarily because new aircraft on order will not be delivered until the fiscal year 1960.

Federal financial management.—The budget anticipates that improved equipment and techniques in the financial management activities of the Treasury will make possible the meeting of higher workloads without additional cost. In fact, somewhat less new obligational authority is requested for 1959 than for 1958. The Bureau of Accounts will write a substantially larger number of checks at a

lower unit cost by using electronic equipment. Adoption of the punch card savings bond, together with electronic recording of savings bond transactions, will develop substantial savings in operations of the Bureau of the Public Debt. The Office of the Treasurer has completed its program to install electronic equipment for clearing checks and reconciling accounts of disbursing officers. The Internal Revenue Service and the Bureau of Customs will also meet higher workloads through improved efficiency.

Protective services and alien control.—The budget provides about the same amounts for 1959 as for 1958 for the Secret Service and the Bureau of Narcotics to enforce the narcotics laws, suppress counterfeiting, and investigate check and bond forgeries.

Labor and manpower.—The receipts from the Federal unemployment tax are used to pay grants to the States for the administrative expenses of the employment service and the unemployment compensation program. These expenditures are made by the Department of Labor, and are discussed in that chapter of part II of the budget. Receipts in excess of amounts necessary for administrative expenses are transferred to the unemployment trust fund to help States pay claims, and are reflected as an expenditure of the Treasury. The decrease from 1958 to 1959 primarily reflects higher grants to States.

Other aids to business.—The Reconstruction Finance Corporation was abolished as of June 30, 1957, by Reorganization Plan No. 1 of 1957, and the assets were transferred for final liquidation to the General Services Administration, the Housing and Home Finance Agency, the Small Business Administration, and the Treasury Department. Net receipts from liquidation of the assets transferred to Treasury are estimated to be \$14.6 million in 1959, an increase of more than \$4 million over 1958.

Appropriation (adjusted).....	2,900,000	3,099,980	3,068,000

The Office of the Secretary aids the Secretary in the direction and administration of the Department.

2. *Administration and coordination of legal services.*—The general counsel, as the chief law officer of the Department, administers and coordinates its legal service. This activity provides service for organizational units which do not maintain legal staffs, and supervision of the legal activities of the other bureaus.

4. *Operation and maintenance of Treasury buildings.*—Services are provided for the main Treasury Building and its annex.

5. *Employee health program.*—Four health units are operated for Treasury employees in Washington, D. C.

Total financing.....	-----	-----	-----

The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development and the subscription of \$3,175 million toward its total capital of \$9,100 million.

The United States paid the first 20% of its subscription in cash and non-interest-bearing, nonnegotiable notes, amounting to \$635 million. The remaining 80% amounting to \$2,540 million will not be called unless required to meet the Bank's obligations. Calls on unpaid subscriptions must be a uniform percentage by member countries of the amounts subscribed.

Financing applied to program.....	1,253,725	350,000	175,000

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity, and its remaining assets, liabilities, and obligations were transferred as follows:

	Cash	Loans net	Working capital	Net Government investment	Undisbursed loan obligations
Transferred to—					
Small Business Administration.....	\$2,324,053	\$12,627,048	\$2,143,505	\$17,094,606	\$2,086,598
Housing and Home Finance Agency.....	2,733,106	1,762,806	1,394,855	5,890,767	1,500,000
General Services Administration.....	9,332		-9,332		
Treasury Department.....	5,483,139	39,891,201	384,352	45,758,692	5,242,659
Total.....	10,549,630	54,281,055	3,913,380	68,744,065	8,829,257

As a result of these transfers, the Secretary of the Treasury is responsible for completing the liquidation of business loans and securities with individual balances of \$250,000 or more, securities of and loans to railroads, and securities of financial institutions, and for the windup of corporate affairs.

Budget program.—The aim of the liquidation program is to accomplish the maximum recovery of the Government's investment as rapidly as possible, but with every possible consideration for the interests of those indebted to the Government and the communities in which their businesses are located.

OFFICE OF THE SECRETARY—Continued

Public enterprise funds—Continued

LIQUIDATION OF [RECONSTRUCTION FINANCE CORPORATION]
CORPORATE ASSETS—Continued

RECONSTRUCTION FINANCE CORPORATION LIQUIDATION FUND—CON.

The progress anticipated in the liquidation of those loans, securities, and loan obligations now being liquidated by the Secretary of the Treasury is summarized in the following table:

[In millions]

	1957 actual	1958 estimate	1959 estimate
Outstanding at end of year:			
Loans and securities (at cost).....	\$50.2	\$42.0	\$29.1
Undisbursed loan obligations:			
Commitments to participate in bank loans.....	4.5	3.7	3.1
Other.....	0.8	0.8	0.8

A limitation is placed on administrative expenses. It was reduced by \$485,000 in 1958 because of transfers to other agencies. A further reduction of \$155,000 for 1959 is due to a declining workload.

Operating results.—Excess proceeds of liquidation are paid into the Treasury as miscellaneous receipts.

Financing applied to program.....	30,477	20,000	18,000

The Secretary of the Treasury is authorized to purchase securities or make loans (including participations therein and guaranties thereof) to aid in financing projects for civil-defense purposes upon certification by the Federal Civil Defense Administrator (sec. 409, Federal Civil Defense Act and sec. 104, Reconstruction Finance Corporation Liquidation Act). Investments under the program are limited to a total of \$250 million outstanding at any one time.

Budget program.—The sole program cost continues to be the payment of interest on borrowings from Treasury. So far all loans and commitments, of which approximately \$1 million are still outstanding, have been made to assist in financing construction of hospitals.

It is anticipated that there will be no additional loans authorized during 1958 and 1959.

Financing.—Program activities are financed from borrowings from Treasury. The unobligated balance of such authority at the end of 1959 is estimated to increase slightly to \$247 million.

Appropriation (adjusted)	3,007,000	3,113,020	3,110,000

The appropriation estimate for 1959 has been held to about the 1958 level, although it is estimated that the work volume for processing deposits of withheld taxpayments will increase.

1. *Processing deposits of withheld taxpayments.*—Employers and certain business enterprises deposit monthly, with designated banks, excise, withheld income, railroad retirement, and withheld social security taxes, to the credit of the Treasurer of the United States. The Federal Reserve banks, acting as fiscal agents of the Treasury, issue depository receipts which the employers attach to their returns as evidence of payment of taxes. Of the obligations estimated for 1959, \$509,000 will be charged against the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund. The work volume is estimated at 9,050,000 depository receipts in 1958 and 9,200,000 in 1959, compared to 8,837,086 in 1957.

2. *Financial reporting and maintenance of the Government's central accounts.*—This activity includes the maintenance of central accounts on appropriations, receipts, and expenditures which provide data for financial statements. It also includes the preparation and publication

of financial reports on the Government's fiscal operations, such as the annual Combined Statement of Receipts, Expenditures, and Balances; the Monthly Treasury Statement; the Secretary's Annual Report; the Treasury Bulletin; and reports on foreign currencies acquired without payment of dollars. The volume of accounting items is estimated at 5,011,000 in 1958 and 1959 as compared with 5,239,286 in 1957.

3. *Accounting and reporting development and internal audit.*—This activity includes furnishing technical accounting advice and assistance to all bureaus and offices of the Treasury, participating in the governmentwide accounting improvement program, performing internal audit in the Bureau, and coordinating Treasury fiscal internal audit.

4. *Processing investments, loans, claims, collections, and surety bonds.*—Investments in interest-bearing securities are processed for certain funds, such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans insurance trust fund, and various Government retirement funds. The work includes purchase and disposal of securities, processing of capital stock subscriptions of Government corporations, payment of international and other claims, and examination of the financial condition of companies issuing surety bonds in favor of the United States. The number of transactions is estimated at 236,000 for 1958 and 1959 as compared with 226,535 for 1957.

5. *Supervision of the Federal depository system.*—Banking facilities are provided for all agencies of the Government through the designation of selected institutions to act as official depositories of the Government's funds. Workload is expected to increase in 1959 as follows:

Transferred from "Administering the public debt" (Reorganization Plan No. 26 of 1950).....		354,000	
Appropriation (adjusted).....	16,275,000	17,354,000	17,340,000

The Division of Disbursement, through its 21 regional offices, makes payments for civilian Federal agencies, except the Post Office Department and certain Government corporations, and issues savings bonds for Federal employees under the payroll savings plan.

The increased workload in 1959 is due to 3.8 million additional social security, veterans, and civil service retirement annuity payments. In addition the function of issuing interest checks to holders of Government securities was transferred from the Bureau of the Public Debt effective August 1, 1957.

The funds required are determined by multiplying the number of units to be processed by the unit cost per item as shown in the following tables:

WORK VOLUME

	1957 actual	1958 estimate	1959 estimate
1. Processing payments.....	243,220,304	255,520,000	258,996,000

Total obligations.....		6,264,507	6,431,725	6,632,625

Object Classification

	1957 actual	1958 estimate	1959 estimate
14 Interest.....	\$6,264,507	\$6,431,725	\$6,632,625

PAYMENT OF CERTIFIED CLAIMS

(Indefinite)

Amounts Available for Settlement of Claims

	1957 actual	1958 estimate	1959 estimate
Balance brought forward for settlement of claims.....	\$1,272,923,346	-----	-----
Credits from appropriations expiring at end of the preceding year.....	5,157,140	-----	-----
Amounts restored to agency accounts for future payment of claims.....	-468,537,800	-----	-----
Balance no longer available (carried to surplus).....	-779,820,381	-----	-----
Settlement of claims.....	29,722,305	-----	-----

The balances of lapsed general fund appropriations were consolidated in this account and used for payment of claims (31 U. S. C. 712 a and b). Beginning in 1957, such claims are charged to accounts established for that purpose by the various agencies (70 Stat. 647).

PAYMENT TO UNEMPLOYMENT TRUST FUND

(Indefinite)

Appropriated (est.) 1958, \$48,717,000 Estimate 1959, \$25,150,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Payment to unemployment trust fund (total obligations).....	\$71,195,220	\$48,717,000	\$25,150,000
Financing:			
Appropriation (new obligational authority).....	71,195,220	48,717,000	25,150,000

At the end of each year, the Secretary of the Treasury estimates the excess of Federal unemployment tax receipts for the year over expenditures for unemployment compensation and employment service administration. This payment is determined as follows:

	1957 actual	1958 estimate	1959 estimate
Estimated Federal unemployment tax receipts.....	\$330,000,000	\$342,000,000	\$350,000,000
Less:			
Tax refunds, including interest.....	2,764,527	2,764,500	2,764,500
Adjustment of prior year estimate.....	76,347	-----	-----
Adjusted tax receipts.....	327,159,126	339,235,500	347,235,500
Less expenses incurred:			
Internal Revenue Service.....	3,413,089	3,413,521	3,413,556
Other Treasury bureaus.....	21,138	21,050	21,050
Department of Labor:			
Grants to States.....	247,050,093	286,956,207	318,520,000
Administrative expenses.....	5,479,586	127,722	130,894
Payment to unemployment trust fund.....	71,195,220	48,717,000	25,150,000

This appropriation transfers the estimated excess into the unemployment trust fund, where a portion is allocated to the Federal unemployment account to bring the balance of that account to \$200,000,000, and the remainder is allocated to the trust accounts of the various States (68 Stat. 668).

Financing applied to program.....	47,013	51,000	61,000

This revolving fund was created as self-insurance to cover claims resulting from losses in shipment of Government property such as coin, currency, and securities (5 U. S. C. 134). Since these claims are only partially offset by recoveries, the deficit has gradually increased until it amounted to \$800,210 as of June 30, 1957, and is expected to increase to \$850,210 by June 30, 1958. In order to place the fund on a sound basis, an appropriation of \$100,000 is requested for 1959.

This appropriation provides funds for public debt operations and for the promotion of the sale of United States savings bonds and stamps.

1. *Issuance, servicing, and retirement of savings bonds.*—This activity consists of (1) procuring, receiving, storing, and distributing bond stocks; (2) issuing bonds and maintaining records relating thereto; (3) adjudicating claims

for the replacement or payment of lost, stolen or mutilated bonds; (4) handling reissues and other transactions incident to servicing outstanding bonds; (5) retiring bonds; and (6) determining and authorizing semiannual interest payments on Series G, H, and K bonds. The 1959 estimate reflects the adoption of punchcard-type savings bonds and the installation of electronic processing equipment to record the sale and redemption of savings bonds.

Appropriation (new obligational authority)	15,125,000	17,950,000	17,950,000

This office (a) receives, keeps, and disburses the moneys of the United States; (b) receives, stores, issues, transfers, and retires currency; (c) issues and redeems Government securities; (d) maintains fiscal accounts; and (e) prepares financial statements and reports.

1. *Check payment and reconciliation.*—This consists of maintaining checking accounts of Government disbursing officers and Government-owned corporations, processing documents crediting Government disbursing accounts, performing centralized payment function of all checks drawn on the Treasurer of the United States, reconciling deposits claimed and checks issued as reported by disbursing officers with the deposits credited and checks paid by the Treasurer, and determining the outstanding checks in each disbursing account.

The continuing volume of Federal expenditures by the Department of Defense and the increasing checkload for social security and tax refund payments have resulted in a constant increase in workload. The program to convert to an integrated electronic system for payment and reconciliation of checks has been completed.

CHECK VOLUME

(In thousands)

	1957 actual	1958 estimate	1959 estimate
Checks paid	351,195	377,451	378,166

2. *Processing check claims.*—This consists of the processing of all claims for the proceeds of Government checks, including the allowance or disallowance of claims against the United States and the enforcing of claims of the United States against banks, endorsers, principals, and sureties or other parties having liability due to the fraudulent or otherwise improper negotiation of checks.

WORK VOLUME

	1957 actual	1958 estimate	1959 estimate
Type of case processed:			
Paid check cases	109,420	111,450	112,450
Outstanding check cases	69,990	72,700	73,400
Authority cases	7,202	7,250	7,350

UNIT COSTS PER CASE

Paid check cases	\$8.81	\$9.63	\$9.63
Outstanding check cases	3.23	3.50	3.50
Authority cases	1.78	1.93	1.93

3. *General banking services.*—General banking services are provided for accountable Government officers and for banks in the District of Columbia.

WORKLOAD OF MEASURABLE OPERATIONS

(In thousands)

	1957 actual	1958 estimate	1959 estimate
Treasury checks and other obligations paid in cash	400	430	430
Commercial checks, drafts, and money orders processed for collection	6,328	6,500	6,500
Pieces of paper currency issued	1,221,620	1,260,000	1,260,000

4. *Retirement of currency.*—United States currency unfit for further circulation is verified and destroyed by the Federal Reserve banks on a reimbursable basis. Currency received from local sources, as well as all mutilated currency, is processed for retirement or reissue in Washington. The pieces of currency destroyed are estimated to be 1.23 billion in both 1958 and 1959 as compared to 1.19 billion in 1957.

5. *Maintenance of the Treasurer's accounts.*—Controlling accounts covering receipts and disbursements are maintained for all funds placed in the custody of the Treasurer, and reports are prepared, including the daily statement of the Treasury and a monthly statement of money held in the Treasury and paper currency in circulation.

6. *Payment and custody of securities.*—This consists of payment of principal and interest on public debt obligations, including those of Government corporations, and provision of safekeeping facilities for securities, trust funds, and savings bonds.

Appropriation (new obligational authority).....	44,250,000	45,000,000	45,000,000

The Bureau of Customs controls the importation of merchandise and collects the duties thereon. Gross total collections amounted to \$1,059,208,252 in 1957.

The unobligated balance of \$300,000 is a special fund available to this account when necessary to help pay the expenses of reimbursable customs work pending the collection of receivables from private interests.

1. *Assessment and collection of duties, taxes, and fees.*—The collectors of customs assess and collect the duties and taxes on imported merchandise, inspect international traffic, combat smuggling, perform certain marine activities relating to ownership and documentation of vessels of the United States and the movement of vessels in the foreign trade, and enforce the laws of other Government agencies affecting imports and exports.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Formal entries accepted.....	1,116,211	1,172,000	1,230,000
Carriers of persons and merchandise arriving from foreign countries.....	38,564,443	40,490,000	42,515,000
Persons arriving from foreign countries.....	132,321,187	136,200,000	140,300,000

2. *Appraisal of imported merchandise.*—The customs appraisers examine and ascertain the value of imported merchandise, and perform other functions in support of the collectors' determinations of rates of duty to be assessed and the admissibility of merchandise into the United States.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Packages examined by appraisers' personnel.....	1,365,041	1,433,000	1,503,000
Invoices received.....	1,774,343	1,863,000	1,958,000

3. *Investigations of violations of customs and related laws and regulations.*—The customs agents in the United States and abroad make investigations in the enforcement of laws affecting the movement of merchandise into and out of the United States. They also secure market value information for customs appraisers. In 1957, a total of 16,473 investigations were made. The estimates for 1958 and 1959 are 16,885 and 17,985, respectively.

4. *Audit of collection and merchandise accounts.*—The comptrollers of customs examine and certify collectors' accounts of receipts and disbursements of money and receipts and disposition of merchandise, and verify collectors' final assessments of duties and taxes, as well as allowances of drawback.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Liquidations verified.....	71,153	74,000	77,000
Comptrollers' verifications pending at close of year.....	3,273	3,500	3,500
Audit reports made.....	105	100	100

5. *Analysis and identification of merchandise for tariff purposes.*—The customs laboratories perform scientific analysis and identification of merchandise for tariff and enforcement purposes. In 1957, there were 110,087 samples tested, and it is estimated that 110,100 will be tested in 1958 and 1959, respectively.

The Internal Revenue Service is the primary revenue-collecting agency of the Federal Government.

1. *Rulings, technical planning, and special technical services.*—The Service interprets statutory provisions, issues rulings, and prepares regulations and Treasury decisions. It conducts continuing research on tax loopholes, inequities, and related problems and provides special technical services and negotiates tax treaties with foreign governments.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Rulings and advisory opinions.....	59,186	65,000	65,000
Regulations, legislative analysis, drafting and reports.....	3,246	3,000	3,000
Research, analysis, and preparation of rulings for publication.....	3,214	4,000	4,000

2. *Collection of revenue.*—This activity includes the securing of delinquent returns and the collection of delinquent accounts; receiving returns and remittances; tax accounting; bookkeeping; arithmetic verification of tax returns; determination of tax liability in respect to Form 1040A returns; preparation of bills; computation and scheduling of refunds; and the filing of returns and records. Gross total collections of the Internal Revenue Service amounted to \$80 billion in 1957. The details of revenues collected are shown in table 1 and special analysis L of this document.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Tax returns filed.....	93,278,692	95,000,000	96,500,000
Income tax computations and verifications.....	57,330,588	58,954,000	59,000,000
Refunds and credits scheduled.....	36,845,998	38,500,000	39,000,000
Notices issued for delinquent accounts and current installments due.....	17,398,605	17,500,000	17,600,000
Taxpayer delinquent accounts closed.....	2,762,464	2,845,000	2,900,000
Delinquency and other investigations closed.....	1,319,685	1,328,000	1,350,000

3. *Audit of tax returns.*—This activity covers the primary enforcement work of the Service. It encompasses all examinations, audits, investigations, and informal conferences for checking correctness and completeness of taxpayers' returns and claims, and for determining the correct tax liability.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Examined income, estate, and gift tax returns (office audits and field audits).....	2,387,542	2,388,000	2,388,000
Offers in compromise disposed of.....	18,762	29,000	20,000

4. *Tax fraud and special investigations.*—This function covers investigations of tax fraud, including making recommendations with respect to prosecution, fraud penalty, and civil liability of taxpayers; investigations of applicants for enrollment to practice before the Treasury Department; and investigations of charges against enrolled practitioners.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Fraud cases.....	22,076	23,000	23,000
Enrollment investigations.....	8,141	6,200	6,400

5. *Alcohol and tobacco tax regulatory work.*—Under the laws relating to liquor, tobacco, and firearms, tax liability is determined, the alcohol and tobacco industry operations and trade practices are regulated, and violators against such laws are detected and prosecuted.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Cases made.....	14,350	13,300	13,200
Distilleries seized.....	8,646	8,500	8,300
Mash seized (wine gallons).....	6,756,563	6,500,000	5,500,000
Arrests.....	11,512	11,000	10,500
Inspections (includes dealers with Federal Alcohol Administration permits).....	52,349	52,000	51,000

6. *Taxpayer conferences and appeals.*—This activity consists of formal appellate work with respect to tax liability, interest, penalties (except alcohol, tobacco, narcotics, and firearms) in protested cases, the issuance of statutory notices, consideration of claims, and consideration of appealed offers in compromise which have been rejected by district directors. There were 19,797 cases closed

during 1957, 20,600 estimated for 1958, and 21,300 for 1959.

7. *Legal services.*—This activity is responsible for all legal services, including the issuance of legal opinions for the guidance of officers of the Service, defense of petitions to the Tax Court of the United States, recommendations as to prosecution by the Department of Justice of civil and criminal suits and appeals to be taken, and the review of abatements, refunds, or credits of \$100,000 or over.

SELECTED WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Litigation:			
Tax Court cases.....	4,912	5,300	5,300
District court cases.....	1,466	1,450	1,450
Enforcement:

¹ Reimbursements from non-Federal sources above are receipts from foreign coinage (31 U. S. C. 367 (Jan. 29, 1874, 18 Stat. 6)); proceeds from sale of medals and proof coins (31 U. S. C. 369 (as amended May 10, 1950, 64 Stat. 157)); and proceeds from the sale of personal property (40 U. S. C. 481 (c)).

Activities include manufacture of coins, receipt of deposits of gold and silver bullion, safeguarding of the Government's holdings of monetary metals, and refining of gold and silver bullion (see miscellaneous permanent appropriations).

1. *Manufacture of coins (domestic).*—Production of coins is the major mint activity. Funds requested for 1959 will permit production of approximately 2 billion coins, which will be necessary to meet the continued high demand. Mint inventories have been low for about 2 years and the Federal Reserve banks have been requisitioning coins as quickly as produced.

Total.....	1,388,481	1,803,304	2,000,000	2,000,000

2. *Processing deposits and issues of monetary metals and coins.*—This activity includes receipt of deposits of gold and silver bullion; issue of gold bars for industrial, professional, and artistic use and settlement of international balances; disbursement of coins; moving, shipping, stor-

ing, and verifying bullion and coin; and counting and classifying uncurrent coins returned to the mints for recoinage. High silver receipts in 1957 and 1958 reflect the return of lend-lease silver by foreign governments.

SELECTED STATISTICS REGARDING DEPOSIT ACTIVITY

Description	1957 actual	1958 estimate	1959 estimate
Number of deposit transactions.....	8,544	8,500	8,500
Gold receipts and disbursements (value).....	\$899,996,063	\$900,000,000	\$900,000,000
Sale of gold bars for industrial, professional, and artistic use (value).....	\$24,257,676	\$24,000,000	\$24,000,000
Silver receipts (fine ounces).....	107,201,001	215,005,000	20,000,000
Silver disbursements (fine ounces).....	8,900,453	8,900,000	8,900,000
Uncurrent coins received (pieces).....	25,624,436	26,000,000	26,000,000

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. During fiscal year 1957, \$196,346 were deposited to miscellaneous receipts.

8. *Relation of costs to obligations.*—This relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

The Bureau of Engraving and Printing designs, manufactures, and supplies all major evidences of a financial character issued by the United States. It is the sole source of U. S. currency, Federal Reserve notes, and certificates of indebtedness, as well as most of the minor evidences of a financial character issued by the United States, such as postage, internal revenue, customs, and savings stamps. In addition, the Bureau prints bonds, commissions, certificates, permits, warrants, etc. The Bureau also prints bonds, postage and internal revenue stamps for the governments of insular possessions.

PROGRAM HIGHLIGHTS—DELIVERIES AND COSTS

Cost.....	\$186,463	\$213,517	\$221,379
Rate per thousand.....	\$0.584	\$0.662	\$0.676
(c) Commissions, certificates, etc.			
Cost.....	25,383,807	18,048,310	19,344,280
Rate per thousand.....	\$327,742	\$321,988	\$380,522
(d) Securities..... units.....	98,539,264	14,645,125	5,662,625
Cost.....	\$2,242,400	\$843,293	\$617,559
Rate per thousand.....	\$22.756	\$57.582	\$109.059
2. Card checks purchased..... units.....	407,686,000	387,803,000	397,780,500
Cost.....	\$1,120,777	\$1,074,910	\$1,099,538
Rate per thousand.....	\$2.749	\$2.772	\$2.764
3. Cost of operation and maintenance of incinerator and space utilized by other agencies.....	\$320,949	\$342,900	\$348,860
4. Other direct charges for miscellaneous services.....	\$23,993	\$94,702	\$606,382
Total cost.....	\$27,113,787	\$28,602,738	\$29,854,434

The Bureau finances its operations out of reimbursements received from other agencies for all direct and indirect costs, including administrative expenses (31 U. S. C. 181-181e).

Budget program.—The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency.*—The anticipated deliveries reflect a decrease of 0.6% in 1958 and an increase of 5.7% in 1959 over deliveries made in 1957.

(b) *Stamps.*—The estimated production requirements have increased approximately 4% in 1958 and 1959 over 1957.

(c) *Commissions, certificates, etc.*—The anticipated requirements of the various agencies for commissions, certificates, etc., reflect a decrease of 28% in 1958 and 25% in 1959 as compared with 1957. This decrease is due primarily to a reduction in the requirements for various identification cards requisitioned by national defense agencies.

(d) *Securities.*—The production of United States savings bonds reflects the substantial decrease of approximately 89% in 1958 and 98% in 1959 below the deliveries made in 1957 due to the Treasury's decision to issue such bonds in punched card form. The estimated production of other securities reflects an increase of 15% in 1958 and 1959 as compared with 1957.

2. *Card checks.*—Based on estimated requirements of the agencies served, the Bureau negotiates a single contract with a commercial firm for the purchase of all Government checks in punched card form.

3. *Operation and maintenance of the incinerator and space utilized by other agencies.*—Charges are made to other agencies, on an actual cost basis, for use of the incinerator and for the cost of maintenance services provided for the space they occupy in the Bureau's buildings.

4. *Other direct charges for miscellaneous services.*—Charges for these services are made to other agencies on an actual cost basis.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and prepaid expenses.....	\$6,980,899	\$5,715,265	\$5,120,265	\$5,070,265
Unpaid undelivered orders.....	2,889,497	3,576,491	2,600,000	2,400,000
Total selected resources at end of year.....	9,870,396	9,291,756	7,720,265	7,470,265
Selected resources at start of year (—).....	—9,870,396	—9,291,756	—7,720,265	—7,720,265
Costs financed from obligations of other years, net (—).....		—578,640	—1,571,491	—250,000

Operating results and financial condition.—Bureau operations during 1957 resulted in a loss of \$21,219. This loss will be recovered from any earnings in subsequent years.

The capital of the fund is expected to remain at \$25.3 million represented by an appropriation of \$3.3 million and donated assets of \$22 million.

Sources and Application of Funds (Operations)

The Coast Guard enforces maritime law, provides limited security of ports and waterfront facilities, saves life and property, provides navigational aids to maritime commerce in navigable waters, promotes the safety of the American merchant marine, and maintains a state of military readiness to serve as a part of the Navy in time of war or national emergency.

Direct program by activities—1. Vessel operations.—Multifunctional vessels are strategically stationed along the coasts and inland waterways for search and rescue; tending aids to navigation; operating an international ice observation and patrol service in the North Atlantic

Ocean; performing limited icebreaking in navigable lakes, rivers, canals, and harbors; and for law enforcement.

Number of navigational aids servicing.....	113,224	113,000	114,000
Ocean stations operated.....	6	6	6

2. Aviation operations.—Aircraft are maintained at air stations and detachments for search and rescue; Federal law enforcement; aerial reconnaissance for the international ice patrol; and logistic support in isolated areas.

WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Aviation operations:			
Assistance cases.....	3,705	3,800	3,950
Lives saved or persons rescued.....	122	200	400
Passenger-miles traveled in administrative and logistic support.....	6,197,535	6,500,000	7,000,000
Cargo (ton-miles).....	678,719	700,000	725,000

3. Shore stations and aids operations.—Bases and lifeboat stations are strategically situated for search, rescue, and law enforcement, and for maintaining aids to navigation. Port security units patrol major harbor entrances; control anchorage areas; supervise the loading and unloading of dangerous cargoes; and screen merchant seamen and longshoremen to bar subversive elements from merchant vessels and critical waterfront areas. Critical waterfront areas have been patrolled since the inauguration of the port security program in 1951.

Buoys, lighthouses, lightships, fog signal stations, light attendant stations, radio beacons, and loran stations are maintained as navigational aids in the waters of the United States, its Territories, and military bases overseas. There will be a net addition of 1,225 unmanned aids operated in 1959. Radio stations provide rapid communication incident to all Coast Guard operations and maintain a guard on the international maritime distress frequencies. Marine inspection offices and detachments administer laws and issue regulations on safety equipment and inspection of merchant vessels, and on licensing and certification of merchant marine officers and crews. They review plans for construction or alteration of merchant vessels, investigate marine accidents, and handle disciplinary cases.

The recent upsurge in merchant vessel construction and repair, the increasing number of oil rigs being erected on the continental shelf of the Gulf of Mexico, and the corresponding increase in the number of small commercial craft servicing these rigs have all contributed to a serious backlog in the examination and inspection programs. Additional marine inspection personnel are being requested to keep pace with the demands of industry.

Costs for the operation of one additional loran station are included in the Coast Guard budget for 1959. This facility is being constructed during 1958 with funds provided by the Department of Defense.

WORKLOAD DATA

Violations of navigation and vessel inspection laws processed.....	10,292	11,600	13,000
Miscellaneous additional vessel inspections.....	18,064	26,000	34,000
Vessel plans and blueprints reviewed.....	19,807	31,700	44,400
Items of equipment inspected at factory.....	879,059	940,000	980,000
Drydock inspections.....	4,601	8,600	12,600
Vessels reinspected.....	2,602	5,015	9,015
Vessels numbered by Coast Guard (lien of documentation).....	419,118	455,000	495,000
Structures inspected (Outer Continental Shelf Lands Act).....	645	650	650

4. *Repair and supply facilities.*—Repair and supply facilities are maintained at strategic points for support of Coast Guard operating units. Also, two facilities are maintained for testing, developing, and adapting material for safer and more effective Coast Guard use.

5. *Training and recruiting facilities.*—This activity includes the Coast Guard Academy for the training of cadets and officer candidates, recruiting stations, training units for recruits and petty officers, and outside training programs.

WORKLOAD DATA

	1957 actual	1958 estimate	1959 estimate
Training and recruiting facilities:			
Cadets.....	498	530	530
Recruits trained.....	5,168	5,200	5,100
Other personnel in training.....	4,782	5,120	5,120

6. *Administration and operational control.*—In addition to executive direction, this activity provides for internal auditing and inspection, and for administrative services to operating units.

7. *Other military personnel expense.*—This activity provides for certain military personnel expenses such as the pay of personnel hospitalized and in transit; expense of permanent changes of stations, including travel of dependents and transportation of household effects; and expenses of military separation, recreation, death gratuities, and burial.

8. *Supporting programs.*—This activity consists of programs for procurement of ammunition and maintenance of ordnance; replacement of vehicles, boats, and electronic equipment; transportation of materials; and printing. These programs have such general applicability that they cannot properly be charged to specific units.

Property transferred in without charge represents material received from the acquisition, construction, and improvements appropriation, consisting primarily of aircraft equipment and parts purchased with aircraft.

9. *Relation of costs to obligations.*—The relationship between direct costs and direct obligations is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Direct program:				
Selected resources at end of year: Inventories and items on order:				
Stores (goods and operating equipment unconsumed by projects).....	\$37,109,754	\$35,165,002	\$36,840,737	\$39,570,995
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	13,141,205	14,232,035	14,143,062	13,264,194
Advances (payments for goods and services on order not yet received).....	2,096,704	1,407,969	1,107,969	807,969
Work in process.....	1,553,959	948,094	948,094	948,094
Total selected resources at end of year.....	53,901,622	51,753,100	53,039,862	54,591,252
Selected resources at start of year (—).....	—53,901,622	—51,753,100	—51,753,100	—53,039,862
Adjustment of selected resources reported at start of year.....		128,863		
Costs financed from obligations of other years, net (—).....		—2,019,659		
Obligations incurred for costs of other years, net.....			1,286,762	1,551,390

It is estimated that an increase in inventories will occur in 1958 and 1959, attributable to the receipt of spare parts for replacement aircraft.

Advances will be reduced in 1958 and 1959 by liquidation of advances made to the Navy for the procurement of long lead time electronic equipment. Undelivered orders will be reduced in 1958 and 1959 due to the delivery of long lead time electronic equipment.

Reimbursable programs by activities—10. *Operation of ocean stations.*—The operation of 6 ocean stations (4 in the Atlantic and 2 in the Pacific), on the basis of 3 cutters per station, is financed by the Department of Defense as a defense requirement. These vessels perform the dual function of ocean station duty and search and rescue.

11. *Miscellaneous services to other accounts.*—Various activities of the Coast Guard are financed by other agencies. They include, in part, operation of 1 vessel for United States Information Agency; operation of 1 ocean-going tug for the Department of the Navy; installation and maintenance of aids to navigation for the Saint Lawrence Seaway Corporation; and operation of 2 special projects, Loran-C and Tacan, for the Department of Defense.

12. *Relation of costs to obligations.*—The relationship between reimbursable costs and reimbursable obligations is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Reimbursable program:				
Selected resources at end of year (inventories and items on order):				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$102,336	\$614,044	\$614,044	\$614,044
Advances (payments for goods and services on order not yet received).....		750	750	750
Work in process.....		68,718	68,718	68,718
Total selected resources at end of year.....	102,336	683,512	683,512	683,512
Selected resources at start of year (—).....	—102,336	—683,512	—683,512	—683,512
Adjustment of selected resources reported at start of year.....		52,294		
Obligations incurred for costs of other years, net.....		633,470

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [\$7,795,000] \$16,000,000, to remain available until expended. (Title 14 U. S. C.; Treasury-Post Office Appropriation Act, 1958.)

Appropriated 1958, * \$15,895,000 Estimate 1959, \$16,000,000

* Includes \$8,100,000 in Supplemental Appropriation Act, 1958.

Program and Financing

8. Loran to meet Department of Defense requirements (total reimbursable program costs).....	1,124,373	12,794,190	1,443,688			
9. Relation of costs to obligations:						
Costs financed from obligations of other years, net (—).....	—26,635	—472,814				
Obligations incurred for costs of other years, net.....			18,556,312			
Total reimbursable program (obligations).....	1,097,738	12,321,376	20,000,000			
Total program (obligations).....	9,949,968	36,354,946	36,000,000			
Financing:						
Unobligated balance brought forward.....	—10,899,391	—14,973,438	—13,492			
Advances and reimbursements from—						
Other accounts.....	—5,450,000	—5,500,000	—20,000,000			
Non-Federal sources (40 U. S. C. 481 (c)).....	—24,130					
Recovery of prior year obligations.....	—1,149,885					
Unobligated balance carried forward.....	14,973,438	13,492	13,492			
Appropriation (new obligational authority).....	7,400,000	15,895,000	16,000,000			

This appropriation provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore stations, and aids to navigation.

Direct programs by activities—1. *Vessels*.—One buoy tender will be reengined and modernized, 7 patrol boats will be constructed to replace the least serviceable of fifty-three 83-foot wooden-hull craft constructed during World War II, and a design will be developed for the replacement in subsequent years of certain of these craft.

2. *Aviation facilities*.—Two Lockheed C-130 turbo-prop landplanes will be procured to replace 2 over-age PB1G and 2 modern helicopters of the HUS type will replace 2 over-age helicopters. Spare parts will be obtained for UF aircraft transferred from the Air Force at no cost and without spares. These UF's will replace P4Y's, PB1G's, and R4D's. In addition, certain necessary improvements will be accomplished at two air detachments.

3. *Shore stations and navigational aids*.—Provision is made for the establishment of aids to navigation in waterways improved and developed by the Corps of Engineers and for the installation and replacement of other aids made necessary by the natural shifting of channels and the changing needs of marine commerce. One light station dwelling will be replaced, the power supply will be converted from direct to alternating current at three light stations in Alaska, and an electronic survey will be carried out in the vicinity of New Orleans to determine where a radio station may suitably be located in the gulf area and to acquire the land.

4. *Repair and supply facilities*.—This request provides for the modernization of freight elevators and repairs to a causeway at 2 bases; construction of barracks and other facilities at 1 base; and the improvement of buoy handling facilities and channel at another. In addition, an electric power substation will be replaced at the Coast Guard Yard, Curtis Bay, Md.

6. *Loran to meet Department of Defense requirements*.—Loran construction since 1956 has been financed by the Department of Defense as a reimbursable program. Direct costs incurred under this activity are for projects authorized in prior years when this activity was budgeted for under Coast Guard appropriations.

7. *Relation of costs to obligations*.—The relationship between direct costs and direct obligations is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Direct program:				
Selected resources at end of year (inventories and items on order):				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$1,373,504	\$4,056,256	\$14,366,280	\$21,320,776
Advances (payments for goods and services on order not yet received).....	96,411	4,781,206	4,515,105	2,654,400
Total selected resources at end of year.....	1,469,915	8,837,462	18,881,385	23,975,176
Selected resources at start of year (—).....	—1,469,915	—8,837,462	—18,881,385	
Obligations incurred for costs of other years, net.....		7,367,547	10,043,923	5,093,791

Total advances and undelivered orders vary with the projects authorized and their rate of completion. Orders are placed with the Coast Guard yard for vessel construction and with the Navy for procurement of aircraft with delivery scheduled in subsequent years.

Reimbursable programs by activities—8. *Loran to meet Department of Defense requirements*.—Funds have either been provided or are being provided by the Department of Defense for the construction of 12 loran stations with support facilities. The construction program for 1959 contemplates 10 more stations.

9. *Relation of costs to obligations*.—The relationship between reimbursable costs and reimbursable obligations is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Reimbursable program:				
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)....	\$609,614	\$361,473	\$110,674	\$18,666,986
Advances (payments for goods and services on order not yet received)...	509	222,015	-----	-----
Total selected resources at end of year.....	610,123	583,488	110,674	18,666,986
Selected resources at start of year (—).....	-----	—610,123	—583,488	—110,674
Costs financed from obligations of other years, net (—).....	-----	—26,635	—472,814	-----
Obligations incurred for costs of other years, net...	-----	-----	-----	18,556,312

The increase in undelivered orders in 1959 pertains to the loran construction program for which funds were received from the Department of Defense.

This appropriation provides for payments to retired personnel of the Coast Guard and Coast Guard Reserve, members of the former Lifesaving Service, members of the former Lighthouse Service, and certain surviving dependents of retired personnel.

The table below divides activities into those persons who retired for involuntary and voluntary reasons. The columns headed "Involuntary" include all retirements for age, physical disability, and forced attrition. The columns headed "Voluntary" include retirements for military personnel with over 30 years' service, those with 20 to 30 years' service, and other optional retirements.

TYPES OF RETIREMENTS

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law (14 U. S. C. 751-762; 37 U. S. C. 231-319), including direct expenses and repayment to other Coast Guard appropriations for indirect expenses, for regular personnel, or reserve personnel while on active duty, engaged primarily in administration and operation of the reserve program; *purchase of not to exceed six passenger motor vehicles, of which four shall be*

for replacement only; and the maintenance, operation, and repair of aircraft; [\$15,000,000] \$11,500,000: Provided, That amounts equal to the obligated balances against the appropriations for "Reserve training", for the two preceding years shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation. (Title 14 U. S. C.; 37 U. S. C. 231-233, 235-238, 251-254; 50 U. S. C. 921, 1051, 1053; 70 Stat. 747, 807, 857; Treasury-Post Office Appropriation Act, 1958.)

The Reserve training program is designed to build up a trained Reserve component to the mobilization manpower requirement of 40,000 trained officers and men.

1. *Trainee expense.*—The program for 1958 provides for an increase from 8,525 to 10,430 in the number of reservists to receive training of the type established by the Reserve Forces Act of 1955. The 1959 program provides for a further increase to 12,106.

TYPES OF TRAINING PLANNED

	1958			1959		
	Man-days of training			Man-days of training

Total, all types.....	394,634	493,462	888,096	483,480	592,860	1,076,340

2. *Operation of training facilities.*—Training stations, vessels, minor shore units, and Organized Reserve training units are utilized to provide training to reservists. In 1959, the number of reservists receiving training under the 6-month program at Alameda Base will be increased from 500 to 750, and 27 additional Organized Reserve training units will be placed in operation.

3. *Construction of training facilities.*—Construction during 1959 is tied to the expanding training program. Facilities at Alameda Base will undergo renovation and repair; summer training facilities at selected minor shore establishments will be improved and equipped to handle larger numbers of trainees; and 27 additional Organized Reserve training units will be housed and outfitted.

4. *Administration.*—This activity comprises the supervisory and logistic functions which are essential for the control and support of the Reserve training program. It includes headquarters and district office management, recruiting effort, and "in-training and ineffectives" allowance for administrative personnel at school, in transit, etc. The 1959 estimates include additional funds for three vehicles to be assigned to district offices and for "in-training and ineffective" personnel to back up the added personnel under activity 2.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

The Coast Guard supply fund, established in accordance with 14 U. S. C. 650, finances the procurement of commissary provisions, general stores, technical materials, and uniform clothing.

Budget program.—Costs of approximately \$15 million to be incurred under the sales program of this fund in 1959 are divided 69% for commissary provisions, 17% for general stores and technical materials, and 14% for uniform clothing. The increase in costs from 1957 through 1959 is attributable to the expansion of the Reserve training program and attendant activities.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances.....	\$6,000	\$3,790	\$9,000	\$9,000

Property transferred in (—) without charge, net.....		—521,924	—350,000	—100,000
Obligations incurred for costs of other years, net.....		520,960	505,820	221,000

Operating results.—Sales are expected to increase at the rate of approximately \$1,100,000 in 1958 and \$150,000 in 1959.

The 20% rise in the inventory level between 1957 and 1959 is due to: (1) a rise in uniform prices effective July 1, 1957, (2) the transfer of material from other inventory accounts under authority of Public Law 1014, Eighty-fourth Congress, and (3) additions to present stock levels to handle increased volume.

GENERAL PROVISIONS—TREASURY DEPARTMENT

SEC. 102. Not to exceed 5 per centum of any appropriation herein made to the Treasury Department for the current fiscal year [, except for the appropriations made to the U. S. Coast Guard,] may be transferred, with the approval of the Bureau of the Budget, to any other appropriation of the Treasury Department, but no appropriation shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Committees on Appropriations of the Senate and House of Representatives [: Provided, That no transfer made under this authority shall result in increasing any appropriation in excess of the budget estimate as presented in House Document 16, Eighty-fifth Congress]. (Treasury-Post Office Appropriation Act, 1958.)

STATUTORY PUBLIC DEBT RETIREMENTS

Permanent authorizations:

CUMULATIVE SINKING FUND

(Indefinite)

Appropriated (est.) 1958, \$633,349,085

Estimate 1959, \$633,349,085

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Financing:			
Unobligated balance brought forward	—\$10,157,862,182	—\$10,791,211,267	—\$11,424,560,352
Unobligated balance carried forward	10,791,211,267	11,424,560,352	12,057,909,437
Appropriation (new obligational authority)	633,349,085	633,349,085	633,349,085

There is appropriated to the cumulative sinking fund annually a sum equal to (1) 2½% of the amount of certain bonds and notes issued under the Liberty Bond Acts and outstanding on July 1, 1920, less an amount equal to the par amount of obligations of foreign governments held by the United States on that date, (2) an amount equal to the interest which would otherwise have been payable on

bonds and notes which have been retired out of the sinking fund during the years, together with (3) 2½% of certain expenditures during the 1930's. The sinking fund is available to retire bonds and notes at maturity or to purchase them before maturity (31 U. S. C. 767, 767 a and b).

OBLIGATIONS RETIRED FROM FEDERAL INTERMEDIATE CREDIT BANK FRANCHISE TAX RECEIPTS

Financing:			
Unobligated balance brought forward	\$19		
Transferred to public debt receipts	—139,000		
Appropriation (new obligational authority)	138,981		

Public Law 809, approved July 26, 1956, removed the limitations on the use of the moneys received in payment of franchise taxes by Federal intermediate credit banks, which had formerly been used to supplement the gold reserve or to reduce the bonded indebtedness of the United States (50 Stat. 715; 12 U. S. C. 1072).

DISTRICT OF COLUMBIA

The budget proposes a Federal payment to the general fund of the District of Columbia government of \$25 million, compared with \$20 million appropriated for 1958. The amount proposed for 1959 consists of the full \$23 million annual payment authorized by law, together with \$2 million representing a portion of payments authorized but not appropriated in previous years.

The budget also includes Federal payments to other District funds, estimated at \$11 million in 1959, for water and sewer service rendered to the Federal Government, and for interest-bearing loans made to the District for capital outlays for highways, water, and sewage works.

In addition, the budget provides for payment to the District of grants-in-aid for the performance of certain functions of the types performed by the several States. The Federal payments to the District for this purpose are included with the estimates for each of the corresponding payments to States in other parts of the budget.

The Congress serves as the legislative body for the District of Columbia and enacts the District's total budget, authorizing expenditures from funds available to the District from its own revenues and from payments made to it by the Federal Government. This year, detailed estimates for the District as a whole, including the Federal payments and loans to the District, estimates of appropriations from District revenues, and information regarding allocations to various Federal agencies for services rendered to the District, are printed in a separate volume of the budget. The main volume of the budget contains detail only for the Federal payments and loans to the District. However, to the extent that transactions involving the District affect summary tables in the main volume of the budget, they are reflected in the same manner as heretofore.

FEDERAL FUNDS

Current authorizations:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1958] 1959, out of (1) the general fund of the District of Columbia (unless otherwise herein specifically provided), hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and [\$20,000,000] \$25,000,000 which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1957] 1958, and of which \$7,000,000 shall be available for capital outlay only), (2) the highway fund (when designated as payable therefrom), established by law (D. C. Code, title 47, ch. 19), (3) the water fund (when designated as payable therefrom), established by law (D. C. Code, title 43, ch. 15), and [\$1,751,450] \$1,532,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1957] 1958), (4) the sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 364, 83d Congress), and [\$753,000] \$697,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1957] 1958), and (5) the motor vehicle parking fund (when designated as payable therefrom), established by law (D. C. Code, title 40, ch. 8), sums as shown herein; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, [\$9,631,100] \$8,600,000, which, together with balances of previous appropriations for this purpose, shall remain available until expended, for loans authorized by the Act of May 18, 1954 (68 Stat. 101), to be advanced upon request of the Commissioners to the following funds: highway fund, [\$6,481,100] \$5,500,000, and water fund, [\$1,600,000, and sanitary sewage works fund, \$1,550,000] \$3,100,000. (District of Columbia Appropriation Act, 1958.)

Appropriated 1958, \$22,504,450

Estimate 1959, \$27,229,000

PART III

ESTIMATES FOR TRUST FUNDS

Table 10. Trust Receipts and Expenditures
Detailed Estimates

INTRODUCTION TO PART III

Part III of the budget contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds. It excludes the detail on trust fund programs which require annual action by Congress (shown in part II) and the detail on the District of Columbia municipal government funds (contained in a separate budget volume).

TRUST AND DEPOSIT FUNDS DISTINGUISHED

The funds which are covered in this part of the budget are of two types, as follows:

Trust funds are those funds established to account for receipts which are held in trust by the Government for use in carrying out specific purposes and programs in accordance with a trust agreement or a statute. Within the category of trust funds, there is a subcategory of *trust revolving funds*, which are trust funds used to carry on a cycle of business-type operations, including certain corporations which are partly owned by the Government and partly by private interests.

Deposit funds are those funds established to account for collections that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government, or (b) held by the Government as banker or agent for others, being paid out in lump sums at the direction of the owner. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

While the transactions in these groups of funds are a part of the financial program of the Government, trust and deposit funds are not fully owned by the Government; hence these transactions are excluded from budget totals.

TRUST FUND RECEIPTS AND EXPENDITURES

Receipts.—Like budget receipts, trust fund receipts are based upon collections received and deposited, including U. S. securities received in lieu of cash and contributions to the trust funds from the general fund. The conversion of U. S. Government securities on hand into cash is excluded from receipts, but such sales and redemptions are listed in special analysis J of part IV on a net basis.

Expenditures.—Like budget expenditures, trust fund expenditures are stated on a checks-issued basis, less refunds collected. Net investments in U. S. Government securities are excluded from the figures, and are listed in special analysis J of part IV.

Trust revolving funds.—The small group of funds which constitute trust revolving funds are reported on a *net* expenditure basis. The collections of trust revolving funds, instead of being taken into the tables as receipts, are deducted from expenditures. The gross figures are shown in a supplementary summary table and in the detailed schedules.

OBLIGATIONAL AUTHORITY FOR TRUST FUNDS

Trust fund receipts must be appropriated before they can be obligated or spent, with the exception of those few

cases where the law grants contract authorization in advance (for example, the highway trust fund).

Most trust funds are appropriated by permanent law, not requiring further action by Congress. Usually the appropriations equal the receipts of the year. In a few cases receipts of trust funds can be spent only in accordance with appropriations enacted by Congress from year to year. Examples are the highway trust fund, funds of the United States Soldiers' Home, and the municipal revenues of the District of Columbia (which are accounted for as trust funds by the Federal Government). In a few other cases, trust fund receipts are permanently appropriated for benefit payments, but limitations on administrative expenses payable out of the trust funds are imposed by annual action of the Congress.

DEPOSIT FUND EXPENDITURES

Table 10 includes deposit fund expenditures by department or agency. These expenditures are on a net basis; that is, the collections are deducted from checks issued, and the resulting figure is shown as an expenditure. Checks issued include those written to move money into other funds, as well as those written for refunds and the return of money to depositors. When the collections are larger than the checks issued, the amount shown as an expenditure is a negative item.

NET ACCUMULATION IN TRUST AND DEPOSIT FUNDS

Table 10 shows the net accumulation in all the trust and deposit funds. This represents the result obtained when the trust and deposit fund expenditures are subtracted from the trust receipts of the year. Since trust and deposit funds, as well as Federal funds, affect the total cash balance of the Treasury and the total public debt, the final figures on table 10 are carried forward into table 4 of part I. Data on the unexpended balances of the largest trust funds are appended to the table.

DETAIL OF TRUST FUND ESTIMATES

The detailed material in part III covers the trust funds which do not require annual action by Congress. Consolidated schedules are used for the smaller trust funds of each bureau or independent agency.

The material here follows the general format of the similar material in part II, with the principal exception that these schedules show receipts in place of showing appropriations. In cases where the receipts are not permanently appropriated as the money is collected, the schedules identify the portion of the unobligated balances on hand which is appropriated and the portion which is unappropriated. Also, no appropriation language appears here, and the narrative statement of "Program and performance" usually consists only of an explanation of the sources of money for the fund, the purposes for which it is authorized to be spent, and the legal citations.

TRUST FUNDS

Total trust fund receipts in the fiscal year 1959 are estimated to be \$16,619 million, and trust fund expenditures \$16,364 million. Thus the net accumulation in the trust funds during 1959 will be \$255 million. As indicated in the following table, trust fund expenditures are now rising at a faster rate than receipts.

TOTAL TRUST FUND TRANSACTIONS

	[In millions]		
	1957 actual	1958 estimate	1959 estimate
Receipts.....	\$14,369	\$16,373	\$16,619
Expenditures.....	12,961	15,196	16,364
Net accumulation.....	1,408	1,177	255

The financial transactions of the trust funds are a significant part of the program of the Government. In some cases—notably in labor and welfare activities—trust fund expenditures represent a larger part of the Government's program than do budget expenditures. Table 5 of part I of this budget shows budget expenditures, trust expenditures, and total Federal payments to the public for 1959. Special analysis A, in part IV, shows similar data for a number of years.

The following table summarizes trust fund expenditures by function for the fiscal years 1957 through 1959:

TRUST AND DEPOSIT FUND EXPENDITURES BY MAJOR FUNCTION

	[In millions]		
	1957 actual	1958 estimate	1959 estimate
Major national security.....	\$93	\$251	\$255

Total.....	12,961	15,196	16,364

* Less than one-half million.

¹ Excludes deposit funds of Government-sponsored enterprises. These have been allocated to the appropriate function above.

A table on page S28, at the end of this statement, presents trust and deposit fund expenditures by function for the fiscal years 1948 through 1956.

While there are hundreds of separate trust and deposit funds, the bulk of the transactions and the largest amounts of money are in the following trust funds.

TRANSACTIONS OF MAJOR TRUST FUNDS

	[In millions]		
	1957 actual	1958 estimate	1959 estimate
Labor and welfare:			
Federal old-age and survivors insurance trust fund:			
Receipts.....	\$7,159	\$7,739	\$7,933

Mortgage sales and repayments.....	22	64	117
Mortgage purchases.....	993	685	490
Mortgage portfolio at end of year.....	1,193	1,819	2,191

⁴ Includes above interfund transfers.

⁵ Excludes \$16 million of aviation gasoline taxes which, under proposed legislation, would be retained in the general revenues.

Social security insurance programs for retirement, death, or disability.—Insurance against these risks is provided by the first four trust funds listed in the above table, of which the first two provide nationwide social security protection and the last two cover employees of the railroad industry and most employees of the Federal Government. These payments are made primarily from moneys derived from payroll contributions of employees, employers, and those who are self-employed. These receipts are invested in securities of the Federal Government and earn interest.

The following table indicates the number of individuals receiving monthly benefits at the end of each of the fiscal years 1957 through 1959.

	[In thousands]			
	Federal old-age and survivors insurance	Federal disability insurance	Railroad retirement account	Civil service and foreign service
Retired individuals:				
1957 actual.....	7,551	---	365	205

1958 estimate.....	2,967	---	233	108
1959 estimate.....	3,154	---	242	124

¹ Includes children of retired workers under old-age and survivors insurance.

While expenditures in 1959 from the Federal old-age and survivors insurance trust fund are expected to be greater than receipts, this is a temporary situation. Beginning January 1, 1960, the combined contributions by employers and employees are scheduled, under present law, to increase from $4\frac{1}{2}\%$ to $5\frac{1}{2}\%$ of wages. As a result, receipts will again exceed outlays.

Unemployment trust fund.—This fund invests the deposits made (and is drawn upon) by the States and the Railroad Retirement Board. These deposits represent payroll taxes paid by employers. The States draw upon the fund to make weekly payments to covered workers during periods of unemployment. The railroad system provides weekly payments for workers who are unemployed or who are prevented from working because of sickness. (Former employees of the Federal Government and veterans who are entitled to unemployment compensation are not paid out of this fund. Although the States process these cases and make the payments to those eligible, the Federal Government makes regular grants to the States to finance such payments. These grants are budget expenditures.)

Veterans' life insurance.—The receipts of these trust funds come from premiums, interest on investments, and payments (budget expenditures) by the Federal Government for specified risks. They provide life insurance primarily for veterans of the two World Wars. The

amount of insurance in force has been declining, since new policies were not issued after 1951. The bulk of the payments in 1959 will consist of \$281 million in dividends to about 4.9 million policyholders and \$332 million in payments to survivors of deceased veterans.

Highway trust fund.—This fund uses receipts from certain excise taxes on motor fuels, tires, and vehicles to finance expenditures for Federal-aid highways. See highway trust fund, Department of Commerce chapter, part II, pages 414-422, for supporting detail.

Federal National Mortgage Association, secondary market operations.—In the secondary market part of its program, the Association buys and sells federally insured or guaranteed mortgages at prices prevailing in the market. In accordance with statutory objectives, these operations are self-supporting. During 1959, the Association expects to buy 42,000 mortgages and sell 4,200 mortgages. Most of the funds required will be obtained from private sources by the sale of the Association's debentures and by the purchases of common stock which are required of all mortgage sellers. In addition, the Federal Government is expected to purchase \$10 million in preferred stock and make short-term loans to facilitate the financing operations of the Association. By the end of the fiscal year, private investors will own about one-fourth of the Association's stock; the ultimate goal is complete private ownership.

Interest on permanent loan.....	144,595	145,925	146,825
Service fees.....	490,660	500,000	500,000
Cataloging project, Copyright Office.....	7,705	7,500	7,800
Recovery of prior year obligations.....	1,217		
Unobligated balance carried forward.....	-661,307	-579,958	-424,883
Total financing.....	1,100,821	1,286,774	1,286,000

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from revolving funds the original capital for which was received as gifts, (2) income from investments held by the Library of Congress Trust Fund Board, and (3) interest at the rate of 4% per annum paid by the United States Treasury on the principal funds deposited therewith as described under "Library of Congress trust fund, principal accounts" (2 U. S. C. 156-160; 31 U. S. C. 725s; 37 Stat. 319).

1. *Acquisition of library materials.*—During 1957, this included the procurement of manuscripts, Hispanic materials, fine prints, books and other library materials from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1957 included the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization of the collections.*—During 1957, the preparation of the 16th edition of Dewey Classification was continued, and lists of East European accessions were prepared and distributed.

4. *Information service on copyright materials.*—Depositors were supplied with preliminary information relating to copyright materials in selected subject fields.

Obligations by major source of funds for 1957 and estimated for 1958 and 1959 are as follows:

	1957 actual	1958 estimate	1959 estimate
Library of Congress gift fund.....	\$495,138	\$582,672	\$600,000
Service fees.....	419,072	497,708	515,500
Cataloging project, Copyright Office.....	9,662	7,643	7,500
Income from investment account.....	26,636	16,585	15,000
Interest on permanent loan account.....	148,275	169,166	146,000
Interest on bequest of Gertrude M. Hubbard.....	2,038	3,000	2,000
Total obligations.....	1,100,821	1,286,774	1,286,000

Total financing.....			

This schedule covers two principal accounts—permanent loan and bequest of Gertrude M. Hubbard.

Both funds represent gifts or bequests in cash, which have been deposited with the Treasurer of the United States as permanent loans to the United States, the interest upon which, at 4% per annum, payable semi-annually, is available to the Librarian for the purposes specified in each case.

As of June 30, 1957, the principal in the permanent loan account, which shall not exceed the sum of \$5 million (12 U. S. C. 158; 31 U. S. C. 725s), was distributed as follows:

Music activities.....	\$1,876,951
Fine arts.....	396,556
American history.....	307,040
Hispanic activities.....	170,437
Poetry and literature.....	301,150
Miscellaneous purposes.....	588,485
Total principal.....	3,640,619

The additional principal sum of \$20,000, representing the bequest of Gertrude M. Hubbard, is for the purchase of engravings and etchings (37 Stat. 319).

The use of the income from these accounts is described under Library of Congress gift and trust fund income accounts.

This fund is used to pay annuities to eligible widows and dependent children of deceased judges of the United States, to make refunds to former judges who have elected to come under the judicial survivors annuity system but who have left the service, and to pay claims of survivors of member judges for any unpaid amounts credited to the individual accounts of such judges (28 U. S. C. 376). On June 30, 1957, there were 334 judicial members and 116 survivor annuitants. It is estimated that in 1958 and 1959 there will be respectively 340 and 345 judges covered by the system and that the number of survivor annuitants will total 121 and 124.

1. *Advances, Mutual Security Act.*—Advance payments are received from several nations for the procurement or transfer of military supplies, equipment, and services (Mutual Security Act of 1954, as amended, 22 U. S. C. 1705, et seq.).

2. *Advances for economic assistance.*—By agreement with certain governments, the International Cooperation Administration acts as an agent, utilizing dollar advances by them to arrange transportation services for commodities purchased by those countries (Mutual Security Act of 1954, as amended, 22 U. S. C. 1705, et seq.).

3. *Philippine assistance.*—By agreement with the Philippine Government, the International Cooperation Administration acts as its agent, utilizing dollars advanced by the Philippines to procure commodities for them (Mutual Security Act of 1954, as amended, 22 U. S. C. 1705, et seq.).

4. *United States dollars advanced from foreign governments for technical assistance.*—Funds advanced by foreign countries are used to pay some local costs of technical cooperation programs in those countries in accordance with bilateral agreements (Mutual Security Act of 1954, as amended, 22 U. S. C. 1705, et seq.).

¹ This amount does not agree with "Deductions from employees salaries, etc." because of voluntary contributions above 6.5% made by employees.

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, and to pay claims for employees who have died before retirement or before their annuities are paid in full (5 U. S. C., ch. 14, 66 Stat. 622). It is estimated that as of June 30, 1959, there will be 464,271 persons on the annuity roll, compared with 371,465 as of June 30, 1957, and 413,069 as of June 30, 1958. Beginning in 1958, Government agencies contribute to the fund amounts equal to mandatory deductions from employees' salaries.

The status of the fund is as follows:

This fund finances the payment of group life insurance premiums to private insurance companies under the Federal Employees' Group Life Insurance Act of 1954 (5 U. S. C. 2091-2103) and any expenses incurred by the Civil Service Commission in administration of this act as annually authorized by Congress.

Premium costs are met by withholding from the salary of an employee under age 65, as his share of his group life and accidental death and dismemberment insurance, an amount not to exceed 25 cents biweekly for each \$1,000 of his group life insurance, and contribution by the Government from appropriations or funds used for the payment of his salary, wage, or other compensation of an amount not to exceed one-half the amount withheld from the employee.

Budget program.—Through June 30, 1957, a total of \$185,400,000 was withheld from the salaries of covered employees and \$92,700,000 was contributed by the Government to the fund. It is estimated that in 1959, a sum of \$68,700,000 will be paid into the fund by employees and \$34,350,000 by the Government. As of June 30, 1957, a total of \$140,300,000 had been paid by the insurer in benefits and approximately \$12,000,000 in accrued benefits awaited filing of claims. An estimated \$65,000,000 in benefits will be paid in 1959.

Most of the difference between receipts and benefit payments is held by the insurer as a contingency reserve. As of November 17, 1956, the end of the second policy year, there was \$90,471,500 in this reserve. At the end of future policy years the contingency reserve will be held at a level of \$100,000,000 and any amounts above this figure will be returned to this fund. The estimated returns of \$30,000,000 in 1958 and \$37,000,000 in 1959, netted against expense, account for the increase in retained earnings which will be used to meet the cost of future benefits.

Pursuant to Public Law 356, Eighty-fourth Congress, the Civil Service Commission has assumed life insurance

assets and liabilities of 16 nonprofit associations of Federal employees with an approximate membership of 54,000, assets of approximately \$5 million, and coverage of approximately \$82 million.

Operating results.—Earnings are retained to meet the cost of future benefits.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Supplies	\$2,848	\$4,741	\$5,000	\$5,000

The war claims fund consists of funds transferred by the Office of Alien Property, Department of Justice, from the net proceeds derived from the liquidation of former German and Japanese assets vested pursuant to the Trading With the Enemy Act. This is the master trust account from which transfers are made to other accounts and it includes all unobligated balances from these accounts.

Pursuant to section 13 (a) of the War Claims Act of 1948, as amended, the sum of \$5 million is to be transferred from the Office of Alien Property to cover the remaining cost of payments under Public Law 997, approved August 6, 1956.

OPERATION AND MAINTENANCE, PROPERTIES AIDED BY PUBLIC HOUSING ADMINISTRATION—Continued

bia, under the authority of the Housing Act of 1937, and title II of the District of Columbia Alley Dwelling Act (48 Stat. 930). The 1959 program consists of the operation of 7,704 dwelling units and the development of 1,618 additional units. Management and development operations are financed through rental income, loans and annual contributions. Projects are permanently financed through the sale of 40-year Authority bonds which are supported by the pledge of the Public Housing Administration to pay annual contributions equal to the debt service less any excess of operating receipts over operating expense.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories, deferred charges.....	\$124,190	\$87,472	\$96,100	\$94,899

Under the railroad retirement system, workers and employers contribute in the form of taxes on wages toward benefits which are payable when workers reach 65, become disabled, or die. These contributions are deposited in this trust fund and invested in Government securities bearing interest of at least 3%.

Transfers are made between this account and the Federal disability insurance trust fund and the Federal old-age and survivors insurance trust fund so as to place these funds in the same position in which they would have been if railroad employment had been included in social insurance coverage (65 Stat. 687 and 70 Stat. 837).

The status of the fund is as follows:

	1957 actual	1958 estimate	1959 estimate
Investments in U. S. securities at beginning of year (par)-----	\$3,606,505,000	\$3,642,058,000	\$3,767,000,000

Income.—The income of the railroad retirement account consists of taxes paid by railroad employers and employees; interest on investments; and payments from the Federal old-age and survivors insurance trust fund. The railroad retirement system has a reinsurance arrangement of financial interchanges with the social security system.

Budget program.—(1) *Retirement and survivor benefit payments.*—Payments will increase annually until the system reaches maturity some years hence.

(2) *Interest payments under Public Law 234.*—Interest was paid in 1957 to the Federal old-age and survivors insurance trust fund to place the trust fund in the same position in which it would have been if railroad employment after 1936 had been under social security coverage. However, in 1958 and 1959 no interest will be paid. Instead, the railroad account will receive funds from the old-age and survivors' insurance trust fund (45 U. S. C. 228).

INDEPENDENT OFFICES—Continued**RAILROAD RETIREMENT BOARD—Continued****RAILROAD RETIREMENT ACCOUNT—Continued**

(3) *Administrative expenses.*—Such expenses are subject to annual limitations in appropriation acts (see "Limitation on salaries and expenses," Railroad Retirement Board, in part II of the budget).

The Board administers an unemployment and sickness insurance system and an employment service to find jobs for unemployed railroad workers. The cost is provided through a permanent appropriation of 0.2% of taxable payroll. As of each June 30, the unobligated balance in this fund in excess of \$6 million is transferred as shown in the following table to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

	1957 actual	1958 estimate	1959 estimate

Appropriation, net.....	6,897,230	8,116,931	8,155,673

1. *Maintenance of earnings accounts.*—The amounts of insurance payments for unemployment, sickness, and maternity benefits are based upon individual records of earnings and daily wage rates. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the retirement program. Compensation items were 2,816,271 in 1957 and are estimated to be 2,840,000 in 1958 and 2,800,000 in 1959.

2. *Processing of unemployment insurance claims.*—This involves paying benefits to unemployed railroad workers and conducting an employment service to find jobs for them. Claims for unemployment compensation are filed locally and certified for payment through regional offices; the number fluctuates when economic changes affect the railroad industry. Unemployment claims were 1,552,942 in 1957 and are estimated at 1,500,000 in 1958 and 1959.

3. *Processing of sickness and maternity claims.*—These claims are filed by mail and certified for payment through the regional offices of the Board. The volume of sickness claims is relatively stable. Sickness claims were 915,264 in 1957 and are estimated at 936,000 in 1958 and 1959.

4. *Administration.*—Except for certain basic activities the costs of administration are shared between this and the retirement program on a measured basis.

This fund, established by appropriation from the general fund of the Treasury, is used to pay adjusted-service certificates issued to veterans of World War I upon maturity or upon demand. The principal of the fund has not been invested in United States securities since January 1, 1957. None of the fund will be invested in succeeding years. All future payments will be made from the principal of the fund. Only a small portion of the certificates remain unpaid (38 U. S. C. 646-657).

This fund was established in 1940 as the financing mechanism for the World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies were issued under this program of which about 5.4 million, totaling approximately \$35 billion, remain in force. Because issuance of new policies was ended in 1951, the insurance in force will continue to decline.

The assets of the fund, which are invested in special Treasury interest-bearing securities and in policy loans are expected to increase from \$5,775 million as of June 30, 1957, to \$6,025 million on June 30, 1959. The actuarial estimate of policy obligations at the end of the budget year totals \$5,591 million leaving a balance of \$434 million for contingency reserves.

The income of the fund derives from premium receipts, investments, and payments which are made to the fund from the appropriation for "National service life insurance" for claims (1) resulting from extra hazards of the veterans' service, and (2) arising on certain policies held by personnel on active duty.

The largest expenditures of the fund are for payments on death claims, the majority of which arose during World War II. Effective January 1, 1957, dividend rates were increased 13.5% and approximately half of premium receipts will be returned to policyholders as dividends. Administrative expenses are charged to the appropriation for "General operating expenses."

During 1957, policy reserves were increased \$410 million. This action caused the fund net operating loss for that year of \$155 million.

This fund is operated on a commercial basis to the greatest possible extent consistent with law. The following business-type statements of income and expense and financial condition include noncash transactions relating to the status of insurance policy accounts. In the budget schedules these noncash transactions, which are offset by other claims of the fund, are subtracted from the program obligations in order to show the cash position of the fund.

This fund was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. Approximately 370,000 policies of United States Government life insurance, providing coverage of over \$1.6 billion, remain in force.

The assets of the fund, which are invested in interest-bearing securities and policy loans, are estimated to decline from \$1,323 million as of June 30, 1957, to \$1,242 million on June 30, 1959, as an increasing number of policies mature through death or disability. The actuarial estimate of obligations at the end of the budget year totals \$1,155 million, leaving retained earnings of \$87 million.

The income of the fund is derived from premium receipts, investments, and payments which are made to the fund from the appropriation "Military and naval insurance," for claims (a) resulting from the extra hazards of the veteran's service, and (b) arising on certain policies held by personnel on active military duty. Administrative expenses are charged to the appropriation for "General operating expenses."

A total of \$61 million dividends will be paid in 1959 on United States Government life insurance policies. This amount includes \$32 million as a special dividend to be paid in the fall of 1958.

The fund is operated on a commercial basis to the greatest possible extent consistent with law. The following business-type statements of income and expense and financial condition include noncash transactions relating to the status of insurance policy accounts.

These operations were authorized by the Housing Act of 1954 in order to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home financing. Mortgage purchases, under these operations, are financed by proceeds from (1) subscription by the Treasury in 1955 of \$92.8 million in preferred stock (increased in 1957 to \$142.8 million and estimated to be increased in 1959 by \$10 million), (2) sale of debentures to the public, or to the Secretary of the Treasury (the Secretary of the Treasury may hold not more than \$2.25 billion of such debentures), and (3) mandatory subscription by mortgage sellers to the Association's common stock. Government management is intended to be transitional to be succeeded by wholly private operation when the Government investment can be retired. The present interim program, financed by private as well as Government investment, is treated as a trust fund. Operations are discussed in part II of the budget in connection with

the program's general fund financing and effect on budget expenditures.

Sources and Application of Funds (Operations)

	1957 actual	1958 estimate	1959 estimate
Gross expenditures (funds applied):			
Acquisition of assets: Federal Housing Administration insured and Veterans Administration guaranteed mortgages.....	\$993,365,403	\$684,800,000	\$489,750,000
Expense.....	27,327,375	69,030,000	91,500,000
Income tax equivalent.....	5,848,335	6,336,000	7,470,000
Dividends:			
On preferred stock held by Treasury.....	1,151,330	2,530,000	2,760,000
On common stock held by public.....	298,392	600,000	800,000
General fund financing: Repayment of borrowings to Treasury.....	963,968,870	691,233,814	335,000,000
Total gross expenditures.....	1,991,959,705	1,354,529,814	927,280,000

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others.

1. *Inspection and certification fees* provide for (a) inspection and certification of animal foods and inedible agricultural products in interstate and foreign commerce; (b) identification and marking of divided portions of meat, meat byproducts, and meat food products previously federally inspected and so marked in order that divided portions will bear Federal marks; and (c) exami-

nations of meat and meat food products in federally inspected meat-packing plants for compliance with contract specifications (7 U. S. C. 1622h, 1624).

2. *Expenses of providing feed and attendants for animals in quarantine* are paid from fees advanced by importers (21 U. S. C. 102).

3. *Miscellaneous contributed funds* received from States, local organizations, individuals, and others are available for work under cooperative agreements on miscellaneous production and utilization research activities, plant quarantine inspection, and cooperative plant pest control activities (5 U. S. C. 67, 563).

1. *Technical services and other assistance, agricultural conservation program.*—Funds are advanced to Soil Conservation Service from the agricultural conservation program appropriation on the basis of agreements with individual county agricultural stabilization and conservation committees for technical assistance in formulating and carrying out agricultural conservation cost-sharing programs in participating counties. This assistance is over and above that which would be furnished to farmers and ranchers under the regular soil conservation programs with soil conservation districts (71 Stat. 337; 16 U. S. C. 590k).

2. *Miscellaneous contributed funds.*—Miscellaneous funds received from States, local organizations, individuals, and others are available for work under cooperative agreements (5 U. S. C. 67, 563).

Financing:			
Amounts becoming available:			
Loans repaid.....	11,330,322	7,690,000	7,800,000
Interest income.....	1,372,169	1,445,000	1,522,000
Other income.....	27,327	21,000	26,000
Recovery of prior year obligations.....	1,445		
Total amounts becoming available.....	12,731,263	9,156,000	9,348,000
Unobligated balance brought forward.....	4,475,635	3,874,802	3,641,302
Total amounts available.....	17,206,898	13,030,802	12,989,302
Unobligated balance carried forward.....	-3,874,802	-3,641,302	-3,189,802
Financing applied to program.....	13,332,096	9,389,500	9,799,500

These funds are administered by the Farmers' Home Administration, under agreements with 40 individual States, for use in carrying out titles I and II of the Bankhead-Jones Farm Tenant Act. In these States, operating-type loans are made at 5% interest. In some States, farm ownership type loans are made from these funds and insured under the regular Farmers' Home Administration insured loan program at 3½% plus a 1% insurance charge. The entire assets of the 40 State corporations are being administered by the Farmers' Home Administration, with the exception of \$4,595,117 in cash returned to States which is not covered by an agreement.

Actual and estimated volume for 1956, 1957, 1958, and 1959 is as follows:

LOAN OPERATIONS

	Operating		Farm ownership	
	Number	Amount	Number	Amount
1956.....	5,881	\$9,607,131	145	\$1,598,741
1957.....	2,086	3,383,703	721	8,810,370
1958.....	1,520	2,400,000	535	6,200,000
1959.....	1,520	2,400,000	560	6,600,000

The stepped-up volume of farm ownership loans in 1957 resulted from a shortage of funds from private lenders for insured farm ownership loans. The reduction in the volume of operating loans for 1957, 1958, and 1959 results from utilizing a larger portion of the limited funds which are available for insured farm ownership loans.

The Bureau performs special statistical work, at cost, for individuals and firms requesting such data. In addition, the Bureau furnishes age and citizenship data from past census records on a fee basis. Funds received for these purposes are used to pay expenses incurred in performance of such work (5 U. S. C. 606; 12 U. S. C. 1701e; 13 U. S. C. 8, 218; 15 U. S. C. 189a, 192).

Contributed funds, highways for Alaska.....	193,259	1,314,160	1,350,000
Funds contributed for improvement of roads, bridges, and trails, Alaska.....	474,309	-----	-----
Unobligated balance carried forward.....	-201,073	-----	-----
Total financing.....	4,512,751	7,087,419	6,095,000

1. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways (42 Stat. 212, 218).

2. *Equipment, supplies, etc., for cooperating countries.*—In connection with the construction of the Inter-American Highway, the Bureau acts as agent for the cooperating Central American Republics in purchase of equipment, supplies, and services (55 Stat. 860).

3. *Technical assistance, United States dollars advanced from foreign governments.*—Under the Foreign Economic Assistance Act and under agreement with the International Bank for Reconstruction and Development, the Bureau renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. During the current year, these services are being rendered for Ethiopia, Iran, Nicaragua, Philippines, and Turkey (68 Stat. 841-861).

4. *Contributed funds, highways for Alaska.*—The Territory of Alaska contributes funds each year in an amount of not less than 10% of Federal funds apportioned to it. These funds are expended in conjunction with Federal funds apportioned to the Territory for construction and maintenance of roads within Federal-aid systems (70 Stat. 374). This now includes work formerly carried on under activity 5 above.

Balance carried forward.....	77,542,988	84,404,868	90,128,668

This fund consists of receipts from fines, forfeitures, and stoppages of pay of regular enlisted personnel of the Army and Air Force, withholding of 10 cents per month from the pay of such personnel, estates of deceased soldiers and airmen, other receipts consisting largely of sales and interest of 3% on fund balance. The receipts and the balance are available for obligation and expenditure through the maintenance and operation account only as authorized annually by Congress (24 U. S. C. 44, 45; 31 U. S. C. 725s).

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park and Monument system (16 U. S. C. 6). Donations amounting to \$836,222 were received from 24 contributors during 1957. Of that amount, \$400,000 was received from a private foundation which was matched by Federal funds for the purpose of acquiring private in-holdings within the National Park system. It is estimated that \$500,000 will be received during 1958 to be matched by Federal funds for the same purpose. It is expected that similar donations will be received during 1959 to be matched by Federal funds whenever possible.

2. *National Park trust fund.*—The National Park Trust Fund Board holds and administers gifts of personal property for the benefit of the National Park Service. Interest accruals or donations to the fund are used for current needs, or invested in U. S. Treasury bonds (16 U. S. C. 6a, 19).

3. *Preservation, birthplace of Abraham Lincoln.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest thereon is available for preservation of the Abraham Lincoln National Historical Park, Ky. (16 U. S. C. 211, 212).

Commissaries are operated for the inmates as an earned privilege (Comp. Gen. Dec. July 9, 1931, and Jan. 5, 1932). Tobaccos, candies, toiletries, etc., are sold. Profits are used for general welfare and recreational items for the inmates. Sales for 1959 are estimated at a slight increase over the 1958 estimate. Adequate working capital is assured from retained earnings. Year-end balances of unpaid undelivered orders are as follows: 1956, \$80,992; 1957, \$131,247.

Seized property in the United States of the governments or nationals of Germany and Japan, vested in the name of the Attorney General, is prepared for liquidation as soon as practicable (50 U. S. C. App.). During fiscal year 1957 no transfers were made to the war claims fund. The total transferred to date remains at \$225 million. In 1957 a total of \$2.9 million in claims and settlements was paid from such property operations and it is anticipated that \$1.5 million will be paid in 1958 and \$5.2 million in 1959. The estimate of interest in vested property on June 30, 1959, reflects increases of \$10.7 million from 1958 and \$48 million from 1957.

Enemy-owned property in the Philippines is administered for the Philippine Government by the Office of Alien Property in the same manner as funds for World War I and World War II properties (Executive Order 10254). During 1957 no transfers were made to the Philippine Government and none will be made in 1958. It is anticipated that \$1.2 million will be transferred in 1959. The following statements include the United States dollar equivalent of currencies of the Philippines which become available without dollar purchase.

Property in the United States of the governments or nationals of Bulgaria, Hungary, and Rumania, seized pursuant to title II of the International Claims Settlement Act of 1949 (22 U. S. C. 1621), is being vested in the name of the Attorney General like property seized from the governments and nationals of Germany and Japan. As of June 30, 1957, a total of \$15.5 million has been vested and liquidated. It is estimated that during 1958 an additional \$10 million will be acquired. Funds thus realized are earmarked for payment of war damages and nationalization claims assertable by United States nationals against Bulgaria, Hungary, and Rumania.

U. S. securities (par).....	-882,125	-888,625	-858,625
Total financing.....	38,796	67,400	67,400

These trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death and from fines and penalty payments. In 1957 receipts were \$18,000 and interest was \$22,487 (33 U. S. C. 908; 31 U. S. C. 725; 33 U. S. C. 944). Receipts are used to pay additional compensation for second injuries resulting in permanent total disability and to provide maintenance for employees undergoing vocational rehabilitation. In addition, under the subactivity "Administration of rehabilitation," provi-

sion is made for the costs of necessary rehabilitation services not otherwise available to disabled longshoremen and harbor workers.

This fund is used primarily for the payment of annuities to retired Foreign Service officers (22 U. S. C. 1062). It is also used for the refund of contributions made by certain officers who leave the Foreign Service before retirement.

DEPARTMENT OF STATE—Continued

ADMINISTRATION OF FOREIGN AFFAIRS—Continued

FOREIGN SERVICE RETIREMENT AND DISABILITY FUND—Con.

The fund is maintained through (1) contribution of 5% of the basic annual salaries of all Foreign Service officers; (2) interest on investments; and (3) appropriated funds. It is estimated that approximately 570 annuitants will be paid retirement benefits from this fund during 1959 compared with 520 at the end of 1957 and 545 at the end of 1958. Gratuities represent payments made to officers in classes 4, 5, 6, and 7 who are selected out of the Service.

1. *Benefit payments.*—The Social Security Act provides disability insurance benefits for certain disabled individuals. An amount equal to one-half of 1% of wages paid and three-eighths of 1% of self-employment income is deposited to this fund for benefit payments and administrative expenses. The excess of income over outgo and annual interest are invested in Government securities.

2. *Administration.*—The Secretary of Health, Education, and Welfare determines, at the end of each year, that portion of the administrative expenses of the Bureau of Old-Age and Survivors Insurance which is a proper charge to this fund. The amount shown herein for the administrative expenses is subject to further refinement of the processes for allocating costs between the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund (70 Stat. 821).

Starting in 1959, transfers will be made between this trust fund and the railroad retirement account so as to place this fund in the same position in which it would have been if railroad employment had been included in social insurance coverage (70 Stat. 837).

The status of the fund is as follows:

Under the Federal old-age and survivors insurance system, workers, employers, and self-employed individuals make annual contributions in the form of taxes on earnings toward the benefits which will be payable when the worker retires or when he dies. An amount equal to the annual contributions, including interest and penalties, is deposited in this trust fund for benefit payments and administrative expenses, part of which is being used for construction of a building to house the Bureau of Old-Age and Survivors Insurance. The excess of income over outgo together with annual interest is invested in Government securities (42 U. S. C. 401).

TREASURY DEPARTMENT—Continued

Total financing.....	1,643,897,769	1,677,884,400	1,768,226,400

Under the Social Security Act all moneys deposited by a State agency from a State unemployment fund or by the Railroad Retirement Board to the credit of the railroad unemployment insurance account, as well as transfers to the Federal unemployment account, are held in the unemployment trust fund; amounts in the fund which are not required to meet current withdrawals are invested in Government securities (42 U. S. C. 1104).

The status of the fund is fully disclosed in the program and financing schedule above.

The June 30, 1957, balance of \$9,057,924,344 is distributed as follows:

State unemployment trust accounts.....	\$8,486,567,367
Railroad unemployment insurance account.....	294,781,510
Federal unemployment account.....	205,380,247
Undistributed (for later credit to the State and Federal accounts).....	71,195,220

The Federal unemployment account is maintained at \$200 million in order to make loans to States whenever benefit payments made by any State seriously deplete the balance in its unemployment trust account. Interest and repayments may increase the balance above \$200 million. Beginning in 1958, the major part of the administrative expenses of the Bureau of Employment Security, Department of Labor, are being paid from this account. The Federal unemployment account's financial activity for 1957 showed:

Balance brought forward July 1, 1956.....	\$152,258,042
Outgo: Loans.....	2,630,000
Income:	
Appropriation.....	47,654,863
Repayment of loans.....	3,000,000
Interest.....	5,097,342
Balance carried forward June 30, 1957.....	205,380,247

1-6. *Foreign claims settlement.*—The Foreign Claims Settlement Commission is authorized to adjudicate claims of American nationals against Bulgaria, Hungary, Italy, Rumania, Soviet Union, and Yugoslavia. Upon certification by the Commission, the Secretary of the Treasury is authorized to make payments on awards. Final pay-

ments are to be made on the claims as follows: Bulgaria 1959; Hungary, 1959; Italy, 1959; Rumania, 1959; Soviet Union, 1959; and Yugoslavia, 1958 (64 Stat. 12 and 69 Stat. 562).

7. *Losses in melting gold.*—Out of the receipts to be covered into the Treasury under section 7 of the Gold Reserve Act of 1934, an amount is made available sufficient to cover the difference between the volume of gold as carried in the general account of the Treasurer of the United States and the volume of such gold after melting and refining (48 Stat. 1061).

8. *National defense conditional gifts.*—The Secretary of the Treasury accepts on behalf of the United States conditional gifts of money or other tangible property to be used for a particular defense purpose. Intangibles other than money are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which will best effectuate the intent of the donors (68 Stat. 566).

9. *Payment of pre-1934 bonds of the Government of the Philippines.*—This trust account provides for payment of principal and interest on outstanding bonds of the Philippines, its provinces, cities, and municipalities issued prior to May 1, 1934, under authority of acts of Congress. The value of unmatured outstanding bonds is \$4,847,850 (22 U. S. C. 1393(g)(5)).

10. *Payment of unclaimed moneys.*—Payments are made to individuals who establish their right to moneys held in trust pending claims of owners.

11. *Unclaimed moneys of individuals whose whereabouts are known.*—Amounts are held in trust awaiting settlement of claims (31 U. S. C. 725).

Matured obligations of the District of Columbia.—Funds from inactive accounts are transferred to this account to meet matured obligations of the District of Columbia when and if presented (31 U. S. C. 725s). As of June 30, 1957, there was a balance of \$8,176 in the fund.

To promote the education of the blind.—The \$250,000 uninvested credit on the books of the Treasury is an unexpended endowment fund to aid the education of the blind in the United States. A permanent annual appropriation of \$10,000, being equivalent to 4% on the principal, is paid to the American Printing House for the Blind (20 U. S. C. 101).

INTRODUCTION TO PART IV

Part IV of the budget contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Most of the analyses include explanatory material which expands and elaborates these introductory notes.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Special analysis A presents information on the flow of money between the public and the Federal Government as a whole, including both Federal funds and trust (and deposit) funds. In addition, certain transactions of enterprises which are sponsored by the Government are included. Major intragovernmental and noncash transactions are excluded in this consolidation. This analysis also presents a reconciliation with Treasury cash deposits and withdrawals as reported in the Daily Statement of the United States Treasury. The information here is the basis for table 5 of part I, which summarizes the data for fiscal year 1959 only.

ANALYSIS OF BUDGET RECEIPTS

Special analysis B presents details on the budget receipts summarized in table 1 of part I. It includes a statement explaining the receipt estimates, together with a table giving a classification of receipts by source. The figures include receipts of both the general fund and the special funds. The text pertaining to taxes, customs, and refunds is prepared by the Treasury Department.

ANALYSIS OF THE BUDGET BY FUNCTION AND AGENCY

Special analysis C gives the details for the functional breakdown of new obligational authority and expenditures used in the budget message and in certain tables of part I. It is compiled by regrouping the figures found in the chapter summaries of part II. The code numbers listed in the chapter summaries are the key to the grouping found in this analysis.

CHARACTER ANALYSIS OF BUDGET EXPENDITURES

Special analysis D analyzes budget expenditures in terms of the duration and nature of the benefits derived. Expenditures of an *investment* type are shown in two major categories—one for acquisition and improvement of Federal assets, and the other for developmental purposes such as additions to State, local, and private assets, and expenditures for research, education, and health. Expenditures yielding *current* benefits are also grouped in two major categories—one for aids and special services to various groups, and the other for the remaining current operating expenses. No adjustments are made for depreciation, obsolescence, allowances for potential losses on loans, and other items not reflected in current expenditure data.

ANALYSES OF CERTAIN PROGRAM EXPENDITURES

Special analysis E gives detailed information on the major Federal programs involving direct loans, loan insurance, and loan guaranties. It provides data on commitment authority, commitments, expenditures, repayments, and outstanding loans, guaranties, and insurance.

Special analysis F provides an analysis of the construction activities of the Federal Government. It presents detailed information on direct Federal public works and Federal grants and loans for public works. It gives summary information on Federal financial assistance for certain international public works, semipublic works, and construction by private business and individuals.

Special analysis G covers Federal financial assistance to State and local governments. Three types of Federal assistance are included—direct grants-in-aid, shared revenues, and loans and repayable advances.

Special analysis H summarizes Federal expenditures for research and development. It includes both the performance of research and the construction, improvement, and equipping of research facilities. Data on Federal support of scientific training programs are appended.

Special analysis I presents the current and recommended budget levels of the principal statistical programs of the Federal Government.

SELECTED INVESTMENTS AND INTERFUND TRANSACTIONS

Special analysis J sets forth certain investments and interfund transactions which are not reflected in the expenditures or receipts shown elsewhere in the budget. The first two groups of these are the investments by revolving and trust funds in United States Government securities (both Treasury issues and the securities of wholly owned Government enterprises), and the net borrowing or repayment of debt by wholly owned enterprises (other than their debt to the Treasury). The totals of these transactions, while not a part of budget expenditures or receipts, affect the financing requirements of the Government as a whole, and therefore are included in computations shown in table 4 of part I. The other group of transactions included in this table constitutes transfers by the revolving funds to the general fund, representing the return of capital or the distribution of earnings; such transfers are excluded from budget expenditures and budget receipts.

HISTORICAL COMPARISON OF BUDGET RECEIPTS AND EXPENDITURES

Special analysis K presents a 10-year comparison of budget receipts and expenditures. The receipts are classified by source and the expenditures by function. A technical note sets forth the change in classifications since the 1958 budget. As in special analysis C, the code numbers appearing in the chapter summaries of part II are the key to the grouping of items in the expenditure section of this analysis.

SPECIAL ANALYSIS A

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Federal Government receipts from and payments to the public in 1959 are estimated to be the highest in peacetime history. (For a detailed description of the coverage, use, and limitations of this concept of Federal income and outgo, see pp. 880-881 of this analysis.) Total cash receipts from the public of \$87,286 million for 1959 are estimated to be \$2,173 million more than in 1958. Cash payments to the public are estimated to be \$86,662 million, \$1,724 million more than in 1958.

A continued rise in the receipts of the social security trust funds is the primary reason estimated receipts from the public will increase \$173 million more than budget receipts between 1958 and 1959. Payments to the public are estimated to rise more than budget expenditures by \$578 million. The increase of \$1,168 million in trust fund payments, mainly from the social security and highway trust funds, is expected to be partly offset by a decrease in payments to redeem Treasury notes previously issued to the International Monetary Fund. Since payments from other than budget funds increase more than comparable receipts, the excess of receipts from the public will increase from 1958 to 1959 by less than the change estimated from the budget deficit to the budget surplus.

Federal receipts from the public by major source and payments to the public by major function.—Total Federal receipts from the public will have almost doubled over the 12 years from 1948 to 1959, as shown in the following table, while total Federal payments to the public will have more than doubled.

The increase in both receipts from and payments to the public has been faster than that of budget receipts and expenditures. This trend reflects the rapid growth in the size of trust fund programs (particularly old-age and survivors insurance), as well as the creation of such new trust funds as those for highways and for the secondary market operations of the Federal National Mortgage Association.

With respect to payments to the public by function, the largest relative changes from 1948 to 1959 occur in payments for commerce and housing and for agriculture and agricultural resources. Payments for commerce (including highways) and housing are estimated in 1959 to be more than nine times the low 1948 level. Payments for agriculture, which were exceptionally low in 1948 because of special postwar and other factors, will have increased eightfold. On the other hand, payments for international

¹ Since 1954, includes adjustment for change in public debt interest checks, coupons, and accruals outstanding.

² Excludes deposit funds of Government-sponsored enterprises which are allocated to the appropriate program.

³ In 1957 and prior years the Government's payment as employer was made in a lump

sum to the Civil Service Commission and was not included in any functional category as a payment to the public. From 1958, the individual agency payments will be included in the applicable functional category.

⁴ Since 1954, excludes that part of clearing account which is for public debt interest checks, coupons, and accruals outstanding.

SPECIAL ANALYSIS A—Continued

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC—Continued

affairs and finance in 1959 will be about one fourth their unusually high postwar amounts of 1948. Payments for labor and welfare and for major national security are estimated to be about 5 and 4 times their 1948 amounts, respectively. The increases for natural resources and interest are smaller, and payments for general government will have increased only 26%. Although they have been rising in recent years, payments for veterans' services and benefits in 1959 are estimated to be 18% less than in 1948, when a very large number of veterans were receiving readjustment benefits.

Comparison with the budget.—As is the case for budget receipts and expenditures, income taxes provide the majority of cash receipts from the public, and major national security programs account for more than half of all cash payments to the public. However, because they include the social security and other retirement and insurance trust fund payments, labor and welfare payments are much larger on a consolidated cash basis than on a budget expenditure basis. Also, payments to the public for commerce and housing, estimated at \$4,205 million in 1959, will be more than twice budget expenditures for this program, since payments to the public include highway and other trust fund payments. On the other hand, cash payments to the public for interest are considerably smaller than budget expenditures for interest, primarily because a large amount of interest (\$1,341 million estimated for 1959) is paid by the Treasury to the trust funds and not to the public directly.

FEDERAL RECEIPTS FROM AND PAYMENTS TO THE PUBLIC COMPARED WITH BUDGET RECEIPTS AND EXPENDITURES FOR 1959
[Estimates. In millions]

Description	Receipts from and payments to the public	Budget receipts and expenditures	Difference

Undistributed	-1,363	-----	-1,363
Total payments	86,662	73,934	12,728
Excess of receipts	624	466	158

Federal repayment of cash borrowing from the public.—In the long run, the amount of Federal repayment of cash borrowing from the public is affected primarily by the excess of receipts from the public over payments. However, funds obtained late in one fiscal year are sometimes not utilized until early in the following year. In such cases, the size of the Government's cash balances will vary from the end of one fiscal year to another. Receipts from the exercise of the monetary authority (mostly seigniorage on silver) provide a relatively small additional amount that is available for payment to the public or repayment of cash borrowing.

FEDERAL GOVERNMENT REPAYMENT OF CASH BORROWING FROM THE PUBLIC

[In millions]

Description	1957 actual	1958 estimate	1959 estimate
Excess of Federal receipts from the public	\$2,099	\$175	\$624
Receipts from exercise of monetary authority	49	55	55
Increase (—) or decrease in cash balances	952	-426	-----
Federal repayment of cash borrowing	3,100	-196	679

The figures shown for repayment of cash borrowing from the public include not only the repayment of borrowing by the Treasury through net redemptions of U. S. Government securities held by the public, but also include the net borrowing or repayment of borrowing by Government agencies and Government-sponsored enterprises through sales and redemptions of their own securities to the public. Changes in the public debt that do not represent direct cash borrowing or repayment of borrowing from the public are excluded. Major examples are noncash debt transactions such as the issuance of U. S. Government notes and securities to the International Monetary Fund and to the trust funds.

¹ From table 4 in part I of this document.² Includes the Federal National Mortgage Association secondary market operations and (from Jan. 1, 1957, to Jan. 1, 1959) the Federal intermediate credit banks.

Coverage.—This analysis presents information on the flow of money between the public and the Federal Government as a whole, representing, in effect, a consolidated cash statement of Federal transactions—other than borrowing—with the public. The public is defined to include individuals, banks, other private corporations and associations, unincorporated businesses, the Federal Reserve System, the Postal Savings System, State and local governments, foreign governments, and international organizations.

Federal cash receipts from and payments to the public include the transactions of trust and deposit funds (which are not owned by the Federal Government) as well as the Federal funds included in budget receipts and expenditures. (For a detailed description of the various types of funds see the introductions to part I and part III.) Major intragovernmental transactions which are reported as both expenditures and receipts of the funds being consolidated are eliminated. These major intragovernmental transactions are (1) payments between Federal funds, such as interest paid to the general fund by the

SPECIAL ANALYSIS A—Continued

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC—Continued

Commodity Credit Corporation on its borrowing from the Treasury; (2) payments between Federal funds and trust funds, such as interest paid to the old-age and survivors insurance trust fund by the general fund on securities held by the trust fund; and (3) payments between trust funds, such as the District of Columbia payments to the civil service retirement and disability fund.

Receipts of the Government from the exercise of monetary authority (mostly seigniorage on silver) do not represent cash received from the public and are therefore also excluded in this consolidation.

Equals: Federal payments to the public	80,007	84,938	86,662
Excess of Federal receipts from the public	2,099	175	624

¹ From table 1 in part I of this document.² From table 10 in part III of this document.

In this analysis the net expenditures of five Government-sponsored enterprises—the Federal Deposit Insurance Corporation; the Federal home loan banks; the Federal land banks; the banks for cooperatives; and, beginning January 1, 1959, the Federal intermediate credit banks—are estimated by measuring the net sales of their own obligations and the net redemptions of the U. S. securities held by them. The net receipts obtained from such investment transactions are used mainly for the financing of operating expenditures. Also included on a net basis in this analysis, but as part of trust fund expenditures, are the transactions of the Federal National Mortgage Association secondary market operations (an additional Government-sponsored enterprise) and, from January 1, 1957, to January 1, 1959, those of the Federal intermediate credit banks.

Budget expenditures include a relatively small number of noncash accrual transactions. In deriving Federal payments to the public, these noncash items are deducted from budget expenditures in the year of accrual of the obligation. They are later included as payments in the year when the payment is made in cash.

The major items of this type are (1) interest currently accruing on savings bonds and the interest which is paid in cash as the bonds are redeemed, (2) U. S. securities sometimes issued in payment of obligations and their redemption for cash at a later date (an example is the payment of

the U. S. subscription to the International Monetary Fund in 1947 and redemption in later years, especially in 1957 and 1958), and (3) net changes in the clearing accounts for checks, public-debt interest, and related items which are outstanding at the end of each year. In any given year the aggregate of the accruals may be larger or smaller than total disbursements for previously accrued items.

Use and limitations.—Federal Government receipts from and payments to the public are particularly helpful in evaluating the impact of Federal transactions on the economy. For example, Federal receipts from the public classified by source indicate the sectors of the economy or the kinds of transactions other than borrowing which provide funds for the Government. Federal payments to the public by function indicate the relative importance in terms of total cash outlays of the major Government programs. The excess of receipts from the public or payments to the public tends to reflect the net impact of Federal financial transactions on the incomes of the public as a whole.

However, the scope and impact of Federal transactions are somewhat understated, because the totals include only the net receipts or spending of wholly owned and of Government-sponsored enterprises. These enterprises receive interest payments, repayments of loans, and other income from the public which are deducted from new loans and other disbursements. The difference is reported as the net expenditures of the enterprises, so that for the enterprises whose receipts exceed expenditures, the entry is a negative expenditure. Since the totals of receipts and payments are reduced by equal amounts, the excess of Federal receipts from or payments to the public is not affected.

Users of the figures on receipts from and payments to the public should also recognize that no single measure can indicate all of the important economic effects of the many Federal financial activities. For example, a rapid expansion in new appropriations and in Government orders could stimulate a rise in business activity long before the authorized funds were paid to the public. Likewise, the enactment of a tax measure or even the expectation of a change in tax rates may affect business planning or activity long before cash flows occur between the Federal Government and the public. Federal guaranties and insurance of private loans (summarized in special analysis E) also influence the economy, even though they normally have little or no immediate impact on Federal receipts from and payments to the public. Certain other Government contractual arrangements, such as the lease-purchase of Government buildings, have economic effects which are only partially measured by the Government payments made in any 1 year. Aside from the significance of interest payments to the public, the management of the public debt is a further important factor which has particular impact in the money and credit markets of the economy.

Reconciliation with Treasury cash deposits and withdrawals.—The daily statement of the Treasury presents a consolidated cash statement of Treasury operating transactions similar in general concept to Federal receipts from and payments to the public. However, it is limited in coverage to those transactions affecting the accounts of the Treasurer of the United States.

SPECIAL ANALYSIS A—Continued

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC—Continued

RECONCILIATION OF FEDERAL GOVERNMENT RECEIPTS FROM THE PUBLIC WITH TREASURY CASH DEPOSITS

[In millions]

Description	1957 actual	1958 estimate	1959 estimate
Federal receipts from the public.....	\$82,106	\$85,113	\$87,286
Receipts from exercise of monetary authority.....	49	55	55
Net difference in actual year due to reporting method.....	-280		
Equals: Treasury cash deposits.....	81,875	85,168	87,341

Receipts from exercise of monetary authority, since they affect the accounts of the Treasurer, are included in Treasury cash deposits. However, these receipts are omitted from Federal receipts from the public, since they do not take cash from the public.

The net difference due to reporting method applies equally in the reconciliation of receipts with deposits and payments with withdrawals. This arises principally from the fact that the method used to adjust for checks being cleared does not adjust receipts and payments separately. Instead, the net change in clearing accounts is deducted from payments. This procedure yields an accurate measure of the excess of receipts or payments. However, it still leaves a further adjustment to be made to both receipts and payments to reconcile them with cash deposits and withdrawals in the actual year.

The amounts shown for Federal payments to the public are more inclusive than cash withdrawals because payments by Government agencies from their own cash balances or from accounts in commercial banks are not shown in the Treasurer's account. These payments are measured by net changes in cash held outside the Treasury and by net proceeds realized by Government agencies and trust funds from sales of securities in the open market that were not reflected in the Treasurer's account.

SPECIAL ANALYSIS B

ANALYSIS OF BUDGET RECEIPTS

Estimates based on existing and proposed legislation

This special analysis provides supporting detail for the figures on budget receipts by source which are included in the tables of the budget message and in table 1 of part 1.

The estimates of receipts from taxes and customs for the current and ensuing fiscal years are prepared in December of each year by the Treasury Department. In general, the estimates of miscellaneous receipts are prepared by the agencies depositing the receipts in the Treasury.

The receipts estimates are based on the assumption that resumed business expansion occurs early in the calendar year 1958. It is also assumed for the fiscal year 1959 that legislation will be enacted extending tax rates at their present levels for a year beyond July 1, 1958, as recommended by the President.

Detailed estimates of budget receipts under both existing and proposed legislation are contained on pages 885 to 888.

BUDGET RECEIPTS

Budget receipts in the fiscal year 1958 are estimated to be \$72,400 million, an increase of \$1,371 million over actual receipts of \$71,029 million in 1957. A further rise of \$2,000 million to \$74,400 million is expected for 1959.

FISCAL YEAR 1958

Actual receipts in 1957 and estimated receipts in 1958 are compared by major sources in the following table. The amount shown for each receipt source is the net amount after deduction of refunds and transfers to trust funds.

Net budget receipts

[In millions]

Source	1957 actual	1958 estimate	Increase (+) or de- crease (-), 1958 over 1957
Individual income taxes.....	\$35,619.5	\$37,200.0	+\$1,580.5
Corporation income taxes.....	21,167.1	20,385.0	-782.1
Excise taxes.....	9,055.3	8,898.0	-157.3
Employment taxes.....	327.6	339.2	+11.6
Estate and gift taxes.....	1,364.7	1,486.0	+121.3
Taxes not otherwise classified.....	14.3	5.0	-9.3
Customs.....	734.6	765.0	+30.4
Miscellaneous receipts.....	2,745.6	3,321.8	+576.2
Net budget receipts.....	71,028.6	72,400.0	+1,371.4

Receipts from the most important revenue source, the individual income tax, are estimated to increase in 1958 by a substantial amount. A large increase is also estimated for miscellaneous receipts which consist almost entirely of nontax revenues. Offsetting these and other smaller increases are estimated declines of 4% for corporation income taxes and 2% for net excise taxes (after transfers to the highway trust fund).

Individual income taxes.—Receipts from the individual income taxes are estimated to be \$37,200 million in 1958, \$1,581 million above actual receipts of \$35,620 million in 1957. The increase results from the higher levels of income affecting 1958 receipts.

Corporation income taxes.—Corporation income tax receipts are estimated to amount to \$20,385 million in 1958, \$782 million below the \$21,167 million received in 1957. The decline in corporation tax receipts reflects an estimate of lower corporation profits in calendar year

1957 than in 1956 and an irregularity in the flow of corporation receipts that raised the fiscal year 1957 total in comparison with 1958.

Excise taxes.—Receipts from this source are listed in the following table:

Excise tax receipts

[In millions]

Source	1957 actual	1958 estimate	Increase (+) or de- crease (-), 1958 over 1957
Alcohol taxes.....	\$2,973.2	\$3,036.0	+\$62.8
Tobacco taxes.....	1,674.1	1,735.0	+60.9
Taxes on documents, other instruments, and playing cards.....	107.5	112.0	+4.5
Manufacturers' excise taxes.....	3,761.9	4,184.0	+422.1
Retailers' excise taxes.....	336.1	355.0	+18.9
Miscellaneous excise taxes.....	1,718.5	1,770.0	+51.5
Undistributed depository receipts and unapplied collections.....	66.2	-----	-66.2
Gross excise taxes.....	10,637.5	11,192.0	+554.5
Deduct—			
Refunds of receipts.....	103.3	174.0	+70.7
Transfer to highway trust fund.....	1,478.9	2,120.0	+641.1
Net excise taxes.....	9,055.3	8,898.0	-157.3

Gross excise taxes in 1958 are estimated to increase to \$11,192 million from actual receipts of \$10,638 million in 1957. The full-year effect of increased and new taxes under the Highway Revenue Act of 1956, as compared with the part-year effect in 1957, together with estimated higher levels of taxable goods and services are responsible for the estimated rise in gross receipts. All major excise tax sources are expected to increase, with the manufacturers' taxes showing the largest advances. Receipts from the gasoline tax furnish almost half of the increase shown for this group.

Although gross excise taxes are estimated to increase \$555 million in 1958, a decline of \$157 million is estimated for net excise taxes. Transfers of tax receipts to the highway trust fund will increase in 1958, not only because of a greater volume of gasoline sales, but also because transfers of both increased or new taxes and taxes in effect prior to the Highway Act will occur on a full-year basis in 1958. Refunds will also increase because of the gasoline tax refund provision of the Highway Act.

Employment taxes.—The yield of the employment taxes is shown in the following table:

Employment tax receipts

[In millions]

Source	1957 actual	1958 estimate	Increase (+) or de- crease (-), 1958 over 1957

SPECIAL ANALYSIS B—Continued

ANALYSIS OF BUDGET RECEIPTS—Continued

Estimates based on existing and proposed legislation—Continued

All employment taxes are expected to increase in 1958. Higher levels of taxable wages and a full-year effect of the higher rates enacted to finance the disability insurance trust fund are primarily responsible.

Estate and gift taxes.—Receipts from this source are estimated to be \$1,486 million in 1958, an increase of \$121 million over actual receipts of \$1,365 million in 1957.

Customs.—Custom receipts are estimated to amount to \$765 million in 1958, an increase of \$30 million over the actual receipts of \$735 million in 1957.

Miscellaneous receipts.—Miscellaneous receipts are estimated to increase substantially in 1958. Interest payments by Government enterprises and foreign countries, rents and royalties on the Outer Continental Shelf, and larger deposits by the Federal Reserve Board are primarily responsible.

FISCAL YEAR 1959

Estimated receipts in 1958 and 1959 are compared by major sources in the following table:

Net budget receipts

[In millions]

Source	1958 estimate	1959 estimate	Increase (+) or de- crease (—), 1959 over 1958
Individual income taxes.....	\$37,200.0	\$38,500.0	+\$1,300.0
Corporation income taxes.....	20,385.0	20,400.0	+15.0
Excise taxes.....	8,898.0	9,280.0	+382.0
Employment taxes.....	339.2	347.1	+7.9
Estate and gift taxes.....	1,486.0	1,570.0	+84.0
Taxes not otherwise classified.....	5.0	5.0	—
Customs.....	765.0	780.0	+15.0
Miscellaneous receipts.....	3,321.8	3,518.0	+196.2
Net budget receipts.....	72,400.0	74,400.0	+2,000.0

Major increases are estimated to occur in receipts from the individual income taxes and from excise taxes. Other receipt sources are expected to show relatively small gains or to remain virtually unchanged.

Individual income taxes.—A rise in personal income is expected to increase receipts from individual income taxes by \$1,300 million to \$38,500 million in 1959.

Corporation income taxes.—Virtually unchanged receipts of corporation income taxes from the fiscal year 1958 to 1959 reflect the assumption that corporate profits will be about the same in the calendar year 1958 as in 1957. Although corporate profits declined in the latter part of 1957, they are expected to improve after the early months of 1958 and average for the whole of 1958 at about the same level as in the calendar year 1957.

Excise taxes.—Receipts from this source, by major groups, are listed in the following table.

Excise taxes under proposed legislation are estimated to increase in 1959 on both a gross and a net basis. Expanded business activity and increased consumer incomes are estimated for 1959 and these are reflected in advances throughout the excise tax group.

Excise tax receipts

[In millions]

Source	1958 estimate	1959 estimate	Increase (+) or de- crease (—), 1959 over 1958
Alcohol taxes.....	\$3,036.0	\$3,098.0	+\$62.0
Tobacco taxes.....	1,735.0	1,780.0	+45.0
Taxes on documents, other instruments, and playing cards.....	112.0	112.0	—
Manufacturers' excise taxes.....	4,184.0	4,418.0	+234.0
Retailers' excise taxes.....	355.0	367.0	+12.0
Miscellaneous excise taxes.....	1,770.0	1,858.0	+88.0
Gross excise taxes.....	11,192.0	11,633.0	+441.0
Deduct—			
Refunds of receipts.....	174.0	189.0	+15.0
Transfer to highway trust fund.....	2,120.0	2,164.0	+44.0
Net excise taxes.....	8,898.0	9,280.0	+382.0

These estimated increases also reflect enactment of legislation (1) extending existing excise tax rates for another year and (2) providing a new tax of 3½ cents a gallon on jet fuels and an increase in the existing tax rate on aviation gasoline to 3½ cents from the present 2 cents. Receipts from taxes on aviation gasoline and tires are presently transferred into the highway trust fund; it is also proposed that starting in 1959, receipts from aviation gasoline and tires be retained in general receipts.

Employment taxes.—The yield of the employment taxes is shown in the following table:

Employment tax receipts

[In millions]

Source	1958 estimate	1959 estimate	Increase (+) or de- crease (—), 1959 over 1958
Federal Insurance Contributions Act and Self-Employment Contributions Act....	\$7,763.0	\$7,988.0	+\$225.0
Railroad Retirement Tax Act.....	620.0	625.0	+5.0
Federal Unemployment Tax Act.....	342.0	350.0	+8.0
Gross employment taxes.....	8,725.0	8,963.0	+238.0
Deduct—			
Refunds of receipts.....	2.8	3.0	+.2
Transfer to Federal old-age and survi- vors insurance trust fund.....	6,900.0	7,100.0	+200.0
Transfer to Federal disability insurance trust fund.....	863.0	888.0	+25.0
Transfer to railroad retirement account.....	620.0	625.0	+5.0
Net employment taxes.....	339.2	347.1	+7.9

All employment taxes are estimated to increase in 1959 as a result of higher levels of taxable wages

Estate and gift taxes.—Receipts from estate and gift taxes are expected to continue to increase in 1959. Receipts from this source are estimated to reach \$1,570 million in 1959, \$84 million above 1958.

Customs.—Receipts from this source are expected to amount to \$780 million in 1959, an increase of \$15 million over 1958.

Miscellaneous receipts.—The estimated increase of \$196 million in miscellaneous receipts is attributable for the most part to larger collections of principal and interest and payments on loans.

Less refunds.....	3,315	3,200	3,050
Net miscellaneous receipts.....	2,745,574	3,321,800	3,517,950
Net budget receipts.....	71,028,650	72,400,000	74,400,000

SPECIAL ANALYSIS C

ANALYSIS OF BUDGET BY FUNCTION AND AGENCY

This special analysis gives the details for the functional breakdown of new obligational authority and budget expenditures used in the budget message and in some of the tables of part I.

For each function and subfunction, data are listed by agencies. In order to find the appropriation items which make up the amounts shown for the agency, it is necessary to look in the chapter summary for that agency. Each entry in the chapter summary is coded to indicate the subfunction in which it is classified.

For purposes of this classification each appropriation account and each revolving and management fund is treated as a unit. Exceptions are made, and accounts are split into two or more categories, in only selected cases. This necessarily involves some close decisions in borderline cases, and it means that programs with secondary significance for some major functions will be included in another category because another objective predominates in the particular appropriation. Thus, to secure a comprehensive total of all Government programs related to education, for example, it would be necessary to provide a special tabulation, counting in this category

some appropriations which might also be relevant to other categories.

Whereas this special analysis presents both authorizations and expenditures for major functions, subfunctions, and agencies over a 3-year period, special analysis K shows expenditures for the major functions and subfunctions over a 10-year period. Special analysis A shows Federal Government payments to the public, classified by major function. The functional categories are also used in the analyses summarizing Federal activities in public works and other construction, Federal aid to State and local governments, and Federal research and development programs.

For purposes of the budget message the functional categories have been combined into four large groupings, reflecting broad purposes as follows: (1) The cost of protection, including collective security; (2) civil benefits to various parts of society; (3) interest payments, mainly on the public debt; and (4) general government. The allowance for proposed legislation and contingencies constitutes an additional entry in the tabulations for the years 1958 and 1959. The following table summarizes the functional figures according to the categories of the classification by purpose:

	NEW OBLIGATIONAL AUTHORITY			EXPENDITURES		
	1957 enacted	1958 estimate	1959 estimate	1957 actual	1958 estimate	1959 estimate
Protection, including collective security:

SPECIAL ANALYSIS D

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

INTRODUCTION

This special analysis is designed to help contribute to a general understanding of the Federal budget by classifying Government expenditures according to (1) those which yield benefits beyond the current year and (2) those which, in the main, yield benefits within the year the expenditure is made.

Expenditures yielding benefits over a period of years, that is, those of an investment type, are shown in two major categories—first, for the acquisition of assets by the Federal Government and, second, for other broad developmental purposes. The latter category contains expenditures for programs that contribute to the general physical productivity of the economy or help increase the technical skills and knowledge of individuals. Included in this category are expenditures for research and development, education and health, and additions to State, local, and private assets.

Expenditures which yield benefits currently are also grouped in two major categories—the first for aids and services to special groups, and the second for current operating expenses.

Comparison with a capital budget.—This analysis is not intended to be a capital budget. A capital budget as prepared by some foreign governments and some State and local governments usually provides separate financing for major capital outlays. The capital outlays may be entirely excluded from the current budget of these governments or they may be amortized over a period of years by annual charges to the budget. In the U. S. Federal budget, however, investment items are treated in the same way as expenditures for other purposes and, hence, are included in arriving at the budget surplus or deficit.

A capital budget would also require the annual computation and recording of an allowance for depreciation and obsolescence on existing physical assets, an allowance for anticipated losses on loan programs, a recognition of assets received as gifts or donated to others, and the profit or loss on sales of assets at a figure different from their book value. This analysis makes no such provision for depreciation or other changes in the value of assets. Hence, it does not indicate the extent to which annual new investment in a given year is offset by changes in existing assets.

Additions to Federal assets are here limited to major outlays, such as those for public works construction and military missiles, ships, and aircraft. Such a definition of direct investment is less inclusive than the conventional accounting definition which would include increases in all claims or assets owned by the Federal Government. On the other hand, this analysis adopts a broader concept of developmental outlays than is generally employed in private accounting practice for capital items, since Federal expenditures are viewed here in terms of their effect on the economy as a whole.

Recovery of certain types of expenditures.—A part of Federal expenditures for loans, for investment in commodity inventories, and for construction of powerplants is ultimately recovered by the Treasury. However, Federal expenditures for most other investment type programs are not generally expected to be recovered by specific revenues. Nonetheless, these and other developmental expenditures

increase the wealth and income of the Nation both directly and indirectly, thus expanding Federal revenues over a period of years. In addition, there are some Government programs which are financed by the appropriation of part or all of the receipts collected from fees and charges for services, sale of products, and use of property related to the programs.

Significant subcategories.—In each major category of this analysis, expenditures for major national security (as defined in special analysis C) are shown separately from those for all other (civil) programs. Such a distinction may be helpful in appraising the nature of the outlays. For example, military expenditures for fixed assets and other developmental purposes are generally not intended to achieve the same objectives as civil outlays for these purposes.

Separate subcategories are also shown for expenditures for direct Federal programs and for grants-in-aid or loans to States and local governments. Special analysis G presents details on Federal aid to State and local governments and contains a table summarizing these aids according to the major categories of special analysis D.

SUMMARY

About \$26.6 billion of estimated expenditures in 1959 represent outlays for the acquisition and improvement of assets and for other developmental purposes, compared to \$25.9 billion in 1958. Current expenses for aids, services, and operations are estimated to be \$46 billion for 1959, compared to \$46.7 billion for 1958.

Total.....	69,433	72,788	73,934

ADDITIONS TO FEDERAL ASSETS

Expenditures representing direct investment by the Federal Government in loans and federally owned physical assets are estimated to total \$21.6 billion in 1959, compared to \$21.5 billion in 1958. Over four-fifths of the total expenditures in this category is for major national security programs, mostly for military equipment.

Loans.—Direct loans by Federal agencies consist primarily of loans to farmers and homeowners, to public and private agencies serving these two groups and to foreign

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

governments and private business. Most direct loan programs are financed on a revolving fund basis; that is, their receipts are available for further lending operations. However, the Rural Electrification Administration, the Farmers' Home Administration, and a few other loan programs are by law on a nonrevolving basis, with collections going directly to miscellaneous receipts of the Treasury. In those cases where loan programs are financed on a revolving fund basis, only the difference between disbursements and collections is included in budget expenditures. Hence net expenditures for loans as reported in this analysis reflect only a fraction of total direct Government lending activity.

Budget expenditures for loans in 1959 are estimated to be \$1,414 million, compared to \$1,459 million in 1958. Net loans to domestic private borrowers in 1959 are expected to be \$177 million greater than in 1958. Reduced repayments of Commodity Credit Corporation loans and increased mortgage purchases by the Federal National Mortgage Association are anticipated in 1959. These increases will be partly offset by declines in Veterans Administration and Farmers' Home Administration loans. Nonmilitary loans to foreign borrowers are estimated at \$414 million in 1959, \$280 million less than in 1958. The decrease reflects primarily a substantial disbursement by the Export-Import Bank in 1958 under a previously authorized loan to the United Kingdom. Expenditures under the newly established development loan fund, which is a part of the mutual security program, will increase substantially in 1959.

A detailed analysis of major credit programs of the Federal Government is presented in special analysis E of the budget document.

Public works—sites and direct construction.—This category includes all Federal expenditures for sites and for civil public works projects, military installations, and other national security facilities which are owned by the Federal Government, including those outside the continental United States. A summary of these and related programs is given in special analysis F.

Estimated total expenditures for direct Federal public works of \$3,798 million in 1959 are \$293 million higher than estimated for 1958. About three-fifths of the 1959 amount, \$2,338 million, will be for major national security public works. This includes expenditures for construction of military and atomic energy research and development facilities, which are expected to total \$217 million in 1959. The estimated increase of \$161 million for major national security public works from 1958 to 1959 reflects in part proposed construction of facilities for detection and warning systems and for the dispersal of the Strategic Air Command. Civil public works expenditures, mainly for water resources and related development, are estimated at \$1,461 million in 1959, compared to \$1,329 million in 1958. No new water resource projects are proposed for 1959; the total reflects primarily expenditures for construction presently underway.

TABLE 2.—Additions to Federal assets

[In millions]

	1957 actual	1958 estimate	1959 estimate
Loans:			
Civil.....	\$379	\$1,450	\$1,401
Major national security.....	—6	8	13
Public works—sites and direct construction:			
Civil.....	1,075	1,329	1,461
Major national security.....	2,249	2,177	2,338
Major commodity inventories—net change:			
Civil.....	282	559	396
Major national security.....	431	499	359
Major equipment:			
Civil.....	32	48	54
Major national security.....	13,674	13,878	13,801
Other physical assets—acquisition and improvement:			
Civil.....	87	61	75
Major national security.....	1,227	1,483	1,713
Total additions to Federal assets.....	19,430	21,491	21,610

Major commodity inventories.—Net expenditures for purchases of commodities held for resale or in stockpiles are expected to be \$755 million in 1959, \$303 million less than in 1958. The figure for total purchases includes transportation costs, administrative expenses, and storage costs where these are normally included in costs of goods sold.

Expenditures for the stockpiling of strategic and critical materials (other than fissionable) and for purchases of defense materials are expected to decline by \$140 million from the 1958 level of \$499 million. Net additions to the inventory of farm commodities held by the Commodity Credit Corporation under its farm price-support program are expected to require expenditures of \$382 million in 1959, \$129 million less than in 1958.

Major equipment.—Expenditures for major equipment in 1959 are estimated at \$13,855 million, compared to \$13,927 million in 1958. These expenditures represent almost entirely purchases of aircraft, missiles, ships, and other major national security equipment. Expenditures for major military procurement and production are expected to be about the same in 1958 and 1959. Compared with 1958, however, the 1959 total includes greater expenditures for missiles and missile-equipped surface ships and submarines, and decreased expenditures for conventional aircraft and equipment.

Purchases of office equipment, furniture and fixtures, automobiles, and similar items are not classified in this subcategory but are treated as current operating expenses.

Other physical assets—acquisition and improvement.—Expenditures for other physical assets are estimated to be \$1,787 million in 1959. The major part of this amount will be used for the procurement of uranium concentrates and production of special nuclear materials and weapons by the Atomic Energy Commission. This subcategory also includes reforestation and range improvements, and real property purchased or acquired as collateral or defaulted loans.

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES

The category of other developmental purposes includes Federal expenditures which add to the productivity of the economy over a period of years but which do not directly add to Federal physical and financial assets. Programs which yield the bulk of their benefits immediately are excluded, even though they may also contribute to the longer run economic development of the Nation.

Expenditures for military research and development account for over one-half of the total estimated expenditures of \$4,967 million in this category in 1959.

State and local physical assets.—In 1959 the Federal Government will spend an estimated \$305 million for additions to physical assets of State and local governments, mainly through grants-in-aid for the construction of schools in federally affected areas, airports, waste-treatment facilities, hospitals, and other facilities. This amount excludes expenditures for the Federal-aid highway system which since 1957 have been made from a separately financed trust fund.

Private physical assets.—Federal expenditures which directly add to privately owned physical assets consist predominantly of (1) payments and technical assistance for conservation and improvement of private farms, including payments under the soil bank to share the cost of conservation practices; (2) grants to States for the building of private hospitals and other health facilities; and (3) construction subsidies for merchant ships. Expenditures in this category are estimated at \$511 million in 1958 and \$587 million in 1959.

Education, training, and health.—An estimated \$656 million of budget expenditures in 1959 will be devoted to education, training, and health. The increase in the category reflects an expansion in the scientific education and training programs administered by the National Science Foundation, to be complemented by a proposed new program in the Department of Health, Education, and Welfare to strengthen scientific and general education.

Education, training, and health programs are developmental in that they are intended to foster the knowledge, skills, longevity, and physical vigor of the population. Most of these programs are conducted through grants to State and local governments. Included here are school-operating aid to school districts especially affected by activities of the Federal Government, and grants to States for programs of vocational education, vocational rehabilitation, maternal and child welfare, public health, and agricultural extension work. Closely related are several major items classified in other categories—principally the veterans' education program, which is classified as aids and special services for veterans; the operating expenses of hospital services and medical care programs; and the training of military and civilian personnel in Government service.

Research and development.—The Federal Government also contributes to technological and economic progress through the conduct of varied programs of research and development. Expenditures for programs classified under this heading in 1959 are estimated at \$3,351 million, \$343 million above 1958.

Over four-fifths of the 1959 amount will be devoted to research and development by the Department of Defense and the Atomic Energy Commission. Much of the in-

crease in Department of Defense research and development expenditures in 1959 will be devoted to missiles and basic research. Amounts spent by the Department of Defense from appropriations for military procurement and public works also contribute to research and development, testing, and evaluation. However, such expenditures are classified under additions to Federal assets. The Atomic Energy Commission will emphasize basic research and research on military nuclear propulsion reactors and reactors for producing safe and economic electrical energy.

National Advisory Committee for Aeronautics expenditures for research and development in 1959 will be directed primarily toward problems of flight, missiles, and space vehicles. The work of the NACA is closely coordinated with related work of the Department of Defense. In addition, research on air-traffic control will be expanded in 1959. Expenditures by the National Science Foundation for research and development will increase in 1959, reflecting an expansion of basic research activities.

Other research and development programs include health research, research in new uses of farm products, and basic agricultural research.

The definition of research and development in this analysis is that used in special analysis H. Expenditures for routine testing, mapping and surveys, experimental production, information activities, and training programs are generally excluded.

Engineering and natural resource surveys.—An estimated \$67 million of budget expenditures in 1959 will be for investigations and surveys for public works programs, topographic mapping, land classification, forest investigations, and other basic surveys. The largest programs of these types are administered by the Geological Survey, the Bureau of Reclamation, the Coast and Geodetic Survey, and the Corps of Engineers.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

The preceding categories include investment-type expenditures which provide substantial benefits to various economic groups, such as loans, public works, and research programs. This category—current expenses for aids and special services—contains the administrative and other operating expenses for such investment-type programs, as well as the maintenance costs of physical assets and the other current expenditures which primarily provide aids or special services to one or more specific economic groups.

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

Almost four-fifths of budget expenditures for aids and special services are for civil programs. The estimated totals for these programs are \$15.6 billion for 1958 and \$14.5 billion for 1959. In addition to Federal expenditures for aids and special services, benefits accrue to various groups through tax provisions and other nonexpenditure aids which are not included in this analysis.

Agriculture.—Current expenses predominantly for the benefit of farmers consist chiefly of costs and losses in connection with the sale of surplus commodities for foreign currencies and the price-support program, expenditures under the soil bank program, expenses of the International Wheat Agreement, Sugar Act payments, expenditures for removal of surplus commodities, and administrative expenses of loan programs and other aids to farmers. Current expenses for programs in this category are estimated at \$3,478 million in 1958 and \$3,016 million in 1959.

Other major expenditures benefiting farmers which are classified elsewhere in this analysis are provided through loans, conservation payments, and construction of reclamation and other water development projects. Farmers also benefit from the school lunch program, and from certain international and other programs which are designed primarily for other purposes.

Business.—The major types of current Federal expenditures primarily benefiting private business have been the Government payment to the Post Office to cover the losses arising from the operation of the postal service; maritime operating subsidies and navigation aids to the shipping industry; and various aids to air navigation. Expenditures for aids to business are estimated to decline by \$662 million, from \$1,264 million in 1958 to \$602 million in 1959, largely as a result of the proposed increase in postal rates. Taking account of the cost of the proposed postal workers' pay increase (for which \$160 million is included in the "Allowance for proposed legislation and contingencies"), the decrease from 1958 would be \$502 million.

Labor.—The largest current Federal expenditure benefiting labor is for the Federal-State program of unemployment insurance and public employment offices. The Federal Government, through the Department of Labor, makes grants to the States to cover the full cost of administering these services. Employment services also benefit employers since workers are recruited to fill job vacancies. Expenditures classified here also include the mine safety work of the Bureau of Mines and some administrative expenses of the Department of Labor. Current expenses for aids and special services for labor in 1959 are estimated to total \$353 million, compared to \$344 million in 1958. The estimated increase in expenditures for 1959 is primarily to meet anticipated growing workloads in employment security administration.

Homeowners and tenants.—Since loans and mortgage purchases for the benefit of homeowners and tenants are classified in this analysis as investment-type expenditures, current expenditures consist chiefly of (1) annual contributions to local authorities for low-rent public housing projects and grants for the capital losses of slum clearance and urban renewal projects; and (2) the operating expense of the management and liquidation functions of the Federal National Mortgage Association. Receipts from the insurance of mortgages and saving and loan share accounts and the earnings from holdings of mortgages and other housing loans exceed current expenditures for housing in all 3 years shown in this budget.

Veterans.—Current expenditures for aids to veterans in 1959 are estimated at \$4,878 million, \$19 million below 1958. Compensation and pension benefits account for about two-thirds of the estimated 1959 total in this subcategory and are estimated to increase by \$125 million from 1958 to 1959. Compensation payments are made for disabilities or deaths resulting from service; pensions are paid in non-service-connected cases.

Other important current aids to veterans are hospital and medical care for veterans of all wars, and readjustment benefits primarily for those who served in the Korean conflict. Included are outlays for education and training of veterans who enroll in schools and colleges, or vocational training on the job or farm; losses and administration under the loan-guaranty programs; and veterans' unemployment allowances.

International.—In 1959, \$3,052 million, or more than four-fifths of total estimated expenditures in this subcategory, is for military assistance and defense support under the mutual security program. Military assistance expenditures furnish military equipment and training; defense support helps friendly nations meet the economic burden of maintaining adequate defense forces. Both of these programs are classified under major national security in the budget. Current expenses for the nonmilitary parts of the mutual security program are estimated to be \$365 million in 1958 and \$485 million in 1959.

Other aids and special services.—Many other Federal programs involve current expenditures for aids and special services for more than one of the above groups or for other groups. The bulk of the expenditures consists of grants to help provide public assistance to those in need, including the aged, the blind, the permanently and totally disabled, and dependent children; other major programs include grants to States to help finance low-priced school lunches, hospital operation and medical care by the Public Health Service, and various aids to Indians. Expenditures in this subcategory are expected to total \$2,043 million in 1958 and \$2,053 million in 1959.

OTHER SERVICES AND CURRENT OPERATING EXPENSES

All other Government expenditures, apart from undistributed amounts for proposed legislation and contingencies, are included in this final major category. In the main, the activities covered are the basic Government operations of maintaining a military establishment, conducting foreign affairs, making and enforcing laws, collecting taxes, and managing and paying interest on the public debt.

SPECIAL ANALYSIS D—Continued

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES—Continued

Current expenditures for major national security, mostly for operation and maintenance of military facilities and for pay and subsistence of military personnel, dominate this category. The largest component of the remaining (i. e., civil) expenditures is for interest which accounts for about one-fourth of the total.

Repair, maintenance, and operation of physical assets.—Expenditures to repair, maintain, and operate physical assets are chiefly for military structures, equipment, and facilities; atomic energy facilities; and general-purpose public buildings. They are also for operating such other public assets as flood-control reservoirs, irrigation works, power facilities, public lands, and national forests.

Net expenditures for civil repair, maintenance, and operation are estimated at \$285 million in 1958 and \$289 million in 1959. Outlays for the operation and maintenance of structures, weapons and equipment, and facilities for major national security programs are estimated to be \$9,289 million in 1959, a decrease of \$42 million from 1958.

Regulation and control.—Most of the major departments and agencies and many smaller agencies have regulatory or law-enforcement responsibilities. These include the law-enforcement activities of the Departments of Justice, the Treasury, and the Judiciary, as well as the operations of the independent regulatory agencies. Expenditures for regulation and control are estimated to total \$560 million in 1959, compared to \$542 million in 1958.

Operation and administration of other civil activities.—All other governmentwide or multipurpose expenditures for civil programs are estimated to total \$1,318 million in 1959, about the same as in 1958. These cover expenditures for the legislative branch and the conduct of foreign affairs; tax collection, public debt management, and other financing activities; central procurement, record keeping, and various other direct Federal programs not elsewhere classified. The decrease in expenditures between 1957 and

1958 occurs primarily because effective at the beginning of 1958, individual Government programs are bearing their respective shares of the Government's payment to the civil service retirement fund. In 1957 and prior years, the Government made a lump-sum payment which was classified entirely in this subcategory.

Other major national security operation and administration.—These expenditures are estimated to rise from \$11,763 million in 1958 to \$12,175 million in 1959. They represent predominantly pay and subsistence for military personnel together with smaller but substantial expenditures for civilian reserve components, industrial mobilization, and various departmentwide activities of the Department of Defense.

Interest.—These expenditures are almost entirely for interest on the public debt. A relatively minor proportion is for interest on refunds of receipts and on certain uninvested funds deposited with the Treasury. Principally because of the higher interest rates on new securities issued to refund maturing obligations, expenditures for interest rose \$559 million between 1957 and 1958. On the basis of recent changes in interest rates, interest costs in 1959 will remain at about the 1958 level.

SPECIAL ANALYSIS E

FEDERAL CREDIT PROGRAMS

INTRODUCTION

Federal credit programs make important contributions to the achievement of public policy objectives. As part of the Federal programs for improvement of housing and encouragement of home ownership, Federal agencies have insured or guaranteed more than 40% of all outstanding home-mortgage loans. Similarly, financial assistance in the form of credit is an important part of the Federal program of encouraging efficient family-size farm units. Loans have helped to restore international economic stability and to promote the economic development of underdeveloped areas since World War II. Federal credit aids to business are primarily to help meet defense needs and to assist small businesses to obtain financing; they account for only a very small part of business credit. In addition to influences in these specific areas, Federal credit programs exert a powerful influence on the general level of economic activity.

The impact of Federal credit programs on the Federal budget is relatively small when compared with the large amount of credit extended or guaranteed. The most important reason is the predominance of Federal insurance and guaranties of private loans in recent years, discussed more fully later in this analysis. Such programs normally involve little or no budget expenditures except in cases when defaults require the guaranteeing or insuring agencies to take over private loans. Secondly, a significant share of new commitments, both for insurance and guaranties and for direct loans, are canceled or expire without being used by the lending institution or the borrower. Finally, collections on loans in most cases directly offset disbursements on new loans, with the result that net expenditures are much less than gross expenditures; often net receipts occur.

Federal credit programs are intended to supplement rather than to substitute for private credit. They have expanded greatly in the postwar period. Direct loans outstanding increased from about \$5 billion in 1945 to more than \$17 billion on June 30, 1957. However, this amount was only about 4% of the estimated private debt of \$421 billion outstanding on that date. Private loans partly or wholly guaranteed by Federal agencies have increased more than ninefold since 1945 to \$56 billion, comprising 13% of total private debt.

The President has made a number of general legislative recommendations affecting Federal credit programs. They are discussed on pages M29-M30 of the budget message.

COVERAGE OF SPECIAL ANALYSIS

This special analysis presents a broad picture both of direct Federal loans and mortgage purchases, and of Federal loan insurance and loan guaranty programs. It summarizes new commitments, disbursements and repayments, loans outstanding and guaranties in force, new commitment authority, and status of credit authority of 19 major Federal credit programs.

The analysis covers major credit programs of wholly owned Government enterprises, whether corporate or noncorporate. Included also are major credit operations of other departments and agencies, not primarily engaged in lending activities, such as the Treasury Department loan to the United Kingdom in 1947. Loan programs of important quasi-public agencies are excluded from the

tables, but are discussed separately. With this exception, the 19 programs included account for nearly all new commitments of Federal credit agencies in 1959.

One change in coverage has been made in this year's analysis. Loan guaranties by the Civil Aeronautics Board were authorized in September 1957; this program is therefore included in the analysis for the first time.

The analysis excludes interagency credit used to finance budget expenditures, such as borrowing from the Treasury by other Government agencies, whether for loan or other programs. Credit extended to help finance sales by the Federal Government is also generally excluded.

SUMMARY

Total new commitments for major Federal credit programs for 1959 are estimated at \$16.5 billion (table 1). Of this total, credit aids for housing and related programs, including loans and guaranties by the Housing and Home Finance Agency and the Veterans Administration, account for \$11.4 billion, or about 69%. Credit aids for agricultural programs account for \$2.8 billion, or 17%. The decrease in new commitments during the 3-year period is accounted for primarily by the sharp decline in guaranties by the Veterans Administration.

Adjustments for disbursements in foreign currencies.....	—	—	—	—131	—381	—390
Total budget expenditures.....	—	—	—	373	1,459	1,414

As indicated in detail in table 3 below, expenditures of major credit programs will exceed receipts by \$1,367 million in 1959, somewhat less than in 1958. The sharp increase over 1957 is due in large part to increased disbursements by the International Cooperation Administration in the Department of State and the Federal National Mortgage Association in the Housing and Home Finance Agency.

NEW COMMITMENTS

New commitments provide the best single measure of the trends in most Federal credit programs. They also provide the best indication of trends in the economic impact of these programs, since changes in the magnitude of new commitments usually lead to corresponding changes

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

in the volume of loans disbursed by either public agencies or private lenders.

In this study, commitments are defined as approvals by Federal agencies of direct loans or of insurance or guaranties of private loans. They are shown on a gross basis, including commitments which do not result in an actual credit extension. The amounts shown are the principal amounts of the loans; for several guaranty and insurance programs these exceed the Government's contingent liability, since the unguaranteed or uninsured portions are also included.

As table 2 indicates, commitments for Federal guaranties and insurance of private loans account for about 73% of total new commitments in 1959. This high proportion arises from the legal requirements or administrative policy wherever possible of making direct loans only where private credit, even with Government guaranty or insurance, is not available on reasonable terms, and from revisions in interest rates and other terms designed to make guaranteed and insured loans more attractive to private lenders.

Direct loans and investments.—New commitments of \$4.5 billion for direct loans and investments will be somewhat below the 1957 and 1958 level. Commitments in the secondary market operations of the Federal National Mortgage Association are estimated to decline by nearly \$600 million in the 3-year period, and the authority of the Veterans Administration to make direct loans will expire by the end of 1958. These decreases are offset in part by increases in all other housing programs, and the expanded operations of the Development Loan Fund in the International Cooperation Administration.

Guaranties and insurance.—New commitments for Federal guaranties and insurance of private loans are expected to decline during the 3-year period, from \$13.2 billion in 1957 to \$12 billion in 1959. Commitments by the Veterans Administration loan guaranty program—formerly

the largest—have been steadily falling because the 4½% maximum interest rate is unattractive to private lenders. In 1959, commitments will be further reduced because the authority to guarantee loans to veterans of World War II will expire on July 25, 1958. At the same time the demand for mortgage insurance by the Federal Housing Administration has been increasing, but not enough to offset the full decline in veterans loan guaranty activity.

Overlap in commitments.—Total commitments may overstate by \$1 to \$2 billion the net amount of credit assistance by the Federal Government, especially for housing credit. This is because two or more types of Federal assistance are sometimes provided for the same borrower or the same property at different stages in the financing process. No adjustment is made for this overlap, since the amount in any single year is difficult to estimate.

A substantial share of the housing initially constructed with the aid of mortgage insurance by the Federal Housing Administration in the past has later been sold to veterans who finance their purchases with mortgages guaranteed by the Veterans Administration. The Federal National Mortgage Association purchases only mortgages previously insured by the Federal Housing Administration or guaranteed by the Veterans Administration.

Similarly, local housing authorities normally finance most or all of the construction of low-rent units with temporary loans made or directly guaranteed by the Public Housing Administration. These temporary obligations, however, are refinanced by sale of long-term obligations to private investors on the security of Federal annual contribution contracts.

DISBURSEMENTS AND REPAYMENTS

Direct loans and investments can have a major impact on the Federal budget, since the difference between disbursements and repayments represents Federal expenditures or receipts. Federal guaranties and insurance of private loans, on the other hand, ordinarily have only a minor effect on Federal expenditures, since they result primarily in expenditures by private financial institutions. Only if they have been taken over by Federal agencies, as a result of defaults or otherwise, are they reflected in budget expenditures. Net expenditures for Federal credit assistance give, therefore, only a partial picture of the economic impact of these programs.

Net expenditures of all Government lending programs—with the exception of loans from trust funds or by quasi-public agencies—are included in the budget totals. In most cases, collections are offset directly against expenditures; in a few major programs, however, they go directly to miscellaneous receipts and, therefore, do not affect budget expenditures. In the case of foreign loans, disbursements in foreign currencies are included in the analysis but are not included in the budget.

In table 1 of this analysis, expenditures for loans are shown on a net basis, that is, they reflect loan disbursements less repayments of old loans. However, to indicate more clearly the total volume of loans, table 3 shows both gross loan disbursements and repayments (including those going directly to miscellaneous receipts of the Treasury). The difference between these two columns represents the net addition to or reduction in Federal loan assets (excluding primarily chargeoffs and recoveries) for the major

Total budget expenditures.....	373		1,459		1,414	

In both tables 1 and 3, expenditure figures represent disbursements and repayments of loans only, and exclude all income and expense items. Losses actually incurred and written off are not included, because no cash transaction is involved.

In 1959, gross loan disbursements of major Federal credit programs are estimated at \$5,692 million and repayments at \$4,325 million. Net expenditures of \$1,367 million are thus a relatively small fraction of the gross level of activity. Of the total repayments, \$388 million will go directly to miscellaneous receipts, chiefly repayments of loans by the Farmers' Home Administration, the Rural Electrification Administration, and the Treasury loan to the United Kingdom. Disbursements of loans in foreign currencies are estimated at \$390 million. Allowing for these adjustments, together with net expenditures of \$49 million for relatively minor credit programs, net budget expenditures for loans will amount to an estimated \$1,414 million.

Gross disbursements for 1959 will be somewhat lower

than in 1958, primarily because the expenditures of the Export-Import Bank in 1958 include disbursements under a \$500 million loan to the United Kingdom. Repayments in 1959 are also expected to be lower; most of the decline during the 3-year period results from lower repayments to the Treasury by the secondary market activity of the Federal National Mortgage Association.

Current levels of repayments are small when compared with current disbursements in the case of active programs with predominantly long-term loans such as the Rural Electrification Administration, the International Cooperation Administration, or the college housing loan program of the Community Facilities Administration. On the other hand, repayments substantially exceed disbursements in the case of liquidating programs, such as the former Reconstruction Finance Corporation and the loan to the United Kingdom, and relatively inactive programs such as loans and advances under the Defense Production Act.

Neither current repayments nor net expenditures provide any measure of the ultimate recoverability of the loans made. As indicated in the detailed statements on individual programs, interest or premiums cover expenses and losses for many programs. In some, the legislative mandates make losses probable from time to time, such as the nonrecourse loans of the Commodity Credit Corporation and the loan-guaranty programs of the Veterans Administration.

LOANS OUTSTANDING AND GUARANTIES IN FORCE

The best index of the level of Federal credit programs over a period of years is provided by the total of their outstanding loans, guaranties, and insurance in force.

Outstanding loans by the end of 1959 are estimated at \$20.3 billion, about \$2.8 billion more than at the end of 1957. Most of the increase over the 3-year period is in foreign loans by the Export-Import Bank and the International Cooperation Administration. About one-half of the loans outstanding are to foreign borrowers, including the loan of \$3.4 billion to the United Kingdom, loans of \$3.2 billion by the Export-Import Bank, and \$3.4 billion by the International Cooperation Administration.

Guaranties and insurance in force are estimated to increase to \$66 billion by the end of 1959. The increase of \$10 billion in the 2 years since the end of 1957 reflects primarily increased guaranties of mortgage loans by the Federal Housing Administration and the Veterans Administration. These two programs account for more than 90% of all outstanding guaranties and insurance, and most of the remainder are long-term obligations of the Public Housing Administration.

The amounts shown include both the guaranteed and unguaranteed portion of outstanding loans in order to give a clearer picture of the economic impact of these programs and to tie in better with banking statistics. They do not, however, indicate the estimated contingent liability of the Federal Government, which is shown in table 6. The major program for which the contingent liability differs materially from the principal amount of the loans is the veterans loan guaranty program. By the end of 1959, the Government liability will be about \$15.3 billion lower than the outstanding amount of such loans.

The probability that the Government will be called upon to take over any substantial part of the guaranteed or insured portion of outstanding loans is small, except possibly in a national financial emergency. Sizable assets are available to minimize any potential losses. Moreover, in the case of most mortgage insurance programs charging premiums, income in the past has been sufficient not only to cover expenses and current losses, but also to build up substantial reserves.

NEW COMMITMENT AUTHORITY

New commitment authority includes any additional loan or loan guaranty authority made available or recommended. There are several kinds of new commitment authority. Budget authorizations are those included in budget totals of new obligational authority; they consist either of appropriations or of authorizations to expend from public debt receipts. Other authorizations, which do not normally give rise to budget expenditures, consist of insurance and guaranty authorizations and conditional authorizations which become available only under specified conditions.

Table 5 summarizes new commitment authority of the 14 major credit programs which will need additional authority during the period. New commitment authority required for 1959 is estimated at \$7 billion, compared to \$8.5 billion in 1958 and \$10 billion in 1957. The major changes during the period are the sharp decline in the Veterans Administration guaranties as the authority for World War II veterans expires, the \$2 billion new authority for the Export-Import Bank recommended for 1958, the net increase of \$2.3 billion required for the Federal Housing Administration in 1959 as existing authority is used up, and the 1958 peak of \$1.5 billion in new authority for the

Federal National Mortgage Association provided by the Congress.

New commitment authority for most credit programs is provided by Congress in the basic legislation rather than in appropriation acts. For example, the lending authority of the Export-Import Bank, the borrowing authority of the Commodity Credit Corporation and the Public Housing Administration, and the various mortgage insurance authorizations of the Federal Housing Administration are all prescribed in the statutes governing these programs. Since new commitments can generally be financed out of uncommitted balances of prior authorizations, or out of funds made available by collections on outstanding loans, requests for new commitment authority in any one year are limited to relatively few credit programs. For example, in 1959, new commitment authority is requested for only seven major programs—the Rural Electrification Administration, the Farmers' Home Administration, the Small Business Administration, the Community Facilities Administration, the Federal Housing Administration, the Federal National Mortgage Association, and the International Cooperation Administration; in addition, restoration of capital impairment is requested for the Commodity Credit Corporation.

In several important cases, the authority provided by the basic statute is indefinite. The most important examples are guaranties and insurance of loans by the Veterans Administration, guaranties of defense production loans under section 301 of the Defense Production Act, and indirect guaranties of local housing authority obligations issued on the security of annual contribution contracts of the Public Housing Administration. In these cases, the tabulations show new authorizations equal to the net amount of the guaranteed or insured portion of new commitments.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

A second type of new authority indefinite in amount exists in the case of loan programs where the authority can also be used for grants, purchase commitments, or other nonlending purposes. Major examples during the 3-year period are the programs of the Commodity Credit Corporation and mutual security loans by the International Cooperation Administration. In these programs all the new obligational authority provided could legally be used for loans, but is not likely to be so used. Mutual security loans by the International Cooperation Administration in the 3-year period account for only a relatively small part of the total assistance program, so that it would be misleading to include the total amount of the mutual security program as new obligational authority for loan assistance. The data, therefore, show amounts for new authority adequate to finance estimated new commitments. Loans and guaranties by the Commodity Credit Corporation account for a substantial part of its program. Its total new obligational authority is, therefore, included, even though some of it will be used for nonlending purposes.

STATUS OF CREDIT AUTHORITY

Unlike most other Government programs, commitment authority for the major credit programs is not normally provided for a single year, but remains available in most instances until utilized or until the statutory authority for the program expires. Hence, with only a few exceptions, the existing authority represents the cumulative total of amounts made available in prior years.

Cumulative net authority.—Three major types of commitment authority have been provided for Federal credit programs. A majority of the major programs operate on a revolving-fund basis, that is, collections on outstanding loans and expirations of insurance commitments permit reuse of the original authority. Limitations on such programs are ordinarily in terms of maximum amounts of

loans outstanding, maximum borrowings from the Treasury, or maximum amounts of insurance or guaranty liability. Leading examples include all lending programs of Government corporations and the insurance programs of the Federal Housing Administration.

In the case of several noncorporate loan and loan insurance programs, a maximum limitation is placed upon the total volume of loans and loan insurance commitments. Funds collected on such loans and expirations of such insurance are not available for reuse. Typical examples are the direct loan programs of the Rural Electrification Administration and the direct loan and insurance programs of the Farmers' Home Administration.

A few programs are not governed by any specific dollar limitations. These are limited only indirectly by the provisions of the statute or of the agency's regulations governing eligibility for Federal credit assistance. The amount committed depends primarily on the number of applications. The most important example is the loan guaranty and insurance program of the Veterans Administration. The loan guaranties authorized under section 301 of the Defense Production Act are also not specifically limited.

In the case of both the Commodity Credit Corporation and lending programs under the Defense Production Act, loans are financed from obligational authority which also finances nonlending programs. For the purposes of this analysis, the net authority available at the beginning of the year for these loan programs is set equal to the total available authority after deducting authority committed for nonlending programs. An exception is made for the mutual security loans by the International Cooperation Administration, because they account for only a small and indefinite part of the total assistance given under the mutual security program in recent years and in 1959; the authority at the beginning of the year is, therefore, shown as equal to loans outstanding and undisbursed commitments at the beginning of the year.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Credit authority available at the beginning of 1959 is estimated at \$85.8 billion (table 6). New commitment authority of \$7 billion is estimated to become available during the year. On the other hand, estimated expirations, certain repayments, and other reductions in outstanding authority amount to \$3.6 billion. The net authority available at the end of 1959 is, therefore, estimated at \$89.1 billion.

Charges against authority.—In addition to the \$71 billion of outstanding loans and guaranties (shown in detail in table 4 but excluding here the portion of private loans not guaranteed or insured by the Federal Government), charges against the available authority include undisbursed commitments. These are expected to total \$8.6 billion on June 30, 1959, for loans and guaranties together.

Uncommitted authority.—For major Federal credit programs as a whole, commitment authority at the end of 1959 is estimated to exceed charges against the authority by \$9.6 billion. Of this unused authority, about one-half is accounted for by several programs administered by the Housing and Home Finance Agency, including \$2.3 billion by the secondary market activity of the Federal National Mortgage Association. A reduction of \$1 billion in uncommitted authority of the Federal Housing Administration accounts for a significant part of the decline of uncommitted authority between 1958 and 1959.

Since the indefinite authority of loan guaranty programs not subject to specific limitations is shown as equal to charges against the authority, the total uncommitted authority in table 6 does not reflect the fact that these guaranty programs could be expanded substantially under present available authority. However, about 70% of the cumulative authority is subject to definite limitations.

Since this analysis is limited to major active or liquidating credit programs, substantial amounts of uncommitted standby authority of other programs are excluded. The most important examples are the \$3 billion borrowing authority for the Federal Deposit Insurance Corporation, \$1 billion for the Federal home-loan banks, and \$750 million for the Federal Savings and Loan Insurance Corporation. These are unlikely to be used unless a national financial emergency occurs.

QUASI-PUBLIC CREDIT PROGRAMS

The Federal Government also has a measure of responsibility for the credit programs of certain mixed-ownership corporations and other public agencies operating in whole or in part with private funds. The most important are the Federal intermediate credit banks, the banks for cooperatives, the Federal land banks, the Federal home-loan banks, and the Federal Reserve banks. The secondary mortgage market activity of the Federal National Mortgage Association—also financed in part with private funds—is discussed with the other programs of the Association in the next section.

The 12 regional banks for cooperatives make loans to agricultural cooperatives. Most of the stock in the banks is fully owned by the Federal Government and the banks are supervised by the Farm Credit Administration.

The 12 Federal intermediate credit banks extend credit to production credit associations and privately capitalized farm-lending institutions by discounting short-term notes to help finance the production needs of farmers. To finance their operations, the banks sell short-term deben-

tures to the public. The banks may have obligations outstanding of not more than 10 times their capital and surplus. In accordance with the Farm Credit Act of 1956, the production credit corporations were merged in the Federal intermediate credit banks as of January 1, 1957, and provision was made for the retirement of Government capital in the banks and for their eventual ownership by the production credit associations. Because of this change in financial structure, the financial transactions of the banks have been omitted from the budget expenditure figures since January 1, 1957; since then, they have been recorded as trust fund transactions.

The 12 Federal land banks are now privately owned, but are sponsored by the Government and operate under the supervision of the Farm Credit Administration. These banks provide mortgage credit to farmers at relatively low interest rates through individual national farm loan associations.

The 11 Federal home-loan banks are also now privately owned, but are supervised by the Federal Home Loan Bank Board and have authority to borrow \$1 billion from the Treasury, if necessary. These banks make both short-term and long-term advances to member savings and loan associations on the security of home mortgages or Treasury obligations, as well as unsecured short-term loans.

All of the stock in the 12 Federal Reserve banks is provided by the member banks, but the policies of the Federal Reserve System are controlled by the presidentially appointed Board of Governors. Moreover, the Reserve banks, after paying 6% dividends to the member banks, pay 90% of their remaining profits to the Treasury, and their entire surplus reverts to the Treasury in the event of liquidation. As part of their normal central banking functions, the reserve banks stand ready to make short-term discounts and advances for member institutions and also have a small program of direct loans to industry. The amount of discounts, advances, and industrial loans outstanding on June 30, 1957, was \$559 million, with discounts and advances low on that date. By October 31, they were \$790 million.

MAJOR FEDERAL CREDIT PROGRAMS

HOUSING AND HOME FINANCE AGENCY

Major credit programs administered by five constituents of the Housing and Home Finance Agency are included in this analysis. In addition, there are a number of minor programs—most of which are in liquidation—which are administered in the Agency.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

Federal National Mortgage Association.—Under the Housing Act of 1954, the Federal National Mortgage Association was reconstituted as three fiscally independent activities—special assistance functions, management and liquidating functions, and secondary market operations—under a single management.

The special assistance activity is intended to assist groups or areas otherwise unable to obtain private financing and to help prevent declines in housing activity. General authority is provided to make advance commitments, and purchases of mortgages not to exceed \$450 million outstanding at any one time. Legislation is being proposed to increase the authorization by \$90 million. This authority in 1958 and 1959 will be largely directed toward supporting mortgages on housing in urban renewal areas. The Association has, in addition, \$450 million commitment authority for mortgages on military family housing and \$200 million for cooperative housing. The military family housing authorization will be virtually exhausted by commitments estimated at \$250 million in the current year, and no commitments under this authority are projected for 1959. Proposed legislation to authorize higher interest rates on such mortgages is expected to make private financing more readily available. Total new commitments under the special assistance functions in 1959 are estimated at \$316 million.

The management and liquidating functions of the Association consist of the liquidation of the mortgages of the predecessor association. No new commitments can be made and mortgage purchase authority expires as mortgages are sold or repaid. Authority is provided to substitute private financing for Treasury borrowing through the sale of unguaranteed debentures. Purchases under outstanding commitments will be completed in 1958. The outstanding mortgage portfolio at the end of 1959 is estimated at \$2,033 million compared with \$2,183 million at the end of 1958.

The secondary mortgage market operations of the Association are partially privately financed. This unit helps to make mortgage funds available throughout the country at market rates of interest. It may purchase only Government-insured and guaranteed mortgages meeting the usual standards of private investors, and its operations must be self-supporting. The activity was financed initially by Government stock subscription, for which \$208 million has been authorized; private mortgage sellers are also required to buy stock, with provision for ultimate retirement of the Government stock. The Association may issue nonguaranteed debentures; the Secretary of the Treasury may purchase up to \$2.25 billion of these. Mortgage purchases are estimated to decline gradually from \$993 million in 1957 to \$490 million in the budget year. It is estimated that at the end of 1959 the Association's portfolio of mortgages will total \$2,191 million. In 1959, as well as 1957 and 1958, the bulk of the mortgage purchases will be financed from debentures and stock sold privately, and are, therefore, reflected in trust expenditures.

Urban Renewal Administration.—Under the Housing Act of 1954, the Housing and Home Finance Administrator is authorized to make loans and grants to local public agencies for the planning and execution of slum clearance and urban renewal projects. Loans are made to cover the cost of project planning, for the temporary financing of project development, and for long-term financing of land

leased rather than sold to redevelopers. In addition, private loans may be guaranteed through the pledge by local agencies of the Federal loan commitment. Borrowing authority of \$1 billion is available for these purposes.

The level of loan activity is determined primarily by the number of projects in the development stage. Planning has been completed in an increasing number of communities, and many projects have entered the actual development stage, so that financing needs are increasing. New loan commitments are estimated to increase from \$262 million in 1958 to \$325 million in 1959. Net loan expenditures are expected, however, to remain at relatively low levels because of the short-term nature of the loans, and the increasing use of guaranteed private financing in lieu of direct Federal loans. Legislation is being proposed to permit Federal credit assistance for the financing of certain nonresidential projects not eligible for grants.

The current interest rate on temporary financing is 3½%. Administrative expenses are financed from a separate appropriation.

Community Facilities Administration.—The Housing Act of 1957 increased to \$925 million the authorization for long-term loans to colleges and universities for the construction of dormitories and related facilities. The sharply increased demand for these loans, brought about by the reduction in interest rates under the Housing Amendments of 1955 is expected to continue through 1959. Loan commitments are estimated at \$258 million in 1958 and \$263 million in 1959. The current interest rate on these loans is 3%, well below current private market levels for even tax-exempt obligations of this type. Legislation is being proposed in this budget to provide an additional \$200 million of authority and permit increases in interest rates sufficient to cover the cost of money to the Treasury and to make loans more attractive to private investors. The President is also proposing authority to guarantee private loans to certain colleges. The details are still under consideration and the amounts are not reflected in this analysis.

The Housing Amendments of 1955 authorized \$100 million for loans to local governments for public facilities, such as water and sewage systems. Preference is given to communities with a population of less than 10,000. Commitments under this program are estimated at \$20 million in 1958 and \$30 million in 1959. Interest rates are required to cover all expenses of the program. Under present market conditions, interest rates have been set at 4½% for general obligation bonds of 30-year maturity and 5% for revenue bonds of the same period, with upward or downward adjustments for variation in the maturity period.

Federal Housing Administration.—The Federal Housing Administration is authorized to insure against default (a) the full principal amount of a wide variety of mortgage loans on new and existing housing, and (b) up to 90 percent of the principal amount on unsecured home-improvement loans. The basic program of insuring loans for 1- to 4-family housing accounts for the bulk of mortgage insurance activity, but insurance is also provided for mortgages on rental housing, housing under cooperative ownership, and housing on military reservations and in urban renewal areas. Approximately 16% of all outstanding home mortgages are insured by the Administration; it is estimated that these and other insured loans will increase from \$21 billion in 1957 to \$26.9 billion by the end of 1959.

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

In 1959 it is estimated that commitments will be made for insurance of mortgages on 612,600 dwelling units and for 1.2 million home-improvement loans.

The Administration's program is fully self-supporting. Insurance premiums, fees, and other income will cover all current expenses and add substantially to the reserve against future losses. In order to maintain the competitive status of insured mortgages relative to other investments, the maximum interest rate has been increased to 5¼% for insured home mortgages and 4½% for mortgages on rental housing, exclusive of the insurance premium and service charges. Legislation is proposed to permit further increases, if necessary, in interest rates for rental housing mortgages, as well as for cooperative housing mortgages and military housing mortgages.

Public Housing Administration.—Under the Housing Act of 1949, the Public Housing Administration makes loans and grants to assist local authorities in the construction of low-rent public housing. These loans and grants are made under annual contribution contracts between the Administration and local authorities. The annual contribution contracts provide for (1) loan commitments by the Administration not to exceed 90% of project development costs, and (2) the payment of annual Federal contributions over a 40-year period to cover debt service on the bonds used to finance the project permanently.

Loan commitments under annual contribution contracts are either disbursed as direct Federal advances or used to guarantee private temporary loans. Most frequently, a direct Federal advance is made initially and later refunded with guaranteed financing. Ordinarily long-term bonds are sold to private investors prior to completion of construction, and all temporary financing, both direct and guaranteed, is retired. However, under some circumstances, the period of temporary financing may be indefinitely extended. The Administration's borrowing authority for these purposes is \$1.5 billion. Because of the increasing number of units under construction, the volume of temporary financing, including both public and private loans, will increase during 1958 and 1959.

Prior to completion of construction, the units are permanently financed by the local housing authority through the sale of 40-year serial bonds to private investors. While not directly guaranteed by the Federal Government, these local housing authority bonds are treated in this analysis as guaranteed obligations by virtue of the Government contract to pay annual contributions covering debt service. The outstanding permanent financing is expected to increase from \$2.1 billion at the end of 1957 to \$2.6 billion by the end of 1959, reflecting the completion and permanent financing of a large number of units started in earlier years.

On direct Federal loans, local authorities are charged at the present time an interest rate of 3½%. In the past year, interest rates on private temporary loans have averaged between 2% and 2½%, depending primarily on variations in market rates of interest. Long-term loans had an interest cost of between 2¾% and 2⅞% before bond sales were temporarily discontinued pending better market conditions.

VETERANS ADMINISTRATION

This analysis includes the loan guaranty and insurance programs, and the direct housing loan program authorized under the Servicemen's Readjustment Act of 1944, as

amended. It excludes minor lending activities of the Veterans Administration, such as policy loans made by the veterans life insurance funds and a few very small inactive programs.

Loan guaranties and insurance.—The Administrator of Veterans Affairs guarantees housing, business, and farm loans made by private lenders to veterans of World War II and the Korean conflict. The World War II authority expires on July 25, 1958, but the authority for veterans of the Korean conflict continues until 1965.

By June 30, 1957, approximately 5,252,000 loans of all types had been guaranteed, of which 94% were for homes, 5% for businesses, and 1% for farms; housing loans currently account for nearly 99% of new commitments. It is estimated that the number of loans guaranteed annually will continue to decrease, from 441,350 in 1957 to 55,000 in 1959. This sharp decline reflects primarily the inadequacy of the interest rate on guaranteed loans, which is discussed below. There is no statutory limit on the aggregate amount of the loans. It is estimated that \$33.7 billion will be outstanding by the end of 1959.

The maximum interest rate on guaranteed loans is designated by the Administrator of Veterans Affairs, within limits set by law. The current rate of 4½% represents the statutory maximum. Since it has not kept pace with prevailing market rates, the supply of private mortgage funds for this program has been sharply curtailed. To meet this problem, the President has recommended legislation to provide administrative discretion in setting interest rates.

Under existing legislation, the Government is liable for all losses on most loans up to 60% of the outstanding principal amount, or \$7,500, whichever is less. No charge is made by the Government for its guaranty. Administrative expenses are paid from the general operating expenses appropriation of the Veterans Administration and claims are paid from a general appropriation for veterans' readjustment benefits. Net losses on claims paid up to June 30, 1957, amounted to about \$37 million, or less than 1% of loans guaranteed and insured since the program's inception.

Direct housing loans.—In areas where the loan guaranty program is ineffective because of lack of private lending facilities, the Administrator of Veterans Affairs may make loans directly to veterans for the purchase, construction, or improvement of homes (including farm housing) at 4½% interest. Loans outstanding amounted to \$522 million on June 30, 1957. New commitments in 1958 will exceed the number made in 1957, reflecting the decline in private mortgage funds available for guaranty at 4½% interest. No new commitments can be made after June 30, 1958, the termination date for the direct loan program.

DEPARTMENT OF AGRICULTURE

Three major credit programs of the Department of Agriculture are included in this analysis.

Rural Electrification Administration.—Since 1935, the Rural Electrification Administration has been making loans with 35-year maturities, chiefly to cooperatives, to provide electric service to farms and other rural establishments. Beginning in 1950, similar loans have been made to finance construction and improvement of rural telephone systems.

New obligational authority is provided annually in the budget to finance these programs. New commitments for

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

1959 will be \$235 million; this is a reduction of \$25 million from 1958, arising primarily from the President's legislative proposal to assist borrowers to obtain private financing. Most of the loan disbursements in 1959 will arise from commitments made in previous years; undisbursed commitments of \$637 million at the end of 1959 will be reflected mainly in disbursements in 1960 and 1961.

Interest rates are set by statute at 2%, substantially below the present cost of long-term money to the Treasury of about 3½%. Administrative expenses are financed by a separate appropriation. Collections of principal and interest are deposited in miscellaneous receipts of the Treasury.

Farmers' Home Administration.—The Farmers' Home Administration makes loans to farmers unable to obtain credit on terms within their means from other sources for operating expenses and crop production, farm ownership and improvement, farm housing, and for soil and water conservation activities. Loans are intended to strengthen the family-type farm and encourage better farming methods. These loan programs are financed by annual authorizations, except that housing loans are financed from a 1957 authorization of \$450 million. The Administration may also insure a maximum of \$125 million a year in long-term mortgage loans under the farm ownership program and a maximum of \$25 million a year under the soil and water loan program.

New direct loans are expected to amount to \$185 million in 1959, compared with \$240 million in 1958.

The interest rate on farm operating loans, which constitute the largest number of direct loans, is 5%; this is the legal maximum. Interest rates on direct farm ownership and soil and water loans have been set at 4½%. The maximum rate stipulated by law for farm ownership loans is 5%; no maximum rate is set for the soil and water loans. The Secretary of Agriculture has authorized interest rates on insured farm ownership and soil and water loans of 4½%, of which one-half of 1% represents insurance premiums and one-half of 1% a charge for administration. Interest rates on farm housing loans have been set at 4%, the maximum provided by law.

Administrative expenses of the Farmers' Home Administration are covered by separate appropriations. Collections of interest and principal go into miscellaneous receipts of the Treasury.

The Farmers' Home Administration also administers a revolving fund from which emergency loans may be made to farmers and stockmen suffering from production disasters and unable to obtain credit on reasonable terms from other sources. The interest rate is 3% on all loans except special livestock loans on which the rate is 5%. New commitments in 1959 are expected to be \$50 million, which is at about the same level as in 1958, and repayments are estimated to exceed disbursements in both 1958 and 1959.

Commodity Credit Corporation.—In carrying out the Government's program of supporting prices of agricultural commodities, the Commodity Credit Corporation makes direct loans to farmers and guarantees loans made by private lending agencies. Loans and guaranties enable farmers to market their commodities in line with the standards set forth in law. Loans are backed by commodities and borrowers may discharge their obligations without personal liability by turning over pledged commodities to the Corporation. These forfeitures of collateral are treated as repayments of loans in this analysis.

The Corporation also makes loans for the construction or improvement of farm-storage facilities.

No increase is being requested in 1959 in the Corporation's existing borrowing authority of \$14.5 billion. However, a supplemental appropriation of \$2.3 billion will be requested during 1958 to reimburse the Corporation for costs incurred in carrying out the programs of sales of surplus agricultural commodities for foreign currencies and other special programs in 1957, and a 1959 appropriation of \$1.8 billion will be requested to restore the capital impairment of the Corporation resulting from price support losses in 1957. New loan and loan guaranty commitments in 1959 are estimated at \$2,308 million, which is \$92 million more than the estimate for 1958. Repayments of direct loans in 1959 are estimated at \$2,236 million, slightly more than estimated disbursements.

There are no statutory limits on interest rates. Interest rates on 1957 crop loans will be continued at 3½%. This rate is charged the borrower only if the loan is repaid in cash; if repaid by surrender of collateral, no interest is charged. In the case of guaranties, the private lender receives interest at the rate of 2¼%, plus service charges.

DEPARTMENT OF COMMERCE

Maritime Administration.—The Secretary of Commerce is authorized by title XI of the Merchant Marine Act of 1936, as amended, to insure private construction loans and mortgages on most types of cargo and passenger-carrying vessels. The objective of this program is to facilitate private financing of construction, conversion, or reconditioning of vessels. The mortgages or loans may not exceed 75% of the cost to the purchaser of vessels built with Federal subsidies and 87½% of the construction costs of nonsubsidized vessels. The aggregate unpaid principal amount of insured mortgages and loans outstanding at any one time may not exceed \$1 billion.

Amendments to title XI enacted in 1956 increased the authority of the Government to insure ship mortgages from 90% to 100% of the amount of the mortgage. Because of these amendments and the acceleration of the ship replacement program for the merchant marine, insured loans in force will increase from \$36 million in 1957 to an estimated \$600 million in 1959.

The maximum interest rate on guaranteed loans is set by statute at 5%, but the Secretary of Commerce has authority to increase the limit to 6% if private financing is not available at a lower rate. Insurance premiums are three-eighths of 1% per annum on construction loans and three-fourths of 1% per annum on mortgage loans. There has been one default since the inception of the program.

Civil Aeronautics Board.—Legislation enacted September 7, 1957, authorizes the Civil Aeronautics Board to guarantee loans on aircraft purchased by local service and other small airlines to replace uneconomical aircraft with more efficient equipment. Twenty-eight airlines are presently eligible for these loan guaranties, including domestic local carriers and carriers providing services to and within the Territories and metropolitan helicopter service.

The act authorizes the Board to guarantee loans up to \$5 million per airline; the guaranty may not exceed 90% of the loan. Guaranties may be made only if the Board finds that the air carrier would not otherwise be able to obtain funds for the purchase of aircraft upon reasonable terms, and only if the aircraft purchased will

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

improve service and efficiency. New commitments in 1959 are estimated at \$40 million. The authority of the Board to guarantee these loans will expire in 1962. The Board will charge a fee for the guaranty, but the rates for the fees have not yet been established.

EXPANSION OF DEFENSE PRODUCTION

Under the Defense Production Act, the President is authorized to make loans or advances and to guarantee loans for expansion of defense production. Numerous agencies participate in these programs. The act expires on June 30, 1958, but the President has recommended a 2-year extension.

Loan guaranties.—Under section 301 of the Defense Production Act, the three military departments of the Department of Defense, the Departments of Commerce, the Interior, and Agriculture, the Atomic Energy Commission, and the General Services Administration are authorized to guarantee loans by public or private financing institutions to defense contractors and subcontractors. The Federal reserve banks act as fiscal agents for the guaranties of private loans, and the procedure is governed by the Federal Reserve Board's regulation V. No specific limitation is placed on the amount of loan guaranties.

From the beginning of the program in September 1950 to the end of December 1957, about 1,500 V-loans, totaling \$2.9 billion were authorized by the procurement agencies. More than 90% of the guaranties have been authorized by the Departments of the Air Force, the Army, and the Navy, primarily to speed the production of aircraft and aircraft parts, electronics and communication equipment, tanks, weapons, and ammunition. Guaranties by the General Services Administration to expand production of basic materials and metals and machine tools account for nearly all of the remainder. New commitments are expected to decline to \$101 million in 1959, compared to \$128 million in 1958 and \$157 million in 1957.

To cover administrative expenses and possible losses, charges are made for guaranties, the rate depending upon the proportion of the loan guaranty. This proportion has averaged about 75%. The guaranteed portion of loans must be purchased by the procurement agency upon request of the lender. So far, income has substantially exceeded expenses. There is no statutory limit on the interest rate which financing institutions may charge, but a maximum interest rate of 6% and a commitment fee of one-half to 1% have been set administratively.

Loans and advances.—Under section 302 of the Defense Production Act, the President is authorized to make direct loans or to participate in private loans for the expansion of industrial capacity, development of technological processes or production of essential materials. The President has delegated this authority for loans to domestic borrowers to the Treasury Department and for foreign loans to the Export-Import Bank. Under section 303 of the same act, the General Services Administration has made advances on purchase commitments for strategic minerals and metals and industrial equipment. Outstanding loans will decline to \$235 million by the end of 1959. No new commitments were made in 1957 and none are expected in 1958 and 1959, since most of the planned expansion is already underway.

There is no statutory limitation on the interest rate. Rates charged on both loans and advances have been generally 5%. No ultimate net cost is expected.

SMALL BUSINESS ADMINISTRATION

The Small Business Administration, created in 1953, is authorized to make loans to small businesses and to victims of natural disasters. The legislative authority for these programs expires on July 31, 1958, but the President has requested that the authority be extended.

Loans to small businesses are authorized up to a total of \$305 million outstanding at any one time, but an increase has been requested so that loans may continue to be made in the future. The maximum Government participation in loans to any one borrower is \$250,000, and the maximum maturity generally 10 years. Loans may be made only if financial assistance is not available from private sources on reasonable terms, and only if there is reasonable assurance of repayment. Moreover, direct loans are made only when it is not possible to secure participation from private banks. More than two-thirds of the loans made so far have been made jointly with private banks. The law provides for interest to be charged at the going local rate up to a maximum of 6%, which is the current rate. It is anticipated that 3,600 business loans will be approved in both 1958 and 1959, compared with 3,536 in 1957.

The Administrator also has broad authority to make loans to victims of floods or other natural disasters in areas which he has designated. There is no limit on the amount that may be loaned to each borrower, but the aggregate amount outstanding at any one time may not exceed \$125 million. Loans for housing may have maturities up to 20 years, but other loans are limited to 10 years. Interest rates on disaster loans are set by law at not to exceed 3%.

Appropriations of \$320 million have been made to finance the small business and disaster loan programs since the agency was established. An additional amount of \$50 million will be needed to finance anticipated loans in 1959.

The Small Business Administration also administers disaster loans and some business loans made by the former Reconstruction Finance Corporation. On July 1, 1957, these amounted to \$21.5 million.

TREASURY DEPARTMENT

The only credit programs administered by the Treasury Department and included in this analysis are the liquidation of certain Reconstruction Finance Corporation loans and the 1947-48 loan to the United Kingdom. The Treasury Department is also authorized to make civil defense loans, up to \$250 million outstanding at any one time, upon certification by the Federal Civil Defense Administrator; however, no new commitments for civil defense loans are anticipated for 1958 and 1959.

Reconstruction Finance Corporation Liquidation Fund.—The Reconstruction Finance Corporation Liquidation Act terminated the authority of the Corporation to make loans, effective September 28, 1953. Liquidation of business and public agency loans was placed under the direction of the Secretary of the Treasury. During 1957, loans and commitments outstanding were reduced from \$118 million to \$70 million. On July 1, 1957, the Corporation itself was abolished pursuant to Reorganization Plan No. 1 of 1957. Loan assets were transferred, for further liquidation, as follows: to the Treasury Department, \$51 million; to the Small Business Administration, \$14.6 million; and to the Housing and Home Finance Agency, \$4.6 million. It is estimated that the Treasury Depart-

SPECIAL ANALYSIS E—Continued

FEDERAL CREDIT PROGRAMS—Continued

ment's portfolio of loans and commitments will be reduced from \$51 million on July 1, 1957, to about \$30 million on June 30, 1959.

Loan to United Kingdom.—A loan of \$3,750 million was made to the United Kingdom in 1947 and 1948. It is a 50-year loan at 2% interest. Repayments of principal are deposited directly into miscellaneous receipts and are not available for new loans. In accordance with the agreement of March 6, 1957, between the United States Government and Great Britain, approved by the Congress, the interest payments for 1957 and 1958, as well as the repayment of principal for 1958, have been deferred. The agreement provides relief for the United Kingdom as warranted by its international exchange situation.

EXPORT-IMPORT BANK OF WASHINGTON

The Export-Import Bank is the principal foreign lending agency of the Government. Its total loan and loan guaranty authority is \$5 billion; of this, \$100 million may be used to insure American exporters against certain risks of expropriation and confiscation. An additional \$2 billion in lending authority has been recommended by the President. The Bank's major goal is the expansion of trade between the United States and foreign countries. It extends loans to finance American exports and imports and the development of sources of strategic materials, and to promote the economic development of underdeveloped countries. The Bank also makes loans to foreign governments to meet certain emergencies which otherwise would disrupt the normal flow of trade with the United States.

Beginning in 1958, the Bank will make loans in certain foreign currencies to private firms for economic development and trade expansion. The foreign currencies will become available as part of the proceeds of United States surplus agricultural commodity sales abroad under the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480).

The Bank's operations are intended to supplement private capital. Accordingly, it does not finance projects or exports for which private financing is normally available, and, wherever possible, emphasizes guaranties of private loans, rather than the making of loans directly. The high level of domestic demand for private capital has restricted private participation.

Interest rates and other loan terms are set upon advice of the National Advisory Council on International Financial and Monetary Problems. In general, the Bank charges 2% more than the yield of United States Government securities with comparable maturities; rates on long-term unguaranteed loans are usually somewhat higher. The current interest rates range from 5½% to 6%. Loan maturities vary from 12 or more months on export credits to a number of years on development project loans. Losses have been small and income is more than adequate to cover costs; reserves amounting to \$465 million on June 30, 1957, have been set aside for future contingencies. Annual dividends are being paid to the Treasury at the rate of 2¼% on capital stock.

DEPARTMENT OF STATE

The International Cooperation Administration, in the Department of State, directs loans under the Development Loan Fund, the Agricultural Trade Development and Assistance Act, 1954, as amended (Public Law 480), and the Mutual Security Program.

The Mutual Security Act of 1957 established the Development Loan Fund, for which \$300 million has been appropriated. An additional \$625 million is included in the budget for 1959. These funds are available for assisting sound development projects abroad on the basis of long-term credits repayable in dollars or foreign currencies. Loans will generally be for periods up to 20 years.

Under title I of the Agriculture Trade Development and Assistance Act of 1954, as amended, the President may enter into agreements to use the foreign currencies which accrue from the sale of surplus agricultural commodities for loans to promote multilateral trade and economic development. Strategic materials, services, or foreign currencies may be accepted in repayment of such loans. Most of the sales agreements under the program have provided for loans for development projects within the country. A portion of these loans made to foreign governments is in turn reloaned to private enterprise. In general, the terms of loans under this program are similar to those under the Mutual Security Program discussed below.

The International Cooperation Administration directs the bulk of the loans extended under the Mutual Security Program, the authority for which is in the President. The Administration and its predecessor organizations—the Foreign Operations Administration, the Mutual Security Administration, the Economic Cooperation Administration, and the Technical Cooperation Administration—have made loans to foreign governments as part of a broad program to assist in the restoration of economic stability and to promote the economic development of underdeveloped areas in the free world. About half of the loans outstanding were made during 1949, after passage of the Foreign Assistance Act of 1948. Most of the loans are administered by the Export-Import Bank as agent for the International Cooperation Administration. The earlier loans, made primarily to assist the European countries in the restoration of their economies subsequent to World War II, are generally for a period of 28 years. Current mutual security loans generally are for a period of 40 years, and basic materials development loans are for 10 to 20 years.

Interest rates for all these programs are determined by the Administration upon advice of the National Advisory Council on International Monetary and Financial Problems. In the case of most current Mutual Security and Public Law 480 loans, those repaid in dollars require 4% interest, and those repaid in local currencies require 5%. Interest rates on loans made from the Development Loan Fund have not yet been determined. Costs of administering the loans have been financed from funds available for the general administration of the agency. The first significant repayments began in 1956.

SPECIAL ANALYSIS F

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION

A diversity of works and structures results from the expenditures made by the Federal Government in carrying out national objectives and programs. Some needed public works are provided by direct Federal expenditures. Other public works are provided by State and local governments with Federal aid in the form of grants and loans. Most of these public works are built by the private construction industry under contracts with public agencies. The Federal Government also encourages certain types of nonpublic construction by providing financial aids of various kinds to nonprofit groups and private industry.

Federal expenditures for public works and other construction activities are long-term investments important to the national economy and to the construction industry. This special analysis, therefore, summarizes the authorizations and expenditures from budget accounts and trust funds for these activities, with major emphasis given to Federal and federally aided public works.

Direct Federal construction currently constitutes about 6% of the total value of new construction. Federally aided State and local public works represent another 4%, about half of which is financed from Federal grants. The Federal share varies substantially among these grant programs, depending upon program objectives and provisions of law.

The expenditures shown for public works and other construction in this analysis represent disbursements of Federal funds rather than the value of the work put in place during the year. For direct Federal construction such disbursements approximate the value of work put in place. However, they include only the Federal expenditures for federally aided public and nonprofit construction. Federal aid for private construction includes loans,

loan guaranties, tax concessions, and lease-purchase contracts. The net budgetary effect of Federal programs to aid private construction is not an adequate measure of the construction activities stimulated by such Federal aid. For this reason, the information relating to these programs is not presented in tabular form in this analysis.

The volume and types of Federal activities in public works vary from year to year as national needs and objectives change. Table 1 summarizes the Federal budget and trust fund expenditures on public works for 1950 through 1959.

The 1959 budget recommendations provide for public works programs to be carried forward as economically as possible. Construction on some civil public works programs or projects will be stretched out where this can be done without loss of previous investments. Total public works expenditures are estimated to reach \$6.7 billion in 1959, an increase of \$1 billion over the 1958 total. Acceleration of certain military construction, in particular facilities for missile sites and detection systems, will begin in 1958 and will continue in 1959. Expenditures on military construction are estimated at \$2.1 billion, or \$142 million above the estimated total for 1958. For civil public works activities, estimated expenditures will be \$4.3 billion as compared with \$3.5 billion in 1958. The increase results largely from commitments on programs and projects started in earlier years, mostly for the Federal-aid highway systems, under trust funds.

Federal expenditures on programs for cooperatives and nonprofit groups, not included in public works expenditures, are estimated to be \$534 million in 1959, including loans of \$444 million.

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

CIVIL PUBLIC WORKS

"Civil public works," as used in this analysis, are the public works required for Federal civil programs as distinguished from those required for national security. The term includes flood control, navigation and irrigation projects, veterans hospitals, public buildings, and other construction undertaken directly by the Federal Government. It also encompasses the Federal grants and loans to State and local governments for highways, hospitals, waste treatment works, and other facilities.

Table 2 summarizes Federal expenditures for civil public works, by agency, from budget accounts and trust funds for the years 1957, 1958, and 1959.

TABLE 2.—Expenditures and 1959 new obligational authority for civil public works, by agency

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

Budget expenditures in 1959 for continuing work are estimated at \$1.6 billion, with \$6.5 billion required in later years to complete. Expenditures for new projects and programs in 1959 are estimated at \$130 million, with \$664 million required thereafter to complete.

New projects recommended for starting in 1959 include a Court of Claims and office building in the District of Columbia, a building in New York City to house the United States Mission to the United Nations, and the Balboa Bridge over the Panama Canal. The budget recommends that no new water resources projects be started in 1959 by the Corps of Engineers or the Bureau of Reclamation because of the large commitments made for projects started by these agencies in 1956, 1957, and 1958.

Under proposed revenue-bond legislation for the Tennessee Valley Authority, \$125 million of new obligational authority is recommended for construction of additional power-generating facilities. The budget also includes, under the highway trust fund, proposed legislation to provide contract authorization for 1960 and 1961 for Federal aid for primary and secondary highways and for forest and public lands highway programs of the Department of Commerce. The proposed authorizations for 1960 would be available for obligation in 1959, as shown in table 3. Other legislative proposals include additional authority for Federal assistance for schools in federally affected areas, loans to colleges for dormitories and faculty housing, and grants to State and local agencies for civil defense facilities.

INVESTIGATIONS AND STATUS OF PLANNED AND AUTHORIZED PROJECTS

Adequate basic data, comprehensive surveys and careful detailed planning are essential for economical design and construction of public works. Construction expenditures shown in this analysis include detailed project planning costs but do not include costs of basic data collection and preliminary surveys.

Basic data.—Federal programs for the collection of basic data serve a wide variety of nationally important engineering, industrial, and scientific purposes, including investigation and planning of Federal and other construction projects. A total of \$62 million is recommended for collection of general coverage data, including geodetic control surveys; topographic, geologic, and soil surveys and maps; and the accumulation and processing of hydrologic and meteorologic data.

Preliminary surveys and investigations.—Careful preliminary investigations are necessary to determine the basic need for individual projects as well as their engineering and economic feasibility. Inadequate examination of the factors involved in project formulation before authorization may result in approval of projects having questionable justification or in seriously underestimating project costs. Estimated expenditures totaling \$18 million are included for 1959 for preliminary investigations of river basin and other construction programs. In addition, \$3.5 million is recommended to permit the Housing and Home Finance Agency to make grants to States and metropolitan areas for assistance in general community planning.

Detailed planning.—Preparation of project plans in advance of construction provides for orderly programming

of project construction and may prevent expensive changes in project designs during the construction period. Such planning also provides an opportunity to verify the economic feasibility of projects, as well as their estimated cost, before construction is started. Expenditures for advance preparation of plans in 1959 are estimated at \$28 million, including some site costs, as shown in table 3.

The budget also provides an additional \$8.5 million to enable the Housing and Home Finance Agency to make repayable advances to State and local agencies for the planning of their public works.

Authorized reserve.—Agency reports indicate that, on the basis of present costs, \$12.4 billion of authorized work will be in reserve for starting after 1959. Such a reserve of soundly conceived authorized projects is necessary to permit a wise selection of projects for advance planning and for starting in accordance with program needs and economic and budgetary policy. About \$7.7 billion of the reserve is included in the river basin programs of the Corps of Engineers and the Bureau of Reclamation, representing 576 projects.

The status of advance planning and public works projects in the reserve is shown in table 4 by major agency. A substantial amount of planning will also be done by State and local agencies on highways and other programs for which Federal grants are made.

TABLE 4.—Reserve of presently authorized projects and programs for undertaking after 1959

Agency	[In billions]						
	Cost of authorized reserve						
	Total Federal cost	Status of plans as of June 30, 1958			Status of plans as of June 30, 1959

PROGRAMS BY MAJOR FUNCTION AND TYPE OF FACILITY

Civil public works expenditures are listed in table 5 according to the functional classification used in this budget, with subclassifications according to the type of facility. Most functions require some public works. For some functions, expenditures for public works represent only a small part of the total cost of the program. For other functions, such as natural resources, two-thirds of the expenditures are for various types of construction. About 88% of total civil public works expenditures in 1959, including highway trust fund expenditures, will be for the natural resources and commerce and housing programs.

NATURAL RESOURCES

The major portion of the \$1 billion to be spent in 1959 for natural resources programs will be for the multiple-purpose control and development of rivers and streams for flood control, navigation, irrigation, hydroelectric power, municipal water supply and related purposes. The remainder will be for the conservation and development of land, forest, mineral, recreational, and fish and wildlife resources.

Corps of Engineers.—The rivers and harbors and flood-control programs of the Corps of Engineers are nationwide in scope, except for the Tennessee Valley area. In 1959 construction will be continued on 247 projects, including 27 multiple-purpose projects, 135 predominantly flood-control projects, of which 16 are for the lower Mississippi River and tributaries, and 85 other projects, mostly for navigation.

The Saint Lawrence Seaway Development Corporation.—The Corporation is constructing that part of the Saint

Lawrence Seaway which is within U. S. territory. This work is related to navigation improvements being built by Canada and to power developments by the State of New York and the Province of Ontario. The seaway is expected to be opened to deep-draft traffic in 1959, although additional improvement of the shipping channel is contemplated.

Bureau of Reclamation.—In the 17 Western States, the Bureau will continue work on 62 projects for irrigation, water supply, flood control and hydroelectric power. Included in the total are 16 units of the Missouri River Basin project and 2 units of the Upper Colorado River storage project. During the year, irrigation water will be available on 152,895 acres of land, and 20,500 kilowatts of new generating capacity will be installed.

International Boundary and Water Commission.—The Commission and a similar agency of Mexico participate in the construction of water conservation and control facilities on the Rio Grande River. The Anzalduas Dam, started in 1956, is scheduled to be completed in 1959.

Tennessee Valley Authority.—Most of the construction of the Tennessee Valley Authority in 1959 will be for power supply and transmission and for navigation facilities. Under proposed legislation, new steam electric generating facilities to be started in 1959 will be financed from the proceeds of sales of revenue bonds.

Summary of Federal electric power activities.—Federal water resources development programs include provision for generation of electric power produced by hydroelectric facilities in multiple-purpose reservoir projects and by steam-electric facilities constructed by the Tennessee Valley Authority.

Generating capacity installed and operated by Federal agencies at the end of calendar year 1957 amounted to 20 million kilowatts, or about 16% of the total capacity of FPC Class I electric utility systems in the United States. An additional 2 million kilowatts of capacity is scheduled for completion during the calendar years 1958 and 1959 which will bring the total Federal capacity to 22 million kilowatts. Total Federal generating capacity now under construction or programmed amounts to over 28 million kilowatts. In addition, construction of 1.7 million kilowatts of privately owned generating capacity was financed by Rural Electrification Administration loans through June 30, 1957.

TABLE 6.—Federal electric power generating capacity, in operation and presently scheduled (nameplate)

[Million kilowatts]

Agency	Dec. 31, 1957	Total scheduled
Corps of Engineers.....	5.26	10.00
Bureau of Reclamation.....	5.06	6.53
Tennessee Valley Authority.....	9.63	11.77
International Boundary and Water Commission.....	.03	.03
Total.....	19.98	28.33

Additional transmission facilities required for power system integration and for marketing federally produced power will be constructed by the Bureau of Reclamation, the Tennessee Valley Authority, and the Southwestern and Bonneville Power Administrations. The addition of 686 miles of lines in 1959 will result in a Federal transmission system total of 29,000 miles. Expenditures in

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

1959 for construction of these facilities will amount to \$66 million.

Summary of water resources and related developments.—The major part of water resources development is classified under the natural resources function, but other water resource developments are carried out under the programs for agriculture and agricultural resources and for labor and welfare. Expenditures for all water resources and related developments are brought together in table 7.

Other natural resources programs.—In addition, under the natural resources function, there are programs for the construction of roads and trails in the national forests, national parks and Indian reservations, and on other public lands, and for continuation of work on five national parkways. There is also provision for the construction of buildings, utilities, and other facilities in the 180 park, monument, and other areas comprising the National Park System. These facilities are a part of the 10-year development program, known as "Mission 66," initiated in 1957. Provision is also made for recreational facilities in the national forests.

The Bureau of Indian Affairs will continue work on irrigation projects and on schools to accommodate the increasing number of Indian children to be enrolled in Federal schools. Work will proceed on 9 fish hatcheries, 15 wildlife refuges, and a number of other structures.

COMMERCE AND HOUSING

The public works activities under this function include various transportation facilities, housing and community development, and construction of civil defense facilities. Expenditures for transportation facilities, including trust fund expenditures, amounting to \$2.6 billion, account for 60% of the expenditures for civil public works in 1959.

Public roads.—The Federal-Aid Highway Act of 1956 provided authority for grants to States for projects on the interstate highway system totaling \$24.8 billion. This amount, which is spread over the 13-year period from 1957 through 1969, was estimated to cover about 90% of the cost of completing a 40,000-mile highway system. The act also included additional contract authorization for grants for Federal-aid primary, secondary, and urban highways.

For 1957 and thereafter, authorizations and expenditures for the Federal-aid highway program, which is administered by the Bureau of Public Roads, are carried in a separately financed highway trust fund and, therefore, are no longer included in budget totals. They are included, however, in the overall totals for public works in this analysis.

For 1959 and subsequent years, public lands and forest highway programs of the Department of Commerce will be financed through the highway trust fund rather than in budget accounts. It is expected that new contract authorizations will be provided for these programs in the 1958 biennial Federal-aid highway legislation.

Work will also continue on the Woodrow Wilson Memorial Bridge near the District of Columbia.

TABLE 7.—Budget expenditures for water resources and related developments

[In millions]

Type	Functional code No.	1957 actual	1958 estimate	1959 estimate

Total, water resources and related developments		769.4	901.8	978.1

Airports and air navigation and research facilities.—Under legislation enacted in 1955, contract authority will become available in the amount of \$63 million for 1959 for grants to assist State and local governments in establishing and improving public airports. During 1959, 390 airports are expected to program projects under this authority. The Civil Aeronautics Administration will continue to modernize the Federal airways system by installing additional air navigation and traffic control facilities in 1959.

The National Advisory Committee for Aeronautics is proposing to construct facilities for research on flight principles as applied to aircraft, missiles, and space vehicles. About \$26 million is requested in 1959 to expand the laboratories at Moffett Field, Calif.; Cleveland, Ohio; and Langley, Va.

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

Housing and community development.—The Federal Government assists in the construction of low-rent public housing units through loans and annual contributions. The 1959 budget provides for starting construction of 36,000 units as compared with 33,000 in 1958. In addition, it is estimated that 15,000 units will be completed in 1959 compared with 12,000 in 1958. Under proposed legislation additional borrowing authority is recommended to permit the Housing and Home Finance Agency to continue to provide loans to colleges and universities for the construction of dormitories. Loans in 1959 are estimated at \$219 million, of which \$142 million will be to public institutions. Other significant expenditures consist of loans for public facilities under the Housing Amendments of 1955.

Other facilities.—The Post Office Department will continue to make improvements in 1959, estimated to cost \$33 million. The Panama Canal Company will spend \$9 million for construction on various canal improvements. Work will begin on the Balboa Bridge over the Panama Canal.

VETERANS SERVICES AND BENEFITS

Work will continue on a veterans hospital at Palo Alto, Calif., and on replacement facilities at Downey, Ill. Replacement of a hospital at Jackson, Miss., is scheduled to begin in 1959. The budget includes requests for architectural planning of replacement projects at Long Beach, Calif.; Coral Gables, Fla.; and Memphis, Tenn.

Also included in this function are the construction of monuments and cemeteries by the Quartermaster General of the Army, and the construction of monuments and cemeteries in foreign countries by the American Battle Monuments Commission.

INTERNATIONAL AFFAIRS AND FINANCE

Expenditures under this function are for the construction of office buildings and living quarters for the U. S. Government abroad, and radio facilities for the Voice of America. The \$49 million addition to the State Department building at Washington, D. C., will be well under way in 1959.

LABOR AND WELFARE

Health facilities.—The Department of Health, Education, and Welfare administers a program of grants to States to aid in the construction of hospitals and health research facilities. Only the grants made to public agencies are included as public works in this analysis. Those for nonpublic facilities are discussed later in this analysis and are shown in table 8. Expenditures in 1959 to public agencies will amount to \$68 million, or 45% of total grants for hospitals and health research facilities. The Department's health programs also include construction and renovation in 1959 of medical facilities for the Indian population.

Education and research facilities.—For 1959, Federal assistance for school construction in areas substantially affected by Federal activities will amount to about \$95 million. Legislation will be proposed to extend and modify this program, which expires June 30, 1959. The

legislation will restrict Federal aid primarily to children of parents who live and work on Federal properties.

Grants for construction of waste treatment works.—The Water Pollution Control Act, as amended in 1956, authorized a program of grants to communities to stimulate and assist in the construction of waste treatment facilities. These grants are made to communities for projects which are certified by the States as meeting their pollution control programs and which the Public Health Service determines meet the criteria for Federal assistance. These grants may not exceed 30% of the cost of the project up to a maximum of \$250,000 for each grant.

AGRICULTURE AND AGRICULTURAL RESOURCES

Under the Watershed Protection and Flood Prevention Act, the Department of Agriculture provides assistance to States and local groups for the installation of works of improvement in upstream watersheds to prevent damage from soil erosion, flood water, and sedimentation, and to further conservation, development, utilization, and disposal of water. The Department will also continue the program of upstream flood prevention work in the 11 watershed areas authorized by the 1936 Flood Control Act.

Other construction by the Department of Agriculture in 1959 includes grain storage facilities and facilities for research in a number of fields.

GENERAL GOVERNMENT

Public works classified under this function include the construction and major repair and improvement of administrative and other buildings required to carry on the Government's business. The 1959 program includes expenditures for the major renovation and modernization of buildings and for air conditioning of some buildings. The lease-purchase programs carried on by the General Services Administration and the Post Office Department are discussed in a later section of this analysis on "Other Federal activities in construction." Other direct Federal construction in this category includes continuation of work on new office buildings for the Senate and House of Representatives, and extension and reconstruction of the central portion of the Capitol, in the District of Columbia.

In addition, the Federal Government provides assistance, through grants and loans, for construction of various community facilities in Samoa, the Trust Territory of the Pacific Islands, and the District of Columbia. The Canal Zone Government will begin construction on a high school, clinic, and hospital facilities.

MAJOR NATIONAL SECURITY CONSTRUCTION

Expenditures for major national security construction are estimated at more than \$2.3 billion in 1959, about \$160 million above the 1958 level.

Military construction.—The service programs comprise construction projects required to support the current and long-range programs for the strengthening and modernization of military defense. About \$550 million of 1958 and 1959 funds will be applied to facilities for making more effective the dispersal and alert readiness of the

SPECIAL ANALYSIS F—Continued

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION—Continued

Strategic Air Command. Also included for these years is about \$900 million for the new ballistics missile detection system and the related communication lines, and for construction of missile sites. Other expenditures in 1959 will include construction for the Army's NIKE program and for the Navy's antisubmarine warfare program.

Atomic energy facilities.—Expenditures by the Atomic Energy Commission for construction during 1959 will be primarily for projects started in prior years. This construction includes production plants and weapons facilities; power and propulsion reactors, including land prototypes for submarines and naval surface ships, experimental and prototype civilian power reactors, and a merchant ship reactor; facilities for the development of aircraft and missile nuclear propulsion; facilities to provide general support for atomic and thermonuclear power development; and four multibillion electron-volt particle accelerators. New projects proposed for 1959 include principally further improvement of production and weapons facilities, facilities to process chemically spent fuel elements from Commission, military, and nongovernmental reactors, a land prototype reactor suitable for use in a destroyer, and other facilities to support reactor development and radioactive fallout studies.

OTHER FEDERAL ACTIVITIES IN CONSTRUCTION

In addition to public works, there are other types of Federal activities, involving loans, loan guaranties, grants, or direct Federal expenditures, which affect construction. Federal expenditures for these other activities contribute principally to the physical assets of cooperatives, and nonprofit private groups, or of individuals, whereas public works are limited both in the foregoing sections of this analysis and in special analysis D to additions to Federal, State, and local governmental physical assets.

ASSISTANCE TO COOPERATIVES AND NONPROFIT GROUPS

Construction by privately owned cooperatives and nonprofit groups whose functions are of a quasi-public nature is stimulated through various types of financial assistance. Expenditures for these programs are shown in table 8.

The Rural Electrification Administration makes loans primarily to rural cooperatives to finance electrical and telephone facilities. Grants are made to States by the Public Health Service for construction of both public and privately owned hospitals and medical facilities. Likewise the Housing and Home Finance Agency makes loans to public and private colleges for housing. Legislation is being recommended to assist REA borrowers and educational institutions to obtain financing from private sources. Table 8 includes only the grants and loans to nonpublic groups; those made to public groups are included in the public works totals.

¹ Less than \$50,000.

AIDS FOR PRIVATE CONSTRUCTION

Incentives to farmers, homeowners, and businesses in the form of loans, loan guaranties, tax concessions, grants, direct aid, and other assurances serve to stimulate construction.

Under basic authority provided in 1954, 146 projects whose total construction costs exceed \$785 million have been approved for lease-purchase by the Federal Government. Under this plan, Federal buildings for postal, administrative, and other purposes are to be built by private interests and paid for by the Federal Government over a period of 10 to 25 years, after which the buildings will be owned by the Federal Government.

Through the Federal Housing Administration and the Veterans Administration, programs of insurance or guaranty of mortgages on private housing are conducted, thereby providing incentives for a higher level of construction of such housing than would otherwise be the case. The Farmers' Home Administration makes direct loans for farmhouses, buildings, and water facilities, and insures private loans for these purposes. The Commodity Credit Corporation provides loans and storage-use guaranties for construction or expansion of privately owned grain storage facilities.

SPECIAL ANALYSIS G

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

This analysis covers Federal financial assistance to State and local governments. Three types of Federal assistance are included—direct grants-in-aid, shared revenues, and loans and repayable advances.

For 1959, total Federal aid expenditures, exclusive of Federal administrative costs, are estimated at \$6,259 million. This includes net expenditures of \$3,930 million from budget accounts and \$2,329 million from the trust account established by the Highway Revenue Act of 1956. Since 1957, the Federal share of the new and greatly enlarged interstate highway program has been financed from this trust fund, in which the proceeds of certain excise taxes are deposited, instead of from budget appropriations as was the practice through 1956.

The total of Federal aid expenditures for 1959 includes \$86 million under proposed new legislation, \$84 million for legislation to extend expiring laws, and \$6,089 million under existing laws. The 1959 total from the budget and trust accounts is expected to be \$2,147 million higher than in 1957, and \$815 million greater than the revised total for 1958. The largest single increase from 1958 to 1959 is \$577 million in the new highway grants. Stimulative grants under the proposed new program for improvement of science and general education will total \$70 million in 1959. The net increase in all other items from 1958 to 1959 is \$168 million, reflecting scattered decreases. These increases include unemployment compensation and employment service administration; hospital, waste treatment and health facilities construction; commodity contributions for school lunch and milk programs; airport program, and public housing.

TABLE 1.—Federal aid expenditures in relation to total Federal budget expenditures and total State-local revenues from their own sources

Fiscal year	Net budget expenditures for aid to State and local governments (millions)	Federal-aid expenditures as percent of—	
		Total Federal expenditures (net)	State-local revenues ¹
1950.....	\$2,269	6	10
1951.....	2,434	5	9
1952.....	2,604	4	9
1953.....	2,857	4	9
1954.....	2,657	4	8
1955.....	3,124	5	9
1956.....	3,753	6	9
1957 ²	3,159	5	8
1958 (estimated) ³	3,692	5	(2)
1959 (estimated) ⁴	3,930	5	(2)

¹ Based on compilations published by the Governments Division, Bureau of the Census.

² Not available.

³ When grants-in-aid from the highway trust fund are added, net expenditures total \$4,111 million, 6 percent of total Federal cash payments to the public, and Federal aid as a percentage of State-local revenues will be higher.

⁴ When grants-in-aid from the highway trust fund are added, net expenditures total \$5,444 million, 7 percent of total Federal cash payments to the public, and Federal aid as a percentage of State-local revenues will be higher.

⁵ When grants-in-aid from the highway trust fund are added, net expenditures total \$6,259 million, 7 percent of total Federal cash payments to the public, and Federal aid as a percentage of State-local revenues will be higher.

When the three kinds of aid are considered, by far the largest part of Federal aid in 1959, \$5,972 million, or 95.4% of the total, will be in the form of grants-in-aid from budget appropriations and trust accounts. Shared revenues account for \$101 million, or 1.6%; and net loans and repayable advances for the remaining \$185 million, or 3.0%.

Grants-in-aid, loans, and repayable advances from budget and trust accounts for civil public works which add to State-local assets, represent an increasing part of total Federal aid outlays—45% of the total in 1959 as compared to 39% in 1958 and 28% in 1957. (See summary at end of detailed table and table 4.)

Development of Federal aid.—Federal aid to State and local governments, in recent decades, has become a major factor in the cooperative financing of essential government functions. The rudiments of the present system date back to the Civil War with the enactment of the Morrill Act which established the land-grant colleges and which instituted certain federally required minimum standards, characteristic of the present grant-in-aid system. Federal aid was later initiated for agriculture, highways, vocational education and rehabilitation, forestry, and public health. In the depression years, Federal aid was extended to meet economic security and other social welfare needs. The detailed table at the end of this analysis lists the various programs of Federal financial assistance to State and local governments presently available or proposed for enactment.

Pursuant to a recommendation of the Commission on Intergovernmental Relations, the President in 1956 designated the Office of the Deputy Assistant to the President for Intergovernmental Relations to give continuing attention to interlevel problems of government. As one of its assigned duties, this Office has functional responsibility for problems associated with the Federal aid system as a whole. A special assistant to the President is charged with advising on the implementation of the recommendations of the Commission on Intergovernmental Relations.

The Joint Federal-State Action Committee.—The Joint Federal-State Action Committee of governors and Federal representatives, created in July 1957 by the President and the Governors' Conference, has been engaged in a review of functions—including grants-in-aid—now performed by the Federal Government which could be assumed by the States and localities. At the same time, the Joint Committee has been reviewing those Federal revenue sources which could be relinquished to the States for the financing of programs or activities transferred to States or local governments.

This Committee, in its initial progress report, recommended the transfer of complete responsibility for vocational education and waste treatment construction grants from the Federal Government to the States. At the same time, to assist the States in financing these responsibilities, the Committee recommended that the Federal tax on local telephone service be changed so as to provide up to a 40% tax credit to those States enacting or increasing local telephone taxes. Under this proposal, the tax credit arrangement would end in 5 years and the Federal tax would be reduced 40%. The report also called for strengthening of State and local activities in urban renewal, peaceful uses of atomic energy, and for larger State and local financial participation in natural disaster relief.

The continuing work of the Joint Action Committee is expected to result in additional recommendations for transfers of functions and revenue sources. It will also establish clearer definitions of responsibilities in the case of emerging problems to encourage early action by State

SPECIAL ANALYSIS G—Continued

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS—Continued

and local governments in order to avoid unnecessary Federal participation in these areas.

Grants-in-aid.—As indicated above, the great bulk of Federal aid to State and local governments takes the form of grants-in-aid wherein Federal financial participation supports State or locally administered programs. For 1959, grants to States and local governments total \$5,972 million (including \$2,329 million from the highway trust fund), an increase of \$771 million from the estimate for 1958. The "labor and welfare" category is responsible for approximately 48% of the grant-in-aid expenditures in 1959; "commerce and housing," 43%; "agriculture and agricultural resources," 7%.

The two largest grant programs are for highways and public assistance for which the budget provides \$4,135 million in 1959, or over two-thirds of the total.

The various grant-in-aid programs provide for Federal fiscal participation in a specific function or service rendered by a State or local government. Most grant-in-aid statutes require that State and local programs meet certain standards and provide for the allocation of money among the States in accordance with various formulas. These allocation formulas vary considerably among programs. Some are statutory while others are established by the administering Federal agency on the basis of criteria listed in the laws. Some contain specific measures such as population, area, per capita income, incidence of specific diseases, road mileage, etc.; others allot equal amounts to all States. Still others allot on a fixed percentage of State expenditures up to a specified limitation contained in the Federal law. Generally the amounts expended for most programs of Federal aid are subject to the establishment of maximum amounts in the authorizing statutes and the necessity for annual appropriations by Congress. However, in the public assistance program the amount paid to each State is determined by a statutory formula applied to actual caseloads and individual benefit rates established by each State up to the statutory maximum subject to matching. Consequently, the amount appropriated in advance does not necessarily limit the total of Federal payments for a given year. Congress customarily provides a supplemental appropriation if this is necessary to cover the claims submitted by the States.

The vocational rehabilitation formula enacted in 1954 provides for variation by States in both the allotment of funds and the requisite matching share, in inverse proportion to per capita income. In recent years similar formulas have been recommended for grants-in-aid in the field of health.

Legislation governing a few grant-in-aid programs permits aid to private nonprofit agencies or institutions. The program of grants to aid in the construction of hospitals and other health facilities, administered by the Department of Health, Education, and Welfare, is an illustration. It is estimated that 56% of the Federal expenditures of \$113 million for these grants in 1959 will be used for nonprofit hospitals and other private health facilities. The program, nevertheless, is one in which the States have a central role through the preparation of statewide programs, the approval of individual projects, and the channeling of the Federal payments. Therefore, the entire amount authorized and spent for the program is included as Federal aid in this table. The part going to private institutions is indicated separately.

On the other hand, certain Federal programs may incidentally involve grants to particular State or local governmental agencies, even though they are not primarily programs of grants-in-aid or loans to State or local governments. For example, the Public Health Service and the National Science Foundation make research grants to colleges and universities, including some State and local institutions. These payments are not included in the tabulation.

Payments of unemployment allowances to veterans of the Korean conflict and to former Federal civilian employees are considered direct Federal programs. The States, as a service to the Federal Government, make the benefit payments through their unemployment compensation offices as agents of the Federal Government and are fully reimbursed. Their expenses of administration are paid by the Government as part of its general grants-in-aid for unemployment compensation and employment service administration. These administrative costs in the States are not separately identifiable and are included in the Federal-aid total even though the benefit payments are excluded.

In a few instances, grants-in-kind are made, usually involving commodities, services, or structures. Wherever these can be identified in the budget they have been included in this analysis. Principal among them are grants of agricultural commodities to schools, welfare departments, and other public agencies, shown in the tabulation under agriculture and agricultural resources. This is supplementary to the grants specifically for the national school lunch program, shown under labor and welfare. However, donations of previously acquired property, such as grants of surplus public housing properties to local agencies, have been omitted from the tabulation.

Shared revenues.—In the budget estimates for 1959, payments of shared revenues are estimated at \$101 million, or approximately the same as the revised estimate for the current year. As shown in the tabulation, the Mineral Leasing Act, national forest fund and tax collections for American Samoa, Puerto Rico, and Guam constitute approximately 76% of all shared-revenue expenditures.

Classified as shared revenues are (a) payments to States and localities of a portion of the proceeds from the sale of certain Federal property, products, and services; and (b) payments to the Territories of certain Federal tax collections derived within their boundaries or from transactions affecting them. Shared revenues from property and products are derived mainly from public lands in the West, and the Federal law usually requires that the State or local share be used for schools or for schools and roads in the county where the Federal lands are located. The payment of tax collections to the Territories (e. g., internal-revenue collections for Puerto Rico, the Virgin Islands, and Samoa) are included in this analysis to the extent that they are included in budget receipts and expenditures. Some revenues collected under Federal laws for the benefit of the governments of Guam, Puerto Rico, and Virgin Islands are paid directly to those Territories, without affecting Federal budget accounts.

Loans and repayable advances.—Budget expenditures for loans are net amounts, representing for any year the gross amount of loans and advances minus credits for certain collections during the year. For 1959, net disbursements

SPECIAL ANALYSIS G—Continued

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS—Continued

for loans and advances to State and local governments are estimated at \$185 million. In a few cases, collections are not deducted from gross disbursements but, instead, are credited directly to miscellaneous receipts of the Treasury.

Loans are made to State or local governmental bodies by several Federal agencies for specified types of public improvements, such as low-rent public housing, slum clearance, and urban renewal by the Housing and Home Finance Agency. Also included in the category of loans are certain advances made by the same agency for the planning of non-Federal public works and urban renewal; these advances are repayable if the planned projects are carried out. Advances are also made by the Federal Civil Defense Administration in the operation of its supply procurement fund, which represents a central purchasing operation for State and local civil defense stocks.

Part of the Alaska public works expenditures represents Federal advances of funds to be repaid by the government of the Territory.

Highway trust fund.—The Highway Revenue Act of 1956 established a trust fund into which proceeds from certain excises on motor fuels, tires, and vehicles are deposited and from which the Federal share of the new highway program is financed. The companion Federal-Aid Highway Act of 1956 authorized Federal grants of \$25 billion over a 13-year period to cover 90% of the cost of completing the Interstate Highway System. In addition, it provided for increased grants for primary, secondary, and urban highways.

The actual and estimated receipts and disbursements of this trust fund are shown in table 2. During 1959 it is expected that grants-in-aid from this fund will exceed slightly the tax collections of \$2.2 billion dedicated to this program. It is anticipated that expenditures from the trust fund will rise gradually in later years to nearly \$3 billion annually.

TABLE 2.—*Highway trust fund*

¹ Includes approximately \$3 million for public lands highways.

Proposed legislation.—Federal aid to State and local governments would be affected by several of the recommendations for legislation which are included in the budget.

As part of a coordinated science training program, the President is recommending enactment of new legislation authorizing the Department of Health, Education,

and Welfare to provide grants to States. Under this new 4-year program, matching grants will be provided to States to strengthen State departments of education and local school systems, particularly in the teaching of science and mathematics. Improvement of general education will also be promoted through grants for testing and counseling services for young people and related means. The Federal share of expenditures under this new program is expected to total \$70 million in 1959.

Legislation is again recommended for a new program of Federal assistance to States in meeting certain personnel and administrative costs of State and metropolitan area civil defense organizations as well as provide for other needed improvements in the overall civil defense effort. It is estimated that expenditures of \$16 million will be required for this new program in 1959.

Existing authority to provide grants to help build and operate schools in districts where enrollment is swelled by Federal activities is due to expire. Experience suggests that these programs should be modified. Expenditures of \$84 million are estimated for continuation of these grants in 1959 in addition to payments of \$108 million under existing law.

The President is also recommending legislation to reduce Federal participation in the financing of the public assistance and urban renewal programs, and also to extend the program of grants for hospital construction on a modified basis to meet the most urgent needs. Legislation is likewise being recommended to carry out several of the recommendations of the Joint Federal-State Action Committee discussed above. The recommendations discussed in this paragraph, however, will not be reflected in the budget until 1960.

Relationship to other budget figures.—The totals for Federal aid in this analysis represent budget expenditures, as defined in the introduction to part I except for the one item of grants from the Federal-aid highway trust fund. Financial transactions relating to trust fund programs are shown in part III of the budget document.

In most cases, the expenditures in a given fiscal year correspond closely to the amount of the appropriation, but in some instances the expenditures for grants or loans are made from an appropriation which also finances direct Federal operations or Federal administrative expenses. When this occurs, the amounts tabulated in this analysis ordinarily represent an estimate of that part of the expenditure which is paid as aid to State and local governments. Also, there are certain programs—chiefly construction—where there are substantial differences between appropriations (or other authority to incur obligations) for any year and expenditures in that year. This arises because construction projects usually cannot be completed and paid for within a fiscal year.

The detailed tabulation of Federal expenditures for aid to State and local governments is arranged according to the functional classification used in the budget message. In order that this analysis may be related readily to the analysis of investment, operating, and other budget expenditures presented in special analysis D, that tabulation shows separately in each category the amounts of Federal aid to State and local governments. In table 3, the

SPECIAL ANALYSIS G—Continued

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS—Continued

Federal-aid programs are recapitulated to follow the outline of special analysis D.

Similarly, table 4 relates this special analysis of Federal aid to special analysis F which tabulates budget and trust expenditures for public works.

District of Columbia.—Many Federal-aid programs provide financial assistance for specific public services in the District of Columbia on the same basis as in the States. In addition, this analysis includes programs of particular aid for the District of Columbia in the form of a general contribution to help defray the costs of the local government, assistance in building the District's hospital center (which is additional to aid made available under the general State-aid hospital and health facility construction program), and loans for capital outlays under the District government's public-works program.

¹ Does not include Federal-aid highway trust fund expenditures of \$953 million in 1957, and estimated \$1,752 million in 1958 and \$2,329 million in 1959.

NOTE.—Slight differences in the totals in special analyses D and F result from rounding.

Other financial relationships.—Apart from grants-in-aid, loans, and shared revenues, many other Federal expenditures and policies affect the finances of State and local governments. Types of transactions not covered in the tabulation of aids include the following:

(a) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of students from the Armed Forces and payments to local governments for care of Federal prisoners in local institutions.

(b) Contractual payments to public institutions for research and training in specified fields.

(c) The value of surplus educational and hospital supplies, materials, and equipment, and of housing and other real estate donated or sold at substantial discounts to State and local agencies. The surplus public housing mentioned earlier is in this category of omitted grants-in-kind.

(d) The payments of property taxes, or payments in lieu of property taxes, made upon Federal property under the provisions of various laws. When such payments are based upon a percentage of revenues, however, as in the case of the Tennessee Valley Authority, they are included in the shared-revenue section of the table.

(e) The transfer to the unemployment trust fund of the excess of receipts from the Federal unemployment tax over operating costs of the Federal-State unemployment compensation and placement program to the extent that this annual transfer was devoted initially to setting up a reserve of \$200 million from which loans can be made to States which will deplete their own reserves for benefit payments. Such loans will be trust fund transactions and therefore would not be reflected in the tabulation of budget expenditures for Federal aid. The \$200 million reserve was completed July 1956. Thereafter, excess receipts are being transferred from general funds to the trust fund in which they are credited to the accounts of the several States. For example, the \$25 million transfer estimated for 1959 is classified as a Federal grant-in-aid.

In addition, the table does not reflect various indirect financial benefits accruing to State and local governments, such as exemption from Federal income tax of interest paid on State and local debt; the indirect Federal guaranty of municipal obligations issued for low-rent housing and urban renewal; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and Federal Governments, such as agricultural crop reporting or the National Guard.

Some of these financial benefits, of course, have counterparts in the form of services rendered or occasional payments made to the Federal Government by the States or their subdivisions.

SPECIAL ANALYSIS H

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS

This analysis summarizes Federal expenditures in 1957, 1958, and 1959 for research and development to discover new facts concerning phenomena, primarily in the natural sciences, and to apply existing knowledge to new technological uses. Included are expenditures for the performance of research under the head "Conduct of research and development" and for the construction, improvement, and equipping of research facilities under the head "Increase of research and development plant." The contribution of the Federal Government in support of scientific training is dealt with separately in a supplementary section at the end of this textual analysis.

Net budget expenditures for Federal scientific research and development programs are estimated to be \$3,722 million in 1959, an increase of \$295 million over 1958 and \$694 million over 1957.

TABLE 1.—Total Federal research and development expenditures

(In millions)

Purpose	1957 actual	1958 estimate	1959 estimate
Conduct of research and development.....	\$2,723.8	\$3,037.4	\$3,384.9
Increase of research and development plant.....	303.6	389.1	336.9
Total.....	3,027.4	3,426.5	3,721.8

In addition to these expenditures, which are based on a strict definition of research and development, it is estimated that \$2.5 to \$3 billion a year is being spent by the Department of Defense from procurement appropriations for weapons testing and evaluation and other activities closely supporting research and development programs.

Over four-fifths of the expenditures of the Federal Government for research and development are directed primarily to national security needs. The total for this purpose is estimated at \$3,093 million in 1959. The Department of Defense programs for new and improved weapons, equipment, and defense techniques account for 63% of total 1959 expenditures; the research programs of the Atomic Energy Commission account for 19%. Much of this research also contributes to the civilian economy and to improvements in the health, welfare, and technological advancement of the Nation as a whole. Of particular note is the substantial support given by the Atomic Energy Commission to the development of atomic power for civilian applications.

Expenditures for other than major national security programs are estimated at \$629 million in 1959 or 17% of total Federal research and development expenditures. Of this amount, one-third is for programs of the Department of Health, Education, and Welfare, chiefly the medical research activities conducted and supported by the Public Health Service. Substantial programs of research and development are also conducted by the Departments of Agriculture, Interior, and Commerce, along with the National Advisory Committee for Aeronautics and the National Science Foundation.

Expenditures for basic research, the fundamental scientific knowledge which underlies the Nation's research and development and its technological progress, will increase in 1959. Including \$55 million in expenditures of the National Science Foundation for general purpose basic research and amounts spent by other agencies for such research related to their scientific missions, it is estimated that approximately \$300 million will be devoted to basic research in 1959.

Federal Government support approaches half the research and development costs of the Nation. Private industry finances much of the remainder, and smaller amounts are expended from funds of foundations, educational institutions, and by State and local governments.

Of the total Federal research and development expenditures, about one-half are made directly by Government research laboratories and facilities. The remaining expenditures are chiefly made through contracts with private industry and through grants and contracts with universities.

TABLE 2.—Division of Federal expenditures for research and development between major national security and other programs

(In millions)

Fiscal year	Major national security	Other	Total
1940.....	\$26	\$48	\$74
1941.....	144	54	198

1956 ¹	2,202	336	2,538
1957 ¹	2,596	431	3,027
1958 (estimate) ¹	2,886	541	3,427
1959 (estimate) ¹	3,093	629	3,722

¹ Figures under "Major national security" and "Total" include the pay and allowances of Department of Defense military personnel assigned to research and development activities, as follows: 1956, \$188 million; 1957, \$196 million; 1958, \$193 million; 1959, \$194 million.

In this analysis the term "conduct of research and development" includes activities in which the primary aim is either to develop new knowledge or to apply existing knowledge to new uses. These activities may be carried out in Government installations or in the facilities of private, State, or local organizations using Federal funds. Generally excluded from this definition are expenditures for routine testing, mapping and surveys, experimental production, information activities and training programs including fellowships for the support of graduate students in the sciences. This special analysis also omits expenditures for the collection of general-purpose statistics of the Census Bureau, Bureau of Labor Statistics, and other agencies, some of which expenditures were included in the similar tabulations of "Federal research and development programs" in preceding budgets. The principal statistical programs of the Federal Government are discussed in special analysis I in this budget.

Expenditures for increase of research and development plant include amounts for physical facilities such as land, buildings, and major equipment, regardless of whether the facility is to be used or owned by the Federal Government or by a private, State, or local organization.

All expenditures in this special analysis are net budget expenditures as defined in the introduction to part I of the budget; the estimated amounts include expenditures from supplemental appropriations proposed for later transmission. Table 17 relates the figures in this special analysis to the analysis of the investment, operating, and other budget expenditures presented in special analysis D.

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS

The objective of the military research and development program of the Department of Defense is to provide new and improved weapons, equipments, and techniques which will significantly increase the effectiveness of the armed services. The program includes basic research, applied research, development, testing, and evaluation.

These activities are conducted principally by the military services under the general supervision of the Office of the Secretary of Defense. During 1958 the Department of Defense is establishing, as part of the Office of the Secretary, the Advanced Research Projects Agency which will conduct directly research and development concerned with such advanced systems of military significance as anti-ballistic-missile systems and certain space systems, including satellites.

TABLE 3.—Expenditures of the Department of Defense for research and development

[In millions]			
Function and purpose	1957 actual	1958 estimate	1959 estimate
050 Major national security:			
Conduct of research and development.....	\$1,881.8	\$1,994.4	\$2,269.7
Increase of research and development plant.....	177.3	204.4	90.9
Total, Department of Defense.....	2,059.1	2,198.8	2,360.6

CONDUCT OF RESEARCH AND DEVELOPMENT

The expenditures of the Department of Defense in this analysis for conduct of research and development consist of: (a) those included in the research and development category of the Department's budget, which covers only expenditures under the specific research and development appropriations of the military services, the Advanced Research Projects Agency, the emergency fund, and the United States Scientific Satellite account established in 1958; and (b) that part of the military personnel budget category which represents the pay and allowances of military personnel engaged in research and development activities. Related expenditures, in particular those under procurement appropriations, are not included.

Expenditures for conduct of research and development will rise sharply during the period covered by this analysis as a result of additional funds proposed in support of an intensified research and development effort. During 1958 additional funding of \$62 million is being requested to augment the intermediate range ballistic missiles programs and to permit initiation of the activities of the Advanced Research Projects Agency. In addition, to increase the Department's funding flexibility during the remainder of 1958, authority is to be requested under the emergency fund to transfer an additional \$100 million to research and development appropriations from other accounts. Utilization of this authority would have the effect of increasing the estimates shown in this analysis. In 1959 increased obligational authority is provided directly to the Advanced Research Projects Agency and the military departments.

More than half of the Department's research and development expenditures are for work performed under contracts with industrial and research organizations, including universities; the remainder are for work in the Department's research, development, and test installations. All major operating costs of the military installations are included in these estimates. In the case of contracts with industrial and research organizations, the estimates include a substantial part of contractor effort, but do not reflect the substantial expenditures made under the Department's procurement programs for design, engineering, fabrication, and testing of initial quantities of nonstandardized weapons and equipments. Expenditures of this character from procurement appropriations are estimated to be on the order of \$2.5 billion to \$3 billion a year in addition to the estimates shown in this analysis.

TABLE 4.—Expenditures of the Department of Defense for conduct of research and development

[In millions]			
Operating agency	1957 actual	1958 estimate	1959 estimate
Advanced Research Projects Agency.....		\$5.0	\$199.1
Army.....	\$435.1	450.0	460.0
Navy.....	522.6	573.1	605.0
Air Force.....	728.5	730.0	730.0
Special accounts ¹		43.0	81.2
Total, expenditures under research and development category.....	1,686.2	1,801.1	2,075.3
Expenditures under military personnel category.....	195.6	193.3	194.4
Total, conduct of research and development, Department of Defense.....	1,881.8	1,994.4	2,269.7

¹Included under the heading "Special accounts" are: (a) Estimated expenditures, related to amounts of the emergency fund not yet distributed to performing agencies' and (b) expenditures under the United States Scientific Satellite account, which represent part of the support of Project VANOARD, the remaining support being incorporated principally in expenditures of the Navy and the National Science Foundation for the International Geophysical Year program.

Obligations in major substantive fields are shown in table 5. The most significant trend indicated by these estimates is the continuing increase in emphasis on guided missiles accompanied, in 1959, by a significant decrease in aircraft programs. Programs concerned with space technology and systems, which are not shown separately, include certain activities of the Advanced Research Projects Agency and support derived from programs for advanced manned aircraft and guided missiles and from certain programs in the military sciences. Amounts shown in table 5 for operation of facilities are those amounts not distributed directly to other programs under current practices of each department. Since a large percentage of the undistributed amounts is related to the operation of aircraft and missile development and test installations, the effect of distributing these amounts would be to increase significantly the amounts shown for aircraft and guided missiles programs.

Certain of the fields outlined in table 5 are closely related to and coordinated with programs of the Atomic Energy Commission and the National Advisory Committee for Aeronautics.

Expenditures:			
Total, research and development category.....	1,686.2	1,801.1	2,075.3

¹Included under the heading "Special accounts" are: (a) estimated obligations related to amounts of the emergency fund not yet distributed to performing agencies; and (b) obligations under the United States Scientific Satellite account, which represent part of the support of Project VANGUARD, the remaining support being incorporated principally in obligations under the military sciences program of the Navy and in obligations of the National Science Foundation for the International Geophysical Year program.

INCREASE OF RESEARCH AND DEVELOPMENT PLANT

Estimates of increase in the research and development plant of the Department of Defense include all public works construction at installations having as their primary mission research, development, and testing, and that part of construction at other installations which is in support of the research and development program. The estimates include public works expenditures at certain contractor-operated installations but exclude development, engineering, fabrication, and test facilities provided to contractors under the procurement programs of the Department.

The sharp decline in expenditures in 1959, following the high levels of 1957 and 1958, reflects primarily the completion of major new development and test facilities required in support of the ballistic missiles programs.

MILITARY ASSISTANCE

As part of the military assistance program, the United States cooperates through the mutual weapons development program with a number of foreign countries to accelerate the development of advanced nonnuclear weapons. Current participants in the program, which is administered by the Department of Defense, are the United Kingdom, France, the Netherlands, Belgium, Norway, Italy, and West Germany. Projects are financed jointly

by the United States and the countries undertaking particular developments, and in certain cases technical assistance is provided in addition to or in place of financial assistance. Expenditure estimates in table 7 represent United States participation.

The projects are conducted by scientists and technicians of the participating countries and are directed at developing weapons, equipments, and techniques which are particularly well suited to the defense requirements and capacities of these countries.

ATOMIC ENERGY COMMISSION

The Atomic Energy Commission's program includes both basic research and applied research and development. Basic research is conducted in the physical and life sciences to secure a better understanding of nuclear processes and subatomic particles and of the effect of nuclear radiation on living organisms. The applied research and development includes efforts to improve the processes used in the production of fissionable materials, to improve weapon types, and to find ways of obtaining useful power from nuclear reactions, including controlled thermonuclear reactions. While a large portion of this research program is of necessity aimed at military uses of atomic energy, an increasing portion is devoted to civilian applications. Moreover, the effort placed on military uses produces much information necessary for progress in the application of atomic energy for civilian purposes. The research and development program is carried on in the Commission's contractor-operated laboratories, in universities and other private research institutions, and by other industrial contractors.

TABLE 8.—Expenditures of the Atomic Energy Commission for research and development

The program of research and development for production and weapons is mainly directed to developing improved production methods which would increase the capacity and efficiency of the plants producing special nuclear materials, and to developing concepts which lead

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

to improved weapons and weapons with special characteristics, such as small weapons for tactical and defensive purposes and weapons largely free from radioactive fallout.

In the field of reactor development, increasing effort is being devoted to developing means for producing electric power economically from atomic reactors through a variety of technical approaches. The increasing participation of industry in the program is expected to speed the achievement of this objective. The Commission is also continuing the development of reactors for the propulsion of commercial ships. Supplementing these specific projects is the advanced development of reactor materials, fuel elements, fuel separation systems, and reactor safety, which are applicable to many reactor designs and applications. Expenditures for research and development plant in this area are mainly for engineering laboratories, facilities to house reactor experiments, and experimental civilian atomic power reactors.

Increasing emphasis is being given to the development of experimental devices to achieve a controlled thermonuclear reaction. Larger and more advanced devices are being fabricated at four Commission laboratories and additional laboratory facilities are being constructed, primarily at Princeton University.

The Commission is developing numerous types of reactors for military use, principally propulsion reactors for military aircraft, missiles, and naval combatant ships. In the naval program increased emphasis is being given to the development of a propulsion reactor suitable for use in a destroyer. Construction is going forward on several prototype propulsion reactors as well as necessary supporting facilities.

The Commission's program of research in the physical sciences seeks out fundamental scientific truths; moreover, it contributes important basic data for use in the solution of problems related to the development programs discussed above. A major portion of the effort is to develop a fundamental understanding of atomic structure and forces through the use of particle accelerators, including two in the multibillion-electron-volt range. Considerable effort is also placed on research on the physical, chemical, and metallurgical properties of materials used in the Commission's programs. Much of the information developed may be applied to fields other than atomic energy. Construction expenditures include those for four additional multibillion-electron-volt particle accelerators at Brookhaven National Laboratory, Upton, N. Y.; Cambridge, Mass.; Princeton, N. J.; and Argonne National Laboratory, Lemont, Ill.

The program of research in biology and medicine is primarily aimed at securing an understanding of the effects of radiation on living organisms, developing methods of minimizing such effects, and analyzing the long-term effects of radiation hazards. An increasing effort is being placed on the development of methods of using atomic energy in biological research and in the diagnosis and treatment of human diseases.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Expenditures for research and development in the Department of Health, Education, and Welfare are concentrated in the Public Health Service, principally in the medical research programs of the National Institutes of Health.

Increased expenditures are estimated for 1959 chiefly under the program of the Public Health Service to assist in the construction of health research facilities. This 3-year program, begun in 1957, authorized a total of \$90 million in matching grants to universities and other nonprofit institutions. The expenditures for this purpose have risen as the institutions receiving Federal assistance have actually undertaken construction of new facilities. Expenditures for the conduct of research projects under the Public Health Service will continue at a high level in 1959 reflecting the rapid expansion in recent years of medical research centered in programs of the National Institutes of Health.

Small increases are also forecast in expenditures for other research programs of the Department, including the Office of Education, the Food and Drug Administration, Office of Vocational Rehabilitation, and the Social Security Administration.

TABLE 9.—*Expenditures for the Department of Health, Education, and Welfare for research and development*

[In millions]

Function	1957 actual	1958 estimate	1959 estimate
210 Labor and welfare.....	\$143.6	\$198.2	\$217.3

The Public Health Service is responsible for the conduct and support of research to combat human diseases, chiefly through the research programs of the National Institutes of Health. The Institutes are organized on a category basis as illustrated in table 10 which summarizes the research activities of the Public Health Service.

TABLE 10.—*Expenditures of the Public Health Service for research and development*

[In millions]

Organizational unit and program	1957 actual	1958 estimate	1959 estimate
National Institutes of Health:			
Cancer.....	\$30.1	\$42.3	\$41.5
Mental Health.....	12.8	18.8	17.9
Heart.....	24.3	25.8	25.5
Dental Research.....	4.0	4.4	4.3
Arthritis and Metabolic Diseases.....	13.8	16.9	17.1
Allergy and Infectious Diseases.....	13.3	15.6	16.1
Neurological Diseases and Blindness.....	13.0	15.8	15.1
Grants for construction of medical and dental research facilities.....	3.4	21.0	40.0
General research and other.....	11.4	12.8	13.4
Bureau of State Services.....	10.3	13.8	14.3
Other, Public Health Service.....	2.2	3.0	3.3
Total, Public Health Service.....	138.6	190.2	208.5

Two-thirds of the expenditures of the Public Health Service are for grants to universities, hospitals and other research centers to support scientists in their study of the causes and cure of diseases and in basic research which is fundamental to further progress in medical science. The balance of the expenditures is made in laboratories of the Public Health Service, chiefly at the facilities of the National Institutes of Health in Bethesda, Maryland.

The Office of Education undertakes and sponsors research on educational problems of broad national importance. It conducts studies through its own staff and makes contracts for cooperative research with colleges and universities and with State departments of education. The increased expenditures in 1959 are chiefly devoted to

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

expansion of the cooperative research program which began in 1957. Under this program attention is being given particularly to projects related to educating the mentally retarded and gifted children, to recruiting and training teachers, to school building needs, as well as to other contemporary educational problems.

The Office of Vocational Rehabilitation administers a program of grants to States and to private and nonprofit agencies for research projects which show promise of contributing to the solution of vocational rehabilitation problems common to several or all the States.

Research is also conducted by the Food and Drug Administration in connection with its enforcement activities and by the Social Security Administration on the extent of public and private insurance and assistance programs and on the health and welfare needs of children.

DEPARTMENT OF AGRICULTURE

Research in the Department of Agriculture is centered chiefly in programs of the Agricultural Research Service through laboratories and stations operated directly by the Department, through grants to States and through contracts and cooperative projects, chiefly with State agricultural experiment stations. Research is also conducted by the Forest Service, Agricultural Marketing Service, the Foreign Agricultural Service, the Farmer Cooperative Service, and the library of the Department.

TABLE 11.—*Expenditures of the Department of Agriculture for research and development*

[In millions]			
Function	1957 actual	1958 estimate	1959 estimate
350 Agriculture and agricultural resources.....	\$88.2	\$99.3	\$110.8
400 Natural resources.....	8.7	10.1	10.7
Total, Department of Agriculture..	96.9	109.4	121.5

The increased expenditures for the Department for research in 1959 are principally for expansion of research on the utilization of farm products, under the Agricultural Research Service, which also conducts research on crop production, farm and land management, livestock, and home economics.

The Forest Service undertakes research in the field of forestry and wild land management to develop and improve forests, ranges, wildlife habitat and watershed management practices; to develop better measures for protecting forests from the ravages of fire, insects, and disease; to develop new and improved uses for forest products and to improve their marketing.

Research is conducted by the Agricultural Marketing Service on the distribution, storage, handling, transportation, and pricing of farm products. The Farmer Cooperative Service conducts studies relating to farmers' cooperatives engaged in the marketing of farm products, purchase of farm supplies and supplying farm business services. The departmental library makes available to the research workers of the Department data on previous research results in the field of agricultural research.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The research and development program of the National Advisory Committee for Aeronautics is directed at pro-

viding the scientific and engineering data necessary for continued improvement in the design and performance of manned aircraft, ballistic and other guided missiles, and their powerplants. The Committee is also conducting investigations concerned with space technology. Military problems, including specific problems in the development of particular military projects, are of special concern, and the Committee's program is closely coordinated with related programs of the Department of Defense.

TABLE 12.—*Expenditures of the National Advisory Committee for Aeronautics for research and development*

[In millions]			
Function and purpose	1957 actual	1958 estimate	1959 estimate
500 Commerce and housing:

Increase of research and development plant.....	20.8	28.6	31.1
Total, National Advisory Committee for Aeronautics.....	76.0	94.0	100.5

The increase in expenditures estimated for the conduct of research and development reflects planned augmentation of the Committee's research operations to meet the increasingly complex problems of flight over an ever-widening range of conditions, including the flight of manned and unmanned vehicles beyond the atmosphere. Supplemental funds are requested in 1958 to permit immediate initiation of this expanded effort, and the estimate for 1959 provides additional support for this purpose. Rising expenditures estimated for increase of research and development plant result from the \$35 million construction program already approved for 1958. Supplemental funds of \$7 million are being requested in 1958 to initiate certain important additional facilities and equipment; and new construction totaling \$26 million in new obligatory authority is proposed for 1959. Emphasis is currently being placed on facilities capable of providing data on the problems of hypersonic flight and on continuing modernization and improvement of existing research and supporting facilities.

NATIONAL SCIENCE FOUNDATION

Under its basic legislation, enacted in 1950, and Executive Order 10521, issued in 1954, the National Science Foundation is assuming increasing responsibility for the encouragement and support by the Federal Government of general-purpose basic research in this country. Grants are made to colleges, universities, and other research institutions for the conduct of fundamental investigation in the biological, medical, mathematical, physical, engineering, and social sciences.

TABLE 13.—*Expenditures of the National Science Foundation for research and development*

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

Increased funds are provided for this purpose by the 1959 budget to permit support of a substantially greater number of promising research proposals. The Foundation is also aiding the advancement of basic research by providing special facilities for scientific experimentation and investigation. Such facilities include radio and optical astronomy observatories, a solar research telescope, reactors and other devices for nuclear research, university computers, and support for laboratories and other facilities for biological research.

In addition to its direct support of research, the National Science Foundation is responsible for studying the Nation's research efforts and recommending to the President policies relating to the place of the Federal Government in the encouragement, support, and conduct of research and science education.

The Foundation has responsibility for supporting the United States program for the International Geophysical Year, being held in 1957-58. This worldwide program involves research by scientists of over 50 nations during the period indicated in order to obtain data which will advance the world's knowledge of the earth and its physical characteristics, including conditions above the atmosphere through the launching of earth-circling satellites. Funds for this program provide for establishing and maintaining observation stations and for procurement of scientific equipment—largely reflected in expenditures prior to 1959.

DEPARTMENT OF THE INTERIOR

The major research expenditures of the Department of the Interior are under the Bureau of Mines, the Geological Survey, and the Fish and Wildlife Service. Smaller amounts are expended for research in the utilization of saline water and for programs in the Bureau of Reclamation and the National Park Service.

TABLE 14.—*Expenditures of the Department of the Interior for research and development*

[In millions]

Function	1957 actual	1958 estimate	1959 estimate
400 Natural resources.....	\$39.4	\$44.9	\$48.8

The Bureau of Mines conducts research on technological and economic problems of the mineral industry and on improvements to promote safe and healthy working conditions in mines.

The Geological Survey conducts investigations of the availability and quality of surface and underground water resources and the nature and occurrence of minerals and mineral fuels.

In the Bureau of Reclamation, research is undertaken to develop improved design, construction, and operation of irrigation projects.

The research programs of the Fish and Wildlife Service are directed to the conservation of the Nation's animal life and thus to promote the maximum use and enjoyment of wildlife resources.

AIRWAYS MODERNIZATION BOARD

The Airways Modernization Board, established in 1957, is responsible for conducting research and development on

air traffic control systems and equipment. Work of this type formerly carried on by the Departments of Defense and Commerce is being transferred to the Board in 1958. New obligational authority of \$35 million is recommended in the budget for 1959 to strengthen research and development efforts in this area to meet future requirements of civil and military aviation.

TABLE 15.—*Expenditures of the Airways Modernization Board for research and development*

[In millions]

Function	1957 actual	1958 estimate	1959 estimate
500 Commerce and housing.....	-----	\$5.7	\$28.0

DEPARTMENT OF COMMERCE

The largest research and development program of the Department of Commerce is that of the National Bureau of Standards. Research and development is also conducted by the Maritime Administration, the Civil Aeronautics Administration, the Weather Bureau, and to a lesser extent by the Census Bureau, the Office of Business Economics, the Patent Office, and the Coast and Geodetic Survey.

TABLE 16.—*Expenditures of the Department of Commerce for research and development*

[In millions]

Function	1957 actual	1958 estimate	1959 estimate

600 General government.....	2.3	2.5	2.6
Total, Department of Commerce..	17.8	18.4	24.4

Expenditures for the directly financed activities of the National Bureau of Standards will rise in 1959, reflecting an expansion of the Bureau's research programs which are aimed at improving the national standards of physical measurement to keep pace with scientific and technological advances.

The Maritime Administration is conducting research on the improvement of marine engines and on ship design, cargo handling, materials and equipment, and nuclear propulsion.

Expenditures under the Civil Aeronautics Administration reflect research primarily on improvement of navigational aids and of air traffic control aids and equipment now in service use.

The Weather Bureau conducts a program of meteorological research with special emphasis on investigation of severe storms, such as hurricanes and tornadoes, and on the development of weather forecasting through use of high-speed electronic computers.

OTHER AGENCIES

Research is also conducted by a number of other agencies in furtherance of their assigned responsibilities. These include the Civil Service Commission, the Federal Civil Defense Administration, the Federal Communications Commission, the General Services Administration, the Housing and Home Finance Agency, the Post Office

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

Department, the State Department, the Tennessee Valley Authority, the Treasury Department, the United States Information Agency, and the Veterans Administration. The General Services Administration research is almost entirely contract research, financed from funds available to the President under the Defense Production Act, and is directed toward increasing the supply of strategic and critical raw materials.

¹ Not separately identified in special analysis D.

FEDERAL ACTIVITIES CONTRIBUTING TO TRAINING IN THE SCIENCES

The foregoing analysis deals with expenditures of the Federal Government for the support of research and development and for the acquisition and improvement of scientific equipment and facilities. Equally important, however, to the progress of research is the education of future scientists and engineers and the further training of those already engaged in teaching and research careers in the sciences and mathematics.

Many of the research and development activities reported in this special analysis, as an important byproduct, assist in the education of scientists and engineers. In addition, the Federal Government contributes directly to

the education of new scientists and engineers through fellowships, traineeships, training grants, and other programs directed toward the improvement of science teaching and the encouragement of young people in scientific careers. In the following paragraphs there are described a number of programs primarily directed toward increasing the long-term supply of scientists and engineers and to improving the effectiveness of those already teaching or undertaking research in science and mathematics in positions outside the Federal establishment. Thus there is excluded a number of in-service training programs by Federal agencies, which also make a substantial contribution to improving the scientific position of the Nation as a whole. While not a complete cataloging, this description indicates the range of extramural programs in which the Federal agencies are engaged and gives some data on the relative size of such programs.

Special note should be taken of the expansion of programs for education in the sciences of the National Science Foundation and the related new programs of the Department of Health, Education, and Welfare to improve science teaching. The Foundation programs, totalling \$79 million in new obligational authority, are designed to interest more young people in science careers, to improve the curricula and methods of teaching science and mathematics, to supplement the training of teachers in these fields at the high school and university levels, and to provide greater opportunity for postgraduate and other advanced study in the sciences. The assistance under these programs will be primarily through grants to universities or through fellowships to individuals. The legislative proposals for the Department of Health, Education, and Welfare, which provide for both general education and science programs, include \$110 million in new obligational authority to inaugurate a 4-year program of grants to States to strengthen State departments of education and local school systems particularly in the teaching of science and mathematics. Some of the other proposed activities to be undertaken by this Department, although concerned largely with general education, would also aid science education; for example, a substantial number of the 10,000 general college scholarships would be awarded to science students.

RESEARCH ASSISTANTSHIPS

In the process of carrying out much of their Government-financed research under grants and contracts, educational institutions employ research assistants to perform junior level research work on Government projects while they are engaged in completing undergraduate, graduate, or postgraduate training. Such employment contributes to the technical training of the student, and, through the income it provides, indirectly assists him in completing his education.

It is estimated that under research and development contracts of the Department of Defense from 10,000 to 15,000 research assistants are given employment each year, while other agencies would account for employment of more than 12,000 by 1959.

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

FELLOWSHIPS

The National Science Foundation and the Public Health Service of the Department of Health, Education, and Welfare award fellowships to individuals for the purpose of promoting graduate education and improving teaching in the sciences. These fellowships are available primarily in the physical and life sciences and are not restricted to specific fields or subdisciplines of study.

The Department of State, through the International Education Exchange Service, also assists in science education through fellowships available in all fields. It is estimated that in 1959 the Department will award upwards of 3,000 fellowships to improve teaching, research, and graduate training in the natural and social sciences fields and to promote the sharing of ideas with other nations of the free world. They are awarded both to Americans going abroad and to foreign students coming to this country.

The Public Health Service offers fellowships chiefly for predoctoral and postdoctoral study in the life sciences. In 1959 about 1,000 fellowships will be awarded by the Service as a means of increasing the number of scientists qualified to carry on research in medical and related fields.

The National Science Foundation will award in 1959 over 1,500 fellowships for predoctoral and postdoctoral study in the sciences, generally with emphasis on training in the natural sciences. In 1959, the Foundation will inaugurate a program to provide fellowships for summer study in the sciences to an estimated 4,000 high school teachers and college teaching assistants.

For purposes of this analysis fellowships in more specific areas of science are discussed below under the following category "Specialized fellowships and traineeships."

SPECIALIZED FELLOWSHIPS AND TRAINEESHIPS

Specialized fellowships and traineeships are awarded by the Federal Government primarily for the purpose of providing advanced education and training opportunities in specific fields for individuals who have completed their basic professional education.

The Department of Health, Education, and Welfare, the National Science Foundation, and the Atomic Energy Commission have the largest and most significant programs in this area.

It is estimated that the Department of Health, Education, and Welfare will award 2,000 specialized fellowships and traineeships for graduate study primarily in medical specialties during 1959.

The Foundation will begin a program to increase the supply of high school science teachers through the award of 800 traineeships in 1959 to train persons several years out of high school who demonstrate an aptitude for science teaching.

The Atomic Energy Commission supports graduate students in such fields as reactor technology, radiological physics, and industrial health and medicine. In 1959 the Commission will award nearly 350 specialized fellowships and traineeships in these fields.

TRAINING GRANTS

Training grants are ordinarily awarded for the purpose of establishing, expanding, improving, or continuing programs of training in the sciences. As distinguished from

fellowships and traineeships—awarded directly to individuals—training grants are made to institutions and serve to strengthen the capacity of the recipient institutions of higher education to perform their research and training functions.

The largest program is that of the Public Health Service, National Institutes of Health in the Department of Health, Education, and Welfare, which will offer in 1959 training grants totaling \$35 million to assist undergraduate and graduate training in medical and related fields. The grants may generally be used either for the establishment or strengthening of programs or for the payment of stipends to trainees selected by the recipient institutions.

Also in the Department of Health, Education, and Welfare, the Office of Vocational Rehabilitation will make grants totaling \$5 million in 1959 to schools, universities, and other agencies to pay part of the cost of training projects in fields concerned with rehabilitation.

The Atomic Energy Commission operates several training grant programs for which an estimated \$3 million will be allocated in 1959. The Commission makes grants to assist nonprofit educational institutions acquire teaching aids, demonstration apparatus, and laboratory equipment including educational reactors. Specialized equipment and limited operational assistance are offered to medical schools to encourage training in the use of radioisotopes. A similar program is directed to colleges and universities for the instruction of students in the biological and agricultural sciences. In addition, equipment and operational assistance is granted to schools of public health for radiation safety training.

The National Science Foundation in 1959 will inaugurate a program of training grants to universities to strengthen graduate instruction in the sciences. Under this program grants aggregating \$5 million will be made during 1959, including stipends for fellows selected jointly by the participating institutions and the Foundation.

OTHER AIDS TO SCIENCE TEACHING

Closely related to training grants with respect to providing a variety of aids for science teaching are several programs, chiefly those of the Department of Health, Education, and Welfare under proposed legislation and those of the National Science Foundation under its greatly increased budget for 1959 to support education in the sciences.

The largest single program of the Foundation in this area is the support of training institutes to alleviate the shortage of both high school and college science teachers, and to augment the training of present science teachers. In 1959 the Foundation will allocate over \$35 million for grants to universities to permit them to sponsor summer, academic year, and other specialized institutes for school and college mathematics and science teachers including provision for stipends to be paid to the participants. Over 32,000 teachers will be assisted under the various institute programs.

The Foundation also sponsors a number of other activities designed to interest able students in undertaking careers in science and science teaching, including support for visiting scientists who lecture in the high school classroom; for student participation in science fairs and exhibits; and for the development of career guidance materials. Finally, the Foundation supports several activities di-

SPECIAL ANALYSIS H—Continued

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS—Continued

rected to the improvement of high school and college science curriculums. For these and other specialized projects in science education the Foundation will spend more than \$20 million in 1959.

The Department of Health, Education, and Welfare will inaugurate in 1959, under a proposed legislative program, grants to States, totaling \$110 million, to strengthen State departments of education and local school systems in the teaching of science and mathematics. Together with matching funds from the States, these grants may be used for such purposes as the purchase of instructional material, the refurbishing and equipping of laboratories, and the compensation of science teachers.

OTHER PROGRAMS

A number of agencies undertake cooperative educational programs to contribute to training in the sciences and to

encourage recruitment and retention of scientific and engineering personnel. Such programs may operate through formal agreements whereby a Government agency, an educational institution, and a student cooperate in planning a program in study and complementary employment, or with informal cooperation between agency, school, and student. Related to these cooperative educational programs is the extensive summer employment of qualified students in fields of mutual interest to the agency and to the student.

Finally there are a number of Federal activities which, while not directed toward increasing the supply of scientists and engineers, nevertheless materially assist to this end. These include such programs as the training of veterans, the Reserve Officer Training Corps, the in-service training of Government civilian and military personnel, and medical and dental internships and residencies at Government hospitals.

SPECIAL ANALYSIS I

PRINCIPAL FEDERAL STATISTICAL PROGRAMS

This analysis presents a summary of the principal statistical programs of the Federal Government, showing the amounts provided for these programs in 1957 and 1958 and the amounts recommended for 1959. For current programs, 1959 budget recommendations provide a total of \$34.9 million—an increase of \$2 million over the amount available in 1958. In addition, \$14.8 million is recommended for periodic census programs in 1959.

The recommendations for 1959 constitute a significant step toward implementation of an integrated program to supply improved statistical measures of the functioning, welfare and progress of our national economy. Specific needs for more accurate, comprehensive, and timely information have been emphasized in recent appraisals and reports by the Joint Economic Committee of the Congress, the Council of Economic Advisers, the National Bureau of Economic Research, and other groups representing business, labor, and research organizations.

The 1959 recommendations for statistical programs are designed to remedy some of the most important weaknesses which have been pointed out in these recent appraisals of the adequacy of existing economic statistics for the purposes they are intended to serve. They include a number of interrelated proposals, integrated within the framework of the national income and product accounts, for strengthening statistical series in areas where improvement is needed and where immediate changes are feasible.

The development of a better balanced, more adequate statistical program for the Government as a whole cannot be achieved in one year. Other improvements will be considered in future years.

CURRENT PROGRAMS

The principal current statistical programs are summarized here by broad subject areas to indicate the interrelationships of programs carried out by different agencies and to aid in evaluating the Government's overall statistical system. The agencies whose programs are included in this summary, in whole or in part, are shown in the table at the end of this analysis. Not all the Government's statistical activities are included in this summary: many other agencies contribute to the statistical system. In the course of their administrative operations such agencies as the Social Security Administration, Bureau of Employment Security, Bureau of Mines, Housing and Home Finance Agency, and Interstate Commerce Commission, for example, also collect certain statistical information widely used by the Government and the public.

As shown in this summary, obligations for principal current statistics increased from 1957 to 1958 by \$3.1 million. Nearly half of this increase, however, was for the mandatory items in the 1958 budget—primarily direct agency contributions to the civil service retirement fund—and another large part was to provide for full-year costs of programs initiated in 1957. The only program increases made in 1958 were for preliminary tabulations by the Internal Revenue Service of key items in the income tax returns (under "National income and business financial accounts") and specialized projects in the Department of Agriculture (under "Production and distribution statistics").

Direct obligations for principal current statistical programs, by broad subject areas

(In millions)

Program	1957 actual	1958 estimate	1959 estimate
Labor statistics (Departments of Labor, Commerce, and Agriculture).....	\$7.0	\$7.2	\$7.4
Demographic statistics (Department of Health, Education, and Welfare and Departments of Commerce and Agriculture).....	3.6	4.4	4.5
Prices and price indexes (Departments of Labor and Agriculture).....	3.1	3.2	3.3
Production and distribution statistics (Departments of Agriculture and Commerce).....	11.6	12.7	13.3
Construction and housing statistics (Departments of Commerce and Labor).....	.7	.7	1.2
National income and business financial accounts (Departments of Commerce, Treasury, and Agriculture, Federal Trade Commission, Securities and Exchange Commission, and Small Business Administration).....	3.8	4.6	5.2
Total, principal current programs....	29.8	32.9	34.9

For 1959, increases totaling more than \$1.8 million are recommended for the integrated program for the improvement of economic statistics, referred to above. These increases are offset in part by reductions of about \$400,000 resulting from greater efficiency in operations, nonrecurring items, and minor program changes. The separate proposals included in the program for improving economic statistics are described below in the discussion of each of the broad subject areas included in the tabulation. Other increases recommended for 1959 include an additional amount of about \$135,000 for the national health survey program (under "Demographic statistics") and a total of nearly \$400,000 for statistical programs included in the governmentwide defense readiness program (almost \$80,000 under "Labor statistics" and \$300,000 under "Production and distribution statistics").

Labor statistics.—This area includes the statistics compiled by the Bureau of Labor Statistics on employment and wages, by industry; labor turnover; industrial hazards; foreign labor conditions; and productivity. It also includes statistical work by the Bureau of the Census on the number and characteristics of persons in the labor force, including employment or unemployment status; and by the Agricultural Marketing Service on farm labor.

Increases are recommended in this area in 1959 to provide for two projects in the Bureau of Labor Statistics that are part of the integrated statistical improvement program. Both of these projects are designed to strengthen estimates and analysis of changes in labor productivity: (1) an increase of \$100,000 for employment series to provide for estimates of "hours worked" as well as "hours paid for" and inclusion of hours of "workers other than production workers" for manufacturing industries, and for collection of hours data for additional nonmanufacturing industries; and (2) an increase of \$85,000 to provide for computation of productivity indexes for individual industries.

Demographic statistics.—The principal programs in this area are located in the Department of Health, Education, and Welfare: research and statistical activities of the Office of Education; compilation of the national statistics of births, deaths, marriages, and divorces by the National Office of Vital Statistics in the Public Health Service;

SPECIAL ANALYSIS I—Continued

PRINCIPAL FEDERAL STATISTICAL PROGRAMS—Continued

and the national health survey conducted by the Public Health Service. Other programs included in this area are population estimates and projections made by the Bureau of the Census, and studies of the farm population by the Agricultural Marketing Service.

For 1959 an increase of about \$135,000 is recommended for the national health survey program. Funds for this program were first provided in 1957, and full-scale operation of the survey began in 1958. The increase recommended meets the needs for full-year operation of the program at the level planned. Recommendations for 1959 also include \$14,000 for the Office of Education to permit full-year operation of the expanded statistical program at the level authorized for 1958. In addition to the amount included for statistical services in the regular appropriation request for the Office of Education, new legislative proposals for 1959 call for increased funds, not shown in this analysis, for grants to the States for improvement of educational statistics.

Prices and price indexes.—Included in this area are the programs of the Bureau of Labor Statistics dealing with wholesale and consumer prices and price indexes; and of the Agricultural Marketing Service on prices received and paid by farmers and on factors affecting prices, supply and consumption of agricultural products.

An increase of \$100,000 is recommended in 1959 for price statistics in the Bureau of Labor Statistics to provide additional price information needed for improving the national economic accounts. The expanded price program is also designed to provide improved price deflators for use in measuring changes in productivity and inventories. The expansion proposed includes collection of wholesale prices for selected business services and additional types of fabricated durable goods and goods in process of manufacture. It also includes collection of retail prices for additional types and qualities of consumer goods and services, making the present program more representative of all retail prices in addition to those now measured for certain income groups in the Consumer Price Index.

Production and distribution statistics.—Statistics on production and distribution, the largest area included in this summary, include data on agricultural and industrial production and distribution. Included here are the current programs of the Bureau of the Census on retail, wholesale and service trades; manufacturing; agriculture; and foreign trade and shipping. Also included are the Agricultural Marketing Service programs on crop and livestock estimates, and the Agricultural Research Service program on the economics of farm production.

Increases totaling about \$375,000 are recommended in 1959 for Census Bureau programs in this area as part of the integrated program to improve basic current statistics on the operation of the economy and to contribute to strengthening our national economic accounts. These increases are (1) about \$100,000 for preparation of monthly estimates of retail and wholesale inventories for a limited number of selected commodities; (2) about \$100,000 for collection of monthly data on receipts of selected service trades, needed for the national income and product accounts and for the flow-of-funds accounts; (3) about \$100,000 for collection of monthly information on accounts receivable from retail trade establishments, to improve present estimates of consumer credit outstanding; and (4) about \$75,000 to revise and enlarge the reporting

sample for the Monthly Industry Survey, in order to provide more adequate current data on manufacturers' sales, inventories, and new orders.

The 1959 estimate also includes \$300,000 for the Census Bureau to obtain industrial data for use in bomb-damage assessment, as part of the governmentwide defense readiness program. Increased costs in the Bureau of the Census for the program recommended in 1959 are offset in part by savings resulting from the use of more efficient tabulating equipment.

Construction and housing statistics.—This area includes the estimates of construction activity prepared jointly by the Business and Defense Services Administration (private nonresidential construction) and the Bureau of Labor Statistics (private residential and public construction). It also includes the housing starts series compiled by the Bureau of Labor Statistics and current data on housing vacancies compiled by the Bureau of the Census.

The need for expansion and improvement of the estimates of construction activity has been emphasized repeatedly in recent years. The 1959 budget recommends, as part of the basic statistical improvement program, an increase of \$500,000 to the Bureau of the Census for a survey program in this area. The program is designed to provide for the collection of data needed to correct some of the greatest deficiencies in present estimates of (1) the amount of new construction of certain types, such as farm, private nonresidential, State and local construction; and (2) expenditures on repair and alteration for different types of existing properties.

National income and business financial accounts.—The statistical programs included here are concerned primarily with analysis of the national economy. The area includes all the work of the Office of Business Economics—preparing estimates of national income and product, measuring and analyzing business trends, and computing the balance of international payments. It also includes the work of the Internal Revenue Service in tabulating statistics from personal and corporate income tax returns; estimates of farm income by the Agricultural Marketing Service; statistics on the financial and other operations of State and local governments compiled by the Bureau of the Census; the quarterly financial report program, presenting income and balance sheet data for manufacturing corporations, conducted jointly by the Federal Trade Commission and the Securities and Exchange Commission; and other economic statistical series compiled by the Securities and Exchange Commission.

A number of increases are recommended in this area for 1959 as part of the integrated program for improving basic economic data.

In the Office of Business Economics, about \$200,000 is recommended for four projects designed specifically to improve the national income and product accounts: (1) to establish a separate research staff to conduct a continuing investigation of means of improving the national income and product estimates and concepts, and to explore the interrelationships among the several types of national economic accounts; (2) to prepare quarterly estimates of gross national product and its major components in constant prices, so that the real movement of key components of this overall indicator of economic activity may be made available as promptly as possible; (3) to begin work on preparation of net output measures for as many major industry groups as possible and for selected manufacturing

SPECIAL ANALYSIS I—Continued

PRINCIPAL FEDERAL STATISTICAL PROGRAMS—Continued

industries; and (4) to begin an accounting of interindustry flows for calendar year 1958 for major industries shown in the national income and product accounts.

Also in the Office of Business Economics, \$50,000 is recommended, for the first year of a 2-year program, to provide for a comprehensive survey of United States direct private investments abroad, showing the particular countries and industries which have attracted American capital, and the amounts involved. This information is needed for the balance of payments accounts and for better appraisal of our contribution to and our position in the world economy. Another increase of about \$30,000 is recommended for work of the Office of Business Economics on the current analysis of business trends, primarily for resuming publication of quarterly statistics on business births and deaths.

In the Bureau of the Census, an increase of about \$100,000 is recommended for quarterly surveys of State and local government finances, including revenues, capital outlays and current expenditures, indebtedness, and financial assets.

An increase of \$300,000 is recommended in the 1959 budget for the Small Business Administration to provide for the collection of current information on the financial position of both small and large corporations in trade and mining industries.

The total of the increases recommended in this area is offset in part by a reduction of about \$166,000 in the amount available in 1959 to the Internal Revenue Service for statistical programs. The effects of this reduction will be to decrease the industry detail in the tax return tabulations for corporations and to postpone studies of the treatment of depreciation in corporate tax returns.

PERIODIC CENSUS PROGRAMS

The periodic census programs conducted by the Bureau of the Census supply the base for many of the Government's statistical series and are an indispensable part of the Government's statistical system. In this analysis, they are considered separately from the current programs described above because the wide annual fluctuations in their costs prevent meaningful comparisons from year to year of total outlays for statistical programs.

The economic censuses—those of business, manufactures, and mineral industries—are taken at 5-year intervals, and will next be taken in fiscal year 1959 covering operations in calendar year 1958. The amount of \$7.3 million recommended for these censuses in 1959 provides for most of the collection costs, including printing and mailing of the census schedules. Information on the number, size, geographic distribution, volume of operations, and other characteristics of the Nation's business and industrial enterprises is an essential element in the integrated program for the Government's economic statistics.

For the eighteenth decennial census, including the censuses of population, housing and agriculture, preparatory work was initiated in 1958 and will be accelerated in 1959. The \$7 million recommended for these censuses in 1959 provides for final determination of questions to be asked and procedures to be employed, preparation of enumerator maps, and field testing of procedures and schedules. It also includes about \$2.1 million for completion of the purchase of the major components of electronic equipment needed for the rapid and economical processing of census results.

For the 1957 census of governments, an appropriation of \$1,750,000 was made in 1957. About \$1,650,000 of this amount was obligated in 1957 and 1958, leaving about \$100,000 for 1959. An additional appropriation of nearly \$400,000 is recommended for 1959 to complete those phases of the census not fully provided for in the initial appropriation and to provide for final tabulation and publication of the results.

Direct obligations for principal statistical programs, by agency

NOTE.—Category 058 above contains two subentries. The "Military assistance" portion of this category is comparable to the subfunction of this title in the 1958 budget. The "Defense support" portion represents a reclassification of certain appropriations, previously included under "Other mutual security programs" in category 152.

Category 215 has been retitled "Promotion of science, research, libraries, and museums" in recognition of increased amounts included for scientific activities.

Educational activities of the National Science Foundation, previously included in category 215, have been reclassified to category 214.

HOW TO USE

Bend the pages of the book nearly double and hold them that way with your right hand as shown.

Locate the listing you want in the Edge Index.

Match up the 1-, 2-, or 3-line symbol next to the listing you have selected with the corresponding symbol on the page edge and **OPEN THERE.**

The listings in the left hand column of the Edge Index will be identified by the dot symbols in the first or left hand row. The listings in the right hand column by the dot symbols in the right hand row.
